Corrective Action Compliance does not represent a full routine health inspection. Instead, it reflects that a facility has taken specific corrective actions in response to violations identified during an inspection. These actions may be taken during the inspection or afterward, and the Corrective Action Compliance allows for the facility's grade or status to be updated based on those corrections. Corrective actions may be demonstrated through documentation such as photos, videos, receipts, work orders, site visits, or both verifiable means showing that the violation has been addressed and compliance has been achieved.

APPROVED

An "Approved" grade indicates that a food establishment that has demonstrated compliance with the standards in the Food Code the Food Service and Retail Ordinance, other industry standards, and other laws and has received a Grade of Approved and is able to operate.

CONDITIONAL APPROVED

A "Conditional Approved" grade is issued when a facility is found to have violations of the Food Code, the Food Service and Ret Ordinance, industry standards, or applicable laws. While the facility may continue operating, it must complete specific corrective actions to address the violation A yellow sticker is placed alongside the green "Approved" sticker.

UNSATISFACTORY

An "Unsatisfactory" grade indicates that a facility has not met the required standards but is allowed to continue operating temporarily while corrective actions are completed. A red "Unsatisfactory" sticker will be displayed at the facility for the duration of this grade. This is a temporary status and requires timely follow-up to verify compliance.

CLOSED

A "Closed" grade is assigned when violations pose a significant risk to public health, requiring the facility to immediately cease operations. The facility must remain closed until corrective actions have been completed and verified. A facility with this grade will display an orange "Closed" sticker for the duration of the closure.

ABC PRESCHOOL – 801 98TH ST SW – Approved

ABC PRESCHOOL – 801 98TH ST SW
Food Establishment Class C
Date: 09/22/2026 - #: RT-FOODEST-008020-2025 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed Kitchen area in disrepair by having a hole in the wall with wires hanging outside of the hole.

Violation: Records

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

ALEBRIJES FOOD LLC - 5701 Gibson BLVD SE - Approved

ALEBRIJES FOOD LLC - 5701 Gibson BLVD SE
Mobile Food Unit Class C
Date: 09/21/2026 - #: RT-MBFOOD-061145-2025 - Inspection Result: Approved

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Reach in cooler
Food Items: Shredded cheese Expiration Dates: Not available

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.
Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Wiping cloth bucket
Alleged Material: Chlorine sanitizer

BUFFALO WILD WINGS 613 - 1700 TOWNE CENTER LN SE - Approved

BUFFALO WILD WINGS 613 - 1700 TOWNE CENTER LN SE
Food Establishment Class C
Date: 09/23/2026 - #: CAC-Food-090674-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Facility has been upgraded to approved status following the correction of the following violations during inspection by the Environmental Health Department. The facility has corrected:
- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition (Facility dated all food items previously missing dates and discarded food items exceeding the 7-day limit.)

BUFFALO WILD WINGS 613 - 1700 TOWNE CENTER LN SE
Food Establishment Class C
Date: 09/23/2026 - #: COM-FOODES-090575-2026 - Inspection Result: Conditional Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine interior by chute Location: Kitchen
Condition of the Location: Soiled with black like and slimy residue

Violation: Pest Control

• Controlling Pests, Inspection/Harborage

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by routinely inspecting incoming shipments of food and supplies, routinely inspecting the premises for evidence of pests, and eliminating harborage conditions. Instructed PIC to provide EHD with their standard operating procedures and pest control plan.
Observed the facility has inadequate procedures to effectively control pests. Current Policy: Facility has pest control operator but needs further treatment to treat for flying insects observed in kitchen area by drains and rear receiving door.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on ensuring the proper disposition of food items. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food held within the establishment exceeding the seven (7) day limit. Location: Walk-in cooler and upright cooler at pick up counter
Food Items: Ranch Expiration Dates: 9/19/26

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components. Observed equipment not maintained in good repair. Location: Kitchen
Type of Equipment: Walk-in freezer (condenser) Condition of the equipment: Condenser appears to be freezing over as heavy ice and frost is forming over both fan covers.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drains next to the water filtration system and ice machine.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the kitchen floors, floor drains under make line and on the walls in the dish pit area.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located on sauce pump station / surroundings, fryer area exteriors, dich machine exterior, reach in coolers and clean dish storage tubs. The condition of the surface was soiled with grease, food residue and soil accumulation.

BUFFALO WILD WINGS 613 - 1700 TOWNE CENTER LN SE
Food Establishment Class B
Date: 09/23/2026 - #: PT0143668 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Employees shall store their personal care items in proper storage facilities. Instructed PIC to move employee belongings to an approved location.
Observed employee personal care items stored incorrectly. Location: Directly on top of equipment in bar.

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.
Observed no handwashing cleanser available at handwashing sink(s). Location: Handwashing sink in bar area

Violation: Sewage and Waste Water

• Conveying Sewage

- Sewage shall be conveyed to the point of disposal through an approved sanitary sewage system or other system, including use of sewage transport vehicles, waste retention tanks, pumps, pipes, hoses, and connections that are constructed, maintained, and operated according to law.
Observed a single drain in bar is backed up and not free flowing to properly convey waste water.

CALIFORNIA DEL NORTE INC - 1415 4TH ST SW, H - Approved

CALIFORNIA DEL NORTE INC - 1415 4TH ST SW, H
Mobile Food Unit Class A
Date: 09/25/2026 - #: CAC-Food-091506-2026 - Inspection Result: Approved

. Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: reach in freezers Location: inside facility Condition of the Location: old ice cream/debris build up inside reach in freezers
pic cleaned inside reach in freezers and resolved violation

Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: inside facility Type of Equipment: reach in freezers Condition of the equipment: Broken Gaskets and lids on multiple reach in freezers at the facility
pic resolved by disposing of freezers with bad gaskets

Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place. Location: inside warehouse/facility observed mice dropping throughout the facility.
instructed pic that a closure for excessive mice droppings were seen at the time of the inspection
pic cleaned all mice dropping and had a pest control company spray for mice and other pests

The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.

Observed holes or other gaps in the structure of the facility. Location: walls, roof and on door and roll up gates Size: holes are of all different sizes

pic sprayed foam in hole areas in roof and walls

Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed build up and debris throughout the whole facility on furniture on walls, ceilings, and floors throughout.
pic cleaned throughout whole facility
imminent health hazard resolved
now back into green approved status facility is now allowed to remove sticker and a new green sticker will be placed on front door

CALIFORNIA DEL NORTE INC - 1415 4TH ST SW, H
Retail Food Establishment Class 4
Date: 09/21/2026 - #: COM-RET-092636-2026 - Inspection Result: Closure Re-Inspection Required

Violation: Result of a Complaint

- **Complaint**

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: reach in freezers Location: inside facility Condition of the Location: old ice cream/debris buildup inside reach in freezers

Violation: Physical Facilities, Cleaning

- **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris throughout the whole facility on furniture on walls, ceilings, and floors throughout.

