

City of Albuquerque
Environmental Health Department
Consumer Health Protection Division
P.O. Box 1293, Albuquerque, NM 87103

Summary Table
Consumer Health Protection Inspections Performed
Week: August 16, 2026 to August 22, 2026 Report
Amended on 8/24/2026 for clerical errors

This report includes inspection history for the dates listed. Inspections may have occurred after those dates.
The summary reflects each establishment's current operating status as of the report release date.

123 Child Development Center - 1701 BROADWAY BLVD SE

Inspection Date	Inspection ID Number	Inspection Type	Inspection Status	Page #
Food Establishment (Permit # - PT0160144) - Operational Status - Open				
08/20/2026	RT-FOODEST-003290-2026	Routine Food Establishment Inspection	Approved	Pg. 5

ADVANCE FRESH CONCEPTS FRANCHISE CORPORATION (AFC) - 8100 VENTURA ST NE

Corrective Action Compliance does not represent a full routine health inspection. Instead, it reflects that a facility has taken specific corrective actions in response to violations identified during an inspection. These actions may be taken during the inspection or afterward, and the Corrective Action Compliance allows for the facility's grade or status to be updated based on those corrections. Corrective actions may be demonstrated through documentation such as photos, videos, receipts, work orders, site visits, or both verifiable means showing that the violation has been addressed and compliance has been achieved.

APPROVED

An "Approved" grade indicates that a food establishment that has demonstrated compliance with the standards in the Food Code the Food Service and Retail Ordinance, other industry standards, and other laws and has received a Grade of Approved and is able to operate.

CONDITIONAL APPROVED

A "Conditional Approved" grade is issued when a facility is found to have violations of the Food Code, the Food Service and Retail Ordinance, industry standards, or applicable laws. While the facility may continue operating, it must complete specific corrective actions to address the violation A yellow sticker is placed alongside the green "Approved" sticker.

UNSATISFACTORY

An "Unsatisfactory" grade indicates that a facility has not met the required standards but is allowed to continue operating temporarily while corrective actions are completed. A red "Unsatisfactory" sticker will be displayed at the facility for the duration of this grade. This is a temporary status and requires timely follow-up to verify compliance.

CLOSED

A "Closed" grade is assigned when violations pose a significant risk to public health, requiring the facility to immediately cease operations. The facility must remain closed until corrective actions have been completed and verified. A facility with this grade will display an orange "Closed" sticker for the duration of the closure.

123 Child Development Center - 1701 BROADWAY BLVD SE - Approved

123 Child Development Center - 1701 BROADWAY BLVD SE

Food Establishment Class C

Date: 08/20/2026 - #: RT-FOODEST-003290-2026 - Inspection Result: Approved

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottle

Alleged Material: Pine sol

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.

Observed food stored improperly less than six (6) inches off the floor. Location: Pantry Food Item: Condiments and prepackaged foods

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- Floors, walls, and ceilings that are constructed of smooth and durable surface materials are more easily cleaned. Floor surfaces that are graded to drain and consist of effectively treated materials will prevent contamination of foods from dust and organisms from pooled moisture. The special requirements for carpeting materials and nonabsorbent materials in areas subject to moisture are intended to ensure that the cleanability of these surfaces is retained.

Instructed person in charge to repair flooring with non-absorbent, smooth and easily cleanable material.

Observed food pantry floor is constructed of unsealed plywood which is NOT smooth, easily cleanable or non-absorbent.

ALBERTSONS - 8100 VENTURA ST NE

Retail Food Establishment Class 4

Date: 08/19/2026 - #: PT0086841 - Inspection Result: Approved

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying. Observed PIC relocate mop head to promote air drying.
Observed a soiled mop head not in use, stored directly on the floor of the service sink basin.

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize floor area in dairy walk-in cooler.
Observed spilled milk on the floor in the walk-in cooler.

ALBERTSONS - 8100 VENTURA ST NE

Retail Food Establishment Class 5

Date: 08/19/2026 - #: PT0086842 - Inspection Result: Approved

Violation: Preventing Contamination From Hands

• Preventing Contamination from Hands, Minimize Barehand Contact with non-RTE Foods

- Except when washing fruits and vegetables or ready-to-eat food that is being added as an ingredient to food that will be cooked to a temperature of at least 145 degrees. Handwashing with plain soap and water, as specified in the Food Code, may not be an adequate intervention to prevent the transmission of pathogenic microbes to ready-to-eat foods via bare hand contact. Cooking foods to the temperatures required in the Food Code will reduce the likelihood of survival of pathogens that might be transferred from an employee's hands to the surface of the ready-to-eat foods. Instructed PIC that the food contacted by the employee with bare hands must not be used in the food operation and that employees must be retrained on bare hand contact procedures with ready-to-eat food. Instructed employee to wash hands. Observed employee wash hands.
Observed a food employee touching ready-to-eat food with bare hands. Location: Prep Table. Activity: Observed employee handling food with bare hands. Food Contacted: ready to eat crackers.

Date: 08/19/2026 - #: RT-FOODEST-036099-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Slotted spoon Location: Stored inside stainless-steel container with other utensils in clean dish area Condition of the Location: Utensil stored away with bean debris buildup still on spoon also food debris buildup inside stainless steel utensil storage unit.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course. PIC stated employee has been employed with Canteen for a year.

Violation: Installation

• **Handwashing Sinks-Numbers and Capacities**

- Hands are a common vehicle for the transmission of pathogens to foods in an establishment. Hands can become soiled with a variety of contaminants during routine operations. The transfer of contaminants can be limited by providing food employees with handwashing sinks that are properly equipped and conveniently located. Hand washing sinks must be installed as required by law, and handwashing sinks shall be located to allow convenient use by employees in food preparation, food dispensing, and warewashing areas, and in or immediately adjacent to, toilet rooms. Instructed PIC to install handwashing sink(s) inside food preparation area.

Observed facility with an inadequate number of handwashing sinks necessary for the convenient use by employees. Location: Inside food preparation area

Condition: Facility added an enclosure for canteen to operate as an enclosed kitchen however hand-washing station was not included in the enclosure.

Hand washing sink is available in dining area, but employees have to exit the kitchen that is enclosed to access hand washing sink.

Violation: Operation and Maintenance

• **Handwashing Signage**

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

Observed handwashing sink(s) without a handwashing sign. Location: Hand washing sign in dining room area

Violation: Personal Cleanliness

• **Eating, Drinking, or Using Tobacco Products**

- A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area and should be in a cup with a lid and straw.

Observed a food employee with an improper drink. Location: Prep table designated area

Type of Drink: Twist top water bottles

ALONSO ARTUROS MEXICAN RESTAURANT - 10120 CENTRAL AVE SW

Food Establishment Class C

Date: 08/21/2026 - #: CAC-Food-080182-2026 - Inspection Result: Approved

Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification.

Working Container of Food: spices Location: kitchen area

pic labeled all containers with common food name

Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris and to clean and sanitize.

Observed build up and debris on the ceiling vent covers in back area where ice machine is located and in kitchen area.

pic bought and installed new ceiling vent covers

Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed plumbing is not maintained in good repair or is not repaired by law. Observed faucet on three compartment sink found in disrepair by leak on the faucet of three compartment sink.

pic bought new three compartment sink faucet connection and installed to repair leak

Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping.

Location: kitchen area back prep Food Item: pot of birria, container of taco shells, containers inside reach in coolers, and reach in freezer, multiple containers of spices

pic covered all product that was in violation

The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

Observed food temperature measuring devices were not provided or readily accessible for the measuring of thin foods.

pic obtained new thermometers

ALONSO ARTUROS MEXICAN RESTAURANT - 10120 CENTRAL AVE SW**Food Establishment Class C****Date: 08/21/2026 - #: RT-FOODEST-031581-2025 - Inspection Result: Conditional Approved****Violation: Plumbing****• System Maintained in Good Repair**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed plumbing is not maintained in good repair or is not repaired by law. Observed faucet on 3-compartment sink found in disrepair by leak on the faucet of 3-compartment sink.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented**• Food Storage Containers Identified with Common Name of Food**

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: spices Location: kitchen area

Violation: Food Separation**• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination**

- Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. Location: kitchen area back prep Food Item: pot of birria, container of taco shells, containers inside reach in coolers, and reach in freezer, multiple containers of spices

Violation: Storage**• Food Storage-Preventing Contamination from the Premises**

- Food must be protected from contamination of splashing water, chemical, or other foods; dust; and other contaminants. Instructed PIC to have food protected in containers/wrapping and not to store food in those areas unless the source of contamination can be mediated another way.

Observed food stored improperly where it was exposed to contamination from splash, dust, or other contamination. Location: kitchen area Food Item: Pot of Birria Condition: stored on the floor in the kitchen

Violation: Testing Devices**• Food Temperature Measuring Devices**

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

Observed food temperature measuring devices were not provided or readily accessible for the measuring of thin foods.

Violation: Designated Areas**• Designated Areas-Employee Accommodations for eating/drinking/smoking**

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Physical Facilities, Cleaning**• Drying Mops**

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.

Observed a soiled mop not in use, stored directly inside mop bucket.

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize.

Observed buildup and debris on the ceiling vent covers in back area where ice machine is located and in kitchen area.

Violation: Records**• Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. no logs for cooling, hot holding, cold holding or equipment

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

Ambica Inc. Holiday Inn & Suites Albuquerque Airport - 1501 SUNPORT PL SE - Approved

Ambica Inc. Holiday Inn & Suites Albuquerque Airport - 1501 SUNPORT PL SE

Food Establishment Class C

Date: 08/20/2026 - #: RT-FOODEST-077552-2026 - Inspection Result: Approved

Violation: Training Records

- **Food Handler Cards**

- General Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Physical Facilities

- **Outer Openings, Protected**

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed rear door to the outside that is not tight fitting, light can be seen at the bottom left edge.

