Corrective Action Compliance does not represent a full routine health inspection. Instead, it reflects that a facility has taken specific corrective actions in response to violations identified during an inspection. These actions may be taken during the inspection or afterward, and the Corrective Action Compliance allows for the facility's grade or status to be updated based on those corrections. Corrective actions may be demonstrated through documentation such as photos, videos, receipts, work orders, site visits, or both verifiable means showing that the violation has been addressed and compliance has been achieved.				
APPROVED				
An "Approved" grade indicates that a food establishment that has demonstrated compliance with the standards in the Food Code the Food Service and Retail Ordinance, other industry standards, and other laws and has received a Grade of Approved and is able to operate.				
CONDITIONAL APPROVED				
A "Conditional Approved" grade is issued when a facility is found to have violations of the Food Code, the Food Service and Ret Ordinance, industry standards, or				

applicable laws. While the facility may continue operating, it must complete specific corrective actions to address the violation A yellow sticker is placed alongside the green "Approved" sticker.

UNSATISFACTORY

An "Unsatisfactory" grade indicates that a facility has not met the required standards but is allowed to continue operating temporarily while corrective actions are completed. A red "Unsatisfactory" sticker will be displayed at the facility for the duration of this grade. This is a temporary status and requires timely follow-up to verify compliance.

CLOSED

A "Closed" grade is assigned when violations pose a significant risk to public health, requiring the facility to immediately cease operations. The facility must remain closed until corrective actions have been completed and verified. A facility with this grade will display an orange "Closed" sticker for the duration of the closure.

ABQ BILINGUAL CHARTER - 7500 LA MORADA NW - Approved

ABQ BILINGUAL CHARTER - 7500 LA MORADA NW

Food Establishment Class C

Date: 09/04/2026 - #: RT-FOODEST-010721-2025 - Inspection Result: Approved

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps. Location: light covers on the ceiling in the kitchen area Pest Type: cockroach

Pest Condition: dead

multiple cockroaches visibly seen in light covers in the kitchen area

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: kitchen and cafeteria sitting area Type of Equipment: reach in coolers and reach in freezers

Condition of the equipment: gaskets on doors is creating ice buildup and not making a tight seal on reach in cooler and reach in freezer.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed hand washing sink water faucet handles is not maintained in good repair or is not repaired by law. Observed handwashing sink leaking from the hot and cold-water handles

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap below the three-compartment sink.

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.

Observed a soiled mop not in use, stored directly on the floor.

ADVANCED FRESH CONCEPTS FRANCHISE CORPORATION - 11825 LOMAS BLVD NE - Approved

ADVANCED FRESH CONCEPTS FRANCHISE CORPORATION - 11825 LOMAS BLVD NE

Retail Food Establishment Class 6

Date: 09/03/2026 - #: RT-RET-021881-2025 - Inspection Result: Approved

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively Working with open food items Inappropriate Jewelry

Observed: Wrist watch

ALBERTSONS #928 - 11825 LOMAS BLVD NE - Approved

ALBERTSONS #928 - 11825 LOMAS BLVD NE

Retail Food Establishment Class 5

Date: 09/03/2026 - #: COM-RET-084425-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Large food service bin with flour Location: Deli prep area

Violation: Storage

• In-Use Utensils, Between-Use Storage

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.

Observed cleaned utensils stored improperly. Utensils were not stored in a clean, dry location. Utensil Type: Knives Location: Stored between wall and three compartment sink

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service containers Manner: Not air dried and stacked wet with moisture stuck between pans

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did provide lockers or other suitable facilities for storage of employees clothing or other personal belongings but lockers were not utilized

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Handwashing sink in deli area

Violation: Poisonous and Toxic/Chemical Substances

• Separation-Storage

- The storage of poisonous or toxic materials directly above or adjacent to food could result in contamination of the food from spillage. Poisonous or toxic materials must be stored so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by separating the poisonous or toxic materials by spacing or partitioning; and storing them in an area that is not above food, equipment, utensils, linens, and single-service or single-use articles. Instructed PIC to move chemicals to an approved location.

Observed poisonous or toxic materials stored in a manner that has the potential to contaminate single-service and single-use articles. Poisonous/Toxic Substance: Sanitizer Location: Stored on shelf directly above single use articles

ANODYNE - 409 CENTRAL AVE NW - Approved

ANODYNE - 409 CENTRAL AVE NW

Food Establishment Class B

Date: 09/03/2026 - #: CAC-Food-084622-2026 - Inspection Result: Approved

resolved by having all hoses and pipes 1 inch above floor drain pictures in file added 6 points back to total score now is in approved status

resolved half of violation lines no longer inside ice bins but ice bins still not covered

Things that were not resolved food handlers' cards, Certified food protection manager certificate, cleaning inside walk in cooler walls free of debris and cover ice bins

facility did resolve enough point to remove yellow sticker

also resolved cleaning of shelves inside reach in cooler free of black debris

ANODYNE - 409 CENTRAL AVE NW

Food Establishment Class B

Date: 09/02/2026 - #: PT0044783 - Inspection Result: Conditional Approved

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: bar area Type of Equipment: ice bins Condition of the equipment: no lids to prevent contamination

into ice from occurring

Violation: Plumbing

- **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at under ice bin where pipes from another ice bin and three compartment sink.

Violation: Training Records

- **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file. Observed that the food establishment does not have a certified food protection manager on staff.

- **Food Handler Cards**

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Food Separation

- **Food Contact with Equipment, Utensils, and Linens**

- Pathogens can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. They may also be passed on by consumers or employees directly, or indirectly from used tableware or food containers. Food must only contact surfaces of equipment and utensils that have been properly cleaned and sanitized, single-service articles, or linens that have been properly laundered. Instructed PIC that the food in contact with the unapproved source must not be used in the operation of the food establishment unless it can be made wholesome through cleaning or cooking.

Observed food contacting an unapproved surface. Location: Bar area Food Item: ice inside ice bin Surface: coke distribution lines sitting inside ice bin instructed pic to dump ice from ice bin and clean and sanitize ice bin and not store coke lines inside ice bin.

Apna Bazaar - 7200 MONTGOMERY BLVD NE, F3 - Closure Re-Inspection Required

Apna Bazaar - 7200 MONTGOMERY BLVD NE, F3

Retail Food Establishment Class 4

Date: 09/03/2026 - #: COM-RET-084343-2026 - Inspection Result: Closure Re-Inspection Required

Violation: Result of a Complaint

- **Complaint**

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Health Hazard

- **Imminent Health Hazard**

- Rodent infestation

Violation: Training Records

- **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Surface Condition

- **Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent**

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is nonabsorbent.

Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.

Observed nonfood contact surface that was absorbent. The surface was located inside cold holding units and walk in freezer. The surface was made out of cardboard and paper towels The condition of the surface was dirty and absorbent.

Observed nonfood contact surface that was not smooth. The surface was located inside cold holding units and walk in freezer The surface was made out of cardboard and paper towels the condition of the surface was dirty and not easily cleanable

Violation: Functionality and Accuracy

- **Temperature Measuring Devices, Ambient Air and Water-Accuracy**

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature

measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures. Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Cold holding units Thermometer Location: None available

Violation: Maintenance

• Maintaining Premises, Unnecessary Items and Litter

- The presence of unnecessary articles, including equipment, which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.

Observed items on the premises of the food establishment that is no longer used or is non-functional. Location: Inside meat preparation, display area, outside hallway Items list: shelving damaged food items, crates, metal beams, car transmissions, cardboard boxes, Condition of the items: dirty unorganized and cluttered

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to discard food items as unsure and unaware of how long food items have been stored in temperature danger zone.

Observed food items in cold holding unit measuring above 41°F. Location: Cold holding display units Food Items and Temperature: Yogurt 60 °F, Sliced cheese 59 °F, sliced cheese 60 °F, Yogurt 57 °F, Yogurt 58 °F, Management stated Indian type Spinaches 59 °F, 60 °F, Cilantro 59 °F, Cauliflower 55 °F, peeled garlic 72 °F.

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: Produce area and dairy cooler Condition: Cold holding units unable to cold hold at 41 °F or below.

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

Observed food temperature measuring devices were not provided or readily accessible.

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located in display area, walk in refrigerator, meat display, shelving in display area The surface was made out of stainless steel, metal shelving, The condition of the surface was substantial debris buildup

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Raw meats, dairy products, vegetables Activity of the Food: Stored and received

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges. Back door in hallway of facility

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed.

Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place. Location: Food display areas, restroom, meat preparation area, back hallway behind facility Pest Type: mice, cockroach, flies.

• **Removing Dead or Trapped Birds, Insects, Rodents and other Pest**

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate.

Location: Under frying area PIC stated where employees prepare their food in display area Pest Type: Mice, cockroaches, flies

Pest Condition: Mice dead, cockroaches dead, flies alive substantial amount in meat preparation area. Number of Pests Present: Multiple flies, multiple cockroaches, one dead mice

Violation: Storage

• **Food Storage-Preventing Contamination from the Premises**

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.

Observed food stored improperly less than six (6) inches off the floor. Location: Walk in freezer Food Item: Raw meats

Violation: Operations

• **Valid Permit**

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment.

Observed that the facility is operating without a permit.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Commercial meat cutting machine and blades meat cutting boards

Location: Meat preparation area Condition of the Location: Substantial meat debris buildup, flies

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: None available. PIC stated they had an appointment this morning a customer came in to purchase meat this morning at 9am although management showed up around 10:30 am to open store.

Violation: Designated Areas

• **Designation-Dressing Areas and Lockers**

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings. Employee shoes and other belongings stored inside meat cutting area.

Violation: Operation and Maintenance

• **Hand Drying Provision**

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Hand washing sink in meat preparation area.

• **Using a Handwashing Sink-Operation and Maintenance**

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

Observed handwashing sink(s) was observed blocked or inaccessible. Location: Meat preparation area Manner: Creates stored in front of hand-washing sink preventing access to hand washing sink

Violation: Toilet Facilities

• **Toilet Room Receptacle, Covered**

- Instructed to provide a covered receptacle for sanitary napkins.
Observed in a toilet room used by females, no covered receptacle.

• **Toilet Rooms, Enclosed**

- Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.
Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

Violation: Corrective Actions

• **Infestation Corrective Actions: Profession Pest Control**

- Food Establishments shall hire a professional pest control applicator licensed through the New Mexico Department of Agriculture to treat any Infestation. Instructed PIC to hire a pest control company to treat the active infestation and to provide their pest control records to EHD prior to requesting reinspection.

• **Infestation Corrective Actions: Clean Up After Rodents**

- Food Establishments shall remove rodent droppings in accordance with current Centers for Disease Control and Prevention recommendations published on the Enforcement Authority's website. Instructed PIC that the following steps must be taken when cleaning rodent droppings: <https://www.cdc.gov/healthypets/pets/wildlife/clean-up.html> Clean up rodent urine and droppings Step 1: Put on rubber or plastic gloves. Step 2: Spray urine and droppings with bleach solution or an EPA-registered disinfectant until very wet. Let it soak for 5 minutes or according to instructions on the disinfectant label. Step 3: Use paper towels to wipe up the urine or droppings and cleaning product. Step 4: Throw the paper towels in a covered garbage can that is regularly emptied. Step 5: Mop or sponge the area with a disinfectant. Clean all hard surfaces including floors, countertops, cabinets, and drawers. Follow instructions below to clean and disinfect other types of surfaces. Step 6: Wash gloved hands with soap and water or a disinfectant before removing gloves. Step 7: Wash hands with soap and warm water after removing gloves or use a waterless alcohol-based hand rub when soap is not available and hands are not visibly soiled. Observed rodent droppings. Location: In display areas, underneath cold holding units, in gap between walk in freezer and wall, in restroom, in outside hallway of facility Manner: Substantial rodent droppings

BEE HIVE HOMES OF VOLCANO CLIFFS - 6230 MONTANO NW - Approved

BEE HIVE HOMES OF VOLCANO CLIFFS - 6230 MONTANO NW

Food Establishment Class C

Date: 08/31/2026 - #: PT0154247 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of cooking equipment and pans shall be cleaned at a frequency to prevent the buildup of soil residues and encrusted grease deposits. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine. Location: what was the location of the violation
Condition of the Location: Interior front and sides with soil buildup.

Violation: Plumbing

• **System Maintained in Good Repair**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed 3 compartment sink stopper and drain is not maintained in good repair or is not repaired by law. observed sink drain stopper and tubing leaking at the time of inspection

Violation: Ventilation and Hood Systems

• **Ventilation Hood Systems, Filters**

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface. Location: Kitchen stove exhaust vents with substantial debris and grease buildup.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on refrigerators and freezers and drain under the sinks. And to clean and sanitize areas noted.
Observed buildup and debris on the Floors behind the refrigerators and freezers and drain under the sinks.

