

City of Albuquerque
Environmental Health Department
Consumer Health Protection Division
P.O. Box 1293, Albuquerque, NM 87103

Summary Table
Consumer Health Protection Inspections Performed
Week: July 05, 2026 to July 11, 2026
Report Amended on 7/13/2026 for clerical errors

This report includes inspection history for the dates listed. Inspections may have occurred after those dates.
The summary reflects each establishment's current operating status as of the report release date.

A&NT AFRICAN FRESH FOOD MARKET LTD - 5604 MENAUL BLVD NE 5604 MENAUL BLVD NE

Inspection Date	Inspection ID Number	Inspection Type	Inspection Status	Page #
Retail Food Establishment (Permit # - RETAIL-2025-02042) - Operational Status - Open				
07/10/2026	RT-RET-047857-2025	Routine Retail Food Inspection	Approved	Pg. 5

AMADEOS PIZZA & SUBS - 809 98TH ST SW

Corrective Action Compliance does not represent a full routine health inspection. Instead, it reflects that a facility has taken specific corrective actions in response to violations identified during an inspection. These actions may be taken during the inspection or afterward, and the Corrective Action Compliance allows for the facility's grade or status to be updated based on those corrections. Corrective actions may be demonstrated through documentation such as photos, videos, receipts, work orders, site visits, or both verifiable means showing that the violation has been addressed and compliance has been achieved. APPROVED An "Approved" grade indicates that a food establishment that has demonstrated compliance with the standards in the Food Code the Food Service and Retail Ordinance, other industry standards, and other laws and has received a Grade of Approved and is able to operate. CONDITIONAL APPROVED A "Conditional Approved" grade is issued when a facility is found to have violations of the Food Code, the Food Service and Ret Ordinance, industry standards, or applicable laws. While the facility may continue operating, it must complete specific corrective actions to address the violation A yellow sticker is placed alongside the green "Approved" sticker. UNSATISFACTORY An "Unsatisfactory" grade indicates that a facility has not met the required standards but is allowed to continue operating temporarily while corrective actions are completed. A red "Unsatisfactory" sticker will be displayed at the facility for the duration of this grade. This is a temporary status and requires timely follow-up to verify compliance. CLOSED A "Closed" grade is assigned when violations pose a significant risk to public health, requiring the facility to immediately cease operations. The facility must remain closed until corrective actions have been completed and verified. A facility with this grade will display an orange "Closed" sticker for the duration of the closure.

Retail Food Establishment Class 3

Date: 07/10/2026 - #: RT-RET-047857-2025 - Inspection Result: Approved

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Honestly Presented

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all fish packages and dry food ingredients.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Multiple bags containing multiple species of frozen fish. Location: In display freezer and on display shelving inside store.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps. Location: Back of facility storage room

Pest Type: Cockroach Pest Condition: Dead

Number of Pests Present: 9

AMADEOS PIZZA & SUBS - 809 98TH ST SW - Approved

AMADEOS PIZZA & SUBS - 809 98TH ST SW

Food Establishment Class C

Date: 07/08/2026 - #: RT-FOODEST-059187-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener blade Location: Kitchen

Condition of the Location: Soiled with dried food debris

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed 3-compartment sink faucet is not maintained in good repair or is not repaired by law. Observed faucet found in disrepair by having a leak that needs to be repaired. Also observed significant syrup leak coming from the soda pump that is creating standing syrup water directly underneath the soda machine.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Prep cooler

Food Items: Sliced ham (44°F), Sliced cheese (45°F), Italian sausage (48°F)

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Rear kitchen

Activity: Active food prep

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- When cleaning is accomplished by spraying or flushing, coving and sealing of the floor/wall junctures is required to provide a surface that is conducive to water flushing. Grading of the floor to drain allows liquid wastes to be quickly carried away, thereby preventing pooling which could attract pests such as insects and rodents or contribute to problems with certain pathogens such as *Listeria monocytogenes*.

Observed floors and walls in storage area directly under soda machine to be unsealed, absorbent, damaged and not easily cleanable

AMARAN SENIOR LIVING - 9100 HOLLY AVE NE - Approved

AMARAN SENIOR LIVING - 9100 HOLLY AVE NE

Food Establishment Class C

Date: 07/09/2026 - #: CAC-Food-064823-2026 - Inspection Result: Approved

Corrective action taken during the routine inspection resulted in the facility being upgraded from a Conditional Approved Status to Approved Status. The person in charge promptly addressed and corrected most of the violations noted in the original inspection report while on site. The following priority and priority foundation violations were corrected on site:

- Sanitizing Solutions, Testing Devices. Observed sanitizer chemical provider was able to arrive on site and provide quat test strips during inspection.
- When to Wash. Observed employee wash hands during inspection.
- Common Name-Working Containers. Observed sanitizer chemical provider remove signs and labels of sink and surface and replace them with quat sanitizer during inspection.
- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch. Observed PIC instruct employee to immediately take chef knife to warewashing area to be cleaned and sanitized during inspection.

AMARAN SENIOR LIVING - 9100 HOLLY AVE NE

Food Establishment Class C

Date: 07/09/2026 - #: PT0156200 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours. Observed PIC instructed employee to immediately take chef's knife to warewashing area to be cleaned and sanitized. Instructed PIC to re-educate employees how to store soiled utensils and clean utensils.

Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Chef Knife Location: stored on magnetic holder. Condition of the Location: observed dried food debris on the blade of knife.

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, misidentified or mislabeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled, misidentified or mislabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly. Observed chemical service provider correcting violation on site during inspection.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Observed chemical dispenser labeled as sink and surface and all informational wall postings labeled as sink and surface. Containers: Sanitizer containers and sanitizer dispenser. Alleged Material: Quat sanitizer but labeled as sink and surface sanitizer.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a valid certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff at the time of inspection. Observed PIC's certification expired in February 2026.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Personal Cleanliness

• Eating, Drinking, or Using Tobacco Products

- A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area and should be in a cup with a lid and straw. Observed PIC immediately dispose of employee drink. Violation corrected on site.

Observed a food employee with an improper drink. Location: prep table

Type of Drink: single service hot beverage cup with a lid but no straw.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-

eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands. Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required. Observed employee wash hands during inspection after changing tasks. Violation corrected on site.

Observed food employee not wash hands when required. Condition: observed employee immediately don gloves without washing hands on the kitchen line after they were notified of inspector's arrival.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- Multiuse utensils which have been cleaned and sanitized can become contaminated with pathogens which can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. Instructed PIC to clean and sanitize utensils prior to continuing use, must be maintained cleaned in a regular schedule as prescribed by the code and to store items so that the risk of contamination prior to use is minimized.

Observed utensils during a pause in use stored incorrectly. Utensil was not stored on a clean and sanitized portion of the equipment. Utensil Type: Chef Knife. Location: magnetic holder on the wall Condition of the Location: observed soiled knife was placed on holder with other clean and sanitized knives.

BAMBOO - 7202 MENAUL BLVD NE - Unsatisfactory Re-Inspection required

BAMBOO - 7202 MENAUL BLVD NE

Food Establishment Class C

Date: 07/10/2026 - #: CAC-Food-065183-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Facility is being re-opened under a grade of Unsatisfactory.

Facility had minimal live cockroaches present in the warewashing area, and in the dining room service area.