Violation: Cold Holding

- **Time/Temperature Control for Safety Food, Cold Holding**

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Lobby self-serve buffet

Food Items: Strawberries (54°F), cantaloupe(54°F), sliced cheese (57°F), salsa (51°F)

BABY PANTHER LLC DBA SISTER - 407 CENTRAL AVE NW

Food Establishment Class B

Date: 08/19/2026 - #: PT0125157 - Inspection Result: Approved

Violation: Maintenance and Operation

- **Good Repair and Proper Adjustment-Equipment**

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: bar area Type of Equipment: ice bins in bar area Condition of the equipment: no lids to cover and protect ice from contamination.

Violation: Plumbing

- **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the

system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap under handwashing sink.

Violation: Training Records

• Food Handler Cards

BJS RESTAURANT AND BREWHOUSE - 2100 LOUISIANA BLVD NE

Food Establishment Class C

Date: 08/18/2026 - #: RT-FOODEST-001502-2026 - Inspection Result: Approved

Complaint

This inspection was the result of a citizen complaint that was unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature

control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Two vegetable dicers, vegetable slicer, ice machine, and knives

Location: Back prep area, inside kitchen and on main kitchen line Condition of the Location: Dicer and slicer stored away with food debris, ice machine debris buildup, knives stored in between shelving in cold holding unit.

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed wiping cloths used for cleaning and sanitizing.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed prep sink and automatic dish machine is not maintained in good repair or is not repaired by law. Observed prep sink and automatic dish machine found in disrepair by prep sink unable to completely shut off and substantial leak above dish machine.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Filters

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Above salad preparation area

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.

Observed nonfood contact surface that was not smooth. The surface was located on shelving in back of facility The surface was made out of laminate The condition of the surface was damaged and cracked

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Preparing salads Inappropriate Jewelry Observed: Bracelets

Violation: Glove Use Limitation

• Gloves, Use Limitations - Slash Resistant/Cloth

- Gloves are a utensil which must be of proper construction, maintained in good repair, cleaning, and storage. Multiuse gloves, especially when used repeatedly and soiled, can become breeding grounds for pathogens that could be transferred to food. Slash-resistant gloves unless cleaned and sanitized, of smooth, durable non-absorbent construction or covered by single-use glove may not come in direct contact with food that is not intended to be subsequently cooked.

Gloves are a utensil which must be of proper construction, maintained in good repair, cleaning, and storage. Multiuse gloves, especially when used repeatedly and soiled, can become breeding grounds for pathogens that could be transferred to food. Cloth gloves may not come in direct contact with food that is not intended to be subsequently cooked.

Observed employee blowing into gloves before donning Location: Back prep area where raw ground beef is being prepared

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris underneath cold holding units on main kitchen line, behind kitchen equipment such as fryer, stove top, in between equipment on stainless steel panel and Lincoln oven and to clean and sanitize all areas.

Observed buildup and debris underneath cold holding units on main kitchen line, behind kitchen equipment such as fryer, stove top, in between equipment on stainless steel panel and Lincoln oven.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are

not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Observed nonfood contact surface with the buildup of soil residues. The surface was located clean dish storage area. The surface was made out of plastic. The condition of the surface was debris buildup. Grey bus tubs used to store clean dish ware and utensils.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps. Location: dining area behind soda dispenser Pest Type: flies and bugs

Pest Condition: dead

Number of Pests Present: six dead pests behind the containers that store lids and straws

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at the soda machine in drive thru area.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Drip Prevention and Adequacy

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and

condensation drip on to and contaminating equipment surface. Location: above flat top grill and deep fryers in the kitchen area

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. Location: kitchen and back areas Food Item: container of corn dogs, containers of salt and garlic powders and a container of taco shells.

Violation: Availability

• Cleaning Agents and Sanitizers, Availability

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55F. PIC corrected violation by making sanitation bucket after inspector instructed to always have sanitation bucket made before prepping or cooking any food.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: kitchen Concentration: 100ppm

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.

Observed a soiled mop not in use, stored directly inside mop holder instead of drip/air drying directly into mop sink.

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize.

Observed dirty buildup and debris on the floors throughout the kitchen and behind the cooking equipment and back areas of the restaurant. observed debris buildup on the ceiling and vent covers on the ceilings throughout the kitchen and back areas.

observed debris buildup on walls behind cooking equipment.

observed debris buildup on the entry door to the restaurant heavy accumulation of fingerprints.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located in kitchen and back areas of the facility The surface was made out of metal and plastic The condition of the surface had debris buildup on shelving in drive thru areas inside the ventilation equipment behind hood filters, exterior of reach in coolers doors and handles, on the top of the deep friers equipment, on the vent cover inside the walk-in cooler.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed back areas and kitchen in disrepair by holes in ceilings.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. no logs for cold holding, hot holding, equipment, or cooling of food.

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

CATERPILLAR CLUBHOUSE DAY CARE LLC - 4221 SILVER AVE SE - Approved

CATERPILLAR CLUBHOUSE DAY CARE LLC - 4221 SILVER AVE SE

Food Establishment Class C

Date: 08/19/2026 - #: RT-FOODEST-006376-2026 - Inspection Result: Approved

Violation: Poisonous and Toxic/Chemical Substances

• Separation-Storage

- Poisonous or toxic materials shall be stored and displayed for retail so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by separating the poisonous or toxic materials by spacing or partitioning and locating the poisonous or toxic materials in an area that is not above food, equipment, utensils, linens, and single-service and single-use articles. Instructed PIC to move toxic chemicals to an approved location and that contaminated

single-service and single-use articles must be discarded.

Observed poisonous or toxic materials stored in a manner that has the potential to contaminate food. Poisonous/Toxic Substance: Clorox wipes and spray

Location: Food pantry

CHILE TRADITIONS - 6919 MONTGOMERY BLVD NE - Approved

CHILE TRADITIONS - 6919 MONTGOMERY BLVD NE

Retail Food Establishment Class 4

Date: 08/20/2026 - #: PT0160222 - Inspection Result: Approved

Violation: Maintenance

• Maintaining Premises, Unnecessary Items and Litter

- The presence of unnecessary articles, including equipment which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.

Observed items on the premises of the food establishment that is not used or is non-functional for chile production. Location: Storage shelving Condition of the items: Miscellaneous items not used for chile production.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on floor in chile preparation area, under prep table, shelving and to clean and sanitize all areas.

Observed buildup and debris on floor in chile preparation area, under prep table, shelving.

Violation: Maintenance and Operation

• Warewashing Equipment, Cleaning Frequency

- Observed soiled or dirty three (3) compartment sink. Location: In back of facility Condition: 3-compartments sink with previous days dirty dish ware and food debris.

Observed warewashing sink not cleaned or sanitized before and after use. Use: 3-compartments sink with previous days dirty dish ware and food debris.

Violation: Toilet Facilities

• Toilet Rooms, Enclosed

- Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.

Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

CHURCHS CHICKEN #694 - 5112 4TH NW - Approved

CHURCHS CHICKEN #694 - 5112 4TH NW

Food Establishment Class C

Date: 08/18/2026 - #: RT-FOODEST-010117-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine.

Location: back storage areas.

Condition of the Location: Interior with the Ice machine chute and ceiling with a black like soil residue.

Violation: Poisonous and Toxic/Chemical Substances

• Identifying Information, Prominence-Original Containers

- Failure to properly use poisonous or toxic materials can be dangerous. Poisonous or toxic materials shall be applied so that a hazard to employees or other persons is not constituted, and contamination including toxic residues due to drip, drain, fog, splash or spray on food, equipment, utensils, linens, and single-service and single-use articles is prevented. Instructed PIC to ensure that chemicals are applied so that no contamination occurs. Single-service and single-use articles that were contaminated must not be used in the operations of the food establishment.

Observed poisonous or toxic materials used against the manufacturer's labeling. Type of Material: Unknown.

Location: Spray bottle.

Action: not labeled with the identity of the toxic substance.

Violation: Ventilation and Hood Systems

• Mechanical-Ventilation

- Heating, ventilating, and air conditioning systems shall be designed, installed, and maintained so that make-up air intake and exhaust vents do not cause contamination of food, contact surfaces, equipment, or utensils.

Observed heating and air conditioning system vents not properly designed and located to be easily cleanable. Location: Cooler vents and ceilings.
Manner Substantial buildup and debris on the Fan guards and ceiling of the walk-in cooler.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed holes or other gaps in the structure of the facility. Location: Back of the storage area by receiving.

Size: Vent tubing and rectangular hole approximately 10. IN X 4IN.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Cooler and prep areas. The surface was made out of Metal refrigerator doors, fountain drink dispenser's Fryers.

The condition of the surface was soiled with protein soils and black buildup.

Violation: Physical Facilities, Construction and Repair

• Wall and Ceiling Coverings and Coatings

- Walls and ceilings that are of smooth construction, nonabsorbent, and in good repair can be easily and effectively cleaned. Special requirements related to the attachment of accessories and exposure of wall and ceiling studs, joists, and rafters are intended to ensure the cleanability of these surfaces.

Instructed PIC to remove buildup of soil residues and to clean and sanitize or replace ceiling tiles.

Observed walls and/or ceilings with the buildup of soil residues. The surface was located Kitchen and food storage areas. The surface was made out of Unknown ceiling white tiles.

The condition of the surface was soiled with grease and dust buildup.

CIRCLE K 2622024 - 6300 CENTRAL AVE SE - Conditional Approved

CIRCLE K 2622024 - 6300 CENTRAL AVE SE

Retail Food Establishment Class 5

Date: 08/18/2026 - #: PT0158909 - Inspection Result: Conditional Approved

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Refrigerated display case

Food Items: Burrito (60°F), Cookie dough (61°F), chicken salad (55°F), sausage egg and cheese biscuit (56°F)

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: Two refrigerated display cases on the sales floor Condition: Not able to maintain temperatures under 41°F

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on beverage station counters and nozzles and on soda pumps and hoses. Also observed an ice cream chest freezer with severe ice buildup. The condition of the surface was with debris accumulation, ice, syrup and food residue.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain next to the above ground grease interceptor.

