

City of Albuquerque
Environmental Health Department
Consumer Health Protection Division
P.O. Box 1293, Albuquerque, NM 87103

Summary Table
Consumer Health Protection Inspections Performed
Week: August 02, 2026 to August 08, 2026 Report
Amended on 8/10/2026 for clerical errors

This report includes inspection history for the dates listed. Inspections may have occurred after those dates.
The summary reflects each establishment's current operating status as of the report release date.

AMERICAN LEGION POST 13 - 1201 MOUNTAIN RD NE

Inspection Date	Inspection ID Number	Inspection Type	Inspection Status	Page #
Food Establishment (Permit # - PT0051559) - Operational Status - Open				
08/04/2026	PT0051559	Routine Food Establishment Inspection	Unsatisfactory Re-Inspection required	Pg. 5

Food Establishment (Permit # - PT0051560) - Operational Status - Open

08/04/2026	PT0051560	Routine Food Establishment Inspection	Conditional Approved	Pg. 5
------------	-----------	---------------------------------------	----------------------	-------

BEE HIVE HOMES OF TAYLOR RANCH - 6004 WHITEMAN DR NW

Inspection Date	Inspection ID Number	Inspection Type	Inspection Status	Page #
Food Establishment (Permit # - PT0093706) - Operational Status - Open				
08/07/2026	RT-FOODEST-073216-2026	Routine Food Establishment Inspection	Approved	Pg. 6
08/03/2026	PT0093706	Routine Food Establishment Inspection	Closure Re-Inspection Required	Pg. 6

BOBS BURGERS #8 - 1945 JUAN TABO BLVD NE

Inspection Date	Inspection ID Number	Inspection Type	Inspection Status	Page #
Food Establishment (Permit # - PT0151527) - Operational Status - Open				
08/03/2026	RT-FOODEST-014033-2025	Routine Food Establishment Inspection	Approved	Pg. 7

CHILDRENS PROMISE CENTERS - 12855 EASTRIDGE DR NE

Inspection Date	Inspection ID Number	Inspection Type	Inspection Status	Page #
Food Establishment (Permit # - PT0102609) - Operational Status - Open				
08/07/2026	CAC-Food-075037-2026	Corrective Action Compliance	Approved	Pg. 8
08/07/2026	PT0102609	Routine Food Establishment Inspection	Conditional Approved	Pg. 8

CHURCHS CHICKEN #2020 - 10230 CENTRAL AVE NE

Inspection Date	Inspection ID Number	Inspection Type	Inspection Status	Page #
Food Establishment (Permit # - PT0152771) - Operational Status - Open				
08/07/2026	RT-FOODEST-037681-2026	Routine Food Establishment Inspection	Closure Re-Inspection Required	Pg. 9

CIRCLE K 8942 - 8101 HARPER RD NE

Inspection Date	Inspection ID Number	Inspection Type	Inspection Status	Page #
Retail Food Establishment (Permit # - PT0107538) - Operational Status - Open				
08/07/2026	PT0107538	Routine Retail Food Inspection	Approved	Pg. 10

CIRCLE K STORE #2705317 - 13401 LOMAS BLVD NE

08/06/2026	RT-RET-016686-2025	Routine Retail Food Inspection	Approved	Pg. 50
Corrective Action Compliance does not represent a full routine health inspection. Instead, it reflects that a facility has taken specific corrective actions in response to violations identified during an inspection. These actions may be taken during the inspection or afterward, and the Corrective Action Compliance allows for the facility's grade or status to be updated based on those corrections. Corrective actions may be demonstrated through documentation such as photos, videos, receipts, work orders, site visits, or both verifiable means showing that the violation has been addressed and compliance has been achieved.				
APPROVED				
An "Approved" grade indicates that a food establishment that has demonstrated compliance with the standards in the Food Code the Food Service and Retail Ordinance, other industry standards, and other laws and has received a Grade of Approved and is able to operate.				
CONDITIONAL APPROVED				
A "Conditional Approved" grade is issued when a facility is found to have violations of the Food Code, the Food Service and Ret Ordinance, industry standards, or applicable laws. While the facility may continue operating, it must complete specific corrective actions to address the violation A yellow sticker is placed alongside the green "Approved" sticker.				
UNSATISFACTORY				
An "Unsatisfactory" grade indicates that a facility has not met the required standards but is allowed to continue operating temporarily while corrective actions are completed. A red "Unsatisfactory" sticker will be displayed at the facility for the duration of this grade. This is a temporary status and requires timely follow-up to verify compliance.				
CLOSED				
A "Closed" grade is assigned when violations pose a significant risk to public health, requiring the facility to immediately cease operations. The facility must remain closed until corrective actions have been completed and verified. A facility with this grade will display an orange "Closed" sticker for the duration of the closure.				

AMERICAN LEGION POST 13 - 1201 MOUNTAIN RD NE – Unsatisfactory Re-Inspection Required

AMERICAN LEGION POST 13 - 1201 MOUNTAIN RD NE

Food Establishment Class B

Date: 08/04/2026 - #: PT0051559 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC corrected violation.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Bar area three-compartment sink

Concentration: Zero ppm Temperature: Unavailable

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Upright cooler

Food Items: Jar of pickle juice.

Temperature: 48°F

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: Upright cooler bar area Condition: Failing to maintain temperature of 41°F and below

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no/expired testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purpose such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purpose other than handwashing.

Observed handwashing sink used for purpose other than handwashing. Location: Hand wash station in bar area Manner: Discarding drinks

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

Violation: Disposition of Returned, Previously Served Or Reconditioned

• Discarding or Reconditioning Unsafe, Adulterated, or Contaminated Food

- Food shall be safe, unadulterated, and honestly presented. Pathogens may be transmitted from person to person through contaminated food. The potential spread of illness is limited when food is discarded if it may have been contaminated by employees who are infected, or are suspected of being infected, or by any person who otherwise contaminates it. Food may also be contaminated by other means that endanger their safety and present a serious potential hazard. Instructed PIC that food that is unsafe, adulterated, not honestly presented must not be served or offered for sale.

Observed food that is unsafe for consumption present inside the facility. Food: Cranberry Juice Location: Upright cooler bar area

Condition: Visible mold in juice container

AMERICAN LEGION POST 13 - 1201 MOUNTAIN RD NE

Food Establishment Class C

Date: 08/04/2026 - #: PT0051560 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS

foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine
Location: Kitchen
Condition of the Location: Extreme buildup of black organic matter

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drain located under three-compartment sink.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no/expired testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.
Observed that the facility was operating with an expired permit.

BEE HIVE HOMES OF TAYLOR RANCH - 6004 WHITEMAN DR NW - Approved

BEE HIVE HOMES OF TAYLOR RANCH - 6004 WHITEMAN DR NW

Food Establishment Class C

Date: 08/07/2026 - #: RT-FOODEST-073216-2026 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at the three-compartment sinks floor drain. PVC drain tubing about two inches below the drain line.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.
Observed holes or other gaps in the structure of the facility. Location: Kitchen cupboards.
Size: Holes in the 4 inches to 12-inch square side of cupboards and bottom shelving.

BEE HIVE HOMES OF TAYLOR RANCH - 6004 WHITEMAN DR NW

Food Establishment Class C

Date: 08/03/2026 - #: PT0093706 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC corrected violation by Dispensing fresh quat solution of 300 ppm.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.
Location: Kitchen prep table wiping cloth container.
Concentration: tested at 0 ppm at 75 degrees f.

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control.

Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records. last visit by their pest control operator was 7/15/26.
Observed pests in the facility with no control methods in place.
Location: Under kitchen Cabinets Pest Type: Observed live German baby and medium roaches, under hand wash station cabinet, two cabinets with live and dead roaches. and under 3-compartment sink cabinet.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at the three-compartment sinks floor drain. PVC drain tubing about two inches below the drain line.

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth

Observed nonfood contact surface that was not smooth. The surface was located Cabinet bottom shelving. The surface was made out of Particle board The condition of the surface was damaged by water under 3-compartment sinks.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.

Observed holes or other gaps in the structure of the facility. Location: Kitchen cupboards.

Size: Holes in the 4 inches to 12-inch square side of cupboards.

BOBS BURGERS #8 - 1945 JUAN TABO BLVD NE - Approved

BOBS BURGERS #8 - 1945 JUAN TABO BLVD NE

Food Establishment Class C

Date: 08/03/2026 - #: RT-FOODEST-014033-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine, Food Dicer, and Robot coupe Location: Ice machine behind front counter and Dicer and Robot Coupe back prep area Condition of the Location Yellow and brown buildup on inside of ice machine and Dried food debris on Dicer and Robot coupe

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain behind ice machine

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Kitchen area Activity: Actively working with open food items

CHILDRENS PROMISE CENTERS - 12855 Eastridge Dr NE - Approved

CHILDRENS PROMISE CENTERS - 12855 Eastridge Dr NE

Food Establishment Class B

Date: 08/07/2026 - #: CAC-Food-075037-2026 - Inspection Result: Approved

Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch- Pic corrected violation by cleaning and sanitizing Can opener
Due to correction made facility is back into the green approved status.

CHILDRENS PROMISE CENTERS - 12855 Eastridge Dr NE

Food Establishment Class B

Date: 08/07/2026 - #: PT0102609 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener Location: Kitchen Condition of the Location: Dried food debris buildup

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottle Alleged Material: Bottle labeled Bleach water but had Pine- sol

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain next to three-compartment sink

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Lazy Susan Cabinet and the inside of oven The condition of the surface was debris buildup

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctions, Coved, and Enclosed or Sealed

- Observation: 1. Observed floor and wall juncture covering in disrepair and unsealed coming off the wall behind the three-compartment sink and dish machine at the time of inspection.

2. Observed floor is not smooth and easily cleanable. The surface was located near and under three comp sink. The surface is in disrepair by flooring being uneven, with exposed concrete subfloor and cracked/missing floor tile near floor drain at the time of inspection.

Floors, walls, and ceilings that are constructed of smooth and durable surface materials are more easily cleaned. Floor surfaces that are graded to drain and consist of effectively treated materials will prevent

contamination of foods from dust and organisms from pooled moisture. The special requirements for carpeting materials and nonabsorbent materials in areas subject to moisture are intended to ensure that

the cleanability of these surfaces is retained. Instructed person in charge to repair flooring with nonabsorbent, smooth and easily cleanable material.