Violation: Physical Facilities

- **Exterior Walls and Roofs, Protective Barrier**

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.
Observed holes or other gaps in the structure of the facility. Location: walls, roof and on door and roll up gates Size: holes are of all different sizes

Violation: Pest Control

- **Controlling Pests, Inspection/Harborage**

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.
Observed pests in the facility with no control methods in place. Location: inside warehouse/facility observed mice dropping throughout the facility. instructed pic that a closure for excessive mice droppings were seen at the time of the inspection
instructed pic to have a pest control company conduct visit and to call inspector once pest control and cleaning of mice droppings have been resolved in order to open facility back up.

Violation: Maintenance and Operation

- **Good Repair and Proper Adjustment-Equipment**

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.
Observed equipment not maintained in good repair. Location: inside facility Type of Equipment: reach in freezers Condition of the equipment: Broken Gaskets and lids on multiple reach in freezers at the facility

CALVARY ALBUQUERQUE - 6051 WINTER HAVEN NW - Approved

CALVARY ALBUQUERQUE - 6051 WINTER HAVEN NW
Food Establishment Class C
Date: 09/22/2026 - #: PT0154845 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for

quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Sink unit and wiping cloth container
. Concentration: 0 PPM Temperature: 74, 78 °F.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at Front ice machine discharge tubing is below the drain at the time of inspection.

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is nonabsorbent. suggestion, replace with a small stainless-steel table with a shelf.
Observed nonfood contact surface that was absorbent. The surface was located back-room area. The surface was made out of Particle board Cabinet.
The condition of the surface was damaged due to coffee dropping on the cabinet doors.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.
Observed holes or other gaps in the structure of the facility. Location: Back-room ceiling.
Size :3- 4- round duct collar uncovered and sticking out of the ceiling.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed testing kit or other device to measure the concentration of chemical sanitizing solution expired as of March 15th, 2021, august 15th, 2019

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.
Observed handwashing sink(s) without a handwashing sign. Location: Front hand wash station.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the Drains and Floors, walls. front drain back drains with debris buildup, floors under sinks and shelving with debris and soil buildup. walls by Mop station and left of the mop with soil buildup. floors around the water heater.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- When cleaning is accomplished by spraying or flushing, coving and sealing of the floor/wall junctures is required to provide a surface that is conducive to water flushing. Grading of the floor to drain allows liquid wastes to be quickly carried away, thereby preventing pooling which could attract pests such as insects and rodents or contribute to problems with certain pathogens such as Listeria monocytogenes.
Observed floor and wall juncture covering (Base Coving) missing around the dishwasher and 3-compartments sinks.

CENTRAL DESERT BEHAVIORAL HEALTH HOSPITAL - 1525 N RENAISSANCE BLVD NE - Approved

CENTRAL DESERT BEHAVIORAL HEALTH HOSPITAL - 1525 N RENAISSANCE BLVD NE
Food Establishment Class C
Date: 09/24/2026 - #: PT0155894 - Inspection Result: Approved

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends

on sufficient volume and pressure to perform its intended functions.
Observed warewashing machine is not maintained in good repair or is not repaired by law. Observed warewashing machine found in disrepair by leaking water onto the floor when in operations.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair. Observed floor tiles in dry storage area in disrepair by being cracked.

CENTURY RIO 24 - 4901 PAN AMERICAN FWY NE – Approved

CENTURY RIO 24 - 4901 PAN AMERICAN FWY NE
Retail Food Establishment Class 3

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floor in the following areas:
1. underneath popcorn maker equipment
2. underneath ice station
3. floor drains under sinks and equipment

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.
Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: packaged hot dog w/ bun
Food Temperature: 120°F

CENTURY RIO 24 - 4901 PAN AMERICAN FWY NE

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice maker Location: Bar area
Condition of the Location: Soiled with black like debris accumulation along interior walls

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at 3-compartment sink/ ice machine floor drain.

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- Floors, walls, and ceilings that are constructed of smooth and durable surface materials are more easily cleaned. Floor surfaces that are graded to drain and consist of effectively treated materials will prevent contamination of foods from dust and organisms from pooled moisture. The special requirements for carpeting materials and nonabsorbent materials in areas subject to moisture are intended to ensure that the cleanability of these surfaces is retained.
Instructed person in charge to repair flooring with non-absorbent, smooth and easily cleanable material.
Observed floors in bar area are constructed of broken and missing ceramic tiles that need to be replaced.

Cheba Hut Big Toasted Mon 2 - 115 HARVARD DR SE, B
Food Establishment Class C
Date: 09/22/2026 - #: COM-FOODES-090308-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.
Location: Make line wiping cloth bucket and dish machine
Concentration: 0 PPM

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.
Observed equipment not maintained in good repair. Location: Walk-in freezer
Type of Equipment: Door gasket
Condition of the equipment: Door gaskets are torn and causing significant frost buildup inside the walk-in freezer.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may

result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed 3-compartment sink drain pipe is not maintained in good repair or is not repaired by law. Observed sink's drain pipe to be in disrepair by having a continuous leak that needs to be repaired and brought into compliance. Also observed a similar leak on the prep sink behind the sandwich make line.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.
Observed handwashing sink(s) was observed blocked or inaccessible. Location: Rear kitchen across walk-in cooler Manner: Observed a storage container stored inside sink basin

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the kitchen and stockroom floors behind/under kitchen equipment.

CHURCHS CHICKEN #701 - 2937 SAN MATEO BLVD NE - Approved

CHURCHS CHICKEN #701 - 2937 SAN MATEO BLVD NE
Food Establishment Class C
Date: 09/25/2026 - #: COM-FOODES-091682-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is partially unsubstantiated. CHPD observed facility had pest control conducted in facility on 9/25/2026 at 4:30 am. CHPD inspector observed substantial amounts of dead cockroaches throughout facility.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine
Location: Back of house
Condition of the Location: Observed buildup of orange organic matter near ice chute.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.
Observed pests allowed to accumulate in traps. Location: Several location throughout facility Pest Type: Cockroaches
Pest Condition: Dead
Number of Pests Present: 30 plus

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Cook line
Activity: Handling cooked chicken

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee not wash hands when required. Condition: Donning new gloves and switching tasks

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Records

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

COA - Taylor Ranch Community Center - 4900 KACHINA NW - Approved

COA - Taylor Ranch Community Center - 4900 KACHINA NW
Food Establishment Class B
Date: 09/21/2026 - #: RT-FOODEST-000855-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of cooking equipment and pans shall be cleaned at a frequency to prevent the buildup of soil residues and encrusted grease deposits. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine.
Location: Kitchen serving area.
Condition of the Location: Interior ice guard and a chute with a pink like soil residue.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the Drains, floors, behind equipment storage racks.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located Kitchen. The surface was made out of Stainless steel and plastic, The condition of the surface was soiled with substantial hard water and soil buildup. Interior freezer and refrigerator with debris soil buildup.

facility resolved all violation besides still needing to acquire a certified food protection manager certificate and fixing holes in roof

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.
could not verify if roof was leaking

DOG HOUSE - 1216 CENTRAL AVE SW
Food Establishment Class C
Date: 09/22/2026 - #: COM-FOODES-090298-2026 - Inspection Result: Unsatisfactory Re-Inspection Required

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.
could not verify if roof was leaking

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: reach in coolers Food Items: chopped green chile, Sliced Tomatoes and hot dogs Expiration Dates: No dates observed on containers

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Food Separation

• Food Contact with Equipment, Utensils, and Linens

- Pathogens can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. They may also be passed on by consumers or employees directly, or indirectly from used tableware or food containers. Food must only contact surfaces of equipment and utensils that have been properly cleaned and sanitized, single-service articles, or linens that have been properly laundered. Instructed PIC that the food in contact with the unapproved source must not be used in the operation of the food establishment unless it can be made wholesome through cleaning or cooking.