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located Refrigerator units. The surface was made out of Stainless steel. The condition of the surface was Interior with debris and soil buildup. Cabinets interior drawers and shelving with debris and soil buildup.

Chili's Grill & Bar - 10021 COORS BLVD NW - Approved

Chili's Grill & Bar - 10021 COORS BLVD NW

Food Establishment Class C

Date: 08/31/2026 - #: RT-FOODEST-115355-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of cooking equipment and pans shall be cleaned at a frequency to prevent the buildup of soil residues and encrusted grease deposits. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: ice machine. Location: Food prep areas.

Condition of the Location: soil buildup interior ceiling.

Violation: Hot Holding & Reheating

• Reheating for Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165 F and to maintain temperature at 135 F and above.

Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Chicken tenders

Food Temperature: 125°F.

Violation: Ventilation and Hood Systems

• Cleaning Ventilation Systems, Nuisance and Discharge Prohibition

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: In kitchen and service area observed significant debris buildup on ventilation system, and in the immediate surrounding area of the vents. This includes areas where debris was accumulating surrounding the vents with open food below.

Violation: Cold Holding

• Cold Holding Capacities-Equipment

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Prep top cooler Food Items: Shredded Beef- 44 °F, Whole kernel corn- 55°F, Temperature:

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Cooking area.

Activity: Two Employees cooking food without the required beard guards.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on walls and floors and to clean and sanitize.

Observed significant, heavy, caked on buildup and debris on the floors and walls throughout kitchen, service areas and all drains.

Violation: Storage

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed utensils/equipment were not air dried and were wet stacked. Location: Ware washing area Utensil/Equipment Type: multiple sets of pans (6th pans, plastic containers.) Manner: wet stacked

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Facility has made significant progress on cleaning of surfaces throughout the facility. However, continued effort is remaining needed.

Observed nonfood contact surface with the buildup of soil residues. The surface was located throughout the kitchen, service areas, and storage including the sides of equipment, gas lines, piping, undersides of equipment such as the heat lamp area directly above food, cabinets, mechanical areas of equipment, doors of reach in coolers, the interior of reach in coolers, handles The condition of the surface was coated in heavy, significant volume of debris and food.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly

maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed in all areas of the kitchen, storage areas, warewashing, and service area the walls, and ceiling in disrepair by having numerous holes, gaps, cracks, crevices. These include area where wall material such as FRP is coming off of the walls.

• **Surface Characteristics-Indoor Areas**

- Floors, walls, and ceilings that are constructed of smooth and durable surface materials are more easily cleaned. Floor surfaces that are graded to drain and consist of effectively treated materials will prevent contamination of foods from dust and organisms from pooled moisture. The special requirements for carpeting materials and nonabsorbent materials in areas subject to moisture are intended to ensure that the cleanability of these surfaces is retained.

Instructed person in charge to repair flooring with non-absorbent, smooth and easily cleanable material.

Observed damaged, broken and in poor repair flooring constructed of tiles.

Chili's Grill & Bar - 10021 COORS BLVD NW

Food Establishment Class B

Date: 08/31/2026 - #: RT-FOODEST-112904-2025 - Inspection Result: Approved

Violation: Warewashing Temperature and Concentration

• **Sanitizers, Criteria-Chemicals**

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR. PIC corrected violation by Diluting sanitizer to 200 ppm at 75 °F

Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: quat sanitizer. Location: Bar sanitizer:

Concentration: Tested above 400 PPM.

CHIPOTLE MEXICAN GRILL 2952 - 2608 CENTRAL AVE SE - Approved

CHIPOTLE MEXICAN GRILL 2952 - 2608 CENTRAL AVE SE

Food Establishment Class C

Date: 09/04/2026 - #: RT-FOODEST-079227-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Multiple wiping cloth buckets in kitchen

Concentration: 0 PPM

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed heavy amount of standing water on the floor in the dish pit.

Violation: Storage

• **Equipment and Utensils, Air-Drying Required**

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to

allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: Clean dish storage rack

Equipment Type: Trays, pans, and other dishes

Manner: Wet stacked and actively dripping water while stored

CHRISTINE DUNCAN HERITAGE ACADEMY - 1900 ATRISCO DR NW - Approved

CHRISTINE DUNCAN HERITAGE ACADEMY - 1900 ATRISCO DR NW

Food Establishment Class C

Date: 09/02/2026 - #: RT-FOODEST-026015-2025 - Inspection Result: Approved

Violation: Plumbing

• **System Maintained in Good Repair**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Drain is not maintained in good repair or is not repaired by law. Observed Drain by hand wash station. found in disrepair by missing the required drain screen to catch debris.

Violation: Operation and Maintenance

• **Handwashing Cleanser, Availability**

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent

handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.
Observed no handwashing cleanser available at handwashing sink(s). Location: Employees hand wash station.

• **Handwashing Signage**

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.
Observed handwashing sink(s) without a handwashing sign. Location: Kitchen employees hand wash station.

Violation: Storage

• **Equipment and Utensils, Air-Drying Required**

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed utensils were not air dried and were wet stacked. Location: Storage rack
Utensil Type: Deep dish metal Pans.
Manner: 8 pans stacked on each other wet stacked.

CIRCLE K 2622024 - 6300 CENTRAL AVE SE - Approved

CIRCLE K 2622024 - 6300 CENTRAL AVE SE

Retail Food Establishment Class 5

Date: 08/31/2026 - #: CAC-Food-082777-2026 - Inspection Result: Approved

The food service establishment has been allowed upgraded to Approved status following submission of photographic evidence for verification of correction violations by the Environmental Health Department.

The facility has corrected:

- Time/Temperature Control for Safety Food, Cold Holding (All food inside cold holding display cases are under 41°F as required)
- Cold Holding Capacities-Equipment (Equipment has been repaired and brought into)
- Separation-Storage (Chemicals have been moved away from food items)
- Backflow Prevention, Air Gap (Air gap corrected and brought into compliance)

CLYDE HOTEL - 330 TIJERAS ST NW - Closure Re-Inspection Required

CLYDE HOTEL Carrie's - 330 TIJERAS ST NW

Food Establishment Class C

Date: 09/04/2026 - #: COM-FOODES-085079-2026 - Inspection Result: Closure Re-Inspection Required

Violation: Result of a Complaint

• **Complaint**

- This inspection is the result of a complaint received by the Department and the complaint of infestation is substantiated.

Violation: Imminent Health Hazard

• **Imminent Health Hazard**

- Observed imminent health hazard of rodent infestation.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Sanitizer bucket Concentration: 0ppm

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment and utensils food-contact surface with the buildup of soil residues. Equipment and Utensil Type: ice machine, scoops, spatulas, ladles, etc. Condition of the Location: Heavy debris buildup on the inside of the ice machine along the ice shoot and ceiling, and cleaned and sanitized utensils being stored inside hotel pans with debris accumulation.

Violation: Maintenance and Operation

• **Warewashing Equipment, Cleaning Frequency**

- During operation, warewashing equipment is subject to the accumulation of food wastes and other soils or sources of contamination. In order to ensure the proper cleaning and sanitization of equipment and utensils, it is necessary to clean the surface of warewashing machines, three (3) compartment sinks, drainboards, and laundry facilities for wiping cloths before use, every twenty-four (24) hours if used, and periodically throughout the day to prevent buildup of soils or other sources of contamination. Instructed PIC to clean the warewashing equipment and retain employees on the cleaning schedule.

Observed soiled or dirty ware washing machine. Condition: Significant debris growth on the inside of the ware washing.

Violation: Pest Control

• **Controlling Pests, If Present: Treatment**

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place. Location: kitchen line, inside broken equipment inside kitchen area, service area, dining room area, Pest Type: heavy rodent droppings

Violation: Corrective Actions

• Infestation Corrective Actions: Clean Up After Rodents

- Food Establishments shall remove rodent droppings in accordance with current Centers for Disease Control and Prevention recommendations published on the Enforcement Authority's website. Instructed PIC that the following steps must be taken when cleaning rodent droppings: <https://www.cdc.gov/healthypets/pets/wildlife/clean-up.html> Clean up rodent urine and droppings Step 1: Put on rubber or plastic gloves. Step 2: Spray urine and droppings with bleach solution or an EPA-registered disinfectant until very wet. Let it soak for 5 minutes or according to instructions on the disinfectant label. Step 3: Use paper towels to wipe up the urine or droppings and cleaning product. Step 4: Throw the paper towels in a covered garbage can that is regularly emptied. Step 5: Mop or sponge the area with a disinfectant. Clean all hard surfaces including floors, countertops, cabinets, and drawers. Follow instructions below to clean and disinfect other types of surfaces. Step 6: Wash gloved hands with soap and water or a disinfectant before removing gloves. Step 7: Wash hands with soap and warm water after removing gloves or use a waterless alcohol-based hand rub when soap is not available and hands are not visibly soiled.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on ensuring the proper disposition of food items. PIC began to voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food held within the establishment exceeding the seven (7) day limit. Location: reach in coolers Food Items: tomato jam, PP, Red Sauce, Expiration Dates: 7/13, 8/20, 7/31, 8/27,

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment components not maintained. Reach in coolers, prep top coolers in the kitchen line area Condition of component: door gaskets in poor repair, torn, lids to the prep top coolers broken, with pieces dangling and hanging off, facility had attempted to fix areas of lids with the duct tape and masking tape

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

The Person in Charge (PIC) failed to ensure required food safety practices were effectively implemented and maintained within the facility. During the inspection, an imminent health hazard (cockroach infestation) and eight (8) priority violations were observed, demonstrating a failure of active managerial control over food safety operations.

The PIC shall ensure employees are effectively monitoring and controlling food safety risks and that conditions which may result in foodborne illness or otherwise present an imminent health hazard are prevented and immediately corrected.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed plumbing system is not maintained in good repair or is not repaired by law. Observed piping from ware washing area, with ware washing machine found in disrepair by leaking grey water, facility placed bucket underneath to catch grey water

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions

Observed plumbing system is not maintained in good repair or is not repaired by law. Observed plumbing systems such as multiple faucets, plumbing pipes found in disrepair by leaking water profusely.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an

air gap established to prevent backflow.

Observed an inadequate air gap throughout the kitchen at prep sinks, single basin sinks, 3 compartment sinks

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth, non-absorbent, and easily cleanable.

Observed nonfood contact surface that was not smooth. The surface was located in dry storage areas, prep top coolers. The surface was made out of wood and wood composite, cooler lids with handles were duct taped, and masking taped together. The condition of the surface was absorbent, not smooth and not easily cleanable.

Violation: Installation

• Handwashing Sinks-Numbers and Capacities

- Hands are a common vehicle for the transmission of pathogens to foods in an establishment. Hands can become soiled with a variety of contaminants during routine operations. The transfer of contaminants can be limited by providing food employees with handwashing sinks that are properly equipped and conveniently located. Hand washing sinks must be installed as required by law, and handwashing sinks shall be located to allow convenient use by employees in food preparation, food dispensing, and ware washing areas, and in or immediately adjacent to, toilet rooms. Instructed PIC to install/repair handwashing sink(s) for kitchen line.

Observed facility with an inadequate number of handwashing sinks necessary for the convenient use by employees. Location: Kitchen line. Condition: handwashing sink was non-functional with an out of order sign placed on it and beginning to accumulate trash.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed multiple doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Maintenance

• Maintaining Premises, Unnecessary Items and Litter

- The presence of unnecessary articles, including equipment which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.

Observed items on the premises of the food establishment that is no longer used or is non-functional. Location: in kitchen area. Condition of the items: non-functional, with debris accumulation and rodent droppings.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness.

Observed food items in cold holding unit measuring above 41°F. Location: prep top cooler. Food Items: hardboiled eggs, cooked diced chicken, bleu cheese crumbles, Temperature: 47°F, 46°F, 44°F, 46°F.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed heavy buildup and debris on the walls and floors throughout kitchen, warewashing area, and dining room area.

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

• Consumer Advisory Consumption of Animal Foods

- Notice must be provided to consumers that animal-derived foods that are not subjected to adequate heat treatment pose a risk because they may contain biological agents that cause foodborne disease and must communicate the risk on the consumer's health status and the food being consumed. Instructed PIC that consumers must be informed of the significantly increased risk of consuming animal foods not processed to eliminate pathogens or served raw, or undercooked through both a disclosure and a reminder. The disclosure shall include: (1) a description of the animal-derived foods, such as oysters on the half shell (raw oysters), raw-egg Caesar salad, and hamburgers (can be cooked to order); or (2) identification of the animal-derived foods by asterisking them to a footnote that states that the items are served raw or undercooked, or contain (or may contain) raw or undercooked ingredients. Reminder shall include asterisking the animal-derived foods requiring disclosure to a footnote that states: (1) regarding the safety of these items, written information is available upon request; (2) consuming raw or undercooked meats, poultry, seafood, shellfish, or eggs may increase your risk of foodborne illness; or consuming raw or undercooked meats,

poultry, seafood, shellfish, or eggs may increase your risk of foodborne illness, especially if you have certain medical conditions.