Violation: Physical Facilities

• Outer Openings, Protected

- Walls and roofs provide a barrier to protect the interior and foods from the weather, windblown dirt and debris, and flying insects. Perimeter walls and roofs of

a food establishment shall effectively protect the establishment from the weather and the entry of insects, rodents, and other animals.
Observed doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate Location: Water heater closet

Pest Type: Pigeon Pest Condition: Dead

Number of Pests Present: 1

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on floors throughout facility especially under equipment and to clean and sanitize on a regular basis.

Observed buildup and debris on the facility floors.

Violation: Poisonous and Toxic/Chemical Substances

• Separation-Storage

- Poisonous or toxic materials shall be stored and displayed for retail so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by separating the poisonous or toxic materials by spacing or partitioning and locating the poisonous or toxic materials in an area that is not above food, equipment, utensils, linens, and single-service and single-use articles. Instructed PIC to move toxic chemicals to an approved location and that contaminated single-service and single-use articles must be discarded.

Observed poisonous or toxic materials stored in a manner that has the potential to contaminate food. Poisonous/Toxic Substance: Observed bleach being stored directly next to food items Location: Sales floor shelving

CIRCLE K STORE #2706247 - 5605 4TH ST NW - Approved

CIRCLE K STORE #2706247 - 5605 4TH ST NW

Retail Food Establishment Class 3

Date: 08/20/2026 - #: PT0133063 - Inspection Result: Approved

Violation: Training Records

• Food Handler Cards

- Food handler cards shall be kept by the Food Employee on their Person while working as a Food Employee or volunteer for a Food operation, or a copy shall be kept on file by the current employer and be made available for inspection by the Enforcement Authority. If trained through another approved method; records of the training shall be maintained for the duration of the Food Employee's employment. Instructed PIC to provide updated training records to EHD for review. The PIC was unable to provide records of training or certification of food employees. Third party preparing foods.

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.

Observed nonfood contact surface that was not smooth. The surface was located under front prep sink. The surface was made out of Wood and particle board. The condition of the surface was cracked damaged by water.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located sales floor. The surface was made out of Synthetic plastic and metal racks, wood.

The condition of the surface was exterior of the creamer machine, cappuccino machine, fountain drink dispensers with caked and liquid buildup and debris. Sides racks and front dispensing areas.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items.

Food Items: Hot dogs, wings, pizzas, chicken sandwiches egg and cheeses biscuits. Temperatures logs evening shifts missing temperatures.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.

Observed holes or other gaps in the structure of the facility. Location: Back-room hallway and ceiling at back prep area.

Size: Hallway sides with a 1-inch by 2 feet. crack at the ends of the walkway and a u shape drain hole partially covered with plywood. hand wash sinks in back ceiling tile missing.

Violation: Storage

• Food Storage, Prohibited Areas

- Pathogens can contaminate and/or grow in food that is not stored properly. Drips of condensate and drafts of unfiltered air can be sources of microbial contamination for stored food. Shoes carry contamination onto the floors of food preparation and storage areas. Even trace amounts of refuse or wastes in rooms used as toilets or for dressing, storing garbage or implements, or housing machinery can become sources of food contamination. Moist conditions in storage areas promote microbial growth. Food must be protected from contamination and must not be stored in locker rooms, toilet rooms, dressing rooms, garbage rooms, mechanical rooms, under sewer lines, under leaking water lines, under open stairwells, or under other sources of contamination.

Observed food stored improperly under a miscellaneous source of contamination. Location: Reach in freezer.

Food Item: Frozen brownies in a box tray not covered or wrapped at the time of inspection

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on floors in the freezer's coolers under shelving, backroom coke racks and storage racks.

Observed buildup and debris on the floors in the freezer's coolers under shelving, backroom coke racks and storage racks.

Violation: Operation and Maintenance

• Cleaning of Handwashing Fixtures

- Handwashing facilities are critical to food protection and must be maintained in operating order at all times so they will be used. Handwashing sinks shall be cleaned as often as necessary to keep them clean. Instructed PIC to clean handwashing sink(s).

Observed handwashing fixtures with the buildup of soil residues. The plumbing fixture was located Front cook and prep station The condition of the surface was soiled with debris brown mildew buildup and hard water stains.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Cook and prep areas.

Activity: Employee was handling food without a beard Guard at the time of inspection.

COMFORT SUITES - 1401 WOODWARD RD SE - Approved

COMFORT SUITES - 1401 WOODWARD RD SE

Food Establishment Class B

Date: 08/21/2026 - #: PT0156712 - Inspection Result: Approved

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no/expired testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: Donning new gloves and switching tasks

DASHMART - 1431 MERCANTILE AVE NE - Approved

DASHMART - 1431 MERCANTILE AVE NE

Food Establishment Class C

Date: 08/17/2026 - #: RT-FOODEST-052872-2026 - Inspection Result: Approved

Complaint

This inspection was the result of a citizen complaint that was unsubstantiated.

Violation: Receptacle Condition

• Covering Receptacles

- Waste bins with food residue must have tight fitting lids or doors and be emptied once they are filled. Instructed PIC empty the waste bin(s) and to ensure that

waste bins are kept sanitary by installing and/or using tight fitting lids and emptying the bins once they are filled.

Observed waste bins outside the food establishment without tight fitting lids or doors or with tight fitting lids not being used at the time of inspection. Location: outside refuse area enclosure.

Violation: Maintenance

• Maintaining Refuse Areas and Enclosures

- A storage area and enclosure for waste shall be maintained clean. Instructed PIC to clean the area.

Observed the waste storage area to be unclean. Location: outside garbage receptacle area. Condition of the storage area: observed food waste and garbage/refuse, damaged pallets, wood pieces, buildup and debris on the pavement.

Violation: Outside Storage Prohibitions

• Outside Storage Prohibitions

- Waste that is not in a rodent or insect resistant bin must not be stored outside; unless it is cardboard or other recyclables that do not contain food residue and is awaiting regularly scheduled pick-up. Instructed PIC to designate an area indoors for waste that does not fit in the outdoor enclosures or to place proper waste storage bins outside.

Observed that waste was being improperly stored outside. Location of the waste: In damaged/torn black plastic garbage bags Type of items: packages of individual servings of rice pudding, boxes of deli meat and plastic food containers Storage method: stored on the ground next to garbage receptacle and in between pallets. Overall condition of the items: soiled, damaged

Violation: Storage

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.

Observed cleaned single-service and single-use articles stored improperly. Single-service and single-use articles was not stored six (6) inches above the floor. Single-service and single-use articles Type: Boxes of food storage containers. Storage Method: Stored directly on the floor. Location: facility storage area.

DASHMART - 1431 MERCANTILE AVE NE

Warehouse

Date: 08/17/2026 - #: RT-RET-048105-2026 - Inspection Result: Approved

Violation: Maintenance

• Maintaining Refuse Areas and Enclosures

- A storage area and enclosure for waste shall be maintained clean. Instructed PIC to clean the area.

Observed the waste storage area to be unclean. Location: outside garbage receptacle area. Condition of the storage area: observed food waste and garbage/refuse, damaged pallets, wood pieces, buildup and debris on the pavement.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. Location: inside of reach in coolers and freezers' bottom shelf surfaces. Condition: observed dried food debris and buildup.

Violation: Outside Storage Prohibitions

• Outside Storage Prohibitions

- Waste that is not in a rodent or insect resistant bin must not be stored outside; unless it is cardboard or other recyclables that do not contain food residue and is awaiting regularly scheduled pick-up. Instructed PIC to designate an area indoors for waste that does not fit in the outdoor enclosures or to place proper waste storage bins outside.

Observed that waste was being improperly stored outside. Location of the waste: In damaged/torn black plastic garbage bags Type of items: packages of individual servings of rice pudding, boxes of deli meat and plastic food containers Storage method: stored on the ground next to garbage receptacle and in between pallets. Overall condition of the items: soiled, damaged

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize floor area underneath coolers and freezers.

Observed dried food buildup and debris on the floor underneath and behind freezers and coolers.

Violation: Receptacle Condition

• Covering Receptacles

- Waste bins with food residue must have tight fitting lids or doors and be emptied once they are filled. Instructed PIC empty the waste bin(s) and to ensure that waste bins are kept sanitary by installing and/or using tight fitting lids and emptying the bins once they are filled.

Observed waste bins outside the food establishment without tight fitting lids or doors or with tight fitting lids not being used at the time of inspection. Location: outside refuse area enclosure.

Date: 08/17/2026 - #: CAC-Food-078174-2026 - Inspection Result: Approved

Time/Temperature Control for Safety Food, Cold Holding- PIC corrected this violation by maintaining all TCS food items under 41°F

Temperature Logs-- PIC corrected this violation by taking and recording temperatures on log

Calibration Logs- PIC corrected violation by making sure thermometer is calibrated and recoding on log

DGS DELI & MARKET - 1418 DR MARTIN LUTHER KING JR AVE NE - Approved

DGS DELI & MARKET - 1418 DR MARTIN LUTHER KING JR AVE NE

Food Establishment Class C

Date: 08/21/2026 - #: RT-FOODEST-078900-2026 - Inspection Result: Approved

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed rodent droppings allowed to accumulate in facility.

Location: Cash register area, cabinet beverage dispensing area and in back storage room Pest Type: Rodent

Number of Pests Present: Three new rodent droppings near cash register. CHPD inspector observed PIC did not clean or remove rodent droppings from back storage room under storage shelves and in salad bowls.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed floor drain located near cook line is not maintained in good repair or is not repaired by law. Observed floor drain located near cook line found in disrepair by missing strainer.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain near cook line.

Food Establishment Class C

Date: 08/18/2026 - #: RT-FOODEST-078061-2026 - Inspection Result: Closure Re-Inspection Required

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps.

Location: Cash register area, cabinet beverage dispensing area and in back storage room Pest Type: Rodent

Pest Condition: Dead

Number of Pests Present: Two dead mice

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed floor drain located near cook line is not maintained in good repair or is not repaired by law. Observed floor drain located near cook line found in disrepair by missing strainer.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the

introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain near cook line.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges.

• Exterior Walls and Roofs, Protective Barrier

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.