CHURCHS CHICKEN #2020 - 10230 CENTRAL AVE NE - Closure Re-Inspection Required

CHURCHS CHICKEN #2020 - 10230 CENTRAL AVE NE

Food Establishment Class C

Date: 08/07/2026 - #: RT-FOODEST-037681-2026 - Inspection Result: Closure Re-Inspection Required

Complaint

This inspection was the result of a citizen complaint that was substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC corrected violation by remaking sanitizer solution

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Wiping cloth bucket in back kitchen Concentration: 0 ppm

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine and can opener Location: Back of kitchen and walk in cooler Condition of the Location: brown buildup on inside of ice machine and dried food debris on blade of can opener

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place. Location: Kitchen area and dining room Pest Type: cockroach, fly and gnats Pest Condition: living and dead

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps.

Location: Back dry storage, ware washing area, kitchen and dining room Pest Type: cockroach fly

Pest Condition: living and dead

Number of Pests Present: approx. 15 Cockroaches 5-7 flies, 10-15 gnats

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Handwashing sink and plumbing behind ice machine is not maintained in good repair or is not repaired by law. Observed Handwashing sink found in disrepair by leaking grey water onto the floor.

Observed Piping behind ice machine found in disrepair by not aligned to floor drain and leaking grey water onto the floor

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges. Front double doors

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Main cook line Food Items: Temperature: Pickles 56°F,

CIRCLE K 8942 - 8101 HARPER RD NE

Retail Food Establishment Class 3

Date: 08/07/2026 - #: PT0107538 - Inspection Result: Approved

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. Location: Bottom internal surface of reach in freezer to the right of the entry door.

Violation: Hot Holding & Reheating

• Heating Capacities-Equipment

- The ability of equipment to heat foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate equipment with enough capacity to meet the heating demands of the operation. Instructed PIC to make repairs necessary to have adequate equipment or must acquire sufficient equipment to do so.

Observed insufficient equipment to properly heat food. Location: Hot Dog Roller

Condition: observed 2nd row roller bar closest to front of hot dog roller is not operational by not rolling at the time of inspection. A ticking sound coming from hot dog roller was also heard during inspection.

CIRCLE K STORE #2705317 - 13401 LOMAS BLVD NE - Approved

CIRCLE K STORE #2705317 - 13401 LOMAS BLVD NE

Retail Food Establishment Class 3

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Walk in display cooler Food Items: Naked Juice 59° F, Simply Orange Juice 57°F, Shamrock Milk 55°F, Tru Moo Milk 58°F, Breakfast sandwich 55°F, Cheese burger 55°F, Breakfast sandwich 56°F

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: display walk in cooler Condition: Cooler running at 60°F

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located inside chest ice cream freezer The condition of the surface was Ice and frost buildup

Complaint

This inspection was the result of a citizen complaint that was previously substantiated and since brought into compliance.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed

PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F. PIC corrected violation by replacing chlorine

sanitizer.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Inside main kitchen inside red sanitizer bucket Concentration: Zero parts per million Temperature: 94 degrees f

Violation: Maintenance and Operation

• Cutting Surfaces

- Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may buildup or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.

Observed cutting surface with deep scratches and scoring which limit the ability to be effectively cleaned and sanitized. Location: On prep cold holding units

Type: Cutting boards

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed plumbing inside walk in refrigerator is not maintained in good repair or is not repaired by law. Observed plumbing inside walk in refrigerator under condenser found in disrepair by leaking at plumbing.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Filters

- Instructed PIC to make repairs or replace hood ventilation system to allow for filters or other grease extracting equipment to be readily removable for cleaning and replacement, or cleaned in place.

Observed filters or grease extracting equipment damaged with substantial gaps inside hood ventilation system Location: Inside main kitchen hood ventilation system. Manner: Substantial gaps and debris buildup.

Violation: Toilet Facilities

• Toilet Rooms, Enclosed

- Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.

Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Preparing entrees Inappropriate Jewelry Observed: Bracelet

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located in back of Dining room area door leading to back of kitchen. Small freezer with ice frost debris buildup.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked meats, prepared vegetables, sauces, soups etc. Activity of the Food: Stored, cooled, received

D's BBQ LLC - 1200 Wyoming Blvd NE - Approved

D's BBQ LLC - 1200 Wyoming Blvd NE

Food Establishment Class C

Date: 08/06/2026 - #: CAC-Food-074507-2026 - Inspection Result: Approved

EAT MY THAI CUISINE - 5303 GIBSON BLVD SE

Food Establishment Class C

Date: 08/05/2026 - #: CAC-Food-074310-2026 - Inspection Result: Approved

Facility has been upgraded to approved status following the correction of the following violations during inspection by the Environmental Health Department. The facility has corrected:

- Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination (Raw foods moved away from ready to eat foods)
- Common Name-Working Containers (All chemicals labeled)

EAT MY THAI CUISINE - 5303 GIBSON BLVD SE

Food Establishment Class C

Date: 08/05/2026 - #: RT-FOODEST-065878-2026 - Inspection Result: Conditional Approved

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Bowl and spray bottle

Alleged Material: Bleach water

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps Location: Dry storage area and kitchen

Pest Type: Cockroach Pest Condition: Dead

Number of Pests Present: 6

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: All cold holding units in the facility

Food Items: Various containers of sauces, prepared meats, cut cucumbers, soups, thawed shrimp in container Expiration Dates: Not available

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Bulk food storage containers

Location: Dry storage and make line

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination

Observed non-ready-to-eat raw animal food stored with ready-to-eat food without protection from contamination. Location: Reach in coolers

Food Item: Raw shelled eggs and raw meat Condition: Stored directly over ready to eat food items

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Active handling of open food items Jewelry Observed: Wrist jewelry

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on facility floors and walls and to clean and sanitize on a regular basis.

Observed minimal buildup and debris on the kitchen floors throughout the kitchen.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surfaces were located the kitchen such as the kitchen fan and insides of cold holding equipment. The condition of the surface had food debris buildup and soil accumulation.

Violation: Single-Service

• Single-Service and Single-Use Articles-Use Limitations

- Single-service and single-use articles may not be reused. Articles that are not constructed of multiuse materials may not be reused as they are unable to withstand the rigors of multiple uses, including the ability to be subjected to repeated washing, rinsing, and sanitizing. Instructed PIC that all single-service and single-use articles being reused must be replaced with multiuse containers and/articles.

Observed single-use containers being re-used. Location: Dry storage and make line

Use: Single use pork rinds containers are being used to store other ingredients all throughout the facility. Also observed non-NSF containers that need to be replaced.

EL MEZQUITE MARKET - 100 98TH ST NW – Approved

EL MEZQUITE MARKET - 100 98TH ST NW

Food Establishment Class C

Date: 08/03/2026 - #: RT-FOODEST-055634-2025 - Inspection Result: Approved

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. no cooling or cold holding logs

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

EL MEZQUITE MARKET - 100 98TH ST NW

Retail Food Establishment Class 5

Date: 08/03/2026 - #: RT-RET-058745-2025 - Inspection Result: Approved

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- Multiuse utensils which have been cleaned and sanitized can become contaminated with pathogens which can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. Instructed PIC to clean and sanitize utensils prior to continuing use, must be maintained

cleaned in a regular schedule as prescribed by the code and to store items so that the risk of contamination prior to use is minimized.

Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container.
Utensil Type: scoop Location: bakery area Condition of the Location: handle of scoop inside flour

EL MEZQUITE MARKET - 100 98TH ST NW

Retail Food Establishment Class 4

Date: 08/03/2026 - #: RT-RET-058710-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Reach in freezers Location: Grocery area Condition of the Location: debris buildup inside the reach in freezers shelves and floors

EL MEZQUITE MARKET - 100 98TH ST NW

Retail Food Establishment Class 4

Date: 08/03/2026 - #: RT-RET-007739-2026 - Inspection Result: Approved

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Thawing

• Thawing Method

- Freezing prevents microbial growth in foods, but usually does not destroy all microorganisms. Improper thawing provides an opportunity for surviving bacteria to grow to harmful numbers and/or produce toxins. Food must be thawed in an approved method such as: A. under refrigeration maintaining food below forty-one (41) degrees F or below, B. submerged under running water at seventy (70) degrees F, or below with sufficient velocity to agitate and float off loose particles in the overflow, if ready-to-eat does not go above forty-one (41) degrees F, or if raw does not exceed forty-one (41) degrees F for four (4) hours including the cooking or re-cooling process C. in a microwave oven only when the food will be immediately transferred to conventional cooking facilities as part of a continuous cooking process, or when the entire, uninterrupted cooking process takes place in the microwave oven D. as part of the cooking process E. prepared for immediate service in response to an individual consumer's order Instructed PIC to retrain food employees on thawing food and PIC corrected.

Observed frozen time/temperature control for safety food improperly thawing. Food: chicken thigh, drumsticks and breasts Location: three-compartment sink Condition: frozen Method: chicken sitting above water with no cold-water hitting chicken and another sink with chicken sitting inside cold water with no running cold water directly hitting products.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands. Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: touched beard and then touched clothing and then put on gloves without washing hands. had employee take of gloves and then had him wash hands again and then put on clean gloves

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize.

Observed buildup and debris on the floors in the walk-in coolers and freezers and on the flaps when entering meat market areas.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on

ensuring handwashing sinks are properly maintained.

Observed handwashing sink(s) was observed blocked or inaccessible. Location: meat area Manner: sanitation bucket inside hand washing sink and equipment inside handwashing sink.

FAMILY DOLLAR STORES/NM INC - 7100 SAN PEDRO DR NE - Approved

FREDDYS FROZEN CUSTARD & STEAKBURGERS - 10701 CORRALES RD, A-1

Food Establishment Class C

Date: 08/07/2026 - #: RT-FOODEST-101197-2025 - Inspection Result: Conditional Approved

Complaint

This inspection was the result of a citizen complaint that was unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for sanitizer utilized it must be at the manufacturer specified concentration and temperature range with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Wiping cloth container near cooking and prep area.

Concentration: 0 ppm.

Temperature: 68* F.