Observed food contacting an unapproved surface. Location: back prep area by walk-in cooler Food Item: containers of flour and red chile Surface: scoops with handles inside containers touching food and a bag of onions on the ground

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. Location: inside reach in cooler and freezer Food Item: Corn Dogs, Hot Dogs and breaded chicken breasts

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed kitchen and room next to kitchen in disrepair by having holes in ceiling and a missing electrical plate on the wall.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Facility did not have equipment logs, hot holding or cold holding logs
inspector gave pic all logs at time of the inspection

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

DOLLAR TREE - 1405 N RENAISSANCE NE, A-B - Approved

DOLLAR TREE - 1405 N RENAISSANCE NE, A-B
Retail Food Establishment Class 3
Date: 09/24/2026 - #: PT0156300 - Inspection Result: Approved

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the bottom edges.

DOMINOS PIZZA - 1016 JUAN TABO BLVD NE, M - Approved

DOMINOS PIZZA - 1016 JUAN TABO BLVD NE, M
Food Establishment Class C
Date: 09/24/2026 - #: RT-FOODEST-049998-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Facility was in operation and did not have any buckets of sanitizer made up at time of inspection Concentration: 0 Temperature: 0

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Food service bin of cornmeal Location: west side of kitchen

Violation: Toilet Facilities

• Toilet Room Receptacle, Covered

- Instructed to provide a covered receptacle for sanitary napkins.
Observed in a toilet room used by females, no covered receptacle.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: on prep table next to prep top cooler Food Items: Pizza Sauce Temperature: 61°F

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under □□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Food service scoop Location: west side of make line Condition of the Location: Scoop stored in bin of cornmeal with handle of scoop directly touching the food product inside

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: stored

DUTCH BROS COFFEE - 2501 JUAN TABO BLVD NE
Food Establishment Class C
Date: 09/24/2026 - #: PT0160253 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: next to 3-compartment sink Condition of the Location: Brown and black organic debris buildup on inside of ice machine bin and ice shoot

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drains for ice carts

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Observed employee food items stored in walk-in cooler on top rack directly above facility food items

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: wrist jewelry

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: main production area Activity: Actively working with open food items

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed a soiled mop not in use, stored directly on the floor.

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be

established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors in facility. Observed floors to be sticky due to syrups throughout facility

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: Stored Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

FUDDRUCKERS - 4855 PAN AMERICAN FWY NE - Approved

FUDDRUCKERS - 4855 PAN AMERICAN FWY NE
Food Establishment Class C
Date: 09/22/2026 - #: PT0124504 - Inspection Result: Approved

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.
Observed evidence of pests in the facility with no control methods in place where evidence was found. Location: undercounter cabinet next to compressor unit of beverage station. Pest Type: rodent. Pest Condition: droppings observed.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed floor drain and hand washing sinks not maintained in good repair or is not repaired by law. Observed floor drain and hand washing sinks found in disrepair. The following was observed at the time of inspection:
1. observed standing water in floor drain next to flat top grill area.
2. observed center hand washing sinks in Men's restroom is slow draining.
3. observed center hand washing sink in Women's restroom is slow draining.

Violation: Personal Cleanliness

• Eating, Drinking, or Using Tobacco Products

- A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area and should be in a cup with a lid and straw.
Observed a food employee with an improper drink. Location: bottom shelf of prep top cooler.
Type of Drink: bottled beverage, not in an approved cup with a lid and straw.

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed soiled mop heads not in use, stored hanging directly on backflow prevention system at the time of inspection.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.
Observed rodent dropping allowed to accumulate in facility. Location: Chemical storage room back of house
Pest Type: Rodent droppings Pest Condition: Unknown Number of Pests Present: 10 plus

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed hand wash station located near cook line is not maintained in good repair or is not repaired by law. Observed hand wash station located near cook line found in disrepair by leaking faucet.

Violation: Hands Clean & Properly Washed

• Cleaning Procedure

- Food employees must clean their hands and exposed portions of their arms, for at least 20 seconds. Food employees shall use the following cleaning procedure in the order stated to clean their hands and exposed portions of their arms: (1) Rinse under clean, running warm water; (2) Apply an amount of cleaning compound recommended by the cleaning compound manufacturer; (3) Rub together vigorously for at least 10 to 15 seconds while: (a) Paying particular attention to removing soil from underneath the fingernails during the cleaning procedure, and (b) Creating friction on the surfaces of the hands and arms or surrogate prosthetic devices for hands and arms, finger tips, and areas between the fingers; (4) Thoroughly rinse under clean, running warm water; (5) Immediately follow the cleaning procedure with thorough drying Food handling employee re-washed and sanitized their hands.
Observed food employee washing hands incorrectly. Location: Hand wash station near prep table
Manner: Food employee did not utilize any hand cleanser while washing hands

Golden Pride Legacy LLC - 3720 JUAN TABO BLVD NE
Food Establishment Class C
Date: 09/21/2026 - #: COM-FOODES-089858-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is partially substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following

the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine and Can opener Location: Ice machine by drive through window and Can opener by smoker Condition of the Location: Black and brown buildup on inside of ice bin and dried food debris on blade of can opener

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.
Observed wiping cloths improperly used. Observed soiled wiping cloths stored on prep tables

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drain for coke machine by drive through window

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under □□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Tongs and plastic cup Location: Main cook line and dry storage Condition of the Location: tongs and cup stored with in food service pan with handle directly touching the food product.

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: not air dried and stacked wet with water in between pans

Golden Pride Legacy LLC - 3720 JUAN TABO BLVD NE
Food Establishment Class C
Date: 09/21/2026 - #: COM-FOODES-089829-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is partially substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Prep area of kitchen Concentration: 50ppm

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine and Can opener Location: Ice machine by drive through window and Can opener by smoker Condition of the Location: Black and brown buildup on inside of ice bin and dried food debris on blade of can opener

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.
Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Fried Chicken 107°F, Chicken Nuggets 114°F, Baked Chicken 117°F

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.
Observed wiping cloths improperly used. Observed soiled wiping cloths stored on prep tables

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drain for coke machine by drive through window

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Steam table main cook line Food Items: Shredded Cheese Temperature: 75°F

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under □□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Tongs and plastic cup Location: Main cook line and dry storage Condition of the Location: tongs and cup stored with in food service pan with handle directly touching the food product.