Facility had numerous dead cockroaches which was instructed to be removed, with the areas cleaned and sanitized prior to resuming operations. Facility began cleaning, and sanitizing during the inspection.

Areas of the facility including walls, sides of equipment, shelving, and the interior of slicing equipment still had debris accumulation. Additionally, holes, gaps, cracks, and crevices were still noted throughout the facility.

Instructed PIC to continue cleaning efforts, and repair work to ensure no harborage or entry points remain for pests.

Facility will be re-inspected on a more frequent basis to help ensure continued compliance and further corrective actions are made for long term compliance.

BASKIN ROBBINS - 11052 MONTGOMERY BLVD NE - Approved

BASKIN ROBBINS - 11052 MONTGOMERY BLVD NE

Food Establishment Class B

Date: 07/09/2026 - #: RT-FOODEST-115120-2025 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain at three-compartment sink

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: back kitchen prep area

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is nonabsorbent.

Observed nonfood contact surface that was absorbent. The surface was located in the cabinets behind front counter The surface was made out of wood The condition of the surface was coating coming off of wood making wood surface absorbent and not easily cleanable

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.

Observed food stored improperly less than six (6) inches off the floor. Location: Walk in freezer Food Item: containers of ice cream

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Employee drinks and food items stored in coolers and freezers above facility food items

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: Bracelet's

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: Employees changing tasks and not washing hands in between

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on Floors and to clean and sanitize floors

Observed buildup and debris on the floors in the hard-to-reach areas under and behind equipment and shelving

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Spoons Location: behind front counter Condition of the Location: Spoons stored in food containers with handle directly touching the food product inside

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.

Observed cleaned single-service and single-use articles stored improperly. Single-service and single-use articles was not stored six (6) inches above the floor. Single-service and single-use articles Type: Paper food containers Storage Method: stored directly on the floor Location: back kitchen

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located in the cabinets behind front counter The condition of the surface was food and soil debris buildup

Beso Cafe INC - 9311 COORS BLVD NW - Conditional Approved

Beso Cafe INC - 9311 COORS BLVD NW

Food Establishment Class C

Date: 07/08/2026 - #: RT-FOODEST-112633-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC corrected violation.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Sanitizer Buckets.

Concentration: All sanitizer buckets tested at 0 ppm. Temperature: temperature ranges were around 76 to 80 degrees.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Reach in refrigerators.

Food Items: Condensed, several unknown items with no used by dates.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at Dish washer discharge tubing stored in the drain with no air gap.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Hibiscus tea and other unknown bulk food items

Location: Back storage areas.

Violation: Cold Holding

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so. call for repair and send repair invoice to EHD. Gave my business card to the PIC.

Observed insufficient cold holding equipment to properly hold food cold. Location: Prep top cooler.

Condition: Ambient temperature of the prep top cooler was 57 °F. inside prep table was iced up, Boba Teas- 56 degrees, egg salad- 58 degrees, Unknown dip 55 degrees.

Violation: Storage

• Storage or Display of Food in Contact with Water or Ice

- Packages that are not watertight may allow entry of water that has been exposed to unsanitary exterior surfaces of packaging, causing the food to be contaminated. This may also result in the addition of water to the food that is unclaimed in the food's formulation and label. Packaged food may not be stored in direct contact with ice or water if the food is subject to the entry of water because of the nature of its packaging, wrapping, or container or its positioning in the ice or water. Instructed PIC that the improperly stored food must not be used in the operations of the food establishment.

Observed packaged food improperly stored in contact with ice. The packaging of the food was not sufficient to prevent the entry of water or the dripping of condensation on to the foods surface.

Location: Front freezer.

Food Item: Several different ice creams.

Food Packaging: Chocolate ice creams and other frozen items covered in excessive ice particles.

Violation: Physical Facilities, Construction and Repair

• Walls and Ceilings, Attachments

- Wall and ceiling attachments, such as light fixtures, mechanical room ventilation system components, vent covers, wall mounted fans, ornamental objects, and other attachments, must be EASILY CLEANABLE, with the exception of what is mentioned in (B) of this section. (B) If wall and ceiling surfaces, decorative accessories, and other ambiance-enhancing items are maintained clean in a CONSUMER area, this criterion need not be met. Instructed person in charge to clean and sanitize wall and ceiling attachments.

Observed Ceiling tiles.

located in Office and prep areas. either. not installed properly or missing

Boba Tea Company - 8850 HOLLY AVE NE - Approved

Boba Tea Company - 8850 HOLLY AVE NE

Food Establishment Class C

Date: 07/10/2026 - #: PT0096510 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at service sink caused by a hose connected to the faucet being in direct contact with the bottom of the service sink basin at the time of inspection.

BURGER KING 22134 - 1000 RIO GRANDE BLVD NW - Approved

BURGER KING 22134 - 1000 RIO GRANDE BLVD NW

Food Establishment Class C

Date: 07/08/2026 - #: RT-FOODEST-045589-2025 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap below service sink in kitchen area.

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located in front drive thru area and front drink station areas. The surface was made out of Metal and Plastic. The condition of the surface had debris buildup on the exterior of ice machine, coffee machine, soda machine and shelving by the drive thru area.

DAPT Capital Group LLC Pho & Noods Abq - 7921 CENTRAL AVE NW - Approved

DAPT Capital Group LLC Pho & Noods Abq - 7921 CENTRAL AVE NW

Food Establishment Class C

Date: 07/08/2026 - #: RT-FOODEST-108081-2025 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Ventilation and Hood Systems

• **Ventilation Hood Systems, Drip Prevention and Adequacy**

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface. hood ventilation system had debris buildup and grease on Ansel and filters in mobile unit's kitchen area Equipment: flat top grill, grill and stove top

Violation: Testing Devices

• **Food Temperature Measuring Devices**

The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

Observed food temperature measuring devices were not provided or readily accessible for the measuring of thin foods.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize.

Observed buildup and debris on the walls floors and roof of mobile unit.

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located in mobile unit The surface was made out of plastic and metal The condition of the surface had debris buildup on mini split unit exterior of reach in coolers vent covers

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. facility had no cold holding logs or equipment logs

• **Calibration Logs**

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

EAT MY THAI CUISINE - 5303 GIBSON BLVD SE - Closure Re-Inspection Required

EAT MY THAI CUISINE - 5303 GIBSON BLVD SE

Food Establishment Class C

Date: 07/09/2026 - #: RT-FOODEST-073843-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Plates, bowls, ice machine deflector, produce slicer, knives Location: Clean dish storage

Condition of the Location: Soiled with food debris and residue

Violation: Pest Control

• **Removing Dead or Trapped Birds, Insects, Rodents and other Pest**

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate Location: Throughout facility

Pest Type: Cockroach Pest Condition: Dead

Number of Pests Present: +20

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: All cold holding units in the facility

Food Items: Multiple containers of sauces, prepared meats, chopped vegetables, chopped fruits, soups and other varieties of temperature-controlled foods.

Expiration Dates: Not available

Violation: Preventing Contamination From Hands

• Preventing Contamination from Hands, No Barehand Contact with RTE food

- Food employees shall minimize bare hand and arm contact with exposed food that is not in a ready-to-eat form. Instructed PIC to retain employees on proper food handling procedures.