Observed holes or other gaps in the structure of the facility. Location: Several locations in back storage room.

Size: Quarter inch to one inch

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

• Permit Posted

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Provided a copy of the valid permit for posting.

Observed that no food permit was posted at the facility.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: Donning new gloves and switching tasks

DGS DELI & MARKET - 1418 DR MARTIN LUTHER KING JR AVE NE

Food Establishment Class C

Date: 08/17/2026 - #: PT0046323 - Inspection Result: Approved

Violation: Pest Control

• Controlling Pests, Inspection/Harborage

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by routinely inspecting incoming shipments of food and supplies, routinely inspecting the premises for evidence of pests, and eliminating harborage conditions. Instructed PIC to provide EHD with their standard operating procedures and pest control plan.

Observed the facility has inadequate procedures to effectively control pests.

Current Policy: PIC stated the facility does have pest control but could not provide any documentation to verify

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed rodent droppings allowed to accumulate in facility.

Location: Counter under cash register and counter under beverage dispensing station Pest Type: Rodent droppings

Pest Condition: Unknown

Number of Rodent Droppings Present: Extreme amounts 20 plus

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain located near beverage station.

Violation: Toilet Facilities

• Toilet Rooms, Enclosed

- Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.

Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed walls in disrepair with large holes throughout facility

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- When cleaning is accomplished by spraying or flushing, coving and sealing of the floor/wall junctures is required to provide a surface that is conducive to water flushing. Grading of the floor to drain allows liquid wastes to be quickly carried away, thereby preventing pooling which could attract pests such as insects and rodents or contribute to problems with certain pathogens such as *Listeria monocytogenes*.

Observed floor and wall juncture covering missing cove in several areas of the facility.

DOLLAR TREE #8068 - 6211 4TH ST NW, 13 A - Approved

DOLLAR TREE #8068 - 6211 4TH ST NW, 13 A

Retail Food Establishment Class 3

Date: 08/20/2026 - #: PT0155640 - Inspection Result: Approved

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Package Integrity

- Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging. instructed pic to discard.

Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants. Packaged Food: Hot dogs.

Location: Sales cold display cases.

Condition: unit of Oscar Myer and 2 units of Coronado hot dogs with hot dogs were a yellow and green color at the time of inspection.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Sales floor Shelving. The surface was made out of Shelf metal.

The condition of the surface was soiled with substantial debris and black soil buildup.

Observed reach in freezer and refrigerator in the backroom interior with substantial dry soil liquid buildup at the time of inspection.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges and bottom of the receiving door.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on floors under shelving backroom and equipment and to clean and sanitize areas noted.

Observed buildup and debris on the floors under shelving backroom and equipment's.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Backroom restroom.

• Cleaning of Handwashing Fixtures

- In order to minimize the possibility that a non-designated handwashing sink is used for handwashing such as ones used food preparation or utensil washing, or a service sink or curbed cleaning facility used for the disposal of mop water or similar wastes, may not be provided with the handwashing aids and devices required for a handwashing sink. Instructed PIC to remove hand aids or devices from non-designated handwashing sink.

Observed handwashing fixtures with the buildup. of soil residues. The plumbing fixture was located back-room hand wash station The condition of the surface was soiled with black soil buildup.

DOMINOS PIZZA - 2400 12TH ST NW, C - Approved

DOMINOS PIZZA - 2400 12TH ST NW, C

Food Establishment Class C

Date: 08/17/2026 - #: RT-FOODEST-079299-2025 - Inspection Result: Approved

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- Due to the lack of a large safety margin in the temperature requirements themselves, thermometer accuracy is imperative for the safety of food. Instructed PIC to calibrate ambient air and water thermometers or to acquire new thermometers to ensure that the proper accuracy has been achieved to be within 1.5 degrees C.

Observed ambient air and water temperature measuring device that is scaled for both Celsius and Fahrenheit failing to meet accuracy requirements. Location: Undercounter cooler

Type: Ambient air thermometer Accuracy: No thermometer available

EAT MY THAI CUISINE - 5303 GIBSON BLVD SE - Approved

EAT MY THAI CUISINE - 5303 GIBSON BLVD SE

Food Establishment Class C

Date: 08/20/2026 - #: RT-FOODEST-077346-2026 - Inspection Result: Approved

Complaint

This inspection was a follow-up based on a citizen complaint that was previously substantiated. Facility is on a compliance plan involving frequent follow-up inspections.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps. Location: Dish pit, boiler room and dry storage Pest Type: Cockroach

Pest Condition: Dead Number of Pests Present: 3

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165 F and to maintain temperature at 135 F and above.

Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Multiple curries Food Temperature: Curry 1 (120°F), curry 2 (108°F)

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris and grease buildup. Location: Above server station

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

Observed handwashing sink(s) was observed blocked or inaccessible. Location: North side of kitchen Manner: Multiple bags of linens are blocking the handwash station

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed portions of their arms, for at least 20 seconds. Food employees shall use the following cleaning procedure in the order stated to clean their hands and exposed portions of their arms: (1) Rinse under clean, running warm water; (2) Apply an amount of cleaning compound recommended by the cleaning compound manufacturer; (3) Rub together vigorously for at least 10 to 15 seconds while: (a) Paying particular attention to removing soil from underneath the fingernails during the cleaning procedure, and (b) Creating friction on the surfaces of the hands and arms or surrogate prosthetic devices

for hands and arms, finger tips, and areas between the fingers; (4) Thoroughly rinse under clean, running warm water; (5) Immediately follow the cleaning procedure with thorough drying Food handling employee re-washed and sanitized their hands.

Observed food employee washing hands incorrectly. Location: Cookline handwash station

Manner: Observed kitchen employee washing their hands with single use gloves still on both hands. Instructed employee to take off gloves and re-wash their hand properly.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on the vent cover inside the beverage station standing cooler. The surface was made out of plastic. The condition of the surface was soiled with dust and syrup buildup.

ENCINO MID-TOWN MEALSITE - 609 ENCINO PL NE - Closure Re-Inspection Required

ENCINO MID-TOWN MEALSITE - 609 ENCINO PL NE

Food Establishment Class B

Date: 08/19/2026 - #: PT0052509 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75F with a contact time of 7 seconds. PIC did not correct violation

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Wiping cloth container service counter

Concentration: 25 ppm

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine

Location: Dining room

Condition of the Location: Extreme buildup of orange organic matter

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by routinely inspecting incoming shipments of food and supplies, routinely inspecting the premises for evidence of pests, and eliminating harborage conditions. Instructed PIC to provide EHD with their standard operating procedures and pest control plan.

Observed the facility has inadequate procedures to effectively control pests. Current Policy: PIC stated the facility utilizes Manzano Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps. Location: Kitchen service area

Pest Type: Rodent and cockroach Pest Condition: Living and dead

Number of Pests Present: 10 plus dead and 5 plus alive observed in several locations in kitchen. Extreme rodent droppings observed throughout facility and kitchen service area

Fairfield/TownePlace Albuquerque Uptown - 2160 Louisiana BLVD NE – Approved

Fairfield/TownePlace Albuquerque Uptown - 2160 Louisiana BLVD NE

Food Establishment Class C

Date: 08/17/2026 - #: RT-FOODEST-060067-2025 - Inspection Result: Approved

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165 F and to maintain temperature at 135 F and above.

Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Cooked sausage

Food Temperature: 129°F

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Cold holding near customer self-serve area

Food Items: Chopped green chile Temperature: 48°F

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Preparing and warming ready to eat food for customer self-serve

Inappropriate Jewelry Observed: Rings

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food, clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Food prep area

Activity: Warming ready to eat food

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.

Observed a soiled mop not in use, stored directly in mop bucket.

Fairfield/TownePlace Albuquerque Uptown - 2160 Louisiana BLVD NE

Retail Prepackaged Food Est Class 1

Date: 08/17/2026 - #: RT-RET-077909-2026 - Inspection Result: Approved

FILIBERTOS - 5201 4TH ST NW - Scheduled

FILIBERTOS - 5201 4TH ST NW

Food Establishment Class C

Date: 08/21/2026 - #: RT-FOODEST-079972-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Poisonous and Toxic/Chemical Substances

• Poisonous or Toxic Material Containers

- The presence in the establishment of poisonous or toxic materials that are not required for the maintenance and operation of the establishment represents an unnecessary risk to both employees and consumers. Only those poisonous or toxic materials that are required for the operation and maintenance of a food establishment, such as for the cleaning and sanitizing of equipment and utensils and the control of insects and rodents, shall be allowed in a food establishment. Instructed PIC to remove the unapproved chemicals from the facility.

Observed poisonous or toxic materials other than those required for the operation and maintenance of a food establishment located in the establishment. Material: Raid.

Location: storage back room. Intended Use: for insects and roaches.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Hot water valves at two hand wash sinks are not maintained in good repair or is not repaired by law. by 1st hand sink hot water valve stripped and cannot turn. other hand wash sink valve very hard to turn.

• Backflow Prevention, Air Gap

- A backflow prevention device is used to avoid potential backflow of contaminated water when an air gap is not practical. The device provides a break to the atmosphere in the event of a negative pressure within the system. Minerals contained in water and solid particulate matter carried in water may coat moving parts of the device or become lodged between them over time. This may render the device inoperative. To minimize such an occurrence, only devices meeting certain standards of construction, installation, maintenance, inspection, and testing for that application may be used. The necessary maintenance can be facilitated by installing these devices in accessible locations. Instructed PIC to remove unapproved backflow prevention device and install an approved backflow prevention device.

Observed air gap or vented backflow prevention device at the hand sink and 3-compartment sink is not properly installed or does not meet requirements by PVC piping at hand wash sink and 3-compartment sinks below the drain lines at the time of inspection.

Violation: Training Records

• **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Cold Holding

• **Cold Holding Capacities-Equipment**

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: Dining and back prep cooler. Condition: both units ambient temperatures temping at 50 degrees, and 46.7 degrees.

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Dining area, steam table back room, fountain drink dispenser back room. The surface was made out of Metals rubber gaskets and synthetic plastic.