Observed inadequate consumer advisory warning for the consumption of raw, undercooked and not otherwise treated animal products. Manner: Facility menu did not disclose which food menu items were being served raw or undercooked such as two eggs your style, gravlax, steak frites etc.

Violation: Storage

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed utensils were not air dried and were wet stacked. Location: Storage area Utensil Type: multiple pans; 6th, 1/2, 3rd Manner: wet stacked

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located throughout the kitchen area, sides and insides of equipment, inside coolers, compressor areas.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed throughout storage, kitchen, service areas walls in disrepair by having numerous gaps, cracks, holes, crevices present.

CLYDE HOTEL Banquet Kitchen - 330 TIJERAS ST NW

Food Establishment Class C

Date: 09/04/2026 - #: COM-FOODES-085163-2026 - Inspection Result: Closure Re-Inspection Required

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Imminent Health Hazard

• Imminent Health Hazard

- Observed rodent infestation inside facility.

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by routinely inspecting incoming shipments of food and supplies, routinely inspecting the premises for evidence of pests, and eliminating harborage conditions. Instructed PIC to provide EHD with their standard operating procedures and pest control plan.

Observed the facility has inadequate procedures to effectively control pests. Facility had significant amounts of rodent droppings, nesting material throughout the kitchen, and storage areas, droppings were inside equipment, on speed racks holding sheet pans, on food cages holding product, flooring,

Violation: Corrective Actions

• Infestation Corrective Actions: Clean Up After Rodents

- Food Establishments shall remove rodent droppings in accordance with current Centers for Disease Control and Prevention recommendations published on the Enforcement Authority's website. Instructed PIC that the following steps must be taken when cleaning rodent droppings: <https://www.cdc.gov/healthypets/pets/wildlife/clean-up.html> Clean up rodent urine and droppings Step 1: Put on rubber or plastic gloves. Step 2: Spray urine and droppings with bleach solution or an EPA-registered disinfectant until very wet. Let it soak for 5 minutes or according to instructions on the disinfectant label. Step 3: Use paper towels to wipe up the urine or droppings and cleaning product. Step 4: Throw the paper towels in a covered garbage can that is regularly emptied. Step 5: Mop or sponge the area with a disinfectant. Clean all hard surfaces including floors, countertops, cabinets, and drawers. Follow instructions below to clean and disinfect other types of surfaces. Step 6: Wash gloved hands with soap and water or a disinfectant before removing gloves. Step 7: Wash hands with soap and warm water after removing gloves or use a waterless alcohol-based hand rub when soap is not available and hands are not visibly soiled.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on ensuring the proper disposition of food items. PIC voluntarily discarded food items bearing incorrect dates or exceeding the 7 days.

Observed ready-to-eat time and temperature controlled for safety food held within the establishment exceeding the seven (7) day limit or observed ready-to-eat time and temperature controlled for safety food held within the establishment inappropriately marked, or had no date marking. Location: Walk in cooler Food Items: Chia pudding, roasted chopped green chile, green chile Caesar dressing, cooked shredded meat product, cooked shredded meat product, chipotle aioli, cooked meat products, scrambled eggs, cooked meat product, pasta, Expiration Dates: 9/3, 9/3, 8/27, 7/28

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance

may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed plumbing system is not maintained in good repair or is not repaired by law. Observed underneath 3 compartment sink water leak, and faucets leaking

• **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at piping throughout facility at prep sinks, 3 compartment sinks etc.

Violation: Food Separation

• **Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cleaning**

- Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. Location: in dry storage and walk in freezer Food Item: dough item, coffee beans

Violation: Maintenance

• **Maintaining Premises, Unnecessary Items and Litter**

- The presence of unnecessary articles, including equipment which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.

Observed items on the premises of the food establishment that is no longer used or is non-functional. Location: in kitchen area Condition of the items: non-functional, with debris accumulation and often rodent droppings.

Violation: Storage

• **Food Storage-Preventing Contamination from the Premises**

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.

Food must be protected from contamination of splashing water, chemical, or other foods; dust; and other contaminants. Instructed PIC to have food protected in containers/wrapping and not to store food in those areas unless the source of contamination can be mediated another way.

Observed food stored improperly less than six (6) inches off the floor. Location: walk in freezer Food Item: case of premade sheet cake

Observed food stored improperly where it was exposed to contamination from splash, dust, or other contamination. Location: Walk in Freezers Condition: Boxes of food, some open, underneath dripping condensation with ice forming on floors, boxes and containers.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the walls and floors, including walk in coolers which had rotting produce in the corners.

Violation: Storage

• **In-Use Utensils, Between-Use Storage**

- Multiuse utensils which have been cleaned and sanitized can become contaminated with pathogens which can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. Instructed PIC to clean and sanitize utensils prior to continuing use, must be maintained cleaned in a regular schedule as prescribed by the code and to store items so that the risk of contamination prior to use is minimized.

Observed utensils with use for non-time/temperature controlled for safety food during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food. Utensil Type: cups Location/condition: stored directly in/nestled contact with food with no handle

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on the sides, inside, and castors of equipment The condition of the surface had significant, heavy caked on debris, and grease

Violation: Physical Facilities, Construction and Repair

• **Repairing-Premises, Structures, Attachments, and Fixtures-Methods**

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed walls in disrepair by having numerous gaps, holes, cracks crevices, some quite large throughout the kitchen

CLYDE HOTEL Mercantile Cafe - 330 TIJERAS ST NW

Food Establishment Class C

Date: 09/04/2026 - #: COM-FOODES-085080-2026 - Inspection Result: Closure Re-Inspection Required

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Imminent Health Hazard

• Imminent Health Hazard

- Observed imminent health hazard of cockroach infestation present.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: sanitizer buckets Concentration: 0ppm

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place. Location: Throughout the deli area Pest Type: cockroach Pest Condition: live cockroaches +20

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. PIC voluntarily discarded burritos during inspection with no hot holding logs, and saying burritos were over 5 hours old.

Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Burritos

Food Temperature: 128°F, 120°F

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed wiping cloths stored outside of wiping cloth solutions on preparation table

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: in display cooler Food Items: multiple food items such as fruit/yogurt parfait, salad, quiche Expiration Dates: None present.

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

The Person in Charge (PIC) failed to ensure required food safety practices were effectively implemented and maintained within the facility. During the inspection, an imminent health hazard (cockroach infestation) and seven (7) priority violations were observed, demonstrating a failure of active managerial control over food safety operations.

The PIC shall ensure employees are effectively monitoring and controlling food safety risks and that conditions which may result in foodborne illness or otherwise present an imminent health hazard are prevented and immediately corrected.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap under 3 compartment sink.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. PIC voluntarily discarded food products during inspection.

Observed food items in cold holding unit measuring above 41°F. Location: Display cooler Food Items: Unknown dressings in portion cups (product not labeled), quiche, yogurt/fruit parfait Temperature: 52°F, 50°F, 49°F

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment.

Observed insufficient cold holding equipment to properly hold food cold. Location: Display cooler Condition: Cooler was not functioning during inspection, ambient air thermometer placed by facility was showing 50°F

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris throughout the counter service area on the floors and underneath 3 compartment sink area

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

• Food Labels

- Provided food labeling guide to facility. Instructed PIC to follow guidelines on appropriately labeling food packaged for sale inside the facility.

Observed foods packaged inside the facility without necessary labeling. Location: Display case inside and outside with packaged food

Food Items: Cookies, popcorn, brittle, yogurt parfait, salads Manner: Label only identified what the product common name was but no other information such as allergens and ingredients

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed walls, flooring in disrepair by flooring laminate coming up, no longer fully attached, water buildup and cockroaches were observed under 3 compartment sink area coming in and out of flooring area, observed numerous gaps, cracks, crevices, holes etc. into walls. Tile grout cracking with gaps running along corner seams.

Violation: Records

• Temperature Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment.

TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items.

CORRALES INTERNATIONAL SCHOOL - 5500 WILSHIRE AVE NE - Approved

CORRALES INTERNATIONAL SCHOOL - 5500 WILSHIRE AVE NE

Food Establishment Class C

Date: 09/03/2026 - #: PT0137999 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Freska King - 7921 CENTRAL AVE NW - Approved

Freska King - 7921 CENTRAL AVE NW

Mobile Food Unit Class C

Date: 09/04/2026 - #: CAC-Food-085085-2026 - Inspection Result: Approved

Acquired and posted a handwashing sign in the mobile
PIC obtained hand cleanser and put it at the hand washing sink
PIC obtained ambient air thermometers and put them into reach in coolers
PIC obtained chlorine test strips
obtained digital food thermometer
obtained food logs
obtained calibration logs
facility is now in the green approved status

Freska King - 7921 CENTRAL AVE NW

Mobile Food Unit Class C

Date: 09/03/2026 - #: CAC-Food-084748-2026 - Inspection Result: Conditional Approved

Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.

Observed no handwashing cleanser available at handwashing sink(s). Location: inside mobile unit
pic got water bottle and filled up with dish soap at the request of the inspector at the time of the inspection
pic resolved by adding soap to water bottle from detergent for dishes

Freska King - 7921 CENTRAL AVE NW

Mobile Food Unit Class C

Date: 09/03/2026 - #: RT-MBFOOD-108362-2025 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located inside mobile unit The surface was made out of metal and plastic
The condition of the surface had debris buildup on the exterior of the reach in coolers, inside on the reach in coolers vent covers

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.
Observed food temperature measuring devices were not provided or readily accessible for the measuring of thin foods.
The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.
Observed food temperature measuring devices were not provided or readily accessible for the measuring of thin foods.

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.
facility did not have chlorine test strips

Violation: Cold Holding

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.
Observed insufficient cold holding equipment to properly hold food cold. Location: inside mobile unit Condition: reach in cooler temping at 55 °F instructed pic to not use unit and take out frozen fruit and put into cooler next to it that's temping at 41 degrees and cooler

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.
Observed no handwashing cleanser available at handwashing sink(s). Location: inside mobile unit
pic got water bottle and filled up with dish soap at the request of the inspector at the time of the inspection

• **Handwashing Signage**

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

Observed handwashing sink(s) without a handwashing sign. Location: inside mobile unit

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Mobile unit did not have cold holding logs for milk and equipment logs to track the ambient air temperature of reach in coolers

• **Calibration Logs**

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

Violation: Functionality and Accuracy

• **Temperature Measuring Devices, Ambient Air and Water-Accuracy**

- Due to the lack of a large safety margin in the temperature requirements themselves, thermometer accuracy is imperative for the safety of food. Instructed PIC to calibrate thermometers or to acquire new thermometers to ensure that the proper accuracy has been achieved to be within one (1) degree C.

Observed no food temperature measuring device that is scaled for both Celsius and Fahrenheit inside mobile units reach in coolers at time of the inspection

Violation: Hot & Cold-Water Availability & Pressure

• **Water Pressure**

- Inadequate water pressure could lead to situations that place the public health at risk such as improper handwashing or equipment operation. Water under pressure must be provided to all fixtures, equipment, and nonfood equipment that are required to use water.

Observed facility with inadequate water pressure Location: hand washing sink Manner: water barely coming out of faucet hand washing sink.

EAT MY THAI CUISINE - 5303 GIBSON BLVD SE – Approved

EAT MY THAI CUISINE - 5303 GIBSON BLVD SE

Food Establishment Class C

Date: 09/02/2026 - #: CAC-Food-084222-2026 - Inspection Result: Approved

Facility has been upgraded to Approved status following the correction of the following violations during inspection by the Environmental Health Department. The facility has corrected: - Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch (Food contact surfaces have been cleaned and sanitized)

EAT MY THAI CUISINE - 5303 GIBSON BLVD SE

Food Establishment Class C

Date: 09/02/2026 - #: RT-FOODEST-081151-2026 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75°F with a contact time of 7 seconds.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Server packing station

Concentration: 0 PPM

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Knife magnet, knives, ice machine, peelers Location: Make area and clean dish storage rack

Condition of the Location: Soiled with food debris buildup and residue

Violation: Pest Control

• **Removing Dead or Trapped Birds, Insects, Rodents and other Pest**

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps. Location: Dry storage and under server station Pest Type: Cockroach

Pest Condition: Dead Number of Pests Present: 3

Violation: Ventilation and Hood Systems

• **Ventilation Hood Systems, Filters**

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.
Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur. Condition: Hood filters are soiled and in need of cleaning.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Kitchen make line cooler and upright standing cooler Food Items: Cucumber slices (46°F), chili sauce (44°F), soup (46°F)

Violation: Personal Cleanliness

• Eating, Drinking, or Using Tobacco Products

- A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area and should be in a cup with a lid and straw.
Observed a food employee with an improper drink. Location: Produce cutting table
Type of Drink: Open no lid no straw beverage

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the kitchen floors throughout the kitchen. Also observed buildup in the floor drain located next to the server beverage cooler.