Observed a food employee touching non-ready-to-eat food with bare hands. Location: Cook line

Activity: Retrieved food from prep top cooler trays using bare hands Food Contacted: Chopped vegetables and prepared meats

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Knowledge Tested: Facility had numerous priority, and priority foundation violations.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed various faucets and drain pipes are not maintained in good repair or not repaired by law. Observed plumbing systems found in disrepair by having multiple leaks that need to be repaired.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain located under the 3-compartment sink and floor drain under the dish washing machine.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Throughout kitchen and prep areas

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. Location: Cold holding units

Food Item: Batter, multiple containers of sliced vegetables, soups, pot stickers

Violation: Maintenance

• Maintaining Premises, Unnecessary Items and Litter

- Observed items on the premises of the food establishment that is no longer used or is non-functional. Items list: Serving plates and bowl sets, nonfunctional kitchen equipment, storage items and broken utensils.

Condition of the items: PIC stated numerous items inside the facility were no longer in use or nonoperational.

The presence of unnecessary articles, including equipment which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Cook line prep tables and reach in cooler

Food Items: Chopped onions (49°F), pot stickers (47°F), chopped green onions (50°F), sliced carrots (48°F) chicken chunks (47°F), sliced cucumbers (52°F)

Violation: Storage

• Food Storage, Prohibited Areas

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.

Observed food stored improperly less than six (6) inches off the floor. Location: Dry storage area behind point of sale

Food Item: Multiple cases of rice, curry paste, sauces, and other bulk food items

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

Observed food temperature measuring devices were not provided or readily accessible.

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.

Observed no handwashing cleanser available at handwashing sink(s).

Location: Handwashing sink located adjacent to the boiler room had no hand cleanser available. Observed facility using a heavily watered-down soap mixture stored in a water bottle at the make line handwashing sink.

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

Observed handwashing sink(s) was observed blocked or inaccessible. Location: Both kitchen handwashing sinks

Manner: Both are blocked by kitchen supplies and equipment

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Kitchen

Activity: Peeling shrimp

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on facility floors and walls and to clean and sanitize on a regular basis.

Observed buildup and debris on the kitchen floors and walls throughout the kitchen with heavy debris buildup, grease and food residues. Cook line is heavy soiled and in need of cleaning.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on make line kitchen equipment and reach in coolers. The condition of the surface was covered in excessive grease and food residue.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored,

thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All hot and cold held temperature-controlled foods

Activity of the Food: Stored, thawed, cooled

EFFING BAR AND GRILL - 5300 SEQUOIA NW, P - Conditional Approved

EFFING BAR AND GRILL - 5300 SEQUOIA NW, P

Food Establishment Class B

Date: 07/09/2026 - #: PT0110485 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Soda wand holder. Location: bar area.

Condition of the Location: Soda wand holder with a slimy brown soil substance.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Drain under three-compartment sink is not maintained in good repair or is not repaired by law. Observed Drain missing the cover and drain basket.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on Shelving, racks, sinks, beer line holders and to clean and sanitize areas noted.

Observed buildup and debris under the Shelving, racks, sinks, beer line holders.

EFFING BAR AND GRILL - 5300 SEQUOIA NW, P

Food Establishment Class C

Date: 07/09/2026 - #: PT0110486 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Ice Machine, Can opener, Meat Slicer. Location: Food prep and cooking areas.

Condition of the Location: Ice machine interior ceiling with a black like soil residue by Ice chute.

2. meat slicer blade back side with dry soil residue.

3. Can opener blade and holder with a black like dry soil buildup.

Violation: Maintenance and Operation

• Warewashing Equipment, Cleaning Frequency

- During operation, ware washing equipment is subject to the accumulation of food wastes and other soils or sources of contamination. In order to ensure the proper cleaning and sanitization of equipment and utensils, it is necessary to clean the surface of ware washing machines, three (3) compartment sinks, drainboards, and laundry facilities for wiping cloths before use, every twenty-four (24) hours if used, and periodically throughout the day to prevent buildup of soils or other sources of contamination. Instructed PIC to clean the ware washing equipment and retain employees on the cleaning schedule.

Observed soiled or dirty ware washing machine. Location: Back of kitchen wash area.

Condition: interior of dish machine with substantial soil buildup.

Violation: Poisonous and Toxic/Chemical Substances

• Identifying Information, Prominence-Original Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where

the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray Bottle.

Clear unknown toxic substance.

Violation: Receptacle Condition

• Covering Receptacles

- Waste bins with food residue must have tight fitting lids or doors and be emptied once they are filled. Instructed PIC empty the waste bin(s) and to ensure that waste bins are kept sanitary by installing tight fitting lids and emptying the bins once they are filled.

Observed waste bins outside the food establishment without tight fitting lids or doors. Location: Back of the outside of the facility.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed testing kit or other device to measure the concentration of chemical sanitizing solution expired in 2025

Violation: Lighting

• Light Bulbs, Protective Shielding

- Instructed PIC to make repairs necessary so that light bulbs are shielded, coated, or made otherwise shatter-resistant to prevent the contamination of exposed food, clean equipment, utensils, linens, or unwrapped single-service-single-use articles.

Observed light bulbs with no protective shielding, coating or by other means shatter resistant. Location: kitchen frying area. food, equipment, utensils, linens, unwrapped single service article Missing required plastic lighting cover. Bulbs above fryer not shielded with covers or caps.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- Wall and ceiling covering materials shall be attached so that they are EASILY CLEANABLE. Instructed person in charge to replace or clean and sanitize area of concern so that it is maintained or is easily cleanable.

Observed Walls above prep sink and walls around dishwasher with several 1/4-inch holes and is not easily cleanable. The surface was made out of Ceramic tile and FRP, also missing required base coving.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Chicken, beef beans, chilies, cut veggies. Activity of the Food: Food being cooked and prepared and hot holding and cold holding, reheating.

El Chamo Arabe LLC - 7921 CENTRAL AVE NW - Approved

El Chamo Arabe LLC - 7921 CENTRAL AVE NW

Food Establishment Class C

Date: 07/09/2026 - #: RT-MBFOOD-108153-2025 - Inspection Result: Approved

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Cold Holding table Food Items: Chicken raw and cooked, Black Beans, Sausage, Tomatoes, Onions Expiration Dates: no dates observed

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located inside mobile unit. The surface was made out of metal and plastic. The condition of the surface was had debris buildup on plastic container on shelf as well as debris buildup on the exterior of the reach in cooler and on the exterior of the cooking hoods ventilation system.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize.

Observed buildup and debris on the walls floors and sliding screen inside the mobile unit.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored thawed, cooled, prepared, displayed, dispensed, or transported

9-6-1m General

Observed that the food establishment does not have temperature logs available for TCS foods items. no logs for your equipment or cold holding logs for your cold holding food located inside your coolers and cold holding tables

• **Calibration Logs**

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

Violation: Ventilation and Hood Systems

• **Ventilation Hood Systems, Drip Prevention and Adequacy**

-Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface. Location: on hood filters Equipment: stovetop and grill.

First United Methodist - 314 LEAD AVE SW – Approved

First United Methodist - 314 LEAD AVE SW

Charitable Food Provider

Date: 07/07/2026 - #: PT0054742 - Inspection Result: Approved

Violation: Plumbing

• **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap under the dishwasher.