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: not air dried and stacked wet with water in between pans

HOTEL ANDALUZ - 125 2ND ST NW – Approved

HOTEL ANDALUZ - 125 2ND ST NW
Food Establishment Class C
Date: 09/22/2026 - #: PT0159977 - Inspection Result: Approved

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food commercially prepared and opened, held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded

food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food commercially prepared opened in the facility with no date marking indicators. Location: Undercounter cooler
Food Items: Ketchup
Expiration Dates: No dates available

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Undercounter cooler near cook line
Food Items: Raw sausage, raw chicken and salsa Temperature: 44°F, 52°F and 44°F

HOTEL PARQ CENTRAL - 806 CENTRAL AVE SE - Approved

HOTEL PARQ CENTRAL - 806 CENTRAL AVE SE
Food Establishment Class B
Date: 09/23/2026 - #: RT-FOODEST-076903-2025 - Inspection Result: Approved

LFL BUSINESS LLC DBA A Love For Life - 7534 BEAR CANYON RD NE
Food Establishment Class C
Date: 09/23/2026 - #: CAC-Food-090605-2026 - Inspection Result: Conditional Approved

- Manual and Mechanical Warewashing Equipment, Chemical Sanitization- Temperature, pH, Concentration and Hardness
PIC corrected on site by mixing chlorine sanitizer tested at 100 parts per million.
- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition
PIC discarded food items with no labels.
- Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination
PIC placed eggs inside a container to prevent contamination.

LITTLE BEAR COFFEE - 330 TIJERAS ST NW - Approved

LITTLE BEAR COFFEE - 330 TIJERAS ST NW
Food Establishment Class C
Date: 09/25/2026 - #: RT-FOODEST-090983-2026 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drain located under 3-compartment sink.

LITTLE BEAR COFFEE - 330 TIJERAS ST NW
Food Establishment Class C
Date: 09/24/2026 - #: RT-FOODEST-075584-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine
Location: Back of house
Condition of the Location: Extreme buildup blue and orange organic matter on interior of ice machine unit

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset. x
Observed rodent droppings allowed to accumulate in facility.
Location: Back storage room, under 3-compartment sink and under counter of barista station. Pest Type: Rodent droppings
Pest Condition: Unknown Number of Pests Present: 20 plus

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed hand wash station drain is not maintained in good repair or is not repaired by law. Observed hand wash station drain found in disrepair by slow draining.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at three floor drains located under 3-compartment sink, under counter cooler located in front of house and cash register counter.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no/expired testing kit or other device to measure the concentration of chemical sanitizing solution.

LITTLE CAESARS 511 - 2801 EUBANK BLVD NE - Approved

LITTLE CAESARS 511 - 2801 EUBANK BLVD NE
Food Establishment Class C
Date: 09/24/2026 - #: COM-FOODES-090693-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Ventilation and Hood Systems

• Mechanical-Ventilation

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed interior intake and exhaust air ducts with debris buildup. Location: In front area above hot box storage units.

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels
(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s). Location: Hand washing sink in 3-compartment sink area.

Violation: Operations

• Permit Posted

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Instructed PIC to log into ABQ-Plan to obtain permit and print out permit to post inside facility.
Observed that no food permit was posted at the facility.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored,

thawed, cooled, prepared, displayed, dispensed, or transported.
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked meats, prepared vegetables and dairy products Activity of the Food: Stored and received

LJC Enterprise DBA Firehouse Subs - 1720 UNSER BLVD NW - Approved

LJC Enterprise DBA Firehouse Subs - 1720 UNSER BLVD NW
Food Establishment Class C
Date: 09/24/2026 - #: RT-FOODEST-070926-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Front sanitizer buckets.
Concentration:100 ppm Temperature: 84 °F.

Violation: Poisonous and Toxic/Chemical Substances

• Separation-Storage

- The storage of poisonous or toxic materials directly above or adjacent to food could result in contamination of the food from spillage. Poisonous or toxic materials must be stored so they cannot contaminate food, equipment, utensils, linens, and single-service and sing-use articles by separating the poisonous or toxic materials by spacing or partitioning; and storing them in an area that is not above food, equipment, utensils, linens, and single-service or single-use articles. Instructed PIC to move chemicals to an approved location. t
Observed a container previously used to store poisonous or toxic materials used for storage of food. Location: back-room food storage rack.
Material Type: kay Del-Limer stored where bulk food items are stored also above a meat slicer and prep table.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.
Observed holes or other gaps in the structure of the facility. Location: Backroom wall.
Size: two 4x8 square holes not covered.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris
Observed buildup and debris on the 3-compartments sinks and drain under the 3-compartments sinks.

LOS CUATES 5 - 10051 COORS BLVD NW - Approved

LOS CUATES 5 - 10051 COORS BLVD NW
Food Establishment Class C
Date: 09/21/2026 - #: RT-FOODEST-019321-2025 - Inspection Result: Approved

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed Scrapper sprayer at wash sink is not maintained in good repair or is not repaired by law. Observed Scrapper sprayer found in disrepair by leaking.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Filters

- Instructed PIC to make repairs or replace hood ventilation system to allow for filters or other grease extracting equipment to be readily removable for cleaning and replacement, or cleaned in place.
Observed filters or grease extracting equipment improperly designed or constructed to make it easily cleanable. Location: North side cooking area.
Manner: Filter vents are Damaged and in need of replacement.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the bottom of the screen door. Observed corner of the wall by the ice machine 5x 2-inch hole at the corner of the wall.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Two Make tables.
Food Items: Salsa-44. Ranch dressing-50, Salsa adobe-48, Guacamole- 52, Sour Cream- 52

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels
(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s). Location: two kitchen hand wash stations

Violation: Storage

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers
or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under
□□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed clean single-service and single-use articles stored improperly. Single-service and single-use articles was not stored in a clean, dry location. Single-service and single-use articles Type: Aluminum serving Pans.
Location: Storage rack.
Condition of the Location: Storage pans stored upright.

LOS CUATES 5 - 10051 COORS BLVD NW
Food Establishment Class B
Date: 09/21/2026 - #: RT-FOODEST-017259-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: fountain wand dispenser holder. Location: Bar,
Condition of the Location: Holder with substantial soil buildup.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed Drains in bar areas is not maintained in good repair or is not repaired by law. Observed Two drains found in disrepair by Missing the drain screens and covers.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels
(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s). Location: Bar hand wash station.

LOVES TRAVEL STOP 210 - 2200 6TH ST NW – Approved

LOVES TRAVEL STOP 210 - 2200 6TH ST NW
Food Establishment Class C
Date: 09/21/2026 - #: PT0044085 - Inspection Result: Approved

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed floor drain located near 3-compartment sink is not maintained in good repair or is not repaired by law. Observed floor drain located near 3-compartment sink found in disrepair by missing strainer.

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed a soiled mop not in use, stored directly on the floor.

LOVES TRAVEL STOP 210 - 2200 6TH ST NW
Retail Food Establishment Class 3
Date: 09/21/2026 - #: PT0044086 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine
Location: Back room near walk-in cooler
Condition of the Location: Extreme buildup of black organic matter buildup.