El Patron Restaurant and Cantina - 10551 MONTGOMERY BLVD NE - Approved

El Patron Restaurant and Cantina - 10551 MONTGOMERY BLVD NE

Food Establishment Class C

Date: 09/02/2026 - #: CAC-Food-083736-2026 - Inspection Result: Approved

Equipment, Food-Contact Surfaces and Utensils - Clean to Sight
and Touch- PIC corrected violation by cleaning and sanitizing all food contact surfaces
Temperature Logs- Pic Corrected violation by taking and logging temperatures

El Patron Restaurant and Cantina - 10551 MONTGOMERY BLVD NE

Food Establishment Class C

Date: 08/31/2026 - #: RT-FOODEST-083112-2026 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Back of kitchen Condition of the Location: brown and black buildup on inside of ice machine

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener, Food dicers, Food service pans and utensils Location: Back prep area of kitchen Condition of the Location: Dried food debris on Can opener, Food dicers, food service pans, and food service utensils

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed wiping cloths used for sanitizer counter tops on kitchen line stored on counter top and not in sanitizer solution bucket at the time of inspection.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the

Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Kitchen area

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Sugar and flour in food service bins Location: Dry storage

Violation: Toilet Facilities

• Toilet Room Receptacle, Covered

- Instructed to provide a covered receptacle for sanitary napkins. Predefined

Observed in a toilet room used by females, no covered receptacle. Employee bathroom

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges. Back door

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Hot & Cold-Water Availability & Pressure

• Water Capacity-Quantity and Availability

- Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods. Instructed PIC to contact repair personnel to have hot water temperatures adjusted in employee hand washing sinks. PIC must contact CHPD when repairs are made for verification.

Observed facility with insufficient hot water. Location: employee restrooms

Manner: hot water temping at 75°F at both restrooms.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on Floors and to clean and sanitize Floors

Observed buildup and debris on the floors under upright cooler by soapilla station

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57°C (135°F) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: cooking pot Location: Dry storage area Condition of the Location: pot used as scoop and stored in container with food product with handle directly touching the food product inside

• **Equipment and Utensils, Air-Drying Required**

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: Not air dried and stacked wet with water in between pans

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: stored

• **Calibration Logs**

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

EI Patron Restaurant and Cantina - 10551 MONTGOMERY BLVD NE

Food Establishment Class C

Date: 08/31/2026 - #: RT-FOODEST-046871-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Back of kitchen Condition of the Location: brown and black buildup on inside of ice machine

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener, Food dicers, Food service pans and utensils Location: Back prep area of kitchen Condition of the Location: Dried food debris on Can opener, Food dicers, food service pans, and food service utensils

Violation: Poisonous and Toxic/Chemical Substances

• **Common Name-Working Containers**

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottles Alleged Material: Unknown

Violation: Hot Holding & Reheating

• **Time/Temperature Control for Safety Food, Hot Holding**

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165 F and to maintain temperature at 135 F and above.

Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Chile Rellenos 89°F, Green chile sauce 120°F, Red chile 123°F

Violation: Use Limitations

• **Wiping Cloths, Use Limitation**

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed wiping cloths used for sanitizer counter tops on kitchen line stored on counter top and not in sanitizer solution bucket at the time of inspection.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on ensuring the proper disposition of food items. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food held within the establishment exceeding the seven (7) day limit. Location: Walk in cooler and prep top coolers Food Items: Salsa de arbol 8/21 BBQ Sauce 8/16, Salad dressing 7/30

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain under ware washing machine

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Kitchen area

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Sugar and flour in food service bins Location: Dry storage

Violation: Toilet Facilities

• Toilet Room Receptacle, Covered

- Instructed to provide a covered receptacle for sanitary napkins. Predefined

Observed in a toilet room used by females, no covered receptacle. Employee bathroom

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges. Back door

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Prep top cooler on main cook line Food Items: Shredded Cheese 57°F, Diced Tomatoes 51°F, pico de gallo 50°F, Shredded lettuce 52°F

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

• **Designation-Dressing Areas and Lockers**

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Hot & Cold-Water Availability & Pressure

• **Water Capacity-Quantity and Availability**

- Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods. Instructed PIC to contact repair personnel to have hot water temperatures adjusted in employee hand washing sinks. PIC must contact CHPD when repairs are made for verification.

Observed facility with insufficient hot water. Location: employee restrooms

Manner: hot water temping at 75°F at both restrooms.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on Floors and to clean and sanitize Floors

Observed buildup and debris on the floors under upright cooler by sopapilla station

Violation: Consumer Advisories

• **Allergen Warning, Unpackaged Food**

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Storage

• **In-Use Utensils, Between-Use Storage**

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under ☐ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: cooking pot Location: Dry storage area Condition of the Location: pot used as scoop and stored in container with food product with handle directly touching the food product inside

• **Equipment and Utensils, Air-Drying Required**

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: Not air dried and stacked wet with water in between pans

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: stored

• **Calibration Logs**

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

El Patron Restaurant and Cantina - 10551 MONTGOMERY BLVD NE

Food Establishment Class B

Date: 08/31/2026 - #: RT-FOODEST-046986-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC corrected violation by Remaking sanitizer solution.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.
Location: wiping cloth bucket Concentration: 0ppm

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

Observed handwashing sink(s) without a handwashing sign. Location: Hand washing sink in bar area

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on the soda gun holders and in the undercounter cooler. The condition of the surface was debris buildup on inside of gun holders and standing water inside cooler.

EL REY THEATER - 622 CENTRAL AVE SW - Approved

EL REY THEATER - 622 CENTRAL AVE SW

Food Establishment Class B

Date: 09/02/2026 - #: PT0155802 - Inspection Result: Approved

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair. Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: Bar area Type of Equipment: Ice bin Condition of the equipment: no lid to prevent contamination from occurring

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: bar area handwashing sink

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair

coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints. Observed a food employee without proper hair restraints. Location: bar area Activity: serving drinks with no hair or beard restraints

FLIK INTERNATIONAL CORP - 5401 WATSON DR SE - Approved

Food Establishment Class B

Date: 09/02/2026 - #: PT0044178 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Wiping Cloth Container. Concentration: below 200ppm.

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Beverage Gun holder. Location: attached to bar counter. Condition of the Location: Observed debris and buildup in the beverage gun holder.

GMRI INC DBA Olive Garden - 6301 SAN MATEO BLVD NE

Food Establishment Class D

Date: 09/02/2026 - #: CAC-Food-084174-2026 - Inspection Result: Approved

Corrective action taken during the routine inspection resulted in the facility being upgraded from a Conditional Approved Status to Approved Status. The person in charge promptly addressed and corrected most of the violations noted in the original inspection report while on site. following priority violations were corrected on site:

- Time/Temperature Control for Safety Food, Cold Holding. Observed food item was disposed of during inspection.

- Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness. Observed PIC remake sanitizer at three compartment sink during inspection.

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch. Observed PIC place slicer in warewashing area to be cleaned and sanitized.

GMRI INC DBA Olive Garden - 6301 SAN MATEO BLVD NE

Food Establishment Class D

Date: 09/02/2026 - #: PT0044179 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Three compartment sink. Concentration: below 200ppm.

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Slicer. Location: Prep table bottom shelf. Condition of the Location: Observed food debris and buildup on the blade area and observed plastic wrap wrapped around the slicer at the time of inspection.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved

by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Toilet Facilities

• Toilet Rooms, Enclosed

- Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.

Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer. Observed PIC instruct employee to remove lettuce mix and to dispose. Observed employee dispose of lettuce mix. Violation corrected on site.

Observed food items in cold holding unit measuring above 41°F. Location: Salad Prep Station. Food Items: Lettuce Mix. Temperature: 45°F.

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

Observed handwashing sink(s) without a handwashing sign. Location: Employee restroom

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on using proper facial hair restraints.

Observed a food employee without proper facial hair restraints. Location: Kitchen area. Activity: preparing food items.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize floor drains.

Observed buildup and debris in the floor drains in the warewashing pre-washing area at the time of inspection.

GOLDEN CORRAL #936 - 5207 SAN MATEO BLVD NE - Approved

GOLDEN CORRAL #936 - 5207 SAN MATEO BLVD NE

Food Establishment Class C

Date: 08/31/2026 - #: RT-FOODEST-051830-2026 - Inspection Result: Approved

Violation: Preventing Contamination From Hands

• Preventing Contamination from Hands, No Barehand Contact with RTE food

- Except when washing fruits and vegetables or ready-to-eat food that is being added as an ingredient to food that will be cooked to a temperature of at least 145 degrees. Handwashing with plain soap and water, as specified in the Food Code, may not be an adequate intervention to prevent the transmission of pathogenic microbes to ready-to-eat foods via bare hand contact. Cooking foods to the temperatures required in the Food Code will reduce the likelihood of survival of pathogens that might be transferred from an employee's hands to the surface of the ready-to-eat foods. Instructed PIC that the food contacted by the employee with bare hands must not be used in the food operation and that employees must be retrained on bare hand contact procedures with ready-to-eat food.

Observed a food employee touching ready-to-eat food with bare hands. Location: Bakery/Dessert area. Activity: observed employee touching ready to eat whole strawberries with bare hands. Food Contacted: Ready to eat whole strawberries

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions. Instructed PIC to contact repair personnel to have pre-rinse faucet replaced and the flush valve at the toilet in women's restroom repaired. PIC must provide follow up documents and completed work orders to CHPD inspector when repairs are completed.

1.) Observed Pre rinse faucet is not maintained in good repair or is not repaired by law. Location: warewashing area. Condition: Observed pre-rinse faucet found in disrepair by observing the handle and spray valve removed and leaking water into the sink basin. Observed a red water hose being used to pre-rinse in its place.

2.) Observed flush valve at toilet is not maintained in good repair or is not repaired by law. Location: Toilet in stall next to ADA stall in women's restroom. Condition: Observed Flush valve at toilet found in disrepair by observing toilet leaking water at the flush valve when the handle is used to flush toilet.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on floor and to clean and sanitize floors to remove sticky debris and buildup.

Observed the floor in the entrance area into facility was improperly cleaned and sanitized. Inspector's shoes would stick to the floor when walking through. Observed the beverage soda syrup hose at beverage dispenser had malfunctioned and caused soda syrup to leak onto floor.

Golden Pride Legacy LLC - 1830 LOMAS BLVD NE - Approved

Golden Pride Legacy LLC - 1830 LOMAS BLVD NE

Food Establishment Class C

Date: 09/02/2026 - #: CAC-Food-084195-2026 - Inspection Result: Approved

Facility was able to correct violations on site during the inspection bringing grade from Conditional Approved to Approved.

Facility corrected the below violations:

-Time/Temperature Control for Safety Food, Cold Holding

-Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

-Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

Reminded team to continue coaching staff to build correct habits and behaviors.

Golden Pride Legacy LLC - 1830 LOMAS BLVD NE

Food Establishment Class C

Date: 09/02/2026 - #: RT-FOODEST-081487-2026 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Facility changed out sanitizer buckets throughout kitchen. Reminded PIC to change out the buckets when they become soiled with debris.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Sanitizing wiping cloth bucket towards drive through Concentration: below 200ppm Temperature: 74°F

Violation: Maintenance and Operation

• Warewashing Equipment, Cleaning Frequency

- During operation, warewashing equipment is subject to the accumulation of food wastes and other soils or sources of contamination. In order to ensure the proper cleaning and sanitization of equipment and utensils, it is necessary to clean the surface of warewashing machines, three (3) compartment sinks, drainboards, and laundry facilities for wiping cloths before use, every twenty-four (24) hours if used, and periodically throughout the day to prevent buildup of soils or other sources of contamination. Instructed PIC to clean the warewashing equipment and retain employees on the cleaning schedule.

Observed soiled or dirty ware washing machine. Location: in the back kitchen area Condition: significant heavy debris accumulation on the ware washing machine

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items.

Repeat violation

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: walk in cooler Food Items: potato salad

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Door is gasket is currently taped to help ensure functionality.

Observed equipment components not maintained. Location: walk in cooler Type of equipment: door Condition of component: door, gaskets in poor repair

Violation: Ventilation and Hood Systems

• Cleaning Ventilation Systems, Nuisance and Discharge Prohibition

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: throughout the kitchen at all air vents

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- To prevent cross contamination of pathogens and/or allergens, raw animal foods of different types must be separated during storage, preparation, holding, and display by use of separate equipment, arranging food items by cooking temperature requirements, and preparing food at different times or in different areas.