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of cooking equipment and pans shall be cleaned at a frequency to prevent the buildup of soil residues and encrusted grease deposits. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine, Can opener location: prep area and cooking areas.

Condition of the Location: Ice machine interior with a brown and white slimy buildup interior of the ceiling chute. areas were wiped with an alcohol wipe. and photo taken of the soil.

Observed caked on buildup on the can opener blade and can opener holder.

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165 F and to maintain temperature at 135 F and above.

Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Grilled chicken Patties

Food Temperature: 96* f.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Hand wash station is not maintained in good repair or is not repaired by law. Observed hand wash station faucet leaking. found in disrepair.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Unknown Seasoning.

Location: South back prep table.

Violation: Storage

• Food Storage, Prohibited Areas

- Food must be stored in a clean, dry location to prevent contamination. Instructed PIC to clean and sanitize the area and to ensure that the area is kept dry.

Observed food stored improperly in an unclean location. Location: Backroom storage areas.

Food Item Coke syrup. Store directly on the soiled floor,

Violation: Personal Cleanliness

• **Eating, Drinking, or Using Tobacco Products**

- A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area and should be in a cup with a lid and straw.

Observed a food employee with an improper drink. Location: Back shelf where food is stored.

Type of Drink: Employees drink next to can foods and butter in containers.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on walls with grease and soil build storage and food prep and cooking, clean utensil storage racks, behind dish washer, and to clean and sanitize areas noted.

Observed buildup and debris on the Floors under shelving, food equipment, refrigerators and prep tables.

Observes walls with grease and soil build storage and food prep and cooking, clean utensil storage racks, behind dish washer.

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Food prep and cooking areas. The surface was made out of Stainless steel.

The condition of the food surfaces equipment and shelving with substantial grease, soil and debris buildup exterior and interiors.

FRESQUEZ CONCESSIONS - 2200 SUNPORT BLVD SE – Approved

FRESQUEZ CONCESSIONS - 2200 SUNPORT BLVD SE

Food Establishment Class C

Date: 08/03/2026 - #: CAC-Food-073373-2026 - Inspection Result: Approved

Facility has been upgraded to Approved status following the correction of the following violations during inspection by the Environmental Health Department. The facility has corrected:

- Backflow Prevention, Air Gap (Air gap corrected on site)
- Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing (Coffee filters placed back in original packaging)
- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch (Food contact surfaces cleaned and sanitized)

FRESQUEZ CONCESSIONS - 2200 SUNPORT BLVD SE

Food Establishment Class C

Date: 08/03/2026 - #: RT-FOODEST-010713-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener and measuring scoops Location: Clean dish storage and prep table

Condition of the Location: Soiled with dried food debris and residue

Violation: Plumbing

• **System Maintained in Good Repair, Repaired According to Law**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed drain pipe under 3-compartment sink is not maintained in good repair or is not repaired by law. Observed drain pipe found in disrepair by having a continuous leak that needs to be repaired.

• **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at the floor drain in the front service area. Observed a drain hose being stored directly inside of the floor drain.

Violation: Storage

• **Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing**

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.

Observed single-service or single-use articles stored outside of the original packaging and not stored in a manner to prevent contamination.

FRESQUEZ CONCESSIONS - 2200 SUNPORT BLVD SE

Food Establishment Class C

Date: 08/03/2026 - #: CAC-Food-073414-2026 - Inspection Result: Approved

Facility has been upgraded to Approved status following the correction of the following violations during inspection by the Environmental Health Department. The facility has corrected:

- Time/Temperature Control for Safety Food, Cold Holding (Food items stored in cooler had logs and where able to be moved into another cooler)
- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch (PIC corrected violation by making fresh 200 PPM quat batch)
- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition (Food items dated)

FRESQUEZ CONCESSIONS - 2200 SUNPORT BLVD SE

Food Establishment Class C

Date: 08/03/2026 - #: RT-FODEST-010711-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds. PIC corrected violation by making fresh 200 PPM quat batch.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Kitchen and front service area

Concentration: 0 PPM

Violation: Date Marking and Disposition

• **Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition**

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Front display cooler

Food Items: Multiple cheese sandwiches Expiration Dates: Not available

Violation: Cold Holding

• **Time/Temperature Control for Safety Food, Cold Holding**

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Refrigerated make table

Food Items: Chopped tomatoes (52°F), Chopped onions (50°F) Sliced tomatoes (51°F) Chopped cauliflower (52°F)

• **Cold Holding Capacities-Equipment**

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: Rear refrigerated make table Condition: Observed cooler to be at an ambient temperature of 59°F and was also heavily overstocked

Violation: Personal Cleanliness

• **Effectiveness-Hair Restraints**

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Kitchen

Activity: Active food handling of unprotected foods with hair net partially on.

Violation: Storage

• **Equipment and Utensils, Air-Drying Required**

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: Clean dish rack

Equipment Type: Clear trays

Manner: Observed containers not air dried and stored wet stacked dripping onto items below

FRESQUEZ CONCESSIONS - 2200 SUNPORT BLVD SE**Food Establishment Class C****Date: 08/03/2026 - #: RT-FOODEST-017252-2025 - Inspection Result: Approved****Violation: Pest Control****• Controlling Pests, If Present: Treatment**

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place. Location: Rear kitchen by mop sink

Pest Type: Fruit flies Pest Condition: Living

Violation: Plumbing**• System Maintained in Good Repair, Repaired According to Law**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed 3-compartment sink is not maintained in good repair or is not repaired by law. Observed drain pipe on under side of the 3-compartment found in disrepair by having a leak that needs to be repaired.

Fresquez Concessions, Inc. - 2200 SUNPORT BLVD SE - Conditional Approved**Fresquez Concessions, Inc. - 2200 SUNPORT BLVD SE****Food Establishment Class C****Date: 08/03/2026 - #: CAC-Food-073352-2026 - Inspection Result: Approved**

Facility has been upgraded to Approved status following the correction of the following violations during inspection by the Environmental Health Department. The facility has corrected:

- Time/Temperature Control for Safety Food, Cold Holding (Person in charge voluntarily discarded food in ice bath)
- Identifying Information, Prominence-Original Containers (identifying label placed on chemical sanitizer)
- Prohibition-Jewelry (jewelry removed)

Fresquez Concessions, Inc. - 2200 SUNPORT BLVD SE**Food Establishment Class C****Date: 08/03/2026 - #: RT-FOODEST-101372-2025 - Inspection Result: Conditional Approved****Violation: Poisonous and Toxic/Chemical Substances****• Identifying Information, Prominence-Original Containers**

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Wiping cloth bucket under espresso machine

Alleged Material: Quat sanitizer

Violation: Pest Control**• Controlling Pests, If Present: Treatment**

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place. Location: Rear kitchen by mop sink

Pest Type: Fruit flies Pest Condition: Living

Violation: Plumbing**• Approved System and Cleanable Fixtures, Designed/Installed By Law**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed mechanical dishwasher is not maintained in good repair or is not repaired by law. Observed dishwasher drain pipe to be found in disrepair by having a significant leak on the underside causing water to buildup on floor below.

Violation: Cold Holding**• Time/Temperature Control for Safety Food, Cold Holding**

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Ice bath next to cook line
Food Items: Guacamole (47°F), Sliced deli meat (57°F), Sliced cheese (44°F)

Violation: Personal Cleanliness

• **Prohibition-Jewelry**

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Active food handling of uncovered food items Inappropriate
Jewelry Observed: Wrist watch

HOTEL PARQ CENTRAL - 806 CENTRAL AVE SE - Approved

HOTEL PARQ CENTRAL - 806 CENTRAL AVE SE

Food Establishment Class C

Date: 08/05/2026 - #: RT-FOODEST-073494-2026 - Inspection Result: Approved

Follow up inspection resulted in facility being upgraded from an Unsatisfactory status to and Approved status. PIC has corrected all observed violations and provided photo documentation of corrections. CHPD inspector has no cause for concern.

HOTEL PARQ CENTRAL - 806 CENTRAL AVE SE

Food Establishment Class C

Date: 08/04/2026 - #: CAC-Food-073481-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Routine Food Establishment Inspection. Inspection resulted in a Closure. Facility was not closed due to PIC correction three (3) Priority violation on site bringing score back up to an Unsatisfactory status. CHPD inspector instructed PIC to send photo documentation of corrections and repairs to contact information provided on business. PIC must call for re-inspection after photo documentation has been provided and reviewed. CHPD inspector is requiring all food staff and any staff associated with kitchen take a food safety course with the Environmental Health Department. Food safety course can be scheduled by contacting EHD.

Violations corrected:

1. Equipment, Food Contact Surfaces, and Utensils Clean: Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch
2. Hot Holding & Reheating: Time/Temperature Control for Safety Food, Hot Holding
3. Plumbing: Backflow Prevention, Air Gap

HOTEL PARQ CENTRAL - 806 CENTRAL AVE SE

Food Establishment Class C

Date: 08/04/2026 - #: PT0111688 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC did not correct violation.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Three-compartment sink

Concentration: Zero ppm

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Violation corrected on site by PIC discarding ice and cleaning ice machine.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine and cutting blade on can opener

Location: Back of house

Condition of the Location: Ice machine has extreme buildup of black organic matter

Violation: Hot Holding & Reheating

• **Time/Temperature Control for Safety Food, Hot Holding**

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165 F and to maintain temperature at 135 F and above.

Violation corrected on site by PIC reheating egg frittatas to 165°F

Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Egg frittatas

Food Temperature: 102°F

Violation: Date Marking and Disposition

• **Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition**

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded

food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Undercounter cooler

Food Items: Cut cantaloupe Expiration Dates: No dates.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed floor drain near ice machine is not maintained in good repair or is not repaired by law. Observed floor drain near ice machine found in disrepair by missing strainer.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Violation corrected on site by PIC cut drain pipe back to create an air gap. Observed an inadequate air gap at floor drain near ice machine.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no/expired testing kit or other device to measure the concentration of chemical sanitizing solution

Violation: Designated Areas

• Storage-Other Personal Care Items

- Employees shall store their personal care items in proper storage facilities. Instructed PIC to move employee belongings to an approved location. Observed employee personal care items stored incorrectly.

Location: Back of house near ice machine on bulk food storage containers.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purpose such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purpose other than handwashing.