MARIOS PIZZA & PASTA INC - 11500 MENAUL BLVD NE
Food Establishment Class C
Date: 09/22/2026 - #: CAC-Food-090379-2026 - Inspection Result: Approved

Manual and Mechanical Warewashing Equipment, Chemical Sanitization Temperature, pH, Concentration and Hardness- PIC corrected violation by remaking sanitizer
Equipment, Food-Contact Surfaces and Utensils - Clean to Sight
and Touch- PIC corrected violation by cleaning and sanitizing slicer and knifes
Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition- Pic corrected violation by date marking all TCS Food items
Due to corrections made facility is back into the green approved status

MARIOS PIZZA & PASTA INC - 11500 MENAUL BLVD NE
Food Establishment Class C
Date: 09/22/2026 - #: RT-FOODEST-035551-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.
Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Wiping cloth bucket on main cook line Concentration: 25ppm

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Food slicer and chef knifes Location: Main kitchen line and prep area of kitchen Condition of the Location: Dried food debris buildup on blades of knifes and slicer

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded

food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Main cook line prep top cooler Food Items: Tomate sauce, Chicken, spinach,

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed interior intake and exhaust air ducts with debris buildup. Location: Dish washing area

Violation: Toilet Facilities

• Toilet Room Receptacle, Covered

- Instructed to provide a covered receptacle for sanitary napkins.
Observed in a toilet room used by females, no covered receptacle.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the edges. Back doors

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: wrist jewelry

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: kitchen area Activity: Actively working with open food items

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the ceiling and walls around pizza oven

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under □□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Portion cup Location: salad station Condition of the Location: portion cups stored in food container with all sides touching the food product

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: food service pans Manner not air dried and stacked wet

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.
Observed cleaned single-service and single-use articles stored improperly. Single-service and single-use articles was not stored six (6) inches above the floor. Single-service and single-use articles Type: Dinner plates and lids Storage Method: stored directly on the floor Location: Dry storage

MCDONALDS - 1901 LADERA DR NW - Approved

MCDONALDS - 1901 LADERA DR NW
Food Establishment Class C
Date: 09/25/2026 - #: PT0160293 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice chute, drink dispenser, ice chute back-room area.
Both Chutes with a Black and brown soil residue.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels
(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s). Location: Back hand wash station, also bottles stored in hand wash sink.

Violation: Warewashing Temperature and Concentration

• Sanitizers, Criteria-Chemicals

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR. PIC was asked Manually to wash, Rinse and sanitize with quat sanitizer from 200 to 400 ppm quat sanitizer until dishwasher is repaired.
Observed the chemical sanitizing wash solution of a ware washing machine fail to reach the minimum temperature of 120°F. Temperature measured: 104°F and chlorine solution of 0 PPM.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors and drain under the 3-compartment sink.

MCDONALDS 364 - 5324 4TH ST NW - Approved

MCDONALDS 364 - 5324 4TH ST NW
Food Establishment Class C
Date: 09/22/2026 - #: COM-FOODES-089974-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of cooking equipment and pans shall be cleaned at a frequency to prevent the buildup of soil residues and encrusted grease deposits. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine. Location: Back food prep area.
Condition of the Location: Interior of the ice machine with a black like soil residue on the ceiling.

Violation: Plumbing

• Backflow Prevention, Air Gap

- When carbon dioxide is mixed with water, carbonic acid, a weak acid, is formed. Carbonators on soft drink dispensers form such acids as they carbonate the water to be mixed with the syrups to produce the soft drinks. If carbon dioxide backs up into a copper water line, carbonic acid will dissolve some of the copper. The water containing the dissolved copper will subsequently be used in dispensing soft drinks and the first few customers receiving the drinks are likely to suffer with the symptoms of copper poisoning. An air gap or a vented backflow prevention device meeting ASSE Standard No. 1022 will
prevent this occurrence, thereby reducing incidences of copper poisoning. Instructed PIC to immediately discontinue use of equipment and to contact repair personnel to have air gap or vented backflow prevention device repaired or replaced.
Observed air gap or vented backflow prevention device at the carbonator is not properly installed or does not meet requirements by Drain lines stored below back drain.

Violation: Hot & Cold-Water Availability & Pressure

• Water Capacity-Quantity and Availability

- Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods
Observed facility with insufficient hot water Location: Front hand wash station.
Manner: Hot water reached 75 °F, however there is hot water in the facility.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the drains at the time of inspection.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located Front interior mini refrigerator. The surface was made out of Stainless steel.
The condition of the surface was Dry liquid buildup and debris.

MENAUL SHELL - 2021 MENAUL RD NE - Approved

MENAUL SHELL - 2021 MENAUL RD NE
Retail Food Establishment Class 3
Date: 09/23/2026 - #: PT0161056 - Inspection Result: Approved

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed floor drain located under soda dispensing machine counter is not maintained in good repair or is not repaired by law. Observed floor drain located under soda dispensing machine counter found in disrepair with extreme buildup of black organic matter.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Soda dispensing machine ice chute
Location: Counter near cash register
Condition of the Location: Observed buildup of red and orange organic matter

MENCHIES - 6001 WINTER HAVEN RD NW - Approved

MENCHIES - 6001 WINTER HAVEN RD NW
Food Establishment Class C
Date: 09/22/2026 - #: PT0121748 - Inspection Result: Approved

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray Bottle.

Alleged Material: Glass cleaner.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Soft serve ice cream machine is not maintained in good repair or is not repaired by law. Observed Bottom tubing found in disrepair by Leaking onto the floor which is creating a Puddle of water.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels

(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Backroom hand wash station.

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

Observed handwashing sink(s) was observed blocked or inaccessible. Location: backroom hand wash station. Manner: Floor fan stored in front of the hand wash station.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the Drain under 3-compartment sinks, and under storage. racks.

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Food labels serve as a primary means by which consumers can make informed decisions about their food selections and answer questions including ingredients, allergens, weight, and manufacturer. Instructed PIC a label, sign or other method notification must be prominent in plain view of the consumer with the manufacturer's or processor's label provided with the food or The common name of the food, or absent a common name, an adequately descriptive identity statement, if made from two or more ingredients, a list of ingredients and sub ingredients in descending order of predominance by weight, including a declaration of artificial colors, artificial flavors and chemical preservatives, if contained in the food, the name of the food source for each major food allergen contained in the food unless the food source is already part of the common or usual name of the respective ingredient, and if required by law the Nutrition labeling as specified in 21 CFR 101 - Food Labeling and 9 CFR 317 Subpart B Nutrition Labeling.

Observed bulk food available for consumer self-dispensing inside the facility without necessary labeling. Location: Display of several nuts on sales floor.

Food Items: Peanuts, almonds, pecans., walnuts

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Front service counter. The surface was made out of Wood cleanable cabinets.

The condition of the surface interior of the cabinets with substantial soil and debris buildup.

Violation: Physical Facilities, Construction and Repair

• Wall and Ceiling Coverings and Coatings

- Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to remove and replace with material that is smooth and easily cleanable.