Violation was corrected onsite by reorganizing the products.

Observed raw animal foods of different types stored improperly. Location: Walk in Cooler Food Item: raw shell eggs, and raw pork sausage Condition: stored

above ready to eat food items such as coleslaw and potato salad

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges. Walk in door, directly into the walk-in cooler, screen doors and gates throughout

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer. Product was removed from cooler and was placed inside walk in cooler to help rapidly chill the product.

Facility had temperature logs indicating the product had not been out of temperature for extended periods of time. Discussed making sure no gaps were in the pans to help ensure cold air is not escaping, fill lines on pans, keeping lid closed on cooler.

Observed food items in cold holding unit measuring above 41°F. Location: Prep top cooler Food Items: cooked shredded chicken, pickles, hardboiled eggs, diced onions Temperature: 50, 55, 46,48,

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: kitchen area Activity: handling TCS foods.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on walls, floors and ceiling and to clean and sanitize.

Facility has made strides in regards to cleanliness. Facility is continuing to take steps on cleanliness throughout. Observed heavy buildup and debris on the floors, walls and ceiling.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed walls, ceilings in disrepair by having numerous gaps, cracks, crevices, holes, materials coming off the walls and ceiling

• Floors, Walls and Ceilings-Cleanability

- Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to remove and replace with material that is smooth and easily cleanable.

Observed floor, and ceiling materials are not smooth and easily cleanable. The surface was located throughout the entire kitchen area The surface was made out of damaged and in poor repair aggregate flooring, broken or missing tiles, damaged materials.

Facility is actively working on getting repairs made to the flooring, walls and ceiling.

IT DIMSUM - 7900 CARMEL AVE NE, F - Approved

IT DIMSUM - 7900 CARMEL AVE NE, F

Food Establishment Class C

Date: 09/04/2026 - #: RT-FOODEST-076675-2025 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention Device, Design Standard

- A backflow prevention device is used to avoid potential backflow of contaminated water when an air gap is not practical. The device provides a break to the atmosphere in the event of a negative pressure within the system. Minerals contained in water and solid particulate matter carried in water may coat moving parts of the device or become lodged between them over time. This may render the device inoperative. To minimize such an occurrence, only devices meeting certain standards of construction, installation, maintenance, inspection, and testing for that application may be used. The necessary maintenance can be facilitated by installing these devices in accessible locations. Instructed PIC to remove current backflow prevention device and install an approved backflow prevention device.

Observed an inadequate backflow prevention device installed at service sink. Observed backflow prevention device does not meet design standards by leaking water at the time of inspection.

Violation: Training Records

• **Food Handler Cards**

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Physical Facilities, Cleaning

• **Service Sink**

- Mop water and similar liquid wastes are contaminated with microorganisms and other filth. Waste water must be disposed of in a sanitary manner that will not contaminate food or food equipment. A service sink or curbed cleaning facility with a drain allows for such disposal. Instructed PIC to use service sink or curbed cleaning facility equipped with a floor drain that is conveniently located for the cleaning of mops or similar wet floor cleaning tools and for the disposal of mop water and similar liquid waste and not for any other purpose. Observed PIC removing tube from service sink during inspection. Violation corrected on site. Also reminded PIC that all hoses must be disconnected from service sink faucet when it is not in use for air gap purpose.

Observed facility is not utilizing at least one service sink or a designated service sink for its intended use at the time of inspection. Observed a black tube running up to the roof is connected to the faucet of designated service sink. Upon inquiring with PIC, PIC stated that the black tube is for the cooler on the roof. Service sink is not being used for the intended purpose.

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the floor in the following areas:

1. underneath wok area
2. underneath walk in cooler shelving in the corners

Los Tacos Del Junior #3 - 520 LOUISIANA BLVD SE - Approved

Los Tacos Del Junior #3 - 520 LOUISIANA BLVD SE

Mobile Food Unit Class C

Date: 09/03/2026 - #: RT-MBFOOD-112261-2025 - Inspection Result: Approved

Violation: Date Marking and Disposition

• **Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition**

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: inside mobile unit Food Items: Onions, lettuce, birria, ham, salsas Expiration Dates: no dates observed

Violation: Plumbing

• **System Maintained in Good Repair**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed plumbing system is not maintained in good repair or is not repaired by law. Observed three compartment sink and hand washing sink found in disrepair by not being able to turn on by turning knobs has to be turned on and off at water heater area.

Instructed pic to follow all regulation with washing hands and wearing gloves

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: mobile unit did not have Cold Holding, Hot Holding or Equipment logs

• **Calibration Logs**

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

Violation: Food Separation

• **Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination**

- Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. Location: cook line and inside reach in coolers Food Item: birria, cheese, carne asada, Chicken

LEARNING LADDER ACADEMY - 5827 4TH ST NW - Approved

LEARNING LADDER ACADEMY - 5827 4TH ST NW

Food Establishment Class C

Date: 09/04/2026 - #: RT-FOODEST-026639-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Ca opener. Location: Kitchen.

Condition of the Location: Blade with dry soil residue

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.

Observed nonfood contact surface that was not smooth. The surface was located Bottom of the hand wash sink Cabinet. The surface was made out of Particle board.

The condition of the surface was water damaged and not smooth and easily cleanable.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges of the bottom of the door.

Violation: Warewashing Temperature and Concentration

• Sanitizers, Criteria-Chemicals

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR. PIC corrected violation by - dilution to 100 PPM chlorine.

Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Chlorine sanitizer. Location: Spray Bottle Concentration: Tested above 200 PPM.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris

Observed buildup and debris on the on the floors behind the oven.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: meats, lunch meats, milks cheeses, eggs.

Activity of the Food: cooking and cold holding food items or calibration also not being completed on a regular basis.

LEFT TURN DISTILLING - 524 ROMERO ST NW - Approved

LEFT TURN DISTILLING - 524 ROMERO ST NW

Food Establishment Class B

Date: 09/02/2026 - #: PT0156791 - Inspection Result: Approved

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: Bar area Type of Equipment: Ice Bin Condition of the equipment: Ice Bin has no lid to prevent

contamination from occurring

Violation: Training Records

- **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Operations

- **Valid Permit**

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.
Observed that the facility was operating with an expired permit.

Violation: Surface Not Clean

- **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located bar area. The surface was made out of metal and plastic. The condition of the surface had debris buildup inside reach in cooler where drink and kegs are stored in bar area.

Little Europe LLC - 1909 BELLAMAH AVE NW - Approved

Little Europe LLC - 1909 BELLAMAH AVE NW

Food Establishment Class C

Date: 09/02/2026 - #: COM-FOODES-084069-2026 - Inspection Result: Approved

Violation: Result of a Complaint

- **Complaint**

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Training Records

- **Food Handler Cards**

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Records

- **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.
Observed that the food establishment does not have temperature logs available for TCS foods items.

- **Calibration Logs**

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment.
Observed the food establishment does not have calibration logs for temperature measuring devices.

LITTLE LOBITOS - 5015 4TH ST NW - Conditional Approved

LITTLE LOBITOS - 5015 4TH ST NW

Food Establishment Class C

Date: 09/04/2026 - #: RT-FOODEST-097640-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 25-49ppm must also be at a minimum temperature of 120F with a contact time of 10 seconds. PIC corrected violation by remaking sanitizer solution.
Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Three compartment sink at 25 ppm.

Violation: Training Records

- **Food Handler Cards**

- Food handler cards shall be kept by the Food Employee on their Person while working as a Food Employee or volunteer for a Food operation, or a copy shall be kept on file by the current employer and be made available for inspection by the Enforcement Authority. If trained through another approved method; records of the training shall be maintained for the duration of the Food Employee's employment. Instructed PIC to provide updated training records to EHD for review.

The PIC was unable to provide records of training or certification of food employees.

Violation: Surface Condition

- **Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent**

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.

Observed nonfood contact surface that was not smooth. The surface was located Kitchen Cabinets. The surface was made out of Particle Board.

The condition of the surface was bubbled and absorbent and not smooth and easily cleanable.

Violation: Physical Facilities

- **Outer Openings, Protected**

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.

Observed holes or other gaps in the structure of the facility. Location: Under Three compartment sink

Size: Right side to open areas a 12x5 square hole and 2 x10 holes on top interior right side.

Violation: Testing Devices

- **Sanitizing Solutions, Testing Devices**

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Operation and Maintenance

- **Handwashing Aids and Devices, Use Restrictions**

- Handwashing facilities can become sources of contamination if the sinks used for other purpose such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purpose other than handwashing.

Observed no handwashing cleanser available at handwashing sink(s). Location: Kitchen hand wash station.

Violation: Records

- **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Chicken, ground beef, pork, Milk, Yogurt, lentils Hot dogs. temperatures are not taken for cooking, hot holding, cold holding.

No log for calibrating a thermometer.

LOS PUENTES CHARTER SCHOOL - 4012 4TH ST NW - Approved

LOS PUENTES CHARTER SCHOOL - 4012 4TH ST NW

Food Establishment Class C

Date: 09/03/2026 - #: RT-FOODEST-039028-2026 - Inspection Result: Approved

Violation: Poisonous and Toxic/Chemical Substances

- **Identifying Information, Prominence-Original Containers**

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray Bottle.

Alleged Material: Blue substance called glass cleaner.

Violation: Plumbing

- **System Maintained in Good Repair**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Drain is not maintained in good repair or is not repaired by law. Observed Interior of the drain missing the drain screen.

MCDONALDS - 8501 GOLF COURSE RD NW - Approved

MCDONALDS - 8501 GOLF COURSE RD NW

Food Establishment Class C

Date: 09/01/2026 - #: COM-FOODES-083380-2026 - Inspection Result: Approved

Violation: Result of a Complaint

- **Complaint**

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Observed evidence to Substantiate the complaint sales floor Ice machine interior ceiling with substantial black and brown soil residue dripping onto the ice. Instructed pic close down ice machine until ice machine is cleaned and sanitized. Technician is on site cleaning and sanitizing the ice machine. Recommended to PIC to inspect ice machines, must be cleaned and sanitized on a regular basis to prevent buildup.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils - Grease/Soil Deposits, Cooking Equipment

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Ice scoops. Location: Ice bins.

Condition of the Location: brown soil residue on ice scoops and ice scoop holders.

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machines

Location: Sales floor, and drive thru ice machine.

Condition of the Location: Interior both Ice machines with a Black and Brown soil buildup. drive thru ice exterior near the ice and fill spout also with a black buildup.

Violation: Storage

• Storage or Display of Food in Contact with Water or Ice

- Pathogens can contaminate and/or grow in food that is not stored properly. Drips of condensate and drafts of unfiltered air can be sources of microbial contamination for stored food. Shoes carry contamination onto the floors of food preparation and storage areas. Even trace amounts of refuse or wastes in rooms used as toilets or for dressing, storing garbage or implements, or housing machinery can become sources of food contamination. Moist conditions in storage areas promote microbial growth. Food must be protected from contamination and must not be stored in locker rooms, toilet rooms, dressing rooms, garbage rooms, mechanical rooms, under sewer lines, under leaking water lines, under open stairwells, or under other sources of contamination.

Observed food stored improperly under leaking water lines. Location: Reach in refrigerator.

Food Item: ready-made burritos. observed condensation dripping from the corner of the front refrigerator onto burritos that were not covered at the time of inspection.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Cooking and grill area.

Activity: working with food without the required beard Guard.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the drains under the dining area fountain drink dispenser, and drain under the compartments sinks. observed debris and buildup behind food equipment such as Ice cream machine, and cappuccino machine.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Drink Dispensing areas dining area and back-room drink stations. The surface was made out of stainless steel. The condition of the surface was soiled with dry food buildup.

MISSION FOODS CORPORATION - 4300 ALEXANDER BLVD NE, A - Approved

MISSION FOODS CORPORATION - 4300 ALEXANDER BLVD NE, A

Food Processor Class C

Date: 09/02/2026 - #: PT0115364 - Inspection Result: Approved

Violation: Installation

• **Handwashing Sinks, Installation, Water 85F**

- A handwashing sink shall be equipped to provide water at a temperature of at least 85°F through a mixing valve or combination faucet. Instructed PIC to repair or replace handwashing sink so it has hot water available at all times. Also instructed PIC to provide CHPD with updates on repairs made to hand washing sink. Observed handwashing sink with hot water not available. Location: Flour processing area. Condition: observed water temping at 72°F. Observed hot water heater was unplugged and not in operation at hand washing sink at the time of inspection.

Violation: Training Records

• **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

• **Food Handler Cards**

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Physical Facilities

• **Outer Openings, Protected**

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the bottom edges. Location: exit door near QA area and roller door in warehouse area.