Violation: Physical Facilities, Construction and Repair

• **Repairing-Premises, Structures, Attachments, and Fixtures-Methods**

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed Dishwasher area in disrepair by having a hole in the wall under dishwasher

First United Methodist - 314 LEAD AVE SW

Food Establishment Class C

Date: 07/07/2026 - #: RT-FOODEST-014023-2025 - Inspection Result: Approved

Observed an inadequate air gap under dishwasher.

Violation: Physical Facilities, Construction and Repair

• **Repairing-Premises, Structures, Attachments, and Fixtures-Methods**

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed Dishwasher Area in disrepair by hole in wall under dishwasher.

FLYING STAR 4 - 4026 RIO GRANDE BLVD NW - Approved

FLYING STAR 4 - 4026 RIO GRANDE BLVD NW

Food Establishment Class D

Date: 07/10/2026 - #: CAC-Food-065257-2026 - Inspection Result: Approved

Quat sanitizer dispenser was corrected on site technician out and repaired all buckets were within 200- 400 pp, soups and chilis were reheated to 165 degrees and placed back into the steam tables.
conditional approved is brought to approved by PIC correcting violations.

FLYING STAR 4 - 4026 RIO GRANDE BLVD NW

Food Establishment Class D

Date: 07/10/2026 - #: RT-FOODEST-001987-2026 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC corrected violation.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: 3 sanitizer buckets and three-compartment sink.

Concentration: All four at 0 PPM. Temperature: were from 474 to 80 °F,

Violation: Poisonous and Toxic/Chemical Substances

• Separation-Storage

- The storage of poisonous or toxic materials directly above or adjacent to food could result in contamination of the food from spillage. Poisonous or toxic materials must be stored so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by separating the poisonous or toxic materials by spacing or partitioning; and storing them in an area that is not above food, equipment, utensils, linens, and single-service or single-use articles. Instructed PIC to move chemicals to an approved location.

Observed poisonous or toxic materials stored in a manner that has the potential to contaminate food. Poisonous/Toxic Substance: Bucket of Sanitizer Location: front juice making area. sanitizer stored on food contact surface where juices were being prepared.

Violation: Hot Holding & Reheating

• Reheating for Hot Holding

- Ready to eat, time and temperature control for safety food that has been commercially processed and packaged in a food processing plant shall be heated to a temperature of at least 135°F when being reheated for hot holding. Instructed PIC to reheat food to 135°F prior to replacing in hot holding, and to retrain food employees on the proper method of reheating food.

Observed commercially packaged ready to eat food not reheated to 135°F. Food Item: Chicken noodle soup. vegetable soup, green chili stew, red chili Food Temperature: 126 degrees and 80.7 degrees two different steamers. products in bags.

Violation: Maintenance

• Outside Receptacles

- A storage area and enclosure for waste shall be maintained clean. Instructed PIC to clean the area.

Observed the waste storage area to be unclean. Location: outside receptacle area. Condition of the storage area: Substantial debris and grease buildup.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: front prep top cooler.

Food Items: Blue cheese- 54 degrees, Cream cheese- 47 degrees, boiled egg- 46 degrees.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on dining area under tables and door seals, buildup and debris behind equipment and bottom of display cases, drains and to clean and sanitize Areas noted.

Observed buildup and debris on the dining area under tables and door seals, buildup and debris behind equipment and bottom of display cases, drains with substantial soil buildup.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located pre kitchen. The surface was made out of Stainless steel metal.

The condition of the surface was interior of the reach in refrigerator and gaskets with substantial soil buildup.

HEALTH LEADERSHIP HIGH SCHOOL - 6401 JEFFERSON ST NE - Approved

HEALTH LEADERSHIP HIGH SCHOOL - 6401 JEFFERSON ST NE**Food Establishment Class B****Date: 07/10/2026 - #: PT0159729 - Inspection Result: Approved****Violation: Training Records****• Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Functionality and Accuracy**• Temperature Measuring Devices-Functionality**

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures. Educated PIC on required location of thermometer. Inspector moved thermometer to the door area of cooler during inspection. Violation corrected on site.
Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: two-door upright cooler. Thermometer Location: thermometer stored in the back of the cooler.

JACK IN THE BOX - 301 98TH ST - Approved**JACK IN THE BOX - 301 98TH ST****Food Establishment Class C****Date: 07/10/2026 - #: PT0119373 - Inspection Result: Approved****Violation: Food Separation****• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination**

- Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. Location: cooking areas reach in cooler Food Item: container of churros

Violation: Operations**• Valid Permit**

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

Violation: Surface Not Clean**• Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located back stock area and front drive thru areas The surface was made out of metal and plastic The condition of the surface had debris buildup on the shelving where single storage items are stored, vent screens on ice machines and on the exterior of soda and coffee machines

Violation: Physical Facilities, Construction and Repair**• Repairing-Premises, Structures, Attachments, and Fixtures-Methods**

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed back three-compartment sink area in disrepair by ceiling vent cover chipping paint and coming off vent cover.

Jeter Family Food LLC - 5701 GIBSON BLVD SE - Approved**Jeter Family Food LLC - 5701 GIBSON BLVD SE****Mobile Food Unit Class C****Date: 07/08/2026 - #: RT-MBFOOD-064174-2026 - Inspection Result: Approved****Violation: Operation and Maintenance****• Handwashing Cleanser, Availability**

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.

Observed no handwashing cleanser available at handwashing sink(s). Location: Handwashing sink

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels

(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Handwash station

• **Handwashing Signage**

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

Observed handwashing sink(s) without a handwashing sign. Location: Handwashing sink

KFC - 12921 CENTRAL AVE NE - Closure Re-Inspection Required

KFC - 12921 CENTRAL AVE NE

Food Establishment Class C

Date: 07/08/2026 - #: RT-FOODEST-065595-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC corrected violation by Making sanitizer.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: I arrived at 10:45am store opened at 10:30 food was ready in steam tables and coolers but all sanitizer buckets were empty

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Soda machine nozzles, and food service pans, Location: Dining room and kitchen Condition of the Location: soda nozzles with syrup and debris buildup and Food service pans with dried food and soil debris buildup

Violation: Pest Control

• **Controlling Pests, If Present: Treatment**

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place. Location: Dining room and Kitchen Pest Type: cockroach Pest Condition: dead

• **Removing Dead or Trapped Birds, Insects, Rodents and other Pest**

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in Facility Location: Kitchen area and Dining room

Pest Type: cockroach Pest Condition: dead

Number of Pests Present: 2-4 Dozen

Violation: Date Marking and Disposition

• **Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition**

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Walk in cooler Food Items: Coleslaw and pot pies Expiration Dates: no dates observed

Violation: Plumbing

• **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at Floor drain under front counter and at floor drain near drive through window on main cook line

Violation: Physical Facilities

• **Outer Openings, Protected**

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges. Front doors on east side of building has small holes in bottom of door and light can be seen coming in

Violation: Testing Devices

• **Sanitizing Solutions, Testing Devices**

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Designated Areas

• **Designated Areas-Employee Accommodations for eating/drinking/smoking**

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Physical Facilities, Cleaning

• **Drying Mops**

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.

Observed a soiled mop not in use, stored directly on the floor.