Observed Walls is not smooth and easily cleanable. The surface was located above 3-compartment sinks

The surface was made out of FRP and observed 6 1/4 in holes.

MEXICAN FOOD BY MUJERES EN ACCION LLC - 5701 GIBSON BLVD SE - Approved

MEXICAN FOOD BY MUJERES EN ACCION LLC - 5701 GIBSON BLVD SE
Food Processor Class C
Date: 09/21/2026 - #: RT-PRC-001430-2025 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

MOM AND POP PIZZA SHOP - 2220 UNSER BLVD NW - Approved

MOM AND POP PIZZA SHOP - 2220 UNSER BLVD NW
Food Establishment Class C
Date: 09/25/2026 - #: RT-FOODEST-091705-2026 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Cooler drawer below the grill
Food Items: Sliced mushrooms- 48°F, slice white onions-45°F

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the on the floors front pizza making area sides, buildup and debris under 3-compartment sink floors and drains.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located front cook and prep stations The surface was made out of NSF stainless steel metal.
The condition of the surface. Buildup and debris on the inside of the prep top cooler.

MORADA QUINTESSENCE - 7101 EUBANK BLVD NE - Approved

MORADA QUINTESSENCE - 7101 EUBANK BLVD NE
Food Establishment Class C
Date: 09/22/2026 - #: RT-FOODEST-085604-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine's Location: Dry storage in kitchen and Dining room Condition of the Location: Black, brown, green and Yellow organic substance on inside of ice machine bin in kitchen and yellow buildup on the inside of ice machine in dining room
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener Location: Kitchen Condition of the Location: Dried food debris builds up on blade of can opener

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage.

These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed Drain for 3-compartment sink, drain for ware washing machine is not maintained in good repair or is not repaired by law. Observed Drain pipes under 3-compartment sink and ware washing machine found in disrepair by leaking grey water directly onto the floor below.

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed interior intake and exhaust air ducts with debris buildup. Location: Kitchen area

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is nonabsorbent.
Observed nonfood contact surface that was absorbent. The surface was located on the shelving in the server’s closets / cabinet's The surface was made out of Untreated wood The condition of the surface was absorbent and not easily cleanable

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Employee drink stored in walk-in cooler directly above facility foods.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors in the walk-in under raw meat with dried blood on floor. Also, on floor under ware washing machine with substantial food buildup

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under □□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Scoops and cups Location: Main kitchen area Condition of the Location: Scoops and cups stored inside food containers with handles directly touching the food product inside.

NMR - Wyoming, LLC DBA Dunkin Donuts - 4201 WYOMING BLVD NE
Food Establishment Class C
Date: 09/24/2026 - #: RT-FOODEST-075330-2026 - Inspection Result: Approved

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.
Observed facility did provide lockers or other suitable facilities for storage of employees clothing or other personal belongings however were stored on single use donut boxes and inside cabinets next to gloves.

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Preparing beverages and bagging donuts Inappropriate

Jewelry Observed: Bracelets and watches

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris underneath dry storage stainless steel shelving leading to office.

PRESBYTERIAN HEALTH CARE SYSTS - 8300 CONSTITUTION AVE NE
Food Establishment Class C
Date: 09/25/2026 - #: RT-FOODEST-091669-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various
factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Bucket and dispensing area Main kitchen. Dispensing sanitizer unit is not working properly goes from dispensing small amount below 200 parts per million to large amounts above 400 parts per million.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at 3-compartment sinks in dish ware washing room. Problems with plumbing to floor drain closest to grease trap, blue hose leading to another floor drain located in the area stored directly in floor drain.
Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed plumbing is not maintained in good repair or is not repaired by law. Observed plumbing leading from grease trap found in disrepair by not plumbed in a blue hose hooked up to grease trap leading to floor drain.

PRESBYTERIAN HEALTH CARE SYSTS - 8300 CONSTITUTION AVE NE

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various
factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds. Dispensing area was checked as well tested at zero parts per million as employee was refilling bucket.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Main kitchen Concentration: Zero parts per million Temperature: 69 °F.

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Vegetable Dicer Location: Stored away underneath prep table Condition of the Location: Stored away with food debris buildup

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the

introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at 3-compartment sinks in dish ware washing room. Problems with plumbing to floor drain closest to grease trap, blue hose leading to another floor drain located in the area stored directly in floor drain.
Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed plumbing is not maintained in good repair or is not repaired by law. Observed plumbing leading from grease trap found in disrepair by not plumbed in a blue hose hooked up to grease trap leading to floor drain.

Violation: Cooling

• Cooling

- Facility voluntarily discarded the improperly cooled food items. Advised facility to actively monitor cooling product in order to make corrections as needed to properly cool product and to utilize one or more methods such as 1) Place the food in a shallow pan 2) Separate the food into smaller or thinner portions 3) Use rapid cooling equipment 4) Stir the food in a container placed in an ice/water bath 5) Use containers that facilitate heat transfer 6) Only partially cover product, if protected from overhead contamination.
Observed cooling TCS food items fail to reach forty-one (41) °F within a total of six (6) hour period. Location: Inside walk-in refrigerator. Food Items: Red chile sauce, Green chile sauce Temperature: Green chile 49 °F, Red chile 49 °F Time transpired: PIC stated food items were made yesterday

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Large quart food container Location: Inside kitchen spice storage area.

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.
Observed no handwashing cleanser available at handwashing sink(s). Location: Hand washing sink far right side of kitchen. PIC stated it is not used but was in a food preparation area.

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s). Location: PIC stated it is not used but was in a food preparation area.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Red chile sauce and Green Chile sauce Activity of the Food: Cooled

QUICK TRACK 84 - 1801 SAN PEDRO DR NE
Food Establishment Class C
Date: 09/23/2026 - #: RT-FOODEST-075557-2025 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on ensuring the proper disposition of food items. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food held within the establishment exceeding the seven (7) day limit. Location: Undercounter cooler
Food Items: Shredded cheese and precooked chicken wings Expiration Dates: Expiration dates 9/19/2026 and 9/3/2026

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed floor drain located under 3-compartment sink is not maintained in good repair or is not repaired by law. Observed floor drain located under 3-compartment sin found in disrepair by missing strainer.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no/expired testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels
(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife

system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s). Location: Back of house near 3-compartment sink

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purpose such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purpose other than handwashing.
Observed handwashing sink used for purpose other than handwashing. Location: Back of house near 3-compartment sink Manner: Storing plastic food containers

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Hot & Cold-Water Availability & Pressure

• Water Pressure

- Inadequate water pressure could lead to situations that place the public health at risk such as improper handwashing or equipment operation. Water under pressure must be provided to all fixtures, equipment, and nonfood equipment that are required to use water.
Observed facility with inadequate water pressure Location: all Handwashing sinks Manner: Hot water is at a trickle at handwashing sinks