MOUNTAIN MAHOGANY COMMUNITY SCHOOL - 5014 4TH ST NW - Approved

MOUNTAIN MAHOGANY COMMUNITY SCHOOL - 5014 4TH ST NW

Food Establishment Class C

Date: 09/03/2026 - #: RT-FODEST-039108-2026 - Inspection Result: Approved

Violation: Cold Holding

• **Time/Temperature Control for Safety Food, Cold Holding**

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Refrigerator Food Items: Chocolate Milk, Vitamin D Milk, Temperature: 49°F and 48°F.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors behind and under food equipment, Floor drain with soil buildup.

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Kitchen serving area. The surface was made out of Stainless steel. The condition of the surface interior with debris and soil buildup.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Chicken Pozole, Turkey meat, Chicken, steamed veggies, Milks, cut fruits, Pizzas.

Activity of the Food: Stored cold, or hot holding, and transported ready to ready to eat TCS food Items.

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

pic had expired chlorine test strips

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Facility did not have Cold Holding or Hot Holding logs

MY LITTLE WORLD LLC - 303 OLD COORS DR SW

Food Establishment Class C

Date: 09/02/2026 - #: RT-FOODEST-008490-2025 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at three compartment sink and hand washing sink.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Oceans Montessori Academy, LLC - 6211 4TH ST NW

Food Establishment Class B

Date: 09/04/2026 - #: RT-FOODEST-009150-2026 - Inspection Result: Approved

Violation: Cold Holding

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: kitchen prep area Condition: ambient thermometer was holding at 44°F, Cut Broccoli 44°F, Shredded Cheese 44°F

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the prep area floors under the sink, tables and food equipment, walls above the Trash can.

Olympia Cafe - 2210 CENTRAL AVE SE - Unsatisfactory Re-Inspection required

Olympia Cafe - 2210 CENTRAL AVE SE

Food Establishment Class C

Date: 09/02/2026 - #: CAC-Food-083939-2026 - Inspection Result: Unsatisfactory Re-Inspection required

The food service establishment has been allowed to re-open under unsatisfactory following submission of photographic evidence and in person walk through for verification of corrected violations by the Environmental Health Department.

The facility has corrected:

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch (All food contact surfaces have been cleaned and sanitized)
- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition (Expired food products have been discarded)
- Conveying Sewage (Backed up floor drains have been brought back into compliance)
- Backflow Prevention (Direct connection between the sewage system to fresh water supply has been removed)
- Identifying Information, Prominence-Original Containers (Chemicals have been properly labeled)
- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition (All undated food was been voluntarily discarded)
- System Maintained in Good Repair, Repaired According to Law (Condenser leak has been repaired and also observed outdoor drain clean is now cleaned out and capped)

Facility will be subject to a follow-up inspection within five (5) business days of reopening and operating.

Unsatisfactory sticker was placed on facility door in prominence for consumers.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at below front counter/ check out area.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

observed water damaged test strips container no expiration date was visible

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. facility did not have cold holding, hot holding or equipment logs

• **Calibration Logs**

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
- Observed the food establishment does not have calibration logs for temperature measuring devices.

Quesadilla Way LLC - 5305 GIBSON BLVD SE - Approved

Quesadilla Way LLC - 5305 GIBSON BLVD

SE Food Establishment Class C

Date: 09/04/2026 - #: RT-FOODEST-079391-2026 - Inspection Result: Approved

Violation: Cold Holding

• **Time/Temperature Control for Safety Food, Cold Holding**

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
- Observed food items in cold holding unit measuring above 41°F. Location: Refrigerated make table and walk in cooler
- Food Items: Diced onions (46°F), shredded white cheese (48°F), sliced yellow cheese (48°F)

Violation: Designated Areas

• **Designated Areas-Employee Accommodations for eating/drinking/smoking**

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
- Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Storage

• **In-Use Utensils, Between-Use Storage**

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under ☐ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57°C (135°F) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
- Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Single use cup
- Location: Rear bulk food storage tub (sugar)
- Condition of the Location: Single use cup was stored submerged inside of food. Instructed person in charge to switch to scoop and store handle up.

Quesadilla Way LLC - 5305 GIBSON BLVD SE

Food Establishment Class C

Date: 08/31/2026 - #: CAC-Food-082894-2026 - Inspection Result: Unsatisfactory Re-Inspection required

The food service establishment has been allowed to re-open under unsatisfactory following submission of photographic evidence and in person walk through for verification of corrected violations by the Environmental Health Department.

The facility has corrected:

- Time/Temperature Control for Safety Food, Cold Holding (Cold holding units are holding under 41°F as required)
- Cold Holding Capacities-Equipment
- (Previous out of temperature refrigerated units have been replaced)
- Separation-Storage (Chemicals have been properly moved and stored)
- Handwashing Cleanser, Availability (Hand cleanser is now available at the handwashing station)
- Food Storage, Prohibited Areas (Food has been removed off the floor and properly stored)
- Temperature Logs (Are being utilized for cold holding)

Facility will be subject to a follow-up inspection within five (5) business days of reopening and operating.

Unsatisfactory sticker was placed on facility door in prominence for consumers.

QUICK TRACK 87 - 10320 CANDELARIA RD NE - Approved

QUICK TRACK 87 - 10320 CANDELARIA RD NE

Retail Food Establishment Class 3

Date: 09/04/2026 - #: PT0157429 - Inspection Result: Approved

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
- Observed nonfood contact surface with the buildup of soil residues. The surface was located in the ice cream freezer the condition of the surface was frost and

ROYAL BUFFET RESTAURANT - 6111 SAN MATEO BLVD NE - Approved**ROYAL BUFFET RESTAURANT - 6111 SAN MATEO BLVD NE****Food Establishment Class C****Date: 08/31/2026 - #: CAC-Food-083041-2026 - Inspection Result: Approved**

Corrective action taken during the routine inspection resulted in the facility being upgraded from a Conditional Approved Status to Approved Status. The person in charge promptly addressed and corrected most of the violations noted in the original inspection report while on site. The following priority and priority foundation violations were corrected on site:

- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition. Observed employee place date marking label on panned tuna during inspection.
- Time/Temperature Control for Safety Food, Hot Holding. Observed PIC immediately instruct employees to remove hot panned food items found out of hot holding temperatures and to reheat the items during inspection.
- Heating Capacities-Equipment. Observed PIC instruct employees to remove secondary pan from steam table lines, observed employees removing pans from the steam table lines during inspection.

ROYAL BUFFET RESTAURANT - 6111 SAN MATEO BLVD NE**Food Establishment Class C****Date: 08/31/2026 - #: RT-FOODEST-067641-2026 - Inspection Result: Conditional Approved****Violation: Equipment, Food Contact Surfaces, and Utensils Clean****• Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils - Grease/Soil Deposits, Cooking Equipment**

- Food-contact surfaces of cooking equipment and pans shall be cleaned at a frequency to prevent the buildup of soil residues and encrusted grease deposits. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed food-contact surface of cooking equipment and pans with encrusted grease deposits or of soil residues. Food contact surface type: Char broiler grill. Location: grill area. Condition of the Location: observed a buildup of grease, ash and soil deposits on the grill grates, stainless steel exterior side, top, front and back panels.

Violation: Hot Holding & Reheating**• Time/Temperature Control for Safety Food, Hot Holding**

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.

Observed time/temperature control for safety food not hot held at 135°F or above at the time of inspection. Food Item(s): Baked Crab Meat and Grilled chicken and pepper mix,

Food Temperature: Baked Crab Meat: 122°F, Grilled chicken and pepper mix: 113°F.

• Heating Capacities-Equipment

- The ability of equipment to heat foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate equipment with enough capacity to meet the heating demands of the operation. Instructed PIC to make repairs necessary to have adequate equipment or must acquire sufficient equipment to do so.

Observed insufficient equipment to properly heat food. Location: Steam tables on buffet line/consumer self-serve areas.

Condition: Observed panned food items were double panned on steam table lines at the time of inspection.

Violation: Date Marking and Disposition**• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition**

- Ready-to-eat, time/temperature control for safety food commercially prepared and opened, held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days.

Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility.

Observed ready-to-eat time and temperature controlled for safety food commercially prepared opened in the facility with no date marking indicators. Location: Sushi Display cooler. Food Items: minced tuna. Expiration Dates: no dates available.

Violation: Plumbing**• System Maintained in Good Repair**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions. Observed PIC was able to obtain a new faucet fixture to replace broken one. Instructed PIC to send photos and documentation to CHPD for verification when faucet has been replaced.

Observed Prep sink faucet is not maintained in good repair or is not repaired by law. Observed faucet at prep sink found in disrepair by being broken off and leaking water on the floor when turned on.

Violation: Ventilation and Hood Systems**• Ventilation Hood Systems, Drip Prevention and Adequacy**

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.
Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface. Location: grill area. Equipment: hood vents, flat top and char broiler grills.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: panned and plated food items such as sushi rolls, mixed dishes with different types of protein and vegetables. Location: consumer self service areas: steam tables and cold top display tables in sushi area.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Cold top display cooler. Food Items: Sushi rolls. Temperature: 62°F.

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.
Observed inadequate amount of lighting. Location: hood ventilation system in north side wok area. Manner: 3 light bulbs burnt out or are near burning out.

Santa Fe 3007 LLC DBA Garner Hotel- 2300 International Avenue SE AVE - Approved

Santa Fe 3007 LLC DBA Garner Hotel - 2300 International Avenue SE AVE
Food Establishment Class B
Date: 09/03/2026 - #: RT-FOODEST-056322-2025 - Inspection Result: Approved

Violation: Thawing

• Thawing Method

- Freezing prevents microbial growth in foods, but usually does not destroy all microorganisms. Improper thawing provides an opportunity for surviving bacteria to grow to harmful numbers and/or produce toxins. Food must be thawed in an approved method such as: A. under refrigeration maintaining food below forty-one (41) °F or below, B. submerged under running water at seventy (70) °F, or below with sufficient velocity to agitate and float off loose particles in the overflow, if ready-to-eat does not go above forty-one (41) °F, or if raw does not exceed forty-one (41) °F for four (4) hours including the cooking or re-cooling process C. in a microwave oven only when the food will be immediately transferred to conventional cooking facilities as part of a continuous cooking process, or when the entire, uninterrupted cooking process takes place in the microwave oven D. as part of the cooking process E. prepared for immediate service in response to an individual consumer's order Instructed PIC to retrain food employees on thawing food and PIC corrected violation by placing in the upright refrigerator.
Observed frozen time/temperature control for safety food improperly thawing. Food: Green chile Location: Inside the 3-compartment sink
Condition: Improper
Method: Was sitting submerged in standing water

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.
Observed nonfood contact surface that was not smooth. The surface was located Inside drawers and kitchen cabinets. The surface was made out of synthetic wood. The condition of the surface was water damaged, not smooth and easily cleanable.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Breakfast bar ice baths
Food Items: Green chile (60°F), sliced cheese (67°F)

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris inside dining room area drawers and to clean and sanitize all areas.
Observed buildup and debris inside dining room area drawers and drawers located in the kitchen storage.

SERGIOS BAKERY AND CAFE - 2740 WYOMING BLVD NE - Approved

Violation: Result of a Complaint

• **Complaint**

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Ventilation and Hood Systems

• **Cleaning Ventilation Systems, Nuisance and Discharge Prohibition**

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation. Condition: Hood vent filters and hood vent with grease debris buildup.

• **Ventilation Hood Systems, Filters**

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Inside main kitchen

Violation: Personal Cleanliness

• **Effectiveness-Hair Restraints**

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Inside kitchen Activity: Preparing pizzas

Violation: Hands Clean & Properly Washed

• **When to Wash**

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: Employee with gloves using cell phone, then placed hands in pockets, then continued to prepare food after wiping gloved hands on their apron.

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located inside kitchen shelving The surface was made out of stainless-steel shelving The condition of the surface was debris buildup.

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked meats, sliced deli meats, prepared vegetables, dairy products Activity of the Food: Stored, received and cooled

Violation: Result of a Complaint

• **Complaint**

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Slicer stored away with food debris buildup Location: Above prep table Condition of the Location: Substantial debris buildup.

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- Ready to eat, time and temperature control for safety food that has been commercially processed and packaged in a food processing plant shall be heated to a temperature of at least 135°F when being reheated for hot holding. Instructed PIC to reheat food to 135°F prior to replacing in hot holding, and to retrain food employees on the proper method of reheating food.

Observed commercially packaged ready to eat food not reheated to 135°F. Food Item: Marinara and meatballs in hot holding unit Pizzas stored at room temperature in display case. Food Temperature: 121 °F and pepperoni pizza 112 °F, pepperoni and green chile 107 °F, supreme pizza 106 °F, cheese pizza 115 °F

Violation: Pooled Eggs

• Pooled Eggs Prohibition

- Observed pooled eggs in the food establishment that were not being combined for a customer's order or for a batter. Location: Inside cold holding unit Number of eggs combined: estimated 6 to 8 eggs with a temperature of 52 °F

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators.