The condition of the surface was soiled with old buildup and debris.

Violation: Physical Facilities, Construction and Repair

• **Floor and Wall Junctions, Coved, and Enclosed or Sealed**

- Wall and ceiling attachments, such as light fixtures, mechanical room ventilation system components, vent covers, wall mounted fans, ornamental objects, and other attachments, must be EASILY CLEANABLE, with the exception of what is mentioned in (B) of this section. (B) If wall and ceiling surfaces, decorative accessories, and other ambiance-enhancing items are maintained clean in a CONSUMER area, this criterion need not be met. Instructed person in charge to clean and sanitize wall and ceiling attachments.

Observed Cooler walls, prep area walls, base coving, corners of walls located throughout the facility with several holes in areas noted and base coving throughout the facility either damaged or missing or not secure to the wall.

Ceiling tile around the water heater with outer openings.

HAYASHI HIBACHI SUSHI - 6321 SAN MATEO BLVD NE - Approved

HAYASHI HIBACHI SUSHI - 6321 SAN MATEO BLVD NE

Food Establishment Class D

Date: 08/17/2026 - #: RT-FOODEST-023979-2026 - Inspection Result: Approved

Complaint

This inspection was the result of a citizen complaint that was unsubstantiated.

Violation: Equipment Design

• **Warewashing Machine, Data Plate & Manufacturer's Instructions**

- The data plate provides the operator with the fundamental information needed to ensure that the machine is effectively washing, rinsing, and sanitizing equipment and utensils. A warewashing machine shall be provided with an easily accessible and readable data plate affixed to the machine by the manufacturer that indicates the machine's design and operation specifications including temperatures required for washing, rinsing, and sanitizing, pressure required for the fresh water sanitizing rise unless the machine is designed to use only a pumped sanitizing rinse; and conveyor speed for conveyor machines or cycle time for stationary rack machines. Instructed PIC to install the manufacturer's operating specifications for the mechanical ware washer in a manner that complies with the Food Code. Instructed PIC to provide documentation that the warewashing cycle was run in accordance with the manufacturer's operating specifications or to re-sanitize the equipment or utensils from the observed batch of warewashing by means that comply with the Food Code.

Observed mechanical warewashing machine without data plate showing the manufacturer's operation specifications. Location: warewashing area. Data Plate Specifications: data plate information was rubbed off and missing temperature, instructions and sanitizer concentration information.

Violation: Food Separation

• **Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination**

- It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination.

Observed non-ready-to-eat raw animal food stored with ready-to-eat food without protection from contamination. Location: walk-in cooler shelving unit. Food Item: pan of raw chicken and box of whole cucumbers. Condition: observed pan of raw chicken stored above boxes of whole cucumbers.

Violation: Operation and Maintenance

• **Hand Drying Provision**

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels

(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife

system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink. Observed PIC replenish empty paper towel dispenser during inspection. Violation corrected on site.
Observed no approved method of hand drying at handwashing sink(s). Location: North end of main kitchen line.

Violation: Functionality and Accuracy

• Temperature Measuring Devices-Functionality

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to obtain a temperature measuring device and keep temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures.

Observed in a mechanically refrigerated food storage unit the temperature measuring device was not available and was not placed in the warmest part of the unit. Equipment Location: walk-in cooler, ice cream and cheesecake chest freezer. Thermometer Location: none available.

HEALTHY NUTRITION - 640 COORS BLVD NW - Approved

HEALTHY NUTRITION - 640 COORS BLVD NW

Food Establishment Class C

Date: 08/21/2026 - #: RT-FOODEST-003509-2026 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee does not wash hands when required. Condition: employee making shakes then hands shake out then takes money and goes back to making drinks without washing hands after touching money.

JACK IN THE BOX - 10100 CENTRAL AVE SE - Approved

JACK IN THE BOX - 10100 CENTRAL AVE SE

Food Establishment Class C

Date: 08/17/2026 - #: RT-FOODEST-037052-2025 - Inspection Result: Approved

Violation: Time as Public Health Control

• Time as a Public Health Control, Written Procedures, Labeling

- Instructed PIC that food must be labeled indicating when the food was removed from temperature control or indication of the maximum holding time. Reminded that the time must be appropriately indicated as this is the sole method being utilized for the protection and safety of the food. Facility voluntarily discarded food items with no time markings.

Observed no marking or identification signifying when the food was removed from temperature control or indication of the maximum holding time. Location: Main cook line Type of Food: Mayo, Jalapenos, Pickles, Sauteed onions

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Floor drains on 3-compartment sink and mop sink are not maintained in good repair or is not repaired by law. Observed Floor drains found in disrepair by missing protective dome or mesh cover.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers

holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Food service Container Location: Back of kitchen by walk-in cooler

Violation: Toilet Facilities

• Toilet Room Receptacle, Covered

- Instructed to provide a covered receptacle for sanitary napkins.
Observed in a toilet room used by females, no covered receptacle.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges. Back door or right side

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.

Observed no handwashing cleanser available at handwashing sink(s). Location: Handwashing sink in back of kitchen by 3-compartment sink

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on Floor drains and walk-in freezer floor and to clean and sanitize floor drains and floor

Observed buildup and debris on the floor drains and walk-in freezer floor

Violation: Storage

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: not air dried and stacked wet with water in between pans

LAGUNA BURGER - 2400 12TH ST NW - Approved

LAGUNA BURGER - 2400 12TH ST NW

Food Establishment Class C

Date: 08/17/2026 - #: PT0152669- Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds.

PIC corrected violation by PIC remaking quat sanitizer to proper parts per million.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Wiping cloth container and 3-compartment sink

Concentration: Zero PPM

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Violation corrected on site by PIC discarding out of temperature food items Observed food items in cold holding unit measuring above 41°F.

Location: Prep top cooler near cook line

Food Items: Sliced tomatoes, sliced pickles and chopped green chile Temperature: 49°F, 50°F and 55°F

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: Prep top cooler near cook line Condition: Failing to maintain temperature of 41°F and below

Little Caesar's - 2529 SAN MATEO BLVD NE - Approved

Little Caesar's - 2529 SAN MATEO BLVD NE

Food Establishment Class C

Date: 08/20/2026 - #: RT-FOODEST-076543-2026 - Inspection Result: Approved

Violation: Poisonous and Toxic/Chemical Substances

• Separation-Storage

- The storage of poisonous or toxic materials directly above or adjacent to food could result in contamination of the food from spillage. Poisonous or toxic materials must be stored so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by separating the poisonous or toxic materials by spacing or partitioning; and storing them in an area that is not above food, equipment, utensils, linens, and single-service or single-use articles. Instructed PIC to move chemicals to an approved location.

Observed poisonous or toxic materials stored in a manner that has the potential to contaminate food. Poisonous/Toxic Substance: Multiple chemical spray bottles
Location: On shelving next to food items and above baking sheet pans.

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

Observed handwashing sink(s) without a handwashing sign. Location: Hand washing sinks inside kitchen and in 3-compartment sink area.

LITTLE CAESARS 512 - 101 98TH ST NW, 100 - Approved

LITTLE CAESARS 512 - 101 98TH ST NW, 100

Food Establishment Class C

Date: 08/17/2026 - #: RT-FOODEST-073581-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils - Grease/Soil Deposits, Cooking Equipment

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: reach in coolers Location: ordering areas and prep areas Condition of the Location: debris buildup inside reach in coolers

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps. Location: in light shield above 3-compartment sink Pest Type: flies

Pest Condition: Dead Number of Pests Present: 8

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: walk-in cooler Type of Equipment: walk-in cooler door handle Condition of the equipment: broken

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap below 3-compartment sink.

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Personal Cleanliness

• **Effectiveness-Hair Restraints**

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints. Observed a food employee without proper hair restraints. Location: dough proofing area and pizza making areas Activity: making dough and making pizzas with no beard restraints.

Violation: Physical Facilities, Cleaning

• **Drying Mops**

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.

Observed a soiled mop not in use, stored directly on the floor.

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize.

Observed buildup and debris on the front entry door and ordering windows have debris and fingerprints.

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located in cooking oven area The surface was made out of metal The condition of the surface had a heavy accumulation of debris on the exterior, side and top of pizza oven and on filters above the oven.

Violation: Physical Facilities, Construction and Repair

• **Repairing-Premises, Structures, Attachments, and Fixtures-Methods**

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed mop sink area in disrepair by having a hole in ceiling above mop sink

LOS CUATES NORTH - 4901 LOMAS BLVD NE – Approved

LOS CUATES NORTH - 4901 LOMAS BLVD NE

Food Establishment Class B

Date: 08/17/2026 - #: PT0052176 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine

Location: Bar area

Condition of the Location: Extreme buildup of black organic matter buildup near ice chute and on deflector plate

Violation: Plumbing

• **System Maintained in Good Repair**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed floor drain located in bar area is not maintained in good repair or is not repaired by law. Observed floor drain located in bar area found in disrepair with extreme trash and debris buildup.

• **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain located under hand wash station in bar area.

LOS CUATES NORTH - 4901 LOMAS BLVD NE**Food Establishment Class C****Date: 08/17/2026 - #: PT0052177 - Inspection Result: Approved****Violation: Equipment, Food Contact Surfaces, and Utensils Clean****• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine and can opener

Location: Back of house

Condition of the Location: Ice machine had black organic matter buildup near ice chute. Food debris buildup on cutting blade.

Violation: Plumbing**• Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at several floor drains throughout kitchen.

Violation: Designated Areas**• Storage-Other Personal Care Items**

- Employees shall store their personal care items in proper storage facilities. Instructed PIC to move employee belongings to an approved location.

Observed employee personal care items stored incorrectly. Location: Prep table shelf

Violation: Physical Facilities, Cleaning**• Drying Mops**

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.

Observed a soiled mop not in use, stored directly in mop bucket.