Observed handwashing sink used for purpose other than handwashing. Location: Hand wash station located near three-compartment sink Manner: Director of operation discarding drink inn hand wash sink.

Violation: Lighting

• Light Bulbs, Protective Shielding

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning. Violation corrected on site by PIC replacing burnt bulbs

Observed inadequate amount of lighting. Location: Hood vent

Manner: Burnt bulbs

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: Donning new gloves and switching tasks.

• Where to Wash

- Food employees shall only clean their hands in a handwashing sink or approved automatic handwashing facility. Effective handwashing is essential for minimizing the likelihood of the hands becoming a vehicle of cross contamination. It is important that handwashing be done only at a properly equipped handwashing facility in order to help ensure that food employees effectively clean their hands and to prevent the contamination of food preparation sinks. Food employee re-washed hands in a designated hand sink. Instructed PIC to retrain employees on proper hand washing procedures.

Food employee stated they utilize three-compartment sink for washing hands in not in a hand washing sink. Location: Three-compartment sink.

I SCREAM ICE CREAM - 2000 CARLISLE BLVD NE, F - Approved

I SCREAM ICE CREAM - 2000 CARLISLE BLVD NE, F

Food Establishment Class B

Date: 08/03/2026 - #: RT-FOODEST-015639-2025 - Inspection Result: Approved

Complaint

This inspection was the result of a citizen complaint that was unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Cutting blade on can opener

Location: Prep table

Condition of the Location: Food debris on cutting blade

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

Indian Cuisine LLC DBA Taaj Palace - 1435 EUBANK BLVD NE - Conditional Approved

Indian Cuisine LLC DBA Taaj Palace- 1435

EUBANK BLVD NE Food Establishment

Class C

Date: 08/06/2026 - #: RT-FOODEST-074783-2026 - Inspection Result: Conditional Approved

Complaint

This inspection was the result of a citizen complaint.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine, Can opener, food dicer, Immersion Blenders Location: Kitchen area and back dry storage Condition of the Location: Brown buildup on inside of ice machine. Can opener, Food dicer and Immersion blenders with dry food debris buildup

Violation: Poisonous and Toxic/Chemical Substances

• Conditions of Use

- A restricted use pesticide shall be applied only by an applicator licensed by the New Mexico Department of Agriculture. Instructed PIC not to use restricted use pesticides or to have a pest control operator apply restricted use pesticides. Advised PIC that local ordinance requires treatment of infestations to be performed by a professional pest control applicator.

Observed pesticides used in the facility that is not state it is approved for use in food establishments on the manufacturer's label. Pesticide: Ortho Orthene Fire ant killer Location: Dry storage area, bathrooms and by back door.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests.

Observed pests allowed to accumulate in Facility Location: Server's station and back dry storage Pest Type: cockroach, and spider

Pest Condition: dead cockroaches 1 live spider

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Filters

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.
Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface. Location: Main cook line in kitchen Equipment: Missing hood filter vents

• **Heating, Ventilation, Air Conditioning System Vents**

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed interior intake and exhaust air ducts with debris buildup. Location: Kitchen area

Violation: Food Separation

Violation: Physical Facilities

• **Outer Openings, Protected**

- Walls and roofs provide a barrier to protect the interior and foods from the weather, windblown dirt and debris, and flying insects. Perimeter walls and roofs of a food establishment shall effectively protect the establishment from the weather and the entry of insects, rodents, and other animals.
Observed doors to the outside that are not tight fitting, light can be seen at the edges. Back screen door with gaps on bottom and on sides

Violation: Storage

• **Food Storage-Preventing Contamination from the Premises**

- Food must be protected from contamination of splashing water, chemical, or other foods; dust; and other contaminants. Instructed PIC to have food protected in containers/wrapping and not to store food in those areas unless the source of contamination can be mediated another way.
Observed food stored improperly where it was exposed to contamination from splash, dust, or other contamination. Location: Walk in cooler Food Item: All food items Condition: Not covered

Violation: Designated Areas

• **Designated Areas-Employee Accommodations for eating/drinking/smoking**

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

• **Designation-Dressing Areas and Lockers**

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Lighting

• **Light Bulbs, Protective Shielding**

- Instructed PIC to make repairs necessary so that light bulbs are shielded, coated, or made otherwise shatter-resistant to prevent the contamination of exposed food, clean equipment, utensils, linens, or unwrapped single-service-single-use articles.
Observed light bulbs with no protective shielding, coating or by other means shatter-resistant. Location: Back dry storage area Manner: not shatter proof bulb, and or missing cover

Violation: Personal Cleanliness

• **Prohibition-Jewelry**

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: Wrist jewelry

• **Effectiveness-Hair Restraints**

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Kitchen area Activity: Actively working with open food items

Violation: Hands Clean & Properly Washed

• **When to Wash**

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee not wash hands when required. Condition: Observed Multiple employees changing tasks and gloves without washing hands. Observed employee drink out of water bottle that had to be manipulated open then return to work without washing hands

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on walls in the kitchen and to clean and sanitize walls. Observed buildup and debris on the walls in the kitchen

Violation: Consumer Advisories

• **Allergen Warning, Unpackaged Food**

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Storage

• **In-Use Utensils, Between-Use Storage**

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under ☐☐ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Scoops Location: Dry storage and kitchen area Condition of the Location: Scoops stored in food container with handles directly touching the food product inside

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located On the side of the equipment and bottom shelves of prep tables The condition of the surface was debris buildup

Indian Cuisine LLC - 1435 EUBANK BLVD NE

Food Establishment Class C

Date: 08/06/2026 - #: RT-FOODEST-002003-2026 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55F. PIC corrected violation by Remaking sanitizer solution

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Wiping cloth bucket in servers station Concentration: 0ppm

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine, Can opener, food dicer, Immersion Blenders Location: Kitchen area and back dry storage Condition of the Location: Brown buildup on inside of ice machine. Can opener, Food dicer and Immersion blenders with dry food debris buildup

Violation: Poisonous and Toxic/Chemical Substances

• **Separation-Storage**

- Poisonous or toxic materials shall be stored and displayed for retail so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by separating the poisonous or toxic materials by spacing or partitioning and locating the poisonous or toxic materials in an area that is not above food, equipment, utensils, linens, and single-service and single-use articles. Instructed PIC to move toxic chemicals to an approved location and that contaminated single-service and single-use articles must be discarded.

Observed poisonous or toxic materials stored in a manner that has the potential to contaminate food. Poisonous/Toxic Substance: Liquid nails, paint primer, and Ajax cleaner Location: Liquid nails stored next to Food coloring, Paint primer stored next to Sugar packets, and Ajax cleaner stored directly above open bin of sugar

• **Conditions of Use**

- A restricted use pesticide shall be applied only by an applicator licensed by the New Mexico Department of Agriculture. Instructed PIC not to use restricted use pesticides or to have a pest control operator apply restricted use pesticides. Advised PIC that local ordinance requires treatment of infestations to be performed by a professional pest control applicator.

Observed pesticides used in the facility that is not state it is approved for use in food establishments on the manufacturer's label. Pesticide: Ortho Orthene Fire ant killer Location: Dry storage area, bathrooms and by back door.

• **Common Name-Working Containers**

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottles Alleged Material: sanitizer

Violation: Pest Control

• **Removing Dead or Trapped Birds, Insects, Rodents and other Pest**

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests.

Observed pests allowed to accumulate in Facility Location: Server's station and back dry storage Pest Type: cockroach, and spider

Pest Condition: dead cockroaches 1 live spider

Violation: Date Marking and Disposition

• **Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition**

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Walk in cooler, Prep top coolers, and Upright coolers Food Items: All TCS food items Expiration Dates:

Violation: Plumbing

• **System Maintained in Good Repair, Repaired According to Law**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Piping from walk in cooler and three-compartment sink is not maintained in good repair or is not repaired by law. Observed plumbing from walk in cooler found in disrepair by draining directly on the floor behind prep table

Observed Three-compartment sink found in disrepair by hole or crack in basin on sink causing water to leak directly onto the floor

Violation: Ventilation and Hood Systems

• **Ventilation Hood Systems, Filters**

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface. Location: Main cook line in kitchen Equipment: Missing hood filter vents

• **Heating, Ventilation, Air Conditioning System Vents**

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Kitchen area

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• **Package Integrity**

- Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging.

Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants. Packaged Food: Can of garbanzo beans Location: Back dry storage Condition: dented can

Observed #10 can missing label completely

• **Food Storage Containers Identified with Common Name of Food**

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Food service pans with spices, flours and sugars Location: Throughout kitchen area

Violation: Food Separation

• **Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination**

- It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination.

Observed non-ready-to-eat raw animal food stored with ready-to-eat food without protection from contamination. Location: Walk in cooler and upright cooler Food Item: Raw chicken and Eggs Condition: Raw chicken stored above cooked chicken in walk in cooler and Raw eggs stored directly on top of Croissants

Violation: Physical Facilities

• **Outer Openings, Protected**

- Walls and roofs provide a barrier to protect the interior and foods from the weather, windblown dirt and debris, and flying insects. Perimeter walls and roofs of a food establishment shall effectively protect the establishment from the weather and the entry of insects, rodents, and other animals.

Observed doors to the outside that are not tight fitting, light can be seen at the edges. Back screen door with gaps on bottom and on sides

Violation: Storage

• **Food Storage-Preventing Contamination from the Premises**

- Food must be protected from contamination of splashing water, chemical, or other foods; dust; and other contaminants. Instructed PIC to have food protected in containers/wrapping and not to store food in those areas unless the source of contamination can be mediated another way.

Observed food stored improperly where it was exposed to contamination from splash, dust, or other contamination. Location: Walk in cooler Food Item: All food items Condition: Not covered

Violation: Designated Areas

• **Designated Areas-Employee Accommodations for eating/drinking/smoking**

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

• **Designation-Dressing Areas and Lockers**

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Lighting

• **Light Bulbs, Protective Shielding**

- Instructed PIC to make repairs necessary so that light bulbs are shielded, coated, or made otherwise shatter-resistant to prevent the contamination of exposed food, clean equipment, utensils, linens, or unwrapped single-service-single-use articles.