Location: Inside cold holding unit Food Items: Cooked meatballs and marinara, sliced meats, green chile sauce, cooked chicken wings Expiration Dates: None available

Violation: Cooling

• Cooling Methods

- Instructed PIC to use an alternate method of cooling to minimize the opportunity for pathogen growth; recommended to utilize one or more methods such as 1) Place the food in a shallow pan 2) Separate the food into smaller or thinner portions 3) Use rapid cooling equipment 4) Stir the food in a container placed in an ice/water bath 5) Use containers that facilitate heat transfer 6) Only partially cover product, if protected from overhead contamination.

Observed TCS food items cooling in a method that does not facilitate the necessary rate of heat transfer to cool the food in an appropriate time frame. Location: Inside cold holding unit Food Items: Green chile sauce Manner: Stored inside cold holding unit covered with a temperature of 115 °F.

Violation: Ventilation and Hood Systems

• Cleaning Ventilation Systems, Nuisance and Discharge Prohibition

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation. Condition: Hood vent filters and hood vent with grease debris buildup.

• Ventilation Hood Systems, Filters

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Inside main kitchen

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Prep cold holding unit in front of pizza oven some items are double panned or stored above food items in cold holding unit. Food Items and Temperature: Egg mix 52 °F, Cooked meat 62 °F, sliced mushrooms 67 °F, chopped onion 57 °F, cut pineapple 55 °F, shredded cheese 62 °F, sliced ham 53 °F, sliced sausage 52 °F, sliced pepperoni 53 °F, pickled jalapenos 60 °F.

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Drinks stored above dough prep table

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings. Employee cell phone on prep table.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food;

clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints. Observed a food employee without proper hair restraints. Location: Inside kitchen Activity: Preparing pizzas

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided facility with invoice via email to pay permit.
Observed that the facility was operating with an expired permit.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee not wash hands when required. Condition: Employee with gloves using cell phone, then placed hands in pockets, then continued to prepare food after wiping gloved hands on their apron.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located inside kitchen shelving. The surface was made out of stainless-steel shelving. The condition of the surface was debris buildup.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked meats, sliced deli meats, prepared vegetables, dairy products. Activity of the Food: Stored, received and cooled

SERGIOS BAKERY AND CAFE - 2740 WYOMING BLVD NE

Retail Food Establishment Class 5

Date: 09/02/2026 - #: COM-RET-084185-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food.
Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Sugar, flour, etc. Location: Food Containers

Violation: Maintenance

• Maintaining Premises, Unnecessary Items and Litter

- The presence of unnecessary articles, including equipment which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.
Observed items on the premises of the food establishment that is no longer used or is non-functional. Location: Inside bakery. Items list: Ovens bakery equipment. Condition of the items: Non-functional and dirty

Violation: Surface Not Clean

• Nonfood-Contact Surfaces, Easily Cleanable

- Hard-to-clean areas could result in the attraction and harborage of insects and rodents and allow the growth of foodborne pathogenic microorganisms. Well-designed equipment enhances the ability to keep nonfood-contact surfaces clean. Instructed PIC to replace the material with one that is easily cleanable or to modify the existing material so that it is easily cleanable.
Observed nonfood contact surface that was not easily cleanable. The surface was located underneath three compartment sink. The surface was made out of concrete flooring. The condition of the surface was damaged

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule

and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Bread slicer Location: In bakery area Condition of the Location: Food Debris buildup

Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: rolling pins etc. Location: Inside bus tub Condition of the Location: Substantial food debris buildup

Shalom Assisted Living - 8711 DELAMAR AVE NE - Approved

Shalom Assisted Living - 8711 DELAMAR AVE NE

Food Establishment Class C

Date: 08/31/2026 - #: RT-FOODEST-082952-2026 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Sugar, flour Location: Inside kitchen cabinets

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.

Observed nonfood contact surface that was not smooth. The surface was located inside kitchen cabinets The surface was made out of synthetic wood. The condition of the surface was damaged

Violation: Toilet Facilities

• Toilet Rooms, Enclosed

- Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.

Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

Violation: Hot & Cold-Water Availability & Pressure

• Water Capacity-Quantity and Availability

- Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods.

Observed facility with insufficient hot water. Location: Hand washing sink inside kitchen Manner: Hot water knob does not work once turned no hot water available at hand washing sink

Shalom Assisted Living - 8711 DELAMAR AVE NE

Food Establishment Class C

Date: 08/31/2026 - #: PT0160662 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75F with a contact time of 7 seconds.

The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for sanitizer utilized it must be at the manufacturer specified concentration and temperature range with a contact time of 30 seconds.

Observed chemical solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Type of Sanitizer: Chlorine

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Sugar, flour Location: Inside kitchen cabinets

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.
Observed nonfood contact surface that was not smooth. The surface was located inside kitchen cabinets The surface was made out of synthetic wood. The condition of the surface was damaged

Violation: Toilet Facilities

• Toilet Rooms, Enclosed

- Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.
Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.
Observed food temperature measuring devices were not provided or readily accessible.

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.
Observed no handwashing cleanser available at handwashing sink(s). Location: Hand washing sink inside kitchen and employee restroom

Violation: Hot & Cold-Water Availability & Pressure

• Water Capacity-Quantity and Availability

- Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods.
Observed facility with insufficient hot water. Location: Hand washing sink inside kitchen Manner: Hot water knob does not work once turned no hot water available at hand washing sink

Violation: Hands Clean & Properly Washed

• Where to Wash

- Food employees shall only clean their hands in a handwashing sink or approved automatic handwashing facility. Effective handwashing is essential for minimizing the likelihood of the hands becoming a vehicle of cross contamination. It is important that handwashing be done only at a properly equipped handwashing facility in order to help ensure that food employees effectively clean their hands and to prevent the contamination of food preparation sinks. Food employee re-washed hands in a designated hand sink. Instructed PIC to retrain employees on proper hand-washing procedures.
Food employee was observed washing hands in not in a hand-washing sink. Location: Washing hands at three compartment sinks

ST CHARLES BORROMEO SCHOOL - 1801 HAZELDINE AVE SE – Approved

Violation: Testing Devices

• Food Temperature Measuring Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed ambient food temperature measuring devices were not provided or readily accessible inside freezer.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located inside the reach in cooler and inside the storage drawers. The condition of the surface was soiled with debris buildup.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair. Observed the ac vent cover to be in disrepair by not being fully secured or attached to duct.

ST CHARLES BORROMEO SCHOOL - 1801 HAZELDINE AVE SE

Food Establishment Class C

Date: 08/31/2026 - #: RT-FOODEST-044138-2026 - Inspection Result: Approved

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on kitchen floors and to clean and sanitize on a regular basis.
Observed buildup and debris on the kitchen floor and under the kitchen island.

ST THERESE PAROCHIAL SCHOOL - 311 SHROPSHIRE AVE NW - Approved

ST THERESE PAROCHIAL SCHOOL - 311 SHROPSHIRE AVE NW

Food Establishment Class C

Date: 09/03/2026 - #: RT-FOODEST-025931-2025 - Inspection Result: Approved

Violation: Hot & Cold-Water Availability & Pressure

• Water Pressure

- Inadequate water pressure could lead to situations that place the public health at risk such as improper handwashing or equipment operation. Water under pressure must be provided to all fixtures, equipment, and nonfood equipment that are required to use water.
Observed facility with inadequate water pressure Location: hand wash station.
Manner: hand wash hot side with very low water pressure is insufficient.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the on the floors under and behind the freezer and refrigerators and side of the three-compartment sink. Drains under the three-compartment sink with debris buildup.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: TCS Lunch food items from canteen.

STRIPES BURRITO LLC - 801 JUAN TABO BLVD NE - Approved

STRIPES BURRITO LLC - 801 JUAN TABO BLVD NE

Food Establishment Class C

Date: 09/03/2026 - #: RT-FOODEST-084666-2026 - Inspection Result: Approved

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Throughout kitchen area

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: Wrist jewelry and rings with gems

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Main cook line Activity: Actively working with open food items

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on the spray faucet for three compartment sink The condition of the surface was soil debris buildup

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed Ceiling in disrepair by large hole cut into ceiling for repair work

STRIPES BURRITO LLC - 801 JUAN TABO BLVD NE

Food Establishment Class C

Date: 09/03/2026 - #: RT-FOODEST-073172-2025 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine, Tomato Slicer, and Tomato dicer Location: Back prep area of the kitchen Condition of the Location: Yellow buildup on inside of ice machine and dried food debris on inside of ice machine bin

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.

Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Chicken Tenders

Food Temperature: 96°F

Violation: Pooled Eggs

• Pooled Eggs Prohibition

- Raw eggs may only be combined in the amount and in response to a customer's order, or for the preparation of a batter to be cooked immediately. Instructed the PIC that the identified pooled eggs must not be used in further food preparation and that raw eggs shall only be combined for batters or in response to a customer's order.

Observed pooled eggs in the food establishment that were not being combined for a customer's order or for a batter. Location: Walk in cooler Number of eggs

combined: Approx. 90 Quarts

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Throughout kitchen area

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Walk in cooler Food Items: Raw Chicken 48°F, Carne Adovada 48°F, Diced Onions 50°F, Barbacoa 51°F, Diced Potatoes 52°F, Milk 49°F, Pooled Eggs 51°F, Raw Pork 52°F, Salsa 50°F

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry

Observed: Wrist jewelry and rings with gems

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Main cook line Activity: Actively working with open food items

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on the spray faucet for three compartment sink The condition of the surface was soil debris buildup

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed Ceiling in disrepair by large hole cut into ceiling for repair work

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: stored

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

SUBWAY 6132 - 5850 EUBANK BLVD NE, E 20 - Approved

SUBWAY 6132 - 5850 EUBANK BLVD NE, E 20

Food Establishment Class C

Date: 09/04/2026 - #: RT-FOODEST-038447-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Knife Container Concentration: 0ppm

Violation: Installation

• Handwashing Sinks-Numbers and Capacities

- Hands are a common vehicle for the transmission of pathogens to foods in an establishment. Hands can become soiled with a variety of contaminants during routine operations. The transfer of contaminants can be limited by providing food employees with handwashing sinks that are properly equipped and conveniently located. Hand washing sinks must be installed as required by law, and handwashing sinks shall be located to allow convenient use by employees in food preparation, food dispensing, and warewashing areas, and in or immediately adjacent to, toilet rooms. Instructed PIC to install handwashing sink within 30 days. PIC must contact CHPD inspector when hand washing sink is installed.

Observed facility with an inadequate number of handwashing sinks necessary for the convenient use by employees. Location: Prep and warewashing area Condition: Observed no hand washing sink in prep and warewashing area at the time of inspection.

Violation: Toilet Facilities

• Toilet Room Receptacle, Covered

- Instructed to provide a covered receptacle for sanitary napkins.

Observed in a toilet room used by females, no covered receptacle.

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.

Observed food stored improperly less than six (6) inches off the floor. Location: Walk in freezer Food Item: Chicken breast

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.

Observed inadequate amount of lighting. Location: Storage room by bathroom Manner: Light broken

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under ☐ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Portion cup Location: prep top cooler Condition of the Location: portion cup stored in food container with all sides touching the food product inside

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: Not air dried and stacked wet with moisture in between pans

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.

Observed cleaned single-service and single-use articles stored improperly. Single-service and single-use articles was not stored six (6) inches above the floor. Single-service and single-use articles Type: Cup lids and Food boxes Storage Method: Stored directly on the floor Location: storage room by bathroom

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located in the cabinet under the soda machine The condition of the surface was Soil debris buildup

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair. Observed Ceiling in disrepair by missing ceiling tile in back kitchen by walk in cooler

SUSHI FREAK - 2200 LOUISIANA BLVD, 8 D - Approved

SUSHI FREAK - 2200 LOUISIANA BLVD, 8 D

Food Establishment Class C

Date: 09/04/2026 - #: RT-FOODEST-083231-2026 - Inspection Result: Approved

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed wiping cloths used for cleaning.

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

SUSHI FREAK - 2200 LOUISIANA BLVD, 8 D

Food Establishment Class C

Date: 09/02/2026 - #: CAC-Food-083855-2026 - Inspection Result: Unsatisfactory Re-Inspection required

3-502.11 - Variance Requirement

HACCP is not used. Variance (vinegar) is not used as a method of preservation. It is used for taste. We are now using the proper Time as a public health control log for sushi rice. HACCP is not used.

8-103.12(A), (C) - Conformance with Approved Procedures, Records

PIC Printed time as a public health control documentation and has purchased timers. Utilizing a timer and a Time as a Public Health Control Log to control the time the rice is out of temperature control.