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on floor and walls and to clean and sanitize floors and walls

Observed substantial buildup and debris on the floors and walls throughout kitchen and dining room. Under equipment, tables, shelves, and racks

Violation: Storage

• **Equipment and Utensils, Air-Drying Required**

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: ware washing area Equipment Type food Service pans Manner: not air dried and stacked wet

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on the back plate of soda machines with heavy syrup and debris buildup. The sides and backs of fryers with substantial grease buildup. The dining room chairs and tables with dried food and soil debris buildup. The sides of three-compartment sink with heavy debris buildup. The wax paper holders on the main line with heavy debris buildup. and gas/water/electric pipes in kitchen with substantial grease buildup

Kinder Quest Inc DBA Spring Stone Montessori Schools Inc - 7940 CARMEL BLVD NE - Approved

Kinder Quest Inc DBA Spring Stone Montessori Schools Inc - 7940 CARMEL BLVD

NE Food Establishment Class C

Date: 07/08/2026 - #: CAC-Food-064342-2026 - Inspection Result: Approved

Corrective action taken during the routine inspection resulted in the facility being upgraded from a Conditional Approved Status to Approved Status. The person in charge promptly addressed and corrected most of the violations noted in the original inspection report while on site. As a result of the corrections. The following priority and priority foundation violations were corrected on site:

- When to Wash. Observed employee wash hands during inspection.

- Common Name-Working Containers. Observed employee label squeeze bottle with dish soap in it during inspection.

Kinder Quest Inc DBA Spring Stone Montessori Schools Inc - 7940 CARMEL BLVD

NE Food Establishment Class C

Date: 07/08/2026 - #: RT-FOODEST-111339-2025 - Inspection Result: Conditional Approved

Violation: Poisonous and Toxic/Chemical Substances

• **Common Name-Working Containers**

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the

unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: squeeze bottle Alleged Material: dish soap

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions. Instructed PIC to

have scaling buildup and debris removed from vacuum breaker device so that it is able to function properly.

Observed vacuum breaker at faucet on service sink is not maintained in good repair or is not repaired by law. Observed vacuum breaker at service sink faucet found in disrepair by observing scaling buildup and debris.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at service sink caused by a hose connected to the faucet being too long and being in contact with the bottom of the service sink basin at the time of inspection.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required. Observed employee washing hands. Re-educated employees on when to wash hands. Violation corrected on site.

Observed food employee not wash hands when required. Condition: Observed employee remove soiled single use gloves and begin to don new single use gloves.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize floor area next to hot water heater.

Observed buildup and debris on the floor area next to hot water heater at the time of inspection.

Kingdom Concessions LLC - 7921 CENTRAL AVE NW - Approved

Kingdom Concessions LLC - 7921 CENTRAL AVE NW

Commissary Type 2

Date: 07/08/2026 - #: RT-FOODEST-064612-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Cooking Equipment Location: kitchen area Condition of the Location: debris buildup, grease and old food on top of cooking equipment

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize.

Observed buildup and debris on the walls, floors and ceilings.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Kitchen area The surface was made out of metal and plastic The condition of the surface was debris buildup on the exterior of all cooking equipment and reach in coolers and freezers.

KOKIO KOREAN FRIED CHICKEN - 8019 MENAUL BLVD NE, A - Approved

KOKIO KOREAN FRIED CHICKEN - 8019 MENAUL BLVD NE, A

Food Establishment Class C

Date: 07/09/2026 - #: RT-FOODEST-064958-2026 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is nonabsorbent.

Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.

Observed nonfood contact surface that was absorbent. The surface was located inside kitchen used to cover shelving the surface was made out of cardboard. The condition of the surface was torn damaged and absorbent.

Observed nonfood contact surface that was not smooth. The surface was located inside kitchen used to cover shelving the surface was made out of cardboard. The surface was made out of cardboard The condition of the surface was torn damaged and absorbent.

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures.

Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Cold holding units reach in floor freezers, standing freezer Thermometer Location: None available

Violation: Operations

• Permit Posted

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Instructed PIC to log onto ABQ plan and print out permit and post inside facility.

Observed that no food permit was posted at the facility.

KOKIO KOREAN FRIED CHICKEN - 8019 MENAUL BLVD NE, A

Food Establishment Class C

Date: 07/09/2026 - #: PT0160215 - Inspection Result: Closure Re-Inspection Required

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottles Alleged Material: Sanitizer and coconut oil

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days.

Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Food Items: Prepared potatoes, Kimchi, sliced cabbage, sliced onions Expiration Dates: none available

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Flour, bulk spices Location: In main kitchen multiple areas.

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is nonabsorbent.
Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.
Observed nonfood contact surface that was absorbent. The surface was located inside kitchen used to cover shelving the surface was made out of cardboard. The condition of the surface was torn damaged and absorbent.
Observed nonfood contact surface that was not smooth. The surface was located inside kitchen used to cover shelving the surface was made out of cardboard. The surface was made out of cardboard The condition of the surface was torn damaged and absorbent.

Violation: Storage

• Food Storage, Prohibited Areas

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.
Observed food stored improperly less than six (6) inches off the floor. Location: In front of hand-washing sink stored on the floor Food Item: Teriyaki sauce in stock pot stored directly on the floor.

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.
Observed no handwashing cleanser available at handwashing sink(s). Location: Hand washing sink inside kitchen

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.
Observed handwashing sink(s) was observed blocked or inaccessible. Location: Main hand-washing sink inside kitchen Manner: Large stock pot stored on the floor in front of hand-washing sink containing teriyaki sauce.

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures. Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Cold holding units reach in floor freezers, standing freezer Thermometer Location: None available

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit. Observed that the facility was operating with an expired permit.

• Permit Posted

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Instructed PIC to log onto ABQ plan and print out permit and post inside facility. Observed that no food permit was posted at the facility.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported. Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Prepared vegetables, raw chicken, cooked rice and packaged salad mix Activity of the Food: Stored and received Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment. Observed the food establishment does not have calibration logs for temperature measuring devices.

LA LUZ EARLY CHILDHOOD - 1301 BRITT ST - Approved

LA LUZ EARLY CHILDHOOD - 1301 BRITT ST

Food Establishment Class C

Date: 07/10/2026 - #: RT-FOODEST-013413-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55F. PIC corrected violation by Remaking sanitizer solution Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Wiping cloth bucket in kitchen Concentration: 25ppm

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area. Observed interior intake and exhaust air ducts with debris buildup. Location: kitchen area

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Observed nonfood contact surface with the buildup of soil residues. The surface was located on the utensil rack The surface was made out of stainless steel The condition of the surface was dust buildup

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items All TCS food items Activity of the Food: stored

LA MICHOCANA DE PAQUIME #3 LLC - 6500 ZUNI RD SE - Approved

LA MICHOCANA DE PAQUIME #3 LLC - 6500 ZUNI RD SE

Food Establishment Class C

Date: 07/10/2026 - #: CAC-Food-065404-2026 - Inspection Result: Approved

Facility has been upgraded to Approved status following the correction of the following violations during inspection by the Environmental Health Department. The facility has corrected:

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch (food contact surfaces were cleaned and sanitized)

LA MICHOCANA DE PAQUIME #3 LLC - 6500 ZUNI RD SE

Food Establishment Class C

Date: 07/10/2026 - #: RT-FOODEST-080825-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener, knives on knife magnet, produce dicer Location: Kitchen

Condition of the Location: Soiled with food residue and debris

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Reach in coolers

Food Items: Multiple containers of cut fruit, prepared produce, lechera Expiration Dates: Not available

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed 3-compartment sink faucet and handwashing sink faucet are not maintained in good repair or is not repaired by law. Observed faucets to be found in disrepair by having various leaks that need to be repaired and brought into compliance.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed rear receiving door to the outside that is not tight fitting, light can be seen at the edges.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

Observed handwashing sink(s) was observed blocked or inaccessible. Location: Kitchen and front service area

Manner: Had cleaning chemicals and sanitizer bucket being stored inside sink basin

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located inside reach in coolers, equipment handles, prep tables, utility cart, equipment exteriors and knife magnets. The condition of the surface was soiled with debris accumulation and food residue.