LOVE AND CARE CHILD DEVELOPMENT - 5407 4TH ST NW - Unsatisfactory Re-Inspection required**LOVE AND CARE CHILD DEVELOPMENT - 5407 4TH ST NW****Food Establishment Class C****Date: 08/17/2026 - #: RT-FOODEST-077597-2026 - Inspection Result: Unsatisfactory Re-Inspection required****Violation: Pest Control****• Insect Control Devices, Design and Installation**

- Improper design of the device and dead insect collection tray could allow dead insect parts and injured insects to escape, rendering the device itself a source of contamination. Instructed PIC to replace the insect control device with one that is properly designed to contain insects and their parts.

Observed an improper insect control device. Location: Cupboards and behind kitchen equipment. Type of Device: stun/stick.

Condition:

what made the device improper; did not contain dead insects or their only had spring loaded mice traps and nothing to trap German roaches.

Violation: Training Records**• Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Physical Facilities**• Outer Openings, Protected**

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.

Observed holes or other gaps in the structure of the facility. Location: Behind the refrigerator in the kitchen.

Size: Heater Panel does not secure with outer openings

MARIOS PIZZA AND PASTA EXPRESS INC - 5700 4TH ST NW, F - Approved

MARIOS PIZZA AND PASTA EXPRESS INC - 5700 4TH ST NW, F

Food Establishment Class C

Date: 08/19/2026 - #: PT0099577 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: meat Slicer Location: back prep area.

Condition of the Location: back of the Blade and blade guard with dry soil residue.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Filters

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and soil buildup on to and contaminating equipment surface. Location: Hoods and spray valves above fryers and ovens.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Prep top cooler

Food Items Chicken 46°F, Sausage 45.7°F, Spinach sauce 58.4°F, sausage 48°F

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location Food making and: prep areas.

Activity: two employees handling food one without a beard guard, and one with no hair restraint.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on all walls in prep area kitchen.

Observed buildup and debris on the walls by oven, walls by middle plate storage are, back walls by dishwasher with soil buildup.

MONTEREY MOTEL - 2402 CENTRAL AVE SW - Approved

MONTEREY MOTEL - 2402 CENTRAL AVE SW

Food Establishment Class B

Date: 08/19/2026 - #: PT0161113 - Inspection Result: Approved

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: bar area Type of Equipment: ice bin Condition of the equipment: no lid on ice bin to prevent contamination.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. Location: reach in cooler
Food Item: chopped limes not covered sitting on shelves in reach in cooler.
instructed pic to dispose of limes

Mrs. Sprinkles Ice Cream - 3107 EUBANK BLVD NE, 18 - Approved

**Mrs. Sprinkles Ice Cream - 3107 EUBANK BLVD NE,

Date: 08/21/2026 - #: RT-FOODEST-019102-2026 - Inspection Result: Approved**

Complaint

This inspection was the result of a citizen complaint that was unsubstantiated.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Package Integrity

- Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging.
Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants. Packaged Food: Strawberry puree Location: Underneath prep table Condition: Dented can

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s). Location: Hand washing sink

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Preparing ice cream dishes Inappropriate Jewelry Observed: Watch and bracelets

Violation: Operations

• Permit Posted

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Instructed PIC to post permit as owner did have permit.
Observed that no food permit was posted at the facility.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Dairy products Activity of the Food: stored and received
Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment.
Observed the food establishment does not have calibration logs for temperature measuring devices.

PALETERIA LA MICHOACANA DEL SUR - 1720 BRIDGE BLVD SW - Conditional Approved

**PALETERIA LA MICHOACANA DEL SUR - 1720 BRIDGE BLVD SW
Food Establishment Class C
Date: 08/20/2026 - #: PT0138706 - Inspection Result: Conditional Approved**

Complaint

This inspection was the result of a citizen complaint that was unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils - Grease/Soil Deposits, Cooking Equipment

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer

to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: walk-in coolers and freezers and reach in coolers and freezers and display coolers and freezers Location: kitchen, back prep and front dining/serving areas Condition of the Location: debris buildup inside freezers and coolers

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: kitchen/ prep area and walk-in freezer area Type of Equipment: walk-in cooler and cold holding table Condition of the equipment: hole in floor of walk-in cooler and leaking water below cold holding case in back prep/kitchen area

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. Location: walk-in cooler and in dry good storage and prep areas Food Item: ice cream, toppings (Walnuts, sprinkles, coconut), Chocolate sauce

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

Observed food temperature measuring devices were not provided or readily accessible for the measuring of thin foods.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located walk-in cooler The surface was made out of metal The condition of the surface had debris buildup on the walk-in coolers vent covers.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. no Hot holding, Cold Holding, Cooling or Equipment Logs.

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

PANADERIA PASTELANDIA - 600 LOUISIANA BLVD SE, #F – Conditional Approved

PANADERIA PASTELANDIA - 600 LOUISIANA BLVD SE, #F

Retail Food Establishment Class 5

Date: 08/17/2026 - #: CAC-Food-078134-2026 - Inspection Result: Conditional Approved

Facility has been upgraded Conditionally Approved status following the correction of the following violations during inspection by the Environmental Health Department.

The facility has corrected:

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch (Food contact surfaces have been cleaned and sanitized)

- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition (Date labels have been placed on foods produced yesterday and today.)

Person in in charge also voluntarily discarded other food items)

- Handwashing Cleanser, Availability

(Handwashing cleanser has been obtained for the bakery handwashing station)

PANADERIA PASTELANDIA - 600 LOUISIANA BLVD SE, #F

Retail Food Establishment Class 5

Date: 08/17/2026 - #: RT-RET-069804-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Sugar, flour, Manteca and other spices

Location: Multiple areas prep tables, shelving, underneath prep tables and bulk storage bins.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Maintenance

• Maintaining Premises, Unnecessary Items and Litter

- The presence of unnecessary articles, including equipment which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.

Observed items on the premises of the food establishment that is no longer used or is non-functional. Location: Stored on prep tables, damaged shelving, storage rooms, Items list: Damaged kitchen equipment, bags of miscellaneous items, chemicals, office equipment, display cases, broken ice machine, griddles, and cold holding units no longer operational or damaged. Condition of the items: Dirty, non-functional cluttered in multiple areas

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- Floors, walls, and ceilings that are constructed of smooth and durable surface materials are more easily cleaned. Floor surfaces that are graded to drain and consist of effectively treated materials will prevent contamination of foods from dust and organisms from pooled moisture. The special requirements for carpeting materials and nonabsorbent materials in areas subject to moisture are intended to ensure that the cleanability of these surfaces is retained.

Instructed person in charge to repair flooring with non-absorbent, smooth and easily cleanable material.

Observed bakery floors to be constructed of broken and cracked, non-easily cleanable floor tiles that need to be replaced as it does not allow for proper cleaning and sanitizing.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed bakery handwashing sink is not maintained in good repair or is not repaired by law. Observed handwashing sink found in disrepair by having a severe leak on the drain line fitting that needs to be repaired.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked meats, dairy products, chopped vegetables and fruit Activity of the Food: Stored, received and cooled.

Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps. Location: Behind bakery case and restroom hallway Pest Type: Cockroach

Pest Condition: Dead

Violation: Single-Service

• Characteristics-Single-Service and Single-Use, Clean, Shall Not Impart on Food

- The safety and quality of food can be adversely affected through single service and single use articles that are not constructed of acceptable materials. Single-

service articles must be clean and not allow for the migration of debris or other substances, impart colors, odors, or tastes to food; and must be safe. Instructed PIC that the single-service articles must not be used for food in the operations of the establishment and that proper single-service articles should be obtained. Observed single-service articles that were unclear. Condition of the Article: Cake toppers, cake decor, coffee cup lids and cups. Stored with food debris, miscellaneous items stored with these items, uncovered and unprotected.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize under kitchen equipment, inside cold holding units, inside cabinets, shelving, storage rooms, and storage shelving

Observed buildup and debris under kitchen equipment, inside cold holding units, inside cabinets, shelving, storage rooms, and storage shelving.

Violation: Operations

• Valid Permit

- General Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.

Observed inadequate amount of lighting.

Location: Under hood vent and large commercial ovens. Manner: No lighting available in areas.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Can opener and mixers Location: Bakery

Condition of the Location: Soiled and encrusted with food residue

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.

Observed no handwashing cleanser available at handwashing sink(s). Location: Bakery handwashing station

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

Observed handwashing sink(s) without a handwashing sign. Location: Bakery handwashing station

Violation: Ventilation and Hood Systems

• Cleaning Ventilation Systems, Nuisance and Discharge Prohibition

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Hood vent and filters above stove top and intakes above bakery area.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: In multiple standing reach in refrigerators within the main bakery kitchen

Food Items: Cooked green chile, red chile sauce, prepared meats, other unknown sauces and cremes. Expiration Dates: No date marking, expiration, or date food was prepared.

Peter Defries Corp DBA Dion's - 6308 4TH ST NW - Conditional Approved

Peter Defries Corp DBA Dion's - 6308 4TH ST NW

Food Establishment Class C

Date: 08/17/2026 - #: PT0105955 - Inspection Result: Conditional Approved

Violation: Maintenance and Operation

• Warewashing Equipment, Cleaning Frequency

- During operation, warewashing equipment is subject to the accumulation of food wastes and other soils or sources of contamination. In order to ensure the

proper cleaning and sanitization of equipment and utensils, it is necessary to clean the surface of warewashing machines, three (3) compartment sinks, drainboards, and laundry facilities for wiping cloths before use, every twenty-four (24) hours if used, and periodically throughout the day to prevent buildup of soils or other sources of contamination. Instructed PIC to clean the warewashing equipment and retain employees on the cleaning schedule.

Observed soiled or dirty warewashing machine. Location: Dishwashing areas.

Condition: Interior and exterior of the dishwasher soiled.

Violation: Poisonous and Toxic/Chemical Substances

• Restriction-Presence and Use

- Failure to properly use poisonous or toxic materials can be dangerous. Poisonous or toxic materials shall be applied so that a hazard to employees or other persons is not constituted, and contamination including toxic residues due to drip, drain, fog, splash or spray on food, equipment, utensils, linens, and single-service and single-use articles is prevented. Instructed PIC to ensure that chemicals are applied so that no contamination occurs. Single-service and single-use articles that were contaminated must not be used in the operations of the food establishment.