3-501.16(A)(2), (B) - Time/Temperature Control for Safety Food, Cold Holding

PIC verified cold holding unit is working properly. PIC has also placed ambient air thermometers inside cold holding units and printed cold holding logs. Adding ice under the food (all fish, shrimp and vegetables) to maintain temperature below 41 °F.

4-501.114, 4-703.11(C) - Manual and Mechanical Warewashing Equipment, Chemical Sanitization- Temperature, pH, Concentration and Hardness

The Dishwashing machine is now operating with a chlorine concentration of 100 ppm at 128 °F. Instructed employees to mix quaternary sanitizer and test it to ensure at least 300ppm for all other food contact surfaces, including prep tables and dining tables.

3-501.17, 3-501.18 - Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

Instructed employees in proper labeling of ready-to-eat food with date created. Regular daily inspections by management will ensure this is being done.

SUSHI FREAK - 2200 LOUISIANA BLVD, 8 D

Food Establishment Class C

Date: 08/31/2026 - #: PT0146892 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55F.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Automatic dish machine Concentration: Zero parts per million Temperature: 128 °F

The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Red sanitizer buckets Concentration and Temperature: Zero parts per million 77°F

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed wiping cloths used for cleaning.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Walk in refrigerator Food Items: Mango sauce, unidentified sauce, sliced cucumbers, sliced onion rings, seaweed, fish eggs, and coleslaw mix Expiration Dates: None available

Violation: Conformance with Approved Procedures, Records

• Conformance with Approved Procedures, Records

- When EHD grants a variance or HACCP for a facility, the facility must keep a record of that variance or HACCP on file at the facility at all times, and produce it during inspection. The facility must also be able to produce supporting records such as monitoring logs and standard operating procedures that are used in the processes outlined in the variance or HACCP. Instructed PIC to provide the records to EHD and keep them on file at the establishment at all times.

Observed that the facility has a variance or HACCP granted by EHD but is unable to provide records that demonstrates the facility is actively monitoring critical control points. Approved Variance/HACCP: Time as a public health control verified by environmental health consumer health supervisor

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Knowledge Tested: Upon arrival to complete inspection asked person in front if there was a manager available both stated no manager available only two employees available at the time. Inspector informed so you have no one in charge then Emily stated no I am in charge, when speaking with the owner Hayden the cashier handled most of the interaction with owner, then Hayden left stated Artemio was in charge. Asked Artemio about food temperatures hot and cold did not know any of food temperatures, asked about chlorine and quaternary ammonium sanitizers did not know either of the sanitizer's proper parts per million. Asked about food borne illnesses did not know any of the food borne illnesses.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed toilet inside men's restroom is not maintained in good repair or is not repaired by law. Observed toilet inside men's restroom found in disrepair by constantly running and flushing repeatedly

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at three compartment sink, soda machine floor drain, and main kitchen line floor drain.

Violation: Variance

• Variance Requirement

- Specific food processes that require a variance have historically resulted in more foodborne illness than standard processes. They present a significant health risk if not conducted under strict operational procedures. A food establishment must obtain a variance from EHD prior to using food additives or adding components (vinegar) as a method of preservation. Instructed PIC to submit a written request for a variance, that no additives or adding components (vinegar) can be added to food as a method of preservation until such time the variance is granted, and that the food previously added to as a method of preservation must not be used in the operations of the food establishment.

Observed facility using food additives or adding components (vinegar) as a method of preservation without a variance issued by EHD. Food Items: White rice Additive or Component: (vinegar) as a method of preservation

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer. Observed food items in cold holding unit measuring above 41°F. Location: Cold holding make table inside kitchen Food Items and Temperature: Cooked shrimp at 54 °F, raw fish at 47 °F, Tuna mix at 55 °F, coleslaw mix 47 °F, sliced cucumber 47 °F, raw fish at 48 °F, chopped green chile 49 °F, cucumber salad 49 °F

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas. Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures. Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Inside cold holding Thermometer Location: None available

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris underneath cold holding units, behind cooktop, on shelving on main kitchen line and in back of facility underneath shelving and on shelving and to clean and sanitize all areas. Observed buildup and debris underneath cold holding units, behind cooktop, on shelving on main kitchen line and in back of facility underneath shelving and on shelving.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Observed nonfood contact surface with the buildup of soil residues. The surface was located inside stainless steel cabinets The surface was made out of stainless steel The condition of the surface was substantial food debris buildup.

THE MELTING POT - 2201 UPTOWN LOOP RD NE, #1A – Closure Re-Inspection Required

THE MELTING POT - 2201 UPTOWN LOOP RD NE, #1A

Food Establishment Class C

Date: 08/31/2026 - #: RT-FOODEST-081167-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Red sanitizer buckets and three compartment sink Concentration: Zero parts per million Temperature:

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Vegetable dicer and cutting board Location: Inside kitchen Condition of the Location: Vegetable dicer stored away with food debris buildup. Cutting board with vapping device stored on top of cutting board in food preparation area.

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray

bottles Alleged Material: Quat sanitizer

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps.

Location: Inside water heater storage closet, along shelving in dish ware storage area, and underneath table next to soda dispensing machine on glue boards.

Pest Type: Cockroaches

Pest Condition: Both living and dead

Number of Pests Present: estimated 40 to 50

• Tracking Powders, Pest Control and Monitoring, Toxic Powder Not Allowed

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by routinely inspecting incoming shipments of food and supplies, routinely inspecting the premises for evidence of pests, and eliminating harborage conditions. Instructed PIC to provide EHD with their standard operating procedures and pest control plan.

Observed the facility has inadequate procedures to effectively control pests. Current Policy: PIC provided invoices and bill no findings or reports on what preventative measures are being taken and what was seen.

Violation: Corrective Actions

• Infestation Corrective Actions: Clean Up After Rodents

- Food Establishments shall remove rodent droppings in accordance with current Centers for Disease Control and Prevention recommendations published on the Enforcement Authority's website. Instructed PIC that the following steps must be taken when cleaning rodent droppings: <https://www.cdc.gov/healthypets/pets/wildlife/clean-up.html> Clean up rodent urine and droppings Step 1: Put on rubber or plastic gloves. Step 2: Spray urine and droppings with bleach solution or an EPA-registered disinfectant until very wet. Let it soak for 5 minutes or according to instructions on the disinfectant label. Step 3: Use paper towels to wipe up the urine or droppings and cleaning product. Step 4: Throw the paper towels in a covered garbage can that is regularly emptied. Step 5: Mop or sponge the area with a disinfectant. Clean all hard surfaces including floors, countertops, cabinets, and drawers. Follow instructions below to clean and disinfect other types of surfaces. Step 6: Wash gloved hands with soap and water or a disinfectant before removing gloves. Step 7: Wash hands with soap and warm water after removing gloves or use a waterless alcohol-based hand rub when soap is not available and hands are not visibly soiled. Observed substantial number of rodent droppings. Location: In back storage room leading to back door Manner: Substantial rodent dropping underneath clutter and shelving

Food Establishments shall hire a professional pest control applicator licensed through the New Mexico Department of Agriculture to treat any Infestation. Instructed PIC to hire a pest control company to treat the active infestation and to provide their pest control records to EHD prior to requesting reinspection.

Observed multiple live cockroaches in floor drains, glue boards behind and underneath cold holding units and in clutter in back storage room

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed wiping cloths used for cleaning.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators.

Location: Walk in refrigerator and standing cold holding unit Food Items: Prepared potatoes corn on the cob and sauces inside walk in refrigerator vegetarian balls and corn on the cob in standing cold holding unit Expiration Dates: None available

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Knowledge Tested: Asked PIC proper parts per million for quaternary ammonium sanitizer and chlorine sanitizers was unaware of proper parts per million. Asked about cold holding stated 35 °F which is 41 or below, asked about food borne illness was not aware of the six reportable food borne illnesses. Also, facility had multiple priority violations.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed men's hand-washing sink is not maintained in good repair or is not repaired by law. Observed men's hand-washing sink found in disrepair by unable to completely shut off. Also, floor drains inside kitchen with food debris buildup and substantial number of dead roaches

• **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap underneath three compartment sink leading to floor drain.

Violation: Training Records

• **Food Handler Cards**

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Ventilation and Hood Systems

• **Ventilation Hood Systems, Filters**

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Inside kitchen above make line

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• **Food Storage Containers Identified with Common Name of Food**

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: 18 qt food container possibly flour and starch Location: Single use storage rack in back of facility.

Violation: Maintenance

• **Maintaining Premises, Unnecessary Items and Litter**

- The presence of unnecessary articles, including equipment which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.

Observed items on the premises of the food establishment that is no longer used or is non-functional. Location: In back storage room areas cabinets in servers' area, cashier area, inside employee restroom Items list: electronics, decor, chairs, bikes, unused glass ware, paint, shop vacs, tools, buttons, dispensers, pipes, laundry bags, dish racks, bar mats, spray bottles, Condition of the items: dirty, non-functional and disorganized

Violation: Cold Holding

• **Time/Temperature Control for Safety Food, Cold Holding**

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Make salad line Food Items and Temperature: Boiled eggs 61 °F, salad dressing 55 °F, bleu cheese crumbles 59 °F, salsa 47 °F. Employee stated cold holding unit was not on. Employee turned on cold holding unit

Violation: Testing Devices

• **Sanitizing Solutions, Testing Devices**

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Designated Areas

• **Designated Areas-Employee Accommodations for eating/drinking/smoking**

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

• **Designation-Dressing Areas and Lockers**

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Functionality and Accuracy

• **Temperature Measuring Devices, Ambient Air and Water-Accuracy**

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures.

Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Walk in refrigerator, cold holding units Thermometer Location: None available

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris underneath cold holding units, underneath ice machine, underneath automatic dish machine, in back storage room with miscellaneous items and to clean and sanitize all areas.

Observed buildup and debris underneath cold holding units, underneath ice machine, underneath automatic dish machine, underneath shelving, underneath prep tables and back storage room with miscellaneous items.

Violation: Physical Facilities, Construction and Repair

• **Floor and Wall Junctures, Coved, and Enclosed or Sealed**

- When cleaning is accomplished by spraying or flushing, coving and sealing of the floor/wall junctures is required to provide a surface that is conducive to water flushing. Grading of the floor to drain allows liquid wastes to be quickly carried away, thereby preventing pooling which could attract pests such as insects and rodents or contribute to problems with certain pathogens such as *Listeria monocytogenes*.

Observed floor and wall juncture covering with substantial gaps and holes underneath three compartment sink area and automatic dish machine area.

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Raw meats, prepared vegetables, dairy products Activity of the Food: Stored, received

Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

THE MELTING POT - 2201 UPTOWN LOOP RD NE, #1A

Food Establishment Class B

Date: 08/31/2026 - #: RT-FOODEST-081168-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Red sanitizer bucket Concentration: Zero parts per million Temperature: 68 °F

Violation: Pest Control

• **Removing Dead or Trapped Birds, Insects, Rodents and other Pest**

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed dead pests allowed to accumulate. Location: Liquor storage closet

Pest Type: cockroach Pest Condition: dead

Number of Pests Present: 3

Violation: Use Limitations

• **Wiping Cloths, Use Limitation**

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed wiping cloths used for cleaning.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Mason jars Location: Liquor storage room and bar top

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Hand washing sink

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup underneath three compartment sink and automatic dish machine and to clean and sanitize all areas.

Observed buildup and debris underneath three compartment sink and automatic dish machine

TWINS A & V DAYCARE CENTER - 1216 4TH ST SW - Approved

TWINS A & V DAYCARE CENTER - 1216 4TH ST SW

Food Establishment Class C

Date: 08/31/2026 - #: RT-FOODEST-011171-2026 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

repeat violation not having a certified Food Protection manager certificate please obtain and send a picture to EHD to come into compliance

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize.

Observed buildup and debris on the ceiling vent covers in kitchen area.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed kitchen area above stove in disrepair by ceiling vent cover coming off ceiling.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Facility needs to have Cold holding, Hot Holding, Cooling and equipment logs as well as document on a daily basis on these logs for the activities that are occurring when cooking, prepping and cooling of foods to serve to the kids.

cold holding, hot holding, equipment and cooling logs were given at the time of the inspection being conducted by the inspector to the pic

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

Walgreens 07442 - 1201 UNSER BLVD SW - Approved

Walgreens 07442 - 1201 UNSER BLVD SW

Retail Food Establishment Class 3

Date: 09/04/2026 - #: PT0052218 - Inspection Result: Approved

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located retail area/pharmacy and inside walk in cooler. The surface was made out of cardboard, plastic and metal. The condition of the surface had black debris buildup on cardboard boxes inside walk in cooler and debris buildup on back door next to the pharmacy area/retail area.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements for food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: walk in cooler shelves and retail shelves. Location: inside the interior of walk-in cooler on floor and on shelves and in the retail, area shelves. Condition of the Location: Debris buildup on shelves.