LINDO MEXICO II - 7209 CENTRAL AVE NE - Conditional Approved

LINDO MEXICO II - 7209 CENTRAL AVE NE

Food Establishment Class C

Date: 07/10/2026 - #: RT-FOODEST-056232-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F. PIC corrected violation by contacting provider was able to fix during inspection.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Automatic dish machine Concentration: 0 parts per million Temperature: 105 °F

Violation: Training Records

- **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

- **Food Handler Cards**

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Surface Condition

- **Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent**

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is nonabsorbent.

Observed nonfood contact surface that was absorbent. The surface was located inside pint glass cold holding storage unit in bar area The surface was made out of paper towels The condition of the surface was damaged and absorbent. Paper towels covering shelving inside cold holding unit. Also, observed food containers stored on clean dish shelving with previous date marking still on food container.

Violation: Operations

- **Valid Permit**

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment.

Observed that the facility was operating with an expired permit.

Violation: Records

- **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked meats, raw meats, prepared vegetables, salsas, and dairy product Activity of the Food: Stored, cooled, received

LITTLE CORRAL DAY SCHOOL - 10111 CONSTITUTION AVE NE - Approved

LITTLE CORRAL DAY SCHOOL - 10111 CONSTITUTION AVE NE

Food Establishment Class C

Date: 07/10/2026 - #: RT-FOODEST-012119-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can openers Location: main kitchen Condition of the Location: dried food debris buildup

Violation: Storage

- **In-Use Utensils, Between-Use Storage**

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under

□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Scoops Location: Dry storage Condition of the Location: scoops stored in the food containers with handles directly touching the food product

Lotus Tree Herbal LLC - 515 Wyoming Blvd NE - Approved

MCDONALDS 3514 - 1501 COORS BLVD NW
Food Establishment Class C
Date: 07/08/2026 - #: PT0152739 - Inspection Result: Approved

Violation: Plumbing

• **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located in drink station area by drive thru windows. The surface was made out of Metal and Plastic. The condition of the surface had debris buildup on the exterior of drink machines throughout the area referenced. Please clean on a more frequent basis moving forward to be in compliance.

Mini Events Center LLC - 7921 CENTRAL AVE NW - Approved

Mini Events Center LLC - 7921 CENTRAL AVE NW
Food Establishment Class C
Date: 07/09/2026 - #: RT-FOODEST-108134-2025 - Inspection Result: Approved

Violation: Training Records

• **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Ventilation and Hood Systems

• **Ventilation Hood Systems, Drip Prevention and Adequacy**

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface. Location: cooking area. Equipment: grill and stove top.

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.

Observed that the food establishment does not have temperature logs available for TCS foods items. Facility had no logs for hot holding, cold holding and equipment.

• **Calibration Logs**

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment.

Observed the food establishment does not have calibration logs for temperature measuring devices.

NATURAL GROCERS - 4625 WYOMING BLVD NE - Approved

NATURAL GROCERS - 4625 WYOMING BLVD NE
Retail Food Establishment Class 4
Date: 07/06/2026 - #: PT0160279 - Inspection Result: Approved

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Observed nonfood contact surface with the buildup of soil residues. The surface was located to the left at entrance. The surface was made out of plastic ice cold holding storage unit. The condition of the surface was substantial ice frost and debris buildup. Also, shelving where chips are stored found with debris buildup.

Violation: Operations

• **Permit Posted**

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Instructed PIC to contact Consumer Health to obtain permit. Office email is consumerhealth@cabq.gov or (505) 768-2716. Observed that no food permit was posted at the facility.

Violation: Operations

• **Valid Permit**

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

Peter Defries Corp DBA Dion's - 4200 MONTANO RD NW - Conditional Approved

Peter Defries Corp DBA Dion's - 4200 MONTANO RD NW
Food Establishment Class C
Date: 07/08/2026 - #: PT0043179 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice Machine. Location: prep area.

Condition of the Location: Interior of the ice machine ceiling with black and brown like soil residue.

Violation: Cold Holding

• **Time/Temperature Control for Safety Food, Cold Holding**

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Prep top cooler.

Food Items: Corned beef 46 degrees, Roast Beef- 44 degrees Temperature:

Violation: Storage

• **Food Storage, Prohibited Areas**

- Pathogens can contaminate and/or grow in food that is not stored properly. Drips of condensate and drafts of unfiltered air can be sources of microbial contamination for stored food. Shoes carry contamination onto the floors of food preparation and storage areas. Even trace amounts of refuse or wastes in rooms used as toilets or for dressing, storing garbage or implements, or housing machinery can become sources of food contamination. Moist conditions in storage areas promote microbial growth. Food must be protected from contamination and must not be stored in locker rooms, toilet rooms, dressing rooms, garbage rooms, mechanical rooms, under sewer lines, under leaking water lines, under open stairwells, or under other sources of contamination.

Observed food stored improperly under a miscellaneous source of contamination. Location: Bread storage area. Food Item: ready to eat baked breads stored on shelving up against the wall.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on Equipment, storage racks, prep tables and prep coolers. and to clean and sanitize under areas noted.

Observed buildup and debris under Equipment, storage racks, prep tables and prep coolers.

Violation: Records

• **Calibration Logs**

- General Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does have calibration logs for temperature measuring devices but has not been calibrating the thermometers on a regular basis

RUDYS COUNTRY STORE & BBQ - 2321 CARLISLE BLVD NE - Approved

RUDYS COUNTRY STORE & BBQ - 2321 CARLISLE BLVD NE

Food Establishment Class C

Date: 07/06/2026 - #: CAC-Food-063575-2026 - Inspection Result: Approved

- Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness
PIC corrected on site by replacing empty quat sanitizer bucket and remixing quat sanitizer tested at 200 parts per million.

RUDYS COUNTRY STORE & BBQ - 2321 CARLISLE BLVD NE

Food Establishment Class C

Date: 07/06/2026 - #: RT-FOODEST-107490-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Main kitchen line Concentration: Zero parts per million Temperature: 74

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Self-service beverage area at entrance of restaurant Condition of the Location: Debris buildup

Violation: Hot Holding & Reheating

• **Time/Temperature Control for Safety Food, Hot Holding**

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165 F and to maintain temperature at 135 F and above.

Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Cooked meats such as brisket, sausage links, chicken legs
Food Temperature: 104 to 127 °F

Violation: Corrective Actions

• **Infestation Corrective Actions: Clean Up After Rodents**

- Food Establishments shall remove rodent droppings in accordance with current Centers for Disease Control and Prevention recommendations published on the Enforcement Authority's website. Instructed PIC that the following steps must be taken when cleaning rodent droppings: <https://www.cdc.gov/healthypets/pets/wildlife/clean-up.html> Clean up rodent urine and droppings Step 1: Put on rubber or plastic gloves. Step 2: Spray urine and droppings with bleach solution or an EPA-registered disinfectant until very wet. Let it soak for 5 minutes or according to instructions on the disinfectant label. Step 3: Use paper towels to wipe up the urine or droppings and cleaning product. Step 4: Throw the paper towels in a covered garbage can that is regularly emptied. Step 5: Mop or sponge the area with a disinfectant. Clean all hard surfaces including floors, countertops, cabinets, and drawers. Follow instructions below to clean and disinfect other types of surfaces. Step 6: Wash gloved hands with soap and water or a disinfectant before removing gloves. Step 7: Wash hands with soap and warm water after removing gloves or use a waterless alcohol-based hand rub when soap is not available and hands are not visibly soiled. Observed rodent droppings. Location: Storage shed Manner: Rodent droppings inside storage room in back of facility under pallet and in corner of shed.

Violation: Ventilation and Hood Systems

• **Heating, Ventilation, Air Conditioning System Vents**

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Above hot holding pits on main kitchen line.

Violation: Designated Areas

• **Designated Areas-Employee Accommodations for eating/drinking/smoking**

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated area to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

• **Designation-Dressing Areas and Lockers**

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Personal Cleanliness

• **Prohibition-Jewelry**

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Preparing meats and packaging sides into container
Inappropriate Jewelry Observed: bracelets

SUBWAY - 1514 EUBANK BLVD NE - Approved

SUBWAY - 1514 EUBANK BLVD NE

Food Establishment Class C

Date: 07/07/2026 - #: PT0155826 - Inspection Result: Approved

Violation: Plumbing

• **System Maintained in Good Repair**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed floor drain is not maintained in good repair or is not repaired by law. Observed floor drain found in disrepair by missing protective mesh/dome cover

• **Backflow Prevention Device, Design Standard**

- A backflow prevention device is used to avoid potential backflow of contaminated water when an air gap is not practical. The device provides a break to the atmosphere in the event of a negative pressure within the system. Minerals contained in water and solid particulate matter carried in water may coat moving parts of the device or become lodged between them over time. This may render the device inoperative. To minimize such an occurrence, only devices meeting certain standards of construction, installation, maintenance, inspection, and testing for that application may be used. The necessary maintenance can be facilitated by installing these devices in accessible locations. Instructed PIC to remove unapproved backflow prevention device and install an approved backflow prevention device.

Observed an inadequate backflow prevention device installed at mop sink Observed backflow prevention device on faucet broken at time of inspection

Violation: Storage

• **Equipment and Utensils, Air-Drying Required**

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: ware washing area Equipment Type: Food service pans Manner: Not air dried and stacked wet

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on the back plate of the soda machine in the lobby The condition of the surface was soil debris buildup

SUBWAY # 13367 - 640 COORS BLVD NW - Approved

SUBWAY # 13367 - 640 COORS BLVD NW

Food Establishment Class C

Date: 07/07/2026 - #: RT-FOODEST-013408-2026 - Inspection Result: Approved

Violation: Cold Holding

• **Cold Holding Capacities-Equipment**

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so technician was on site repairing walk in freezer and prep top cooler.

Observed insufficient cold holding equipment to properly hold food cold. Location: Prep top cooler, walk in cooler.

Condition: Ambient temperature walk in cooler of 65 degrees, prep top cooler temperatures ranging from 44 to 27 °F. TCS food items chicken, sliced tomatoes,

Turkey, Ham, green chili, onions, spinach.

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.
Observed food temperature measuring devices were not provided or readily accessible for the reach in refrigerator behind the service counter.

Teriyaki Madness - 11032 MONTGOMERY BLVD NE - Approved

Teriyaki Madness - 11032 MONTGOMERY BLVD NE

Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch- PIC corrected violation by cleaning and sanitizing Immersion Blender
Due to correction made Facility is back into the Green approved status

Teriyaki Madness - 11032 MONTGOMERY BLVD NE

Food Establishment Class C

Date: 07/09/2026 - #: RT-FOODEST-103273-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC corrected violation by remaking sanitizer solution
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.
Location: Main cook line in kitchen Concentration: 0ppm

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Immersion Blender Location: prep area of kitchen by prep sink
Condition of the Location: Food debris buildup

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.
Observed wiping cloths improperly used. Observed soiled wiping cloths stored on cutting board

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed interior intake and exhaust air ducts with debris buildup. Location: Kitchen area

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Food service containers with bread crumbs Location Prep area of kitchen

Violation: Toilet Facilities

• Toilet Room Receptacle, Covered

- Instructed to provide a covered receptacle for sanitary napkins.

Observed in a toilet room used by females, no covered receptacle.

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Employee Drinks and food found in upright Freezer, Walk in cooler, above three-compartment sink and stored on Boxes for single use articles

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: actively working with open food items Inappropriate Jewelry Observed Bracelet

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: Employee changing tasks and changing gloves without washing hands prior to donning gloves. Other Employee washing dishes than prepping food items without washing hands prior.

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.

Observed a soiled mop not in use, stored directly on soda bibs

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on pavement and sidewalk and to clean and sanitize areas

Observed buildup and debris on the pavement and sidewalk outside back door of facility. Pavement and sidewalk covered in grease

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: food scoops Location: prep top cooler and steam table Condition of the Location: Scoops stored in food containers with handles directly touching the food product

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: ware washing area Equipment Type: Food service pans Manner: not air dried and stacked wet

The Great Greek - 5600 Coors BLVD NW, B5 B6
Food Establishment Class C
Date: 07/07/2026 - #: RT-FOODEST-097613-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of cooking equipment and pans shall be cleaned at a frequency to prevent the buildup of soil residues and encrusted grease deposits. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Refrigerator shelving and food containers. Location: Kitchen prep areas.

Condition of the Location: Food dropped on the shelving and food containers.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Filters

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface.

Location: Front cooking area.

Equipment: Exhaust hoods.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Prep top cooler.

Food Items: Tirokafteri- 53 degrees, chopped tomatoes with onion peppers- 47 degrees. Sliced Cucumbers 44 -degrees.

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels

(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Middle back hand wash station.

THE LEARNING EXPERIENCE - 4580 NUNZIO NW - Approved

THE LEARNING EXPERIENCE - 4580 NUNZIO NW
Food Establishment Class C
Date: 07/10/2026 - #: PT0157730 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75F with a contact time of 7 seconds. PIC corrected violation by pic remaking sanitizer to 50 ppm temperature of 89 °F.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Three-compartment sinks.

Concentration: 0 PPM.

Temperature: 80 degrees.

Violation: Poisonous and Toxic/Chemical Substances

• Identifying Information, Prominence-Original Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray

Bottle.

Alleged Material: Chlorine sanitizer bottle, glass cleaner bottle.

Violation: Warewashing Temperature and Concentration

• Sanitizers, Criteria-Chemicals

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR. PIC corrected violation by adding water to the chlorine tested at 50 ppm at 80 degrees. f.

Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Chlorine sanitizer. Location: Spray Bottle.

Concentration: 200 ppm.