• Water Capacity-Quantity and Availability

- Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods.
Observed facility with insufficient hot water. Location: All sinks including handwashing sinks, mop sink, and 3-compartment sink Manner: water only got to 75°F on handwashing sinks and hot water turned off at 3-compartment sink and mop sink

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination.
Observed non-ready-to-eat raw animal food stored with ready-to-eat food without protection from contamination. Location: retail cooler Food Item: Raw eggs Condition: Raw eggs stored over and leaking onto containers of half and half

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed celling is not maintained in good repair or is not repaired by law. Observed Celling found in disrepair by leaking rain water in multiple areas in facility. Pic does have buckets and trash cans placed under leaks

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: all TCS food items for hunts bros pizza Activity of the Food: Stored
Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.
Observed pests allowed to accumulate in facility
Location: by atm machine and in back area by 3-compartment sink and mop sink Pest
Type: cockroach
Pest Condition: Dead
Number of Pests Present: 8- 12

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: food dicer, pizza cutter and spatula Location: Hunts brothers pizza station Condition of the Location: dried food debris on dicer and utensils

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.
Observed handwashing sink(s) without a handwashing sign. Location handwashing sink for hunts Brothers pizza

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purpose such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purpose other than handwashing.
Observed handwashing sink used for purpose other than handwashing. Location: Hunts Brothers station handwashing sink Manner: coffee cup stored in sink basin at time of inspection.

SAN FELIPE DE NERI CATHOLIC SCHOOL - 2000 LOMAS BLVD NW - Approved

SAN FELIPE DE NERI CATHOLIC SCHOOL - 2000 LOMAS BLVD NW
Food Establishment Class B
Date: 09/22/2026 - #: RT-FOODEST-047934-2026 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed kitchen area in disrepair by ceiling has hole in kitchen area

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Facility did not have any Cold Holding or Hot Holding logs for food
inspector gave Hot Holding and Cold Holding logs and showed pic how to fill out logs at time of the inspection

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring device
pic was given and shown how to fill out calibration logs

SERGIOS BAKERY AND CAFE - 2740 WYOMING BLVD NE – Approved

SERGIOS BAKERY AND CAFE - 2740 WYOMING STE #8 BLVD NE
Food Establishment Class C
Date: 09/22/2026 - #: CAC-Food-090323-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department.

- Time/Temperature Control for Safety Food, Cold Holding PIC removed all food items and placed inside walk-in refrigerator.
- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition
PIC removed food items not date marked.

SERGIOS BAKERY AND CAFE - 2740 WYOMING STE #8 BLVD NE
Food Establishment Class C
Date: 09/22/2026 - #: COM-FOODES-089986-2026 - Inspection Result: Conditional Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days.
Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators.
Location: Reach in refrigerator Food Items: Cooked pasta and Lasagna Expiration Dates: None available on these two items.

Violation: Time as Public Health Control

• Time as a Public Health Control, Written Procedures, Labeling

- Instructed PIC that procedures must be written in advance and available to the regulatory authority upon request that specify the methodology for compliance while utilizing time as public health control. These must include ensure proper cooling, heating, temperature requirements, labeling, monitoring and disposition are met for safety.
Observed written procedures were not prepared in advance, or not available, when using time in place of temperature as a control for TCS foods.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Filters

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.
Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur. Condition: Substantial debris buildup on hood vent suppression system and filters.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Cold holding Prep make table Food Items and Temperature: Chopped green chile 54 °F, sliced ham 53 °F, Ricotta cheese 53 °F, sliced sausage 52 °F, shredded cheese 56 °F, marinara 78 °F

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Inside kitchen Activity: Preparing food without beard net

• Eating, Drinking, or Using Tobacco Products

- Drinking by employees in food preparation areas is prohibited because of the potential that the hands, food, and food-contact surfaces may become contaminated. Employees working a grill may have drinks at the work station so long as they are in a closed container. Instructed PIC to retrain employees on designated drinking areas.
Observed employee drinking in an undesignated area. Proper hygienic practices must be followed by food employees in performing assigned duties to ensure the safety of the food, prevent the introduction of foreign objects into the food, and minimize the possibility of transmitting disease through food. Location: On cold holding unit shelving Activity: Employee drink cup.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located inside kitchen shelving. The surface was made out of stainless steel The condition of the surface was debris buildup

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked meats cooked beans, posole Activity of the Food: Cooled and received

SERGIOS BAKERY AND CAFE - 2740 WYOMING BLVD NE
Retail Food Establishment Class 5
Date: 09/22/2026 - #: COM-RET-089988-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Sugar, flour, etc. Location: Food Containers

Violation: Maintenance

• Maintaining Premises, Unnecessary Items and Litter

- The presence of unnecessary articles, including equipment which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.
Observed items on the premises of the food establishment that is no longer used or is non-functional. Location: Inside bakery Items list: Ovens bakery equipment Condition of the items: Nonfunctional

Violation: Surface Not Clean

• Nonfood-Contact Surfaces, Easily Cleanable

- Hard-to-clean areas could result in the attraction and harborage of insects and rodents and allow the growth of foodborne pathogenic microorganisms. Well-designed equipment enhances the ability to keep nonfood-contact surfaces clean. Instructed PIC to replace the material with one that is easily cleanable or to modify the existing material so that it is easily cleanable.
Observed nonfood contact surface that was not easily cleanable. The surface was located underneath 3-compartment sink The surface was made out of concreate flooring The condition of the surface was damaged

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the

introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at 3-compartment sink floor drain and floor drain in pastry decorating area next to salad line.

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Ownership was provided invoice to pay for permit
Observed that the facility was operating with an expired permit.

SONIC DRIVE IN 5479 - 2119 VISTA OESTE NW - Approved

SONIC DRIVE IN 5479 - 2119 VISTA OESTE NW

Violation: Result of a Complaint

• Complaint

- This inspection is a follow-up as a result of a complaint previously received by the Department that was substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of cooking equipment and pans shall be cleaned at a frequency to prevent the buildup of soil residues and encrusted grease deposits. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed equipment food-contact surface with the buildup of soil residues.
Equipment Type: Interior ice cream machine, interior ice machine chute. Location: Front serving station and back are where ice machine was stored. Condition of the Location: Interior of both equipment with substantial soil buildup.

Violation: Maintenance and Operation

• Warewashing Equipment, Cleaning Frequency

- If a warewashing sink is used to wash wiping cloths, wash produce, or thaw food, the sink shall be cleaned and sanitized before and after each time it is used to wash wiping cloths or wash produce or thaw food. Instructed PIC to wash and sanitize wash sink before and after it is used for other purpose than warewashing and to retain employees on proper washing procedures.
Observed ware washing sink with excessive soil buildup and not cleaned or sanitized before and after use.

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated. due to cleanliness of the facility by dirty food equipment interior exterior, floors and walls drains with excessive soil and grease buildup.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Lighting

• Light Bulbs, Protective Shielding

- Instructed PIC to make repairs necessary so that light bulbs are shielded, coated, or made otherwise shatter-resistant to prevent the contamination of exposed food, clean equipment, utensils, linens, or unwrapped single-service-single-use articles.
Observed light bulbs with no protective shielding, coating or by other means shatter-resistant. Location: Walk-in freezer unwrapped where food is stored.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors, walls, ceiling tiles under food equipment, prep tables, 3-compartment sinks, cooler and freezer floors Excessive buildup in drains.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located front service dispensing equipment. The surface was made out of stainless steel.
The condition of the surface interior and exterior with excessive soil and debris buildup Cup holders, dispensing equipment sides of the fryers.