Observed pesticides used in the facility that is not state it is approved for use in food establishments on the manufacturer's label. Pesticide: Two cans of Hot shot flying Insects

Location: Food service areas.

Violation: Pest Control

• Prohibiting Animals

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place. Location: Pizza prep area.

Pest Type: flies

Pest Condition: 8 to 10 living flies in food prep area stations

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Package Integrity

- Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging.

Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants. Packaged

Food: Can of black olives, two cans Pizza sauce,

Location: Storage can rack.

Condition. cans dented on the sides and top where cans seal.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents

Observed doors to the outside that are not solid and light can be seen through the left side of the door.

Violation: Cold Holding

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so. adjusted below 41 and covered TCS food items.

Observed insufficient cold holding equipment to properly hold food cold. Location: prep station for pizzas.

Condition: Food items such as mozzarella, green chili, sausage, chicken. sliced tomatoes holding above 41. 44 and 45 degrees.

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.

Observed no handwashing cleanser available at handwashing sink(s). Location: Back hand wash station.

POP POPS LLC - 6300 SAN MATEO BLVD NE, I 1 – Approved

POP POPS LLC - 6300 SAN MATEO BLVD NE, I 1

Food Establishment Class C

Date: 08/20/2026 - #: PT0158318 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS

foods every 4 hours. Instructed PIC to remove ice and debris and buildup and to clean and sanitize internal surfaces of ice machine.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice Machine. Location: internal surface and baffle inside ice machine.
Condition of the Location: observed debris and build on the baffle and internal surface of ice machine.

Violation: Training Records

- **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Installation

- **Handwashing Sinks, Installation, Water 85F**

- A handwashing sink shall be equipped to provide water at a temperature of at least 85°F through a mixing valve or combination faucet. Instructed PIC to repair or replace handwashing sink so it has hot water available at all times. PIC must contact CHPD with updates and verification when repairs are made.
Observed handwashing sink with hot water not available. Location: front preparation area. Condition: observed hot water knob is broken causing hot water to not be available.

Violation: Toilet Facilities

- **Toilet Rooms, Enclosed**

- Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.
Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

Violation: Physical Facilities, Cleaning

- **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize floors throughout facility.
Observed buildup and debris on the floor behind freezers at the time of inspection.

Violation: Consumer Advisories

- **Allergen Warning, Unpackaged Food**

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.
Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

POP POPS LLC - 6300 SAN MATEO BLVD NE, I 1

Food Processor Class B

Date: 08/20/2026 - #: PT0161137 - Inspection Result: Approved

Violation: Toilet Facilities

- **Toilet Rooms, Enclosed**

- Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.
Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

Violation: Training Records

- **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

QUALITY INN ABQ EAST - 450 PAISANO ST NE – Conditional Approved

QUALITY INN ABQ EAST - 450 PAISANO ST NE

Food Establishment Class B

Date: 08/20/2026 - #: CAC-Food-079448-2026 - Inspection Result: Approved

Corrective Action Compliance. Facility is being upgraded from a Conditional Approved status to an Approved status. PIC has corrected three of the four observed and noted violations. No Food Protection Manager Certification has been provided. CHPD inspector advised PIC the facility has thirty days (30) to obtain a Food Protection Manager Certification. CHPD inspector observed PIC removed Conditional Approved sticker and hid it in the kitchen. Not disclosing the status of the facility to the consumer. PIC was advised the facility will receive a civil penalty for relocating yellow sticker.

Violations corrected:

1. Equipment, Food Contact Surfaces, and Utensils Clean: Equipment, Food Contact Surfaces, and Utensils Clean
2. Temperature & Sanitizer Measuring Devices: Sanitizing Solutions, Testing Devices
3. Temperature & Sanitizer Measuring Devices: Food Temperature Measuring Devices

QUALITY INN ABQ EAST - 450 PAISANO ST NE**Food Establishment Class B****Date: 08/18/2026 - #: PT0160878 - Inspection Result: Conditional Approved**

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds.

PIC did not correct violation

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Wiping cloth container

Concentration: Zero ppm

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

Observed food temperature measuring devices were not provided or readily accessible.

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no/expired testing kit or other device to measure the concentration of chemical sanitizing solution.

Quesadilla Way LLC - 5305 GIBSON BLVD SE - Closure Re-Inspection Required**Quesadilla Way LLC - 5305 GIBSON BLVD****SE Food Establishment Class C****Date: 08/19/2026 - #: RT-FOODEST-079362-2026 - Inspection Result: Closure Re-Inspection Required**

Violation: Poisonous and Toxic/Chemical Substances

• Separation-Storage

- Poisonous or toxic materials shall be stored and displayed for retail so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by separating the poisonous or toxic materials by spacing or partitioning and locating the poisonous or toxic materials in an area that is not above food, equipment, utensils, linens, and single-service and single-use articles. Instructed PIC to move toxic chemicals to an approved location and that contaminated single-service and single-use articles must be discarded.

Observed poisonous or toxic materials stored in a manner that has the potential to contaminate food. Poisonous/Toxic Substance: Chaffing fuel Location: Dry food storage rack

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination.

Observed non-ready-to-eat raw animal food stored with ready-to-eat food without protection from contamination. Location: Walk-in freezer Food Item: Raw ground pork / raw ground beef

Condition: Stored directly above ready to eat foods

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Walk-in cooler and refrigerated make table

Food Items: All TCS food items including raw and prepared meats, cheese's, chopped veggies, milks and sauces being held in these units are all out of temperature exceeding 50°F.

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire

sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: Kitchen

Condition: Both the walk-in cooler and refrigerated make table are unable to maintain cold holding temperatures of 41°F or below as required. Also observed the walk-in freezer door being actively propped open to allow cold air into the adjacent walk-in cooler and the ambient temperature was still above 60°F.

Violation: Storage

• Food Storage, Prohibited Areas

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.

Observed food stored improperly less than six (6) inches off the floor. Location: Dry storage room Food Item: Dried red chile

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.

Observed no handwashing cleanser available at handwashing sink(s). Location: Kitchen handwashing sink

Violation: Hands Clean & Properly Washed

• Clean condition-Hands and Arms

- The hands are particularly important in transmitting foodborne pathogens. Food employees with dirty hands and/or fingernails may contaminate the food being prepared. Therefore, any activity which may contaminate the hands must be followed by thorough handwashing. Violation was corrected by having food employee wash and sanitize their hands. Reminded PIC to ensure food employee's hands and arms are clean at all times.

Observed food employee with unclean hands or arms. Location: Kitchen

Condition: Employees hands were unclean and unable to be properly washed due to no hand cleanser being available.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All cold and hot held temperature-controlled foods.

Activity of the Food: Stored, thawed, cooled

STARBUCKS - 2400 12TH ST NW - Approved

STARBUCKS - 2400 12TH ST NW

Food Establishment Class C

TENAMPA RESTAURANT LLC - 101 98TH ST NW, 105 - Unsatisfactory Re-Inspection required

TENAMPA RESTAURANT LLC - 101 98TH ST NW, 105

Food Establishment Class C

Date: 08/20/2026 - #: CAC-Food-079817-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators.

Location: reach in cooler Food Items: hominy and beans Expiration Dates: no dates were observed

pic put dates on all food at time of the site visit

Instructed PIC to repair or replace automatic handwashing facility so it is installed and operational according to manufacturer's instructions.

Observed an automatic handwashing sink not installed according to manufacturer's instructions. Location: kitchen area Manner: handwashing sink was not installed missing drain inside basin and missing pvc pipes

pic fixed handwashing sink and now has hot water and drains properly

Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located kitchen area The surface was made out of metal and plastic The condition of the surface had debris build up throughout the kitchen areas on handwashing sinks paper towel dispenser on gas pipes in cooking area.

pic cleaned all non-food contact surfaces that were mentioned

Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit. Observed that the facility was operating with an expired permit.

pic paid invoice and is now up to date on permit

Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove build up and debris and to clean and sanitize.

Observed build up and debris on the floors, walls and ceiling throughout the whole kitchen.

pic cleaned floors, walls, and floors

Regardless of its specificity, a Code cannot anticipate all the diverse means by which food can become contaminated after receipt. Food must be protected from all sources of contamination.

Method of contamination: baby toys, bouncers and bottles stored on shelves where dry goods and single service items are stored

pic cleaned shelves free from baby toys, bouncers and bottles

TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Cold Holding, Hot Holding, Cooling, Equipment.

pic have logs ready to start once open

Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for

temperature measuring devices.

pic has logs ready to start once facility is open

Failure to use detergents or cleaners in accordance with the manufacturer's label instructions could create safety concerns for the employee and consumer. For example, employees could suffer chemical burns, and chemical residues could find their way into food if detergents or cleaners are used carelessly. When performing warewashing the wash solution of soap, detergent, acid cleaner, alkaline cleaner, degreaser, abrasive cleaner, or other cleaning agent must be used in according to the cleaning agent manufacturer's label instructions. Instructed PIC to use detergent when washing dishes. Equipment and utensils previously cleaned and sanitized must be re-cleaned and sanitized with detergents used in accordance with the manufacturer's label instructions.

Observed improper cleaning solution use during warewashing. Detergent being used: none Manufacturer's Label Concentration: 200pm Manufacturer's Label Temperature: 140f Actual Concentration: 0ppm Actual Temperature:144f

pic had auto chlor came and fixed the chlorine

TENAMPA RESTAURANT LLC - 101 98TH ST NW, 105

Food Establishment Class C

Date: 08/18/2026 - #: RT-FOODEST-070560-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Chemicals

• Warewashing Equipment, Clean Solutions

- Failure to use detergents or cleaners in accordance with the manufacturer's label instructions could create safety concerns for the employee and consumer. For example, employees could suffer chemical burns, and chemical residues could find their way into food if detergents or cleaners are used carelessly. When performing warewashing the wash solution of soap, detergent, acid cleaner, alkaline cleaner, degreaser, abrasive cleaner, or other cleaning agent must be used in according to the cleaning agent manufacturer's label instructions. Instructed PIC to use detergent when washing dishes. Equipment and utensils previously cleaned and sanitized must be re-cleaned and sanitized with detergents used in accordance with the manufacturer's label instructions.