TRADER JOES 166 - 8928 HOLLY AVE NE - Approved

TRADER JOES 166 - 8928 HOLLY AVE NE

Retail Food Establishment Class 4

Date: 07/10/2026 - #: PT0076122 - Inspection Result: Approved

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire usable sanitizing solution testing kits or device.

Observed testing kit or other device to measure the concentration of chemical sanitizing solution found damaged or not usable. Observed available quat test strips had been dropped in liquid and appeared dark blue/teal in color.

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Pathogens can contaminate and/or grow in food that is not stored properly. Drips of condensate and drafts of unfiltered air can be sources of microbial contamination for stored food. Shoes carry contamination onto the floors of food preparation and storage areas. Even trace amounts of refuse or wastes in rooms used as toilets or for dressing, storing garbage or implements, or housing machinery can become sources of food contamination. Moist conditions in storage areas promote microbial growth. Food must be protected from contamination and must not be stored in locker rooms, toilet rooms, dressing rooms, garbage rooms, mechanical rooms, under sewer lines, under leaking water lines, under open stairwells, or under other sources of contamination.

Instructed PIC to remove ice buildup and to make repairs/adjustments to compressor to prevent buildup of ice and from contaminating food items. PIC must provide CHPD Inspector with copy of completed work order or invoice when repairs are made.

Observed food stored improperly under leaking compressor water lines. Location: walk in freezer. Observed significant ice buildup on compressor and compressor lines dripping onto shelving and food item boxes at the time of inspection.

WHICH WICH 219 - 8110 LOUISIANA BLVD NE - Conditional Approved

WHICH WICH 219 - 8110 LOUISIANA BLVD NE

Food Establishment Class C

Date: 07/08/2026 - #: RT-FOODEST-064495-2026 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils - Grease/Soil Deposits, Cooking Equipment

- clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed food-contact surface of cooking equipment and pans with encrusted grease deposits or of soil residues. Food contact surface type: conveyor belt style toaster oven. Location: on table in between prep top coolers. Condition of the Location: observed severe buildup and debris on the conveyor belt, conveyor drive shaft and knobs at the time of inspection.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Instructed PIC contact repair personnel to have:

1. toilet repaired so that it properly flushes.

2. leak at three-compartment sink sprayer nozzle is remedied.

Observed the following is not maintained in good repair or is not repaired by law:

1. Observed toilet found in disrepair by not being able to flush after use.

2. leak at three-compartment sink sprayer nozzle that causes standing water underneath three-compartment sink to leak on to floor on the other side of the wall in the walk way in the dining area.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee

is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is corrosion-resistant.

Observed nonfood contact surface that was non corrosion-resistant. Location: Walk in cooler. Type of equipment: metal shelves inside walk in cooler. Condition: observed rust, buildup and debris on the wire shelves.

Violation: Cold Holding

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: prep top cooler. Condition: observed containers of ice were placed in the 3 door cooler storage area and food items in prep top area temping between 53°F - 57°F at the time of inspection.

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.

Observed inadequate amount of lighting. Location: Walk in cooler. Manner: Observed inadequate lighting in the walk-in cooler at the time of inspection. Inspector had to utilize flashlight in order to see the inside of walk-in cooler.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. Location: interior surface of reach in freezer. Condition: Observed dried food debris and ice buildup on the walls and bottom of the freezer at the time of inspection.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: cut vegetables, sliced deli meats, guacamole, chicken, tuna salad. Activity of the Food: stored, thawed and cooked.

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment.

Observed the food establishment does not have calibration logs for temperature measuring devices.

WHICH WICH 219 - 8110 LOUISIANA BLVD NE

Food Establishment Class C

Date: 07/08/2026 - #: RT-FOODEST-036820-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils - Grease/Soil Deposits, Cooking Equipment

- Food-contact surfaces of cooking equipment and pans shall be cleaned at a frequency to prevent the buildup of soil residues and encrusted grease deposits. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed food-contact surface of cooking equipment and pans with encrusted grease deposits or of soil residues. Food contact surface type: conveyor belt style toaster oven. Location: on table in between prep top coolers. Condition of the Location: observed severe buildup and debris on the conveyor belt, conveyor drive shaft and knobs at the time of inspection.

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener blade. Location: can opener attached to prep table. Condition of the Location: observed dried debris on the can opener blade at the time of inspection.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Instructed PIC contact repair personnel to have:

1. toilet repaired so that it properly flushes.

2. leak at three-compartment sink sprayer nozzle is remedied.

Observed the following is not maintained in good repair or is not repaired by law:

1. Observed toilet found in disrepair by not being able to flush after use.

2. leak at three-compartment sink sprayer nozzle that causes standing water underneath three-compartment sink to leak on to floor on the other side of the wall in the walk way in the dining area.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is corrosion-resistant.

Observed nonfood contact surface that was non corrosion-resistant. Location: Walk in cooler. Type of equipment: metal shelves inside walk in cooler. Condition: observed rust, buildup and debris on the wire shelves.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to dispose of all food in prep top cooler and to discontinue use of prep top cooler until it is able to maintain approved cold holding temperatures of 41°F and below as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: prep top cooler under order pickup sign. Food Items: Sliced tomatoes, sliced cucumbers, shredded lettuce, sliced red onions. Temperatures: 53°F - 58°F

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: prep top cooler. Condition: observed containers of ice were placed in the 3 door cooler storage area and food items in prep top area temping between 53°F - 57°F at the time of inspection.

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.

Observed inadequate amount of lighting. Location: Walk in cooler. Manner: Observed inadequate lighting in the walk-in cooler at the time of inspection. Inspector had to utilize flashlight in order to see the inside of walk-in cooler.

Violation: Hot & Cold-Water Availability & Pressure

• Water Pressure

- Inadequate water pressure could lead to situations that place the public health at risk such as improper handwashing or equipment operation. Water under pressure must be provided to all fixtures, equipment, and nonfood equipment that are required to use water. Observed PIC was able to repair hot water pressure issue during inspection. Violation corrected on site.

Observed facility with inadequate water pressure. Location: hand washing sink in south restroom Manner: observed water is coming out of the faucet at a trickle.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. Location: interior surface of reach in freezer. Condition: Observed dried food debris and ice

buildup on the walls and bottom of the freezer at the time of inspection.

Violation: Records

- **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: cut vegetables, sliced deli meats, guacamole, chicken, tuna salad. Activity of the Food: stored, thawed and cooked.

- **Calibration Logs**

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment.

Observed the food establishment does not have calibration logs for temperature measuring devices.

WINGSTOP - 7610 CARMEL AVE NE

Food Establishment Class C

Date: 07/09/2026 - #: RT-FOODEST-040415-2025 - Inspection Result: Approved

Violation: Plumbing

- **System Maintained in Good Repair**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions. Instructed PIC to contact repair personnel to have hand washing sink repaired. PIC must also provide CHPD inspector with updates and completed work order when repairs are completed.

Observed drain in hand washing sink across from raw chicken upright cooler is not maintained in good repair or is not repaired by law. Observed hand washing sink found in disrepair by having a slow drain at the time of inspection. Observed sink would fill up with water prior to slowly draining. Buildup and debris were observed slightly blocking drain openings in sink basin.

Violation: Surface Not Clean

- **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surfaces with the buildup of soil residues. Type of equipment: upright cooler door handles. Locations: Kitchen area next to fryer and across from three-compartment sink. Condition: Observed debris and buildup on the door handles.