Observed light bulbs with no protective shielding, coating or by other means shatter-resistant. Location: Back dry storage area Manner: not shatter proof bulb, and or missing cover

Violation: Personal Cleanliness

• **Prohibition-Jewelry**

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: Wrist jewelry

• **Effectiveness-Hair Restraints**

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Kitchen area Activity: Actively working with open food items

Violation: Hands Clean & Properly Washed

• **When to Wash**

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: Observed Multiple employees changing tasks and gloves without washing hands. Observed employee drink out of water bottle that had to be manipulated open then return to work without washing hands

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on walls in the kitchen and to clean and sanitize walls. Observed buildup and debris on the walls in the kitchen

Violation: Consumer Advisories

• **Allergen Warning, Unpackaged Food**

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Storage

• **In-Use Utensils, Between-Use Storage**

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under ☐☐ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Scoops Location: Dry storage and kitchen area Condition of the Location: Scoops stored in food container with handles directly touching the food product inside

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located On the side of the equipment and bottom shelves of prep tables The condition of the surface was debris buildup

Violation: Single-Service

• **Single-Service and Single-Use Articles-Use Limitations**

- Single-service and single-use articles may not be reused. Articles that are not constructed of multiuse materials may not be reused as they are unable to withstand the rigors of multiple uses, including the ability to be subjected to repeated washing, rinsing, and sanitizing. Instructed PIC that all single-service and single-use articles being reused must be replaced with multiuse containers and/articles.

Observed single-use containers being re-used. Location: Throughout kitchen Use: Reusing garlic and milk containers to hold other food items

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: stored

• **Calibration Logs**

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

INSOMNIA COOKIES 130 - 2132 CENTRAL AVE SE, A-2 - Approved

INSOMNIA COOKIES 130 - 2132 CENTRAL AVE SE, A-2

Food Establishment Class C

Date: 08/06/2026 - #: RT-FOODEST-115237-2025 - Inspection Result: Approved

Violation: Maintenance and Operation

• **Good Repair and Proper Adjustment-Equipment**

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment components not maintained. Location: Point of sale

Type of equipment: Sliding glass pane on the ice cream display cooler

Condition of component: Sliding glass pane is being held together by tape which prevents proper cleaning and sanitizing

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Observed nonfood contact surface with the buildup of soil residues. The surface was located inside the reach in chest freezers and floors in the walk-in freezer. The surface was made out of plastic and stainless steel. The condition of the surface was soiled with food debris and ice frost

J BENTO SUSHI - 7610 CARMEL AVE NE, E - Approved

J BENTO SUSHI - 7610 CARMEL AVE NE, E

Food Establishment Class D

Date: 08/03/2026 - #: PT0159567 - Inspection Result: Approved

Violation: Training Records

• **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file. Instructed PIC to provide a copy of CPFM certification to CHPD inspector when it is obtained.

Observed that the food establishment does not have a certified food protection manager on staff. Observed PIC stated that they are currently taking the online training course.

Violation: Operations

• **Valid Permit**

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a copy of the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

Limra DBA Royal Hyderabad - 5760 McMahon NW BLVD, Ste B-E - Approved

Limra DBA Royal Hyderabad - 5760 McMahon NW BLVD, Ste B-E

Food Establishment Class C

Date: 08/05/2026 - #: RT-FOODEST-070655-2026 - Inspection Result: Approved

Complaint

This inspection was the result of a citizen complaint that was previously substantiated and since corrected.

Violation: Thawing

• **Thawing Method**

- Freezing prevents microbial growth in foods but usually does not destroy all microorganisms. Improper thawing provides an opportunity for surviving bacteria to grow to harmful numbers and/or produce toxins. Food must be thawed in an approved method such as: A. under refrigeration maintaining food below forty-one (41) degrees F or below, B. submerged under running water at seventy (70) degrees F, or below with sufficient velocity to agitate and float off loose particles in the overflow, if ready-to-eat does not go above forty-one (41) degrees F, or if raw does not exceed forty-one (41) degrees F for four (4) hours including the cooking or re-cooling process C. in a microwave oven only when the food will be immediately transferred to conventional cooking facilities as part of a continuous cooking process, or when the entire, uninterrupted cooking process takes place in the microwave oven D. as part of the cooking process E. prepared for immediate service in response to an individual consumer's order Instructed PIC to retrain food employees on thawing food and PIC corrected violation by placing the frozen chicken in the prep sink and running under colder water at 70 degrees.

Observed frozen time/temperature control for safety food improperly thawing. Food: Frozen chicken Location: Tonnage rack

Condition: 2 cases of Frozen chicken be thawed at room temperature.

Violation: Plumbing

• **System Maintained in Good Repair, Repaired According to Law**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed prep sink is not maintained in good repair or is not repaired by law. Observed Bottom of the prep sink discharge tubing /sink drain plug leaking.

Violation: Training Records

• **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff. last inspection the chef did not pass his managers food handler's test.

Violation: Ventilation and Hood Systems

• **Cleaning Ventilation Systems, Nuisance and Discharge Prohibition**

- Instructed pic to clean and sanitize the hood and ventilation systems on a regular basis. to prevent from coming a source of contamination on ready to eat food items.

Observed interior intake and exhaust air ducts with debris buildup. Location: Throughout the food service areas.

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Observed nonfood contact surface with the buildup of soil residues. The surface was located Kitchen cooking areas
The surface was made out of Stainless-steel metal
The condition of the surface tables, shelving, storage racks, make tables, stoves sinks and dishwasher.

MICHOA K ANA LLC - 301 San Pedro DR SE, SUITE #1 - Approved

MICHOA K ANA LLC - 301 San Pedro DR SE, SUITE #1

Food Establishment Class C

Date: 08/04/2026 - #: CAC-Food-073816-2026 - Inspection Result: Approved

Facility has been upgraded to approved status following the correction of the following violations during inspection by the Environmental Health Department. The facility has corrected:

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch (Food contact surfaces have been cleaned and sanitized)
- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition (Date labels were placed on two food items missing the date labels)

MICHOA K ANA LLC - 301 San Pedro DR SE, SUITE #1

Food Establishment Class C

Date: 08/04/2026 - #: RT-FOODEST-107380-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice cream scoops, ice machine, can opener Location: Kitchen and make line
Condition of the Location: Soiled with food debris and residue

Violation: Date Marking and Disposition

• **Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition**

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Reach in cooler
Food Items: Watermelon, cut banana Expiration Dates: Not available

Violation: Toilet Facilities

• **Toilet Rooms, Enclosed**

- Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.
Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

Violation: Cold Holding

• **Time/Temperature Control for Safety Food, Cold Holding**

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Make line fruit case
Food Items: Watermelon (46°F), Mango (46°F), Pineapple (49°F)

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Observed nonfood contact surface with the buildup of soil residues. The surface was located inside ice cream dipper well and reach in coolers. The condition of the surface was soiled with debris accumulation, ice frost and residue.

Morningstar Memory Care at North Ridge - 8101 PALOMAS AVE NE - Approved

Morningstar Memory Care at North Ridge - 8101 PALOMAS AVE NE

Food Establishment Class C

Date: 08/06/2026 - #: RT-FOODEST-116387-2025 - Inspection Result: Approved

Violation: Training Records

- **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Testing Devices

- **Sanitizing Solutions, Testing Devices**

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

OLD GLORY - 3851 RIO GRANDE BLVD NE, B - Approved

OLD GLORY - 3851 RIO GRANDE BLVD NE, B

Mobile Food Unit Class C

Date: 08/05/2026 - #: RT-MBFOOD-064504-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55F. PIC corrected violation by PIC calling technician out to repair dish washer

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization

. Location: Dishwasher.

Concentration: 0 ppm

Temperature: 131

PALETERIA MICHOACANA EL PARAISO - 9001 CENTRAL AVE NE, C - Conditional Approved

PALETERIA MICHOACANA EL PARAISO - 9001 CENTRAL AVE NE, C

Food Establishment Class C

Date: 08/07/2026 - #: RT-FOODEST-075215-2026 - Inspection Result: Conditional Approved

Violation: Knowledgeable

- **Knowledgeable Person In Charge**

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Knowledge Tested: Asked about chlorine sanitizer did not know. Hot temperatures and cold temperatures unknown, named two food borne illnesses. Also, multiple priority violations.

Violation: Training Records

- **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

- **Food Handler Cards**

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Toilet Facilities

- **Toilet Rooms, Enclosed**

- Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.

Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

Violation: Testing Devices

- **Food Temperature Measuring Devices**

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

Observed food temperature measuring devices were not provided or readily accessible.

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures. Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Inside display areas Thermometer Location: None available

Violation: Operations

• Permit Posted

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Provided a copy of the valid permit for posting. Observed that no food permit was posted at the facility.

PALETERIA MICHOACANA EL PARAISO - 9001 CENTRAL AVE NE, C

Food Establishment Class C

Date: 08/07/2026 - #: PT0150163 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Condition of the Location: Debris buildup.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Inside standing cold holding unit Food Items: Prepared watermelon, cantaloupe and mango Expiration Dates: None available.

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Knowledge Tested: Asked about chlorine sanitizer did not know. Hot temperatures and cold temperatures unknown, named two food borne illnesses. Also, multiple priority violations.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Toilet Facilities

• Toilet Room Receptacle, Covered

- Instructed to provide a covered receptacle for sanitary napkins. Observed in a toilet room used by females, no covered receptacle.

• Toilet Rooms, Enclosed

- Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.

Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC voluntarily discarded food items.

Observed food items in cold holding unit measuring above 41°F. Location: Two standing cold holding units to the right of facility and also one display unit and cold holding make table. Food Items and Temperatures: Prepared watermelon 48 degrees f, prepared mango 49 degrees f, sliced ham 49 degrees f, shredded cheese 50 degrees f, corn on the cob 55 degrees f, corn 55 degrees f, blackberry mix 49 degrees f, watermelon 69 degrees f, cantaloupe 67 degrees f, chopped tomato 56 degrees f, chopped lettuce 49 degrees f, chopped cucumbers 47 degrees f, pork skin 47 degrees f.

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

Observed food temperature measuring devices were not provided or readily accessible.

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Hand washing sink inside kitchen

Violation: Warewashing Temperature and Concentration

• Sanitizers, Criteria-Chemicals

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR. PIC corrected violation by inspector demonstrating and providing small amount of test strips. Chlorine sanitizer was set up and tested correctly.