Observed improper cleaning solution use during warewashing. Detergent being used: none Manufacturer's Label Concentration: 200pm Manufacturer's Label Temperature: 140f Actual Concentration: 0ppm Actual Temperature:144f

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: reach in cooler Food Items: hominy and beans Expiration Dates: no dates were observed

Violation: Miscellaneous

• Miscellaneous Sources of Contamination

- Regardless of its specificity, a Code cannot anticipate all the diverse means by which food can become contaminated after receipt. Food must be protected from all sources of contamination.

-Method of contamination: baby toys, bouncers and bottles stored on shelves where dry goods and single service items are stored Food that was contaminated:

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Knowledge Tested: owner/manager did not know the proper way to safely cooling of food.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Installation

• Handwashing Sinks, Installation, Water 85F

- Instructed PIC to repair or replace automatic handwashing facility so it is installed and operational according to manufacturer's instructions.

Observed an automatic handwashing sink not installed according to manufacturer's instructions. Location: kitchen area Manner: handwashing sink was not installed missing drain inside basin and missing pvc pipes

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: cold holding cooler Food Items: pinto beans Temperature: 45 degrees*

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize.

Observed buildup and debris on the floors, walls and ceiling throughout the whole kitchen.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located kitchen area The surface was made out of metal and plastic The condition of the surface had debris buildup throughout the kitchen areas on handwashing sinks paper towel dispenser on gas pipes in cooking area.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Cold Holding, Hot Holding, Cooling, Equipment.

• Calibration Logs

- General Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

TWISTERS COMMISSARY - 1311 CUESTA ABAJO CT NE, H - Approved

TWISTERS COMMISSARY - 1311 CUESTA ABAJO CT NE, H

Food Processor Class D

Date: 08/20/2026 - #: PT0140640 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention Device, When Required

- The delivery end of hoses attached to hose bibs on a drinking water line may be dropped into containers filled with contaminated water or left in puddles on the floor or in other possible sources of contamination. A backflow prevention device must be installed on the hose bib to prevent the back siphonage of contaminated

liquid into the drinking water system during occasional periods of negative pressure in the water line. Instructed PIC to contact repair personnel to have backflow prevention device repaired/replaced on service sink.
Observed a backflow prevention device/vacuum breaker is not in proper working order at the service sink. Observed liquid pooling around the vacuum breaker at the time of inspection.

• **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow. Observed PIC remove hose during inspection.
Observed an inadequate air gap at the service sink at the time of inspection. Observed the hose connected to the service sink faucet used for filling the mop bucket, was too long and was in direct contact with the bottom of the service sink basin.

VILLAGE INN - 2282 WYOMING BLVD NE - Approved

VILLAGE INN - 2282 WYOMING BLVD NE

Food Establishment Class C

Date: 08/18/2026 - #: CAC-Food-078463-2026 - Inspection Result: Approved

- Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness PIC has corrected dish machine and revisited with team on proper chlorine levels to clean and sanitize 100 parts per million.
- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch PIC has removed all debris from vegetable dicer cleaned and sanitized
- System Maintained in Good Repair, Repaired According to Law PIC has repaired all the plumbing inside the facility.

VILLAGE INN - 2282 WYOMING BLVD NE

Food Establishment Class C

Date: 08/17/2026 - #: RT-FOODEST-110903-2025 - Inspection Result: Conditional Approved

Complaint

This inspection was the result of a citizen complaint that was unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55F. PIC corrected violation by priming chlorine sanitizer. Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Automatic dish machine Concentration: Zero parts per million Temperature: 125 degrees f
The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for sanitizer utilized it must be at the manufacturer specified concentration and temperature range with a contact time of 30 seconds.
Observed chemical solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Type of Sanitizer: Chlorine Location: Red sanitizer bucket Concentration: zero parts per million Temperature: 100 degrees f

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Vegetable dicer Location: Clean dish ware storage area Condition of the Location: Dicer stored away with food debris buildup.

Violation: Plumbing

• **System Maintained in Good Repair, Repaired According to Law**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed plumbing is not maintained in good repair or is not repaired by law. Observed multiple plumbing found in disrepair sink in dish machine area unable to shut off constantly running, hand washing sink faucet unable to completely turn off, mop sink faucet with cloth and tape wrapped around faucet, 3-compartments sink unable to completely shut off.

Violation: Designated Areas

• **Designated Areas-Employee Accommodations for eating/drinking/smoking**

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these

areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

• **Designation-Dressing Areas and Lockers**

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Hands Clean & Properly Washed

• **When to Wash**

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee does not wash hands when required. Condition: Donning new gloves and switching job duties.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris underneath cold holding units in servers' area and shelving in back of facility advised PIC to clean and sanitize area.

Observed buildup and debris underneath cold holding units in servers' area and shelving in back of facility.

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on clean dish ware storage area The surface was made out of stainless steel The condition of the surface was stored away with previous date marking.

WHATABURGER - 200 98TH ST NW - Approved

WHATABURGER - 200 98TH ST NW

Food Establishment Class C

Date: 08/17/2026 - #: RT-FOODEST-119712-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: reach in and walk-in coolers and freezers and hot holding equipment Location: kitchen areas Condition of the Location: debris buildup inside walk-in and reach in coolers and debris buildup on cooking and hot holding equipment and cabinets where bags are held for pick up.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize.

Observed buildup and debris on the floor in prep and cook line and in the walk-in cooler had debris buildup and debris buildup on the ceiling vent covers throughout the whole facility.

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located kitchen and back stock areas The surface was made out of metal and plastic The condition of the surface had debris buildup on the exterior of the ice machine and cooking and soda machines and trash can at hand washing sink.

Yumis kitchen LLC - 4200 Wyoming Blvd NE, C2 - Approved

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed wiping cloths used for cleaning and to cover fried chicken inside cold holding unit.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course. Only one food handler card available with three employees preparing food items.

Violation: Ventilation and Hood Systems

• Cleaning Ventilation Systems, Nuisance and Discharge Prohibition

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur. Condition: Debris buildup

Observed interior intake and exhaust air ducts with debris buildup. Location: Inside kitchen hood suppression system

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Preparing food entrees Inappropriate Jewelry Observed: Bracelets

• Eating, Drinking, or Using Tobacco Products

- A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area and should be in a cup with a lid and straw.

Observed a food employee with an improper drink. Location: Prep tables and shelving inside kitchen

Type of Drink: Refillable drinks and bottled water both twist tops

Violation: Operations

• Permit Posted

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Instructed PIC to log into ABQ-Plan and print valid permit.

Observed that food permit was posted at the facility was a provisional and was expired.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked meats, prepared vegetables, soups and dairy products Activity of the Food: Stored received and cooled

Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed wiping cloths used for cleaning and to cover fried chicken inside cold holding unit.

Violation: Pooled Eggs

• Pooled Eggs Prohibition

- Raw eggs may only be combined in the amount and in response to a customer's order, or for the preparation of a batter to be cooked immediately. Instructed the PIC that the identified pooled eggs must not be used in further food preparation and that raw eggs shall only be combined for batters or in response to a customer's order.

Observed pooled eggs in the food establishment that were not being combined for a customer's order or for a batter. Location: Inside cold holding unit Number of eggs combined: Over a dozen

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Inside walk-in refrigerator Food Items: Cooked meats, prepared vegetables, bean sprouts Expiration Dates: None available

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course. Only one food handler card available with three employees preparing food items.

Violation: Ventilation and Hood Systems

• Cleaning Ventilation Systems, Nuisance and Discharge Prohibition

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur. Condition: Debris buildup

Observed interior intake and exhaust air ducts with debris buildup. Location: Inside kitchen hood suppression system

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Spices, flour, sugar Location: Stored in food containers on bus cart inside main kitchen

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. Location: Inside walk-in refrigerator Food Item: Bean sprouts, soups, fried chicken

It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-

eat food from contamination.

Observed non-ready-to-eat raw animal food stored with ready-to-eat food without protection from contamination. Location: Walk-in refrigerator Food Item: Raw eggs Condition: Raw eggs stored above ready to eat food items.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness.

PIC voluntarily discarded food.

Observed food items stored at room temperature above cold holding unit and inside cold holding unit measuring above 41°F. Location: Main kitchen Food Items and Temperature: Chopped celery 74 degrees f, chopped green onion 72 degrees f, sliced zucchini 63 degrees f, sliced onion 64 degrees f, cubed onion 65 degrees f, sliced carrots 70 degrees f, cooked chicken 89 degrees f, chopped cabbage 58 degrees f

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Hand washing sink in servers' area

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

Observed handwashing sink(s) was observed blocked or inaccessible. Location: Inside server prep area Manner: Red sanitizer bucket stored in hand washing sink basin

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Preparing food entrees Inappropriate Jewelry Observed: Bracelets

• Eating, Drinking, or Using Tobacco Products

- A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area and should be in a cup with a lid and straw.

Observed a food employee with an improper drink. Location: Prep tables and shelving inside kitchen

Type of Drink: Refillable drinks and bottled water both twist tops

Violation: Operations

• Permit Posted

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Instructed PIC to log into ABQ-Plan and print valid permit.

Observed that food permit was posted at the facility was a provisional and was expired.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked meats, prepared vegetables, soups and dairy products Activity of the Food: Stored received and cooled

Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and

contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

Yummy's Mini Donuts & Ice Cream - 1 CENTRAL AVE NW, D - Approved

Yummy's Mini Donuts & Ice Cream - 1 CENTRAL AVE NW, D
Food Establishment Class C
Date: 08/19/2026 - #: PT0156828 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75F with a contact time of 7 seconds. PIC did not correct violation

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: 3-compartment sink and wiping cloth container

Concentration: Zero

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Almonds, walnuts, chocolate chips, Oreo chunks and M&M's plastic food containers

Location: Food storage shelf above the 3-compartment sink