SONIC DRIVE IN 8 - 3110 JUAN TABO BLVD NE - Unsatisfactory Re-Inspection required

SONIC DRIVE IN 8 - 3110 JUAN TABO BLVD NE
Food Establishment Class C
Date: 09/22/2026 - #: CAC-Food-090209-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Result of a Complaint

• Complaint

- This inspection is a follow-up as a result of a complaint previously received by the Department that was substantiated.

Facility is being reopened under an Unsatisfactory status (Red sticker) due to low score in previous inspection. CHPD inspector instructed PIC to remain closed for the remainder of the day (9/22/2026) to clean and sanitize areas noted. PIC was advised the facility can reopen tomorrow morning (9/23/2026) for normal operations. Facility will remain in an Unsatisfactory status for a minimum of five business days. CHPD inspector will re-inspect facility within five business days while facility is in operation to ensure safe food operations.
PIC was instructed to send photo documentation of areas noted for cleaning for CHPD inspector review prior to opening. Pest control has been conducted in the facility. PIC has corrected several noted observed violations.

Violation: Result of a Complaint

• Complaint

- This inspection is a follow-up as a result of a complaint previously received by the Department that was substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine interior by chute Location: Kitchen Condition of the Location: Soiled with slimy debris accumulation

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed 3-compartment sink faucet is not maintained in good repair or is not repaired by law. Observed faucet found in disrepair by having a continuous drip leak that needs to be repaired.

• 3][
•

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the kitchen floors under ice machine, ice cream blenders and under kitchen storage racks.

SPANISH TRAILS WELLNESS & REHABILITATION LLC - 1610 RENAISSANCE BLVD NE
Food Establishment Class C
Date: 09/24/2026 - #: RT-FOODEST-116687-2025 - Inspection Result: Approved

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee not wash hands when required. Condition: employee was observed handling cleaned and sanitized utensils directly after handling soiled wares at the warewashing station without washing hands or removing single service gloves prior to.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floor in the walk-in cooler in the corners and underneath the shelving units at the time of inspection.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair. Observed hand washing sink pipe flange in disrepair by not being fully sealed to the wall, causing the opening in the wall around the pipe to be exposed and could allow entry of pests into facility.

• Floors, Walls and Ceilings-Cleanability

- Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to remove broken and cracked tile and replace with new tile that is smooth and easily cleanable.
Observed several floor tiles next to warewashing machine is not smooth and easily cleanable. Condition: cracked and broken.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.
Location: Front counter sanitizer bucket.
Concentration: 100 ppm
Temperature: 78 degrees.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the on the floors under the cabinets, sinks. also, drains with substantial debris buildup.

Date: 09/23/2026 - #: RT-FOODEST-057033-2025 - Inspection Result: Approved

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.
Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Ecolab Spray Bottle.
Alleged Material: Observed Quat sanitizer in a Multi surface and glass cleaner bottle.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed Drain is not maintained in good repair or is not repaired by law. Observed Drain In Sushi found in disrepair by Missing the required drain screen.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC that food items held in the establishment must be maintained at proper levels to ensure safety and inhibit the growth of pathogens. PIC voluntarily discarded food items improperly cold held.
Observed food items in cold holding unit measuring above 41°F. Location: Reach in refrigerator, prep top cooler.
Food Items: Crab salad- 57°F- refrigerator, Crab salad 45°F- prep top cooler, sliced ginger root- 55°F-degrees reach in refrigerator.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities are critical to food protection and must be maintained in operating order at all times so they will be used. Handwashing sinks shall be cleaned as often as necessary to keep them clean. Instructed PIC to clean handwashing sink(s).
Observed handwashing fixtures with the buildup of soil residues. The plumbing fixture was located Sushi hand wash station.
The condition of the hand sinks with substantial soil buildup and debris.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors of the walk-in freezer under storage shelving, buildup and debris in drain under 3-compartment sinks.

Food Establishment Class C
Date: 09/25/2026 - #: RT-FOODEST-009222-2026 - Inspection Result: Approved

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Storage

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.
Observed clean single-service and single-use articles stored improperly. Single-service and single-use articles were not stored six (6) inches above the floor. Single-service and single-use articles Type: Cutlery packs and foil sheets.
Storage Method: Directly on the floor Location: Dry storage room

TUCANOS BRAZILIAN GRILL - 110 CENTRAL AVE SW
Food Establishment Class C
Date: 09/23/2026 - #: PT0072891 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75°F with a contact time of 7 seconds.
Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Ware wash machine Concentration: Zero PPM

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Prep table
Food Items: Shredded cheese Expiration Dates: No dates available

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Lighting

• Light Bulbs, Protective Shielding

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.
Observed inadequate amount of lighting. Location: Hood vent above kabab grill Manner: Three burnt bulbs

TUCANOS BRAZILIAN GRILL - 110 CENTRAL AVE SW
Food Establishment Class B
Date: 09/23/2026 - #: PT0072892 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the

introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drain in bar area.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee not wash hands when required. Condition: Donning new gloves and switching tasks

TWINS LEARNING CENTER - 5600 CENTRAL AVE SW
Food Establishment Class C
Date: 09/25/2026 - #: RT-FOODEST-098460-2025 - Inspection Result: Approved

Violation: Storage

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.

Observed cleaned utensils stored improperly. Utensils were not stored in a clean, dry location. Utensil Type: (utensils)spoons, forks, knifes Location: on hand washing sink Condition of the Location: when hands are being washed splash from hands are contaminating the utensils

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed in kitchen area in disrepair by having a hole on the ceiling and electrical wires exposed from box on ceiling

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Facility was not keeping logs of their Hot Holding, Cold Holding or Equipment
inspector gave and showed pic how to fill out logs

• Calibration Logs

-Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.
inspector gave pic Thermometer calibration log and showed how to document on log

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.
Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Ware washing machine Concentration: 0ppm

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment.

When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.
Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottle Alleged Material: Glass cleaner

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on ensuring the proper disposition of food items. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food held within the establishment exceeding the seven (7) day limit. Food Items: White sauce and Chicken Expiration Dates: 9/20

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.
Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Storage

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: Not air dried and stacked wet with moisture between pans

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located on the inside of the upright freezer on main cook line The surface was made out of Metal The condition of the surface was Ice buildup

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Cook line
Activity: Handling ready to eat food items

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee not wash hands when required. Condition: Donning new gloves and switching tasks

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors and walls throughout facility.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues.
The surface was located throughout kitchen near cook line and food prep areas.
The surface was made out of stainless steel, plastic, metal and fiberglass reinforced panels (FRP) The condition of the surface was dirty with food debris and grease buildup