Observed no chemical sanitizer set up while in operations.

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures.

Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Inside display areas Thermometer Location: None available

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment.

Observed that the facility was operating with an expired permit.

• Permit Posted

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Provided a copy of the valid permit for posting.

Observed that no food permit was posted at the facility.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Dairy products, sliced deli meat, prepared fruit and vegetables. Activity of the Food: Stored, received, cooled

PALOMA LANDING - 8301 PALOMAS AVE NE - Approved

PALOMA LANDING - 8301 PALOMAS AVE NE

Food Establishment Class C

Date: 08/03/2026 - #: CAC-Food-073163-2026 - Inspection Result: Approved

Corrective action taken during the routine inspection resulted in the facility being upgraded from a Conditional Approved Status to Approved Status. The person in

charge promptly addressed and corrected most of the violations noted in the original inspection report while on site. The following priority and priority foundation violations were corrected on site:

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch. Observed PIC take can opener to warewashing area to be cleaned and sanitized during inspection.

- Package Integrity. Observed dented cans were removed from sale and segregated during inspection.

PALOMA LANDING - 8301 PALOMAS AVE NE

Food Establishment Class C

Date: 08/03/2026 - #: PT0095595 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener blade. Location: attached to prep top ledge. Condition of the Location: observed debris and buildup on the can opener blade.

Violation: Miscellaneous

• Miscellaneous Sources of Contamination

- Regardless of its specificity, a Code cannot anticipate all the diverse means by which food can become contaminated after receipt. Food must be protected from all sources of contamination.

Method of contamination: Using the three-compartment sink for thawing a food item and conducting warewashing at the same time. Food that was contaminated: frozen package of hot dogs

Location: three-compartment sink rinse basin.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at the drain pipe for the ice machine. Observed drain pipe was below flood level rim of floor drain.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Package Integrity

- Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return.

Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants. Packaged Food: two cans of prunes. Location: rack. Condition: dented cans.

Violation: Precleaning and Rinsing

• Rinsing Procedures

- Precleaning of utensils, dishes, and food equipment allows for the removal of grease and food debris to facilitate the cleaning action of the detergent. Depending upon the condition of the surface to be cleaned, detergent alone may not be sufficient to loosen soil for cleaning. Heavily soiled surfaces may need to be presoaked or scrubbed with an abrasive. Food debris on equipment and utensils shall be scraped over a waste disposal unit or garbage receptacle or shall be removed in a warewashing machine with a prewash cycle. If necessary for effective cleaning, utensils and equipment shall be pre-flushed, presoaked, or scrubbed with abrasives. Instructed PIC to retain employees on proper precleaning procedures and that equipment and utensils observed being cleaned and sanitized without a precleaning step must be re-cleaned and sanitized properly.

Observed a three (3) compartment sink being used for warewashing without use of a water rinse step.

PAPA JOHNS' PIZZA - 2206 CENTRAL AVE SE - Approved

PAPA JOHNS' PIZZA - 2206 CENTRAL AVE SE

Food Establishment Class C

Date: 08/06/2026 - #: RT-FOODEST-100137-2025 - Inspection Result: Approved

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed rear kitchen handwashing sink is not maintained in good repair or is not repaired by law. Observed handwashing sink found in disrepair by being non-operational with both water valves shut off. Person in charge stated that it was shut off due to a leak that needs to be repaired.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain located under the 3-compartment sink.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on the kitchen floors especially in hard-to-reach areas such as under kitchen equipment and corners.

Observed buildup and debris on the kitchen floors.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on the pizza oven. The surface was made out of stainless-steel construction. The condition of the surface was soiled with food debris buildup.

PETER PIPER PIZZA - 3109 SAN MATEO BLVD NE - Approved

PETER PIPER PIZZA - 3109 SAN MATEO BLVD NE

Food Establishment Class C

Date: 08/04/2026 - #: RT-FOODEST-073829-2026 - Inspection Result: Approved

Complaint

This inspection was the result of a citizen complaint that was substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine, Can opener, and Food slicer Location: Kitchen area Condition of the Location: Brown and black organic substance on inside of ice machine dripping onto the ice in bin. Dried food debris on Can opener blade, and Food slicer

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact

time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed soiled wiping cloths stored on prep tables, cutting boards and on shelves in walk in cooler

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain under three-compartment sink and floor drain behind salad bowls on buffet

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Large bin of Cornmeal / Semolina Location: Kitchen area

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution. Sanitizer strips being used by facility were expired as of Sep 15 2025

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Observed Employee drinks and food items on prep tables in coolers and on racks

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings. Cell phone stored on prep table directly above open food items

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: Wrist watches

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.

Observed a soiled mop not in use, stored directly on the floor.

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on Floors walls and Ceiling and to clean and sanitize areas

Observed buildup and debris on the floors, floor drains, walls and ceiling. With substantial buildup in ware washing area

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Scoops and cups Location: Throughout kitchen area Condition of the Location: Scoops and cups stored in food containers with handles directly touching the food product inside

• **Equipment and Utensils, Air-Drying Required**

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: not air dried and stacked wet

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Fans in kitchen, the chest freezer by back door, the sprayer for three-compartment sinks and reach in coolers The condition of the surface was food and soil debris buildup

Violation: Physical Facilities, Construction and Repair

• **Repairing-Premises, Structures, Attachments, and Fixtures-Methods**

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed walls by soda machine and around three-compartment sink in disrepair by missing drywall

PETER PIPER PIZZA - 3109 SAN MATEO BLVD NE

Food Establishment Class C

Date: 08/04/2026 - #: RT-FOODEST-034195-2026 - Inspection Result: Closure Re-Inspection Required

Complaint

This inspection was the result of a citizen complaint that was substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC corrected violation by remaking sanitizer solution.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: All buckets in kitchen Concentration: 0ppm

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine, Can opener, and Food slicer Location: Kitchen area Condition of the Location: Brown and black organic substance on inside of ice machine dripping onto the ice in bin. Dried food debris on Can opener blade, and Food slicer

Violation: Poisonous and Toxic/Chemical Substances

• **Common Name-Working Containers**

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottle Alleged Material: Unknown

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165 F and to maintain temperature at 135 F and above.

Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Pasta on buffet line

Food Temperature: 92°F

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed soiled wiping cloths stored on prep tables, cutting boards and on shelves in walk in cooler

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Prep top cooler on pizza make line and walk in cooler Food Items: Pizza sauce in prep top cooler and Salad dressings in walk in cooler

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain under three-compartment sink and floor drain behind salad bowls on buffet

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Large bin of Cornmeal / Semolina Location: Kitchen area

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Buffet Food Items: Salads Temperature: 53°F

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution. Sanitizer strips being used by facility were expired as of Sep 15 2025

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Observed Employee drinks and food items on prep tables in coolers and on racks

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings. Cell phone stored on prep table directly above open food items

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: Wrist watches

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed a soiled mop not in use, stored directly on the floor.

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on Floors walls and Ceiling and to clean and sanitize areas
Observed buildup and debris on the floors, floor drains, walls and ceiling. With substantial buildup in ware washing area

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under ☐ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Scoops and cups Location: Throughout kitchen area Condition of the Location: Scoops and cups stored in food containers with handles directly touching the food product inside

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: not air dried and stacked wet

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located Fans in kitchen, the chest freezer by back door, the sprayer for three-compartment sinks and reach in coolers The condition of the surface was food and soil debris buildup

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair. Observed walls by soda machine and around three-compartment sink in disrepair by missing drywall

QUALITY INN AND SUITES - 5601 ALAMEDA BLVD NE - Approved

QUALITY INN AND SUITES - 5601 ALAMEDA BLVD NE

Food Establishment Class B

Date: 08/05/2026 - #: RT-FOODEST-072670-2026 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

QUALITY INN AND SUITES - 5601 ALAMEDA BLVD NE

Food Establishment Class B

Date: 08/03/2026 - #: CAC-Food-073013-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Corrective Action Compliance: Facility is being upgraded to an Unsatisfactory status from a Closure. Facility will remain in an Unsatisfactory status for a minimum of five days. CHPD inspector will re-inspect facility while in operation to ensure safe food operations. PIC has corrected and repaired observed violations and provided photo documentation of corrections and repairs.

Violations corrected:

1. Cold Holding: Cold Holding Capacities-Equipment
2. Food Contact Surfaces Cleaned & Sanitized: Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness
3. Hands Clean & Properly Washed: When to Wash
4. Plumbing: Backflow Prevention, Air Gap
5. Testing Devices: Sanitizing Solutions, Testing Devices
6. Testing Devices: Food Temperature Measuring Devices

Quesadilla Way LLC - 5305 GIBSON BLVD SE - Closure Re-Inspection Required

Quesadilla Way LLC - 5305 GIBSON BLVD

SE Food Establishment Class C

Date: 08/07/2026 - #: RT-FOODEST-035309-2026 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Scoops, pans, pots, re-usable containers and other kitchen equipment.

Location: Kitchen and clean dish storage rack

Condition of the Location: Observed a heavy amount flies landing on and contaminating food contact surfaces within the kitchen. Including those stored in the clean dish storage area. Everything must be properly cleaned and sanitized.

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place. Location: All throughout kitchen, dish pit, storage area and lobby Pest Type: Excessive flies

Pest Condition: Living

Recommended that the facility installs an appropriate flying insect pest control device to help eradicate the infestation.

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Knowledge Tested: Facility had numerous

priority, and priority foundation violations. Additionally, PIC failed to prevent an imminent health hazard in the form of a fly infestation and lack of refrigeration from occurring inside the kitchen. The PIC also did not know proper refrigeration temperatures needed to keep food safe and out of temperature abuse.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed mop sink faucet and 3 compartment sink faucet are not maintained in good repair or are not repaired by law. Observed faucets found in disrepair by having significant leaks that need to be repaired and brought into compliance. Also observed drain hose for the ice machine is draining directly on floor below

causing standing water to track throughout facility.

Violation: Training Records

• Food Handler Cards

- Food handler cards shall be kept by the Food Employee on their Person while working as a Food Employee or volunteer for a Food operation, or a copy shall be kept on file by the current employer and be made available for inspection by the Enforcement Authority. If trained through another approved method; records of the training shall be maintained for the duration of the Food Employee's employment. Instructed PIC to provide updated training records to EHD for review. The PIC was unable to provide records of training or certification of food employees.

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: In kitchen directly above dish pit and un-covered hot holding steam table.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Refrigerated make table and walk in cooler

Food Items: Carne Asada (93°F), shredded meat (46°F), diced tomatoes (52°F) diced onions (53°F), shredded white cheese (54°F), shredded yellow cheese (54°F), green salsa (60°F), cooked chicken (46°F), green chile (45°F), consume (47°F)

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: Refrigerated make table and walk in cooler Condition: Not able to maintain food at appropriate temperature of 41°F or above.

Violation: Storage

• Food Storage, Prohibited Areas

- Unless food is stored on lot handling equipment it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.

Observed food stored improperly less than six (6) inches off the floor. Location: Walk in freezer, walk in cooler and in dry storage area Food Item: Onions, consume, packaged beef

• Food Storage-Preventing Contamination from the Premises

- Pathogens can contaminate and/or grow in food that is not stored properly. Drips of condensate and drafts of unfiltered air can be sources of microbial contamination for stored food. Shoes carry contamination onto the floors of food preparation and storage areas. Even trace amounts of refuse or wastes in rooms used as toilets or for dressing, storing garbage or implements, or housing machinery can become sources of food contamination. Moist conditions in storage areas promote microbial growth. Food must be protected from contamination and must not be stored in locker rooms, toilet rooms, dressing rooms, garbage rooms, mechanical rooms, under sewer lines, under leaking water lines, under open stairwells, or under other sources of contamination.

Observed food stored improperly under a miscellaneous source of contamination. Location: Walk in freezer Food Item: Observed leaking condenser line dripping directly onto tray of meat stored below it.

Violation: Sewage and Waste Water

• Conveying Sewage

- Sewage shall be conveyed to the point of disposal through an approved sanitary sewage system or other system, including use of sewage transport vehicles, waste retention tanks, pumps, pipes, hoses, and connections that are constructed, maintained, and operated according to law.

Observed drain hose for the ice machine to not be properly set up to drain through an approved system. Drain hose is sitting directly on the ceramic tiles below the ice machine. This is causing a severe amount of grey water to pool on the kitchen floor that is actively being tracked all throughout the kitchen and especially into the walk-in cooler.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on kitchen floors and to clean and sanitize on a regular basis.

Observed standing water buildup and food debris on the kitchen floors.

Violation: Storage

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.

Observed cleaned single-service and single-use articles stored improperly. Single-service and single-use articles was not stored six (6) inches above the floor.

Single-service and single-use articles Type: Multiple boxes of cups, forks, lids and to-go boxes.
Storage Method: Stored directly on unclean floor Location: Rear kitchen storage

Violation: Single-Service

• Single-Service and Single-Use Articles-Use Limitations

- Single-service and single-use articles may not be reused. Articles that are not constructed of multiuse materials may not be reused as they are unable to withstand the rigors of multiple uses, including the ability to be subjected to repeated washing, rinsing, and sanitizing. Instructed PIC that all single-service and single-use articles being reused must be replaced with multiuse containers and/articles.

Observed single-use containers being re-used.

Location: In cold holding units to store food items and also to hold dry foods as well.

Use: Single use product containers are being re-purposed to hold new prepared food items.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All hot and cold temperature-controlled food items. Activity of the Food: Stored, thawed, cooled□

R & G HEALTHCARE MANAGEMENT LLC - 6000 WHITEMAN DR NW - Approved

R & G HEALTHCARE MANAGEMENT LLC - 6000 WHITEMAN DR NW

Food Establishment Class C

Date: 08/03/2026 - #: PT0075491 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of cooking equipment and pans shall be cleaned at a frequency to prevent the buildup of soil residues and encrusted grease deposits. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine.

Location: Kitchen Ice machine.

Condition of the Location: door interior and edge of ice machine with. soil buildup. Interior of the reach in freezer in storage area with debris and soil buildup.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at Under three-compartment sink drain line below the drain line.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Filters

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Kitchen stove hoods and filter vents.

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.

Observed nonfood contact surface that was not smooth. The surface was located Kitchen The surface was made out of Kitchen cabinets exterior and shelving. The condition of the surface was exterior of the cabinets not a cleanable surface.

Interior cabinets are damaged and cracked not a cleanable surface.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage

and when food is not being served or prepared. Instructed person in charge to remove buildup and debris undrain under the three-compartments sinks and drain where ice machine is discharging water.

Floors in kitchen under counter with debris and soil buildup. And to clean and sanitize. areas noted.

Observed buildup and debris on the drain under the three-compartments sinks and drain where ice machine is discharging water. Floors in kitchen under counter with debris and soil buildup.

walls above the stove with debris buildup.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Kitchen cabinets and drawers. The surface was made out of compressed wood drawers and cabinets

The condition of the surface was with debris and soil buildup.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- Wall and ceiling covering materials shall be attached so that they are EASILY CLEANABLE. Instructed person in charge to replace or clean and sanitize area of concern so that it is maintained or is easily cleanable.

Observed Base coving and walls is not easily cleanable. The surface was made out of synthetic coving, and walls made out of dry wall. Missing base coving around kitchen.

Dry wall behind refrigerator behind the base coving with holes.

RIGO TACOS EL AMIGO - 8009 CENTRAL AVE NE - Approved

RIGO TACOS EL AMIGO - 8009 CENTRAL AVE NE

Mobile Food Unit Class C

Date: 08/06/2026 - #: PT0160722 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Up right standing cold holding unit Food Items: Cooked meats Temperature: 45 degrees f

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Clear plastic food container containing flour Location: On shelving inside mobile food unit

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked meats, soups, prepared vegetables, salsa and dairy products Activity of the Food: Stored, cooled, received

Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment.

Observed the food establishment does not have calibration logs for temperature measuring devices.

Mobile food establishments must visit their commissary each day of operation and keep a log of visits to be made available to EHD for inspection. Instructed the PIC to obtain visit logs from the commissary and provide them to EHD for review, and to maintain a copy of those records on the mobile food establishment at all times.

Observed that the mobile food establishment was unable to provide a log of visits to its commissary.

Complaint

This inspection was the result of a citizen complaint that was substantiated.

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair. Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: back area Type of Equipment: Walk In Cooler Condition of the equipment: step is broken.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed plumbing is not maintained in good repair or is not repaired by law. Observed drain in front area where ice cream machine and three-compartment sink is not draining and liquid is leaking on to floor.

Inspector instructed manager/pic to stop use of any machine or plumbing equipment in area that drains into that specific drain and only can start using when this drain is repaired and pictures of it draining have been sent to EHD.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap below three-compartment sink in front area and below ice machine in back area.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located back area The surface was made out of metal and plastic The condition of the surface had debris buildup on the exterior of the ice machine.

Violation: Single-Service

• Characteristics-Single-Service and Single-Use, Safe

- The safety and quality of food can be adversely affected through single service and single use articles that are not constructed of acceptable materials. Single-service articles must be clean and not allow for the migration of debris or other substances, impart colors, odors, or tastes to food; and must be safe. Instructed PIC that the single-service articles must not be used for food in the operations of the establishment and that proper single-service articles should be obtained.

Observed single-service articles that were unclear. observed boxes of straws and cups on floor under manager station/computer boxes were wet from employees keeping boxes on ground and then mopping without lifting them above the ground so boxes were soaked with water and possible chemicals.

Inspector instructed pic to discard single service items.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed back area in disrepair by holes in ceiling tile.

STARR BROTHERS BREWING COMPANY - 5700 SAN ANTONIO NE, B1 – Approved

STARR BROTHERS BREWING COMPANY - 5700 SAN ANTONIO NE, B1

Food Establishment Class C

Date: 08/04/2026 - #: PT0146293 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours. Instructed PIC to remove all ice and to clean and sanitize the internal surfaces of the ice machine.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: ice machine. Location: along center wall. Condition of the Location: Observed buildup and debris on the internal surface of the ice machine.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize floor and floor drains in listed areas.

Observed buildup and debris on the floor and in the following areas:

1. underneath shelving in walk in cooler
2. floor drains next to warewashing machine
3. floor underneath shelving in dry storage closet

STARR BROTHERS BREWING COMPANY - 5700 SAN ANTONIO NE, B1

Food Establishment Class B

STARR BROTHERS BREWING COMPANY - 5700 SAN ANTONIO NE, B1

Food Processor Class C

Date: 08/04/2026 - #: PT0160335 - Inspection Result: Approved

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting, or replace door sweep to prevent entry of pests. Light should not be seen through the door when closed.

Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed roller and north side doors to the outside that are not tight fitting, light can be seen at the bottom edges.

STARRY MOON WEI CHUAN - 8001 WYOMING BLVD NE - Approved

STARRY MOON WEI CHUAN - 8001 WYOMING BLVD NE

Food Establishment Class C

Date: 08/05/2026 - #: CAC-Food-074350-2026 - Inspection Result: Approved

Corrective action taken after the routine inspection resulted in the facility being upgraded from a Conditional Approved Status to Approved Status. The person in charge addressed and corrected some of the violations noted in the original inspection report while on site. The following violations were corrected:

- Time/Temperature Control for Safety Food, Cold Holding. Observed PIC relocated food item to cooler.
- Valid Permit. PIC sent copy of receipt for verification of permit fee payment.
- System Maintained in Good Repair. PIC provided photo showing toilet flush lever handle was repaired.

STARRY MOON WEI CHUAN - 8001 WYOMING BLVD NE

Food Establishment Class C

Date: 08/05/2026 - #: PT0154552 - Inspection Result: Conditional Approved

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
- Observed toilet lever flush handle in women's restroom is not maintained in good repair or is not repaired by law. Observed toilet lever flush handle found in disrepair by not being securely connected to the tank and is loose causing it to come loose after flushing toilet.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
- Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Honestly Presented

- Food shall be offered for human consumption in a way that does not mislead or misinform the consumer. Instructed PIC to discontinue partial removal of labels showing chocolate bar food processing company and other required label information.
- Observed food offered for human consumption in a way that misleads or misinforms the consumer. Food: Dubai Chocolate Bars. Location: Upright cooler.
- Condition: Observed labels on chocolate bars have been partially removed. Observed labels available are ingredient and allergen information but information for the food processing company was removed.

Violation: Installation

• Handwashing Sinks, Installation, Water 85F

- A handwashing sink shall be equipped to provide water at a temperature of at least 85°F through a mixing valve or combination faucet. Instructed PIC to repair or replace handwashing sink so it has hot water available at all times.
- Observed handwashing sink with hot water not available. Location: Men's and Women's restrooms. Condition: 80°F.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
- Observed food item with label stating, "refrigerate after opening" not stored in cold holding unit and measuring above 41°F at the time of inspection. Location: stored on top of prep top cooler. Food Items: passion fruit popping pearls. Temperature: 61°F.

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.
- Observed that the facility was operating with an expired permit.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize floors.
- Observed buildup and debris on the floor underneath and behind equipment.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the noted surfaces.
- Observed nonfood contact surface with the buildup of soil residues. Location: in stainless steel cabinets underneath equipment and on chest freezer internal surfaces. Condition: observed dark colored buildup and debris on the bottom surfaces of cabinets and ice buildup and debris on the internal surface of the chest freezer at the time of inspection.

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to remove broken tiles and replace so that it is smooth and easily cleanable.
- Observed floor tile in front prep area is not smooth and easily cleanable. Observed broken and cracked tiles at the time of inspection.

STONEFACE TAVERN - 8201 SAN PEDRO DR NE - Approved

STONEFACE TAVERN - 8201 SAN PEDRO DR NE

Food Establishment Class C

Date: 08/06/2026 - #: CAC-Food-074619-2026 - Inspection Result: Approved

Corrective action taken during the routine inspection resulted in the facility being upgraded from a Conditional Approved Status to Approved Status. The person in charge promptly addressed and corrected most of the violations noted in the original inspection report while on site. The following priority and priority foundation violations were corrected on site:

- Using a Handwashing Sink-Operation and Maintenance. Observed PIC remind employees to not use hand washing sink as a dump sink during inspection. Handwashing Cleanser, Availability. Observed employee replace empty handwashing cleanser container with a full container during inspection.

STONEFACE TAVERN - 8201 SAN PEDRO DR NE

Food Establishment Class C

Date: 08/06/2026 - #: PT0044763 - Inspection Result: Conditional Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file. Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices. Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation. Observed PIC instruct employee to restock handwashing cleanser. Observed handwashing cleanser restocked during inspection. Violation corrected on site. Observed no handwashing cleanser available at handwashing sink(s). Location: closest hand washing sink to walk in freezer and cooler.

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purpose such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purpose other than handwashing. Observed PIC reminding employees to discontinue using hand washing sink for dumping ice. Observed handwashing sink used for purpose other than handwashing. Location: near server line north wall. Manner: observed ice inside basin of hand washing sink at the time of inspection.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints. Observed a food employee without proper facial hair restraints. Location: kitchen area. Activity: restocking coolers with food items.

STONEFACE TAVERN - 8201 SAN PEDRO DR NE

Food Establishment Class B

Date: 08/06/2026 - #: PT0044764 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours. Observed employee removing drip cups and nozzles and cleaning and sanitizing them during inspection. Violation corrected on site. Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: bar soda gun nozzle and drip cup. Location: along bar top. Condition of the Location: observed debris and buildup in the drip cup and on the bar gun nozzle.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file. Observed that the food establishment does not have a certified food protection manager on staff.

• **Food Handler Cards**

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize floor areas.

Observed buildup and debris on the floor underneath equipment in bar area at the time of inspection.

THE HUMAN BEAN - 7341 SAN ANTONIO DR NE - Approved

THE HUMAN BEAN - 7341 SAN ANTONIO DR NE

Food Establishment Class C

Date: 08/07/2026 - #: CAC-Food-075074-2026 - Inspection Result: Approved

Corrective action taken during the routine inspection resulted in the facility being upgraded from a Conditional Approved Status to Approved Status. The person in charge promptly addressed and corrected a violation noted in the original inspection report while on site. The following priority foundation violation was corrected on site:

-Common Name-Working Containers. Observed PIC label spray bottle of sanitizer during inspection.

THE HUMAN BEAN - 7341 SAN ANTONIO DR NE

Food Establishment Class C

Date: 08/07/2026 - #: PT0161209 - Inspection Result: Conditional Approved

Violation: Poisonous and Toxic/Chemical Substances

• **Common Name-Working Containers**

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray Bottle. Alleged Material: Quat Sanitizer.

Violation: Plumbing

• **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have air gaps established to prevent backflow at the three-compartment sink drain pipe and the hose at the service sink.

Observed an inadequate air gap at the following locations:

1. drain pipe at three-compartment sink is too long and causing the pipe end to go into the floor drain making it below the flood level rim of the floor drain.
2. the hose at the service sink is too long and is direct contact with the bottom of the service sink basin.

Violation: Toilet Facilities

• **Toilet Rooms, Enclosed**

- Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.

Observed toilet room is not equipped with a self-closing door; or the door is propped open.

Violation: Operations

• **Valid Permit**

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a copy of the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

Tokyo Hana Hibachi and Sushi Bar - 10001 COORS BLVD NW - Approved

Tokyo Hana Hibachi and Sushi Bar - 10001 COORS BLVD NW

Food Establishment Class C

Date: 08/04/2026 - #: RT-FOODEST-072603-2026 - Inspection Result: Approved

Complaint

This inspection was the result of a citizen complaint that was previously substantiated and since corrected.

Violation: Miscellaneous

• Miscellaneous Sources of Contamination

- Regardless of its specificity, a Code cannot anticipate all the diverse means by which food can become contaminated after receipt. Food must be protected from all sources of contamination.

Method of contamination: Prepared sushi stored on a cutting board where raw beef was being cut. Observed in walk in cooler. raw quarter leg chicken in a bowl stored on top of apples.

Observed raw cut beef stored on a top shelf on the walk cooler above ready to eat lemons and other ready to eat food items.

Violation: Training Records

• Food Handler Cards

- Food handler cards shall be kept by the Food Employee on their Person while working as a Food Employee or volunteer for a Food operation, or a copy shall be kept on file by the current employer and be made available for inspection by the Enforcement Authority. If trained through another approved method; records of the training shall be maintained for the duration of the Food Employee's employment. Instructed PIC to provide updated training records to EHD for review

The PIC was unable to provide records of training or certification of food employees.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Drip Prevention and Adequacy

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur. Condition: dripping when preparing foods.

• Heating, Ventilation, Air Conditioning System Vents

- Heating, ventilating, and air conditioning systems shall be designed, installed, and maintained so that make-up air intake and exhaust vents do not cause contamination of food, contact surfaces, equipment, or utensils

Observed heating and air conditioning system vents not properly designed and located to be easily cleanable. Location: Kitchen cooking prep areas.

Manner: Return and air-conditioning vents with substantial buildup and debris.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Bulk flour and also unknown bulk food items.

Location: Storage bulk food areas.

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth

Observed nonfood contact surface that was not smooth. The surface was located 8 Bar area. The surface was made out of Wood tabletop. The condition of the surface was absorbent and non-cleanable surface

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.

Observed inadequate amount of lighting.

Location: Cooking area, both prep area and storage areas. Manner: Several lightings burned out.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the floor's kitchen side of prep tables.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Observed nonfood contact surface with the buildup of soil residues. The surface was located Kitchen and drink station. The surface was made out of stainless steel

The condition of the surface food equipment such as Fountain drink dispenser with a sticky black buildup.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctions, Coved, and Enclosed or Sealed

- Floors that are of smooth, durable construction and that are nonabsorbent are more easily cleaned. Requirements and restrictions regarding floor coverings, utility lines, and floor/wall junctions are intended to ensure that regular and effective cleaning is possible and that insect and rodent harborage is minimized. Instructed PIC to install floors that are non-absorbent.

Observed base coving is constructed of Quarry Tile. making it rough and/or absorbent due to receiving area is broken off and missing also tiles in front of receiving door cracked and broken.

Walgreens 11360 - 11200 MONTGOMERY BLVD NE - Approved

Walgreens 11360 - 11200 MONTGOMERY BLVD NE

Retail Food Establishment Class 3

Date: 08/03/2026 - #: PT0097583 - Inspection Result: Approved

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Package Integrity

- Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging.

Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants. Packaged Food: Bush's baked beans and Progresso Chicken Noodle soup Location: Food aisle Condition: dented can

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on the middle food racks by seasonal area The condition of the surface was debris buildup

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.

Observed food stored improperly less than six (6) inches off the floor. Location: Back store room Food Item: Snickers candy bars

Violation: Date Marking and Disposition

• Retail Food Stock First in First out

- Retail Food stock shall be properly rotated with the first in, first out method. Instructed PIC to re-stock the retail shelf so that the first in first out method is used and to retrain staff on proper stocking procedures.

Observed retail food shelves with stock not rotated in the first in first out method. Food with later expiration dates was observed in front of food with more recent expiration dates.

Location: Food Aisle Food Items:

Complaint

This inspection was the result of a citizen complaint that was unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule

and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine

Location: Near service counter

Condition of the Location: Buildup of orange and black organic matter buildup.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps. Location: Near hot water heater and behind ice machine Pest Type: Cockroach

Pest Condition: Dead

Number of Pests Present: Three (3)

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: Donning new gloves and switching tasks

Walking By Faith Inc DBA Weck's - 3913 LOUISIANA BLVD NE

Date: 08/03/2026 - #: PT0143034 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain located under three-compartment sink.

WENDYS - 3601 4TH ST NW

Food Establishment Class C

Date: 08/05/2026 - #: RT-FOODEST-000482-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine. Location: back area storage and preparation area.

Interior of ice machine ceiling by Ice chute with a black and brown soil buildup.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the Freezer floors, back-room storage under shelving and equipment floor edges.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- Wall and ceiling covering materials shall be attached so that they are EASILY CLEANABLE. Instructed person in charge to replace or clean and sanitize so that it is maintained or is easily cleanable.

Observed Walls is not easily cleanable.

The surface was made out of FRP. by prep area and over three-compartments sink with several holes that need to be sealed.
