Corrective Action Compliance does not represent a full routine health inspection. Instead, it reflects that a facility has taken specific corrective actions in response to violations identified during an inspection. These actions may be taken during the inspection or afterward, and the Corrective Action Compliance allows for the facility's grade or status to be updated based on those corrections. Corrective actions may be demonstrated through documentation such as photos, videos, receipts, work orders, site visits, or both verifiable means showing that the violation has been addressed and compliance has been achieved.

APPROVED

An "Approved" grade indicates that a food establishment that has demonstrated compliance with the standards in the Food Code the Food Service and Retail Ordinance, other industry standards, and other laws and has received a Grade of Approved and is able to operate.

CONDITIONAL APPROVED

A "Conditional Approved" grade is issued when a facility is found to have violations of the Food Code, the Food Service and Ret Ordinance, industry standards, or applicable laws. While the facility may continue operating, it must complete specific corrective actions to address the violation A yellow sticker is placed alongside the green "Approved" sticker.

UNSATISFACTORY

An "Unsatisfactory" grade indicates that a facility has not met the required standards but is allowed to continue operating temporarily while corrective actions are completed. A red "Unsatisfactory" sticker will be displayed at the facility for the duration of this grade. This is a temporary status and requires timely follow-up to verify compliance.

CLOSED

A "Closed" grade is assigned when violations pose a significant risk to public health, requiring the facility to immediately cease operations. The facility must remain closed until corrective actions have been completed and verified. A facility with this grade will display an orange "Closed" sticker for the duration of the closure.

BLAKES LOTABURGER 68 - 12345 CENTRAL AVE NE - Approved

BLAKES LOTABURGER 68 - 12345 CENTRAL AVE NE
Food Establishment Class C
Date: 10/19/2026 - #: RT-FOODEST-034608-2025 - Inspection Result: Approved

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.
Observed wiping cloths improperly used. Observed soiled wiping cloths Stored on ware washing table

Violation: Cooling

• Cooling Methods

- Instructed PIC to use an alternate method of cooling to minimize the opportunity for pathogen growth; recommended to utilize one or more methods such as 1) Place the food in a shallow pan 2) Separate the food into smaller or thinner portions 3) Use rapid cooling equipment 4) Stir the food in a container placed in an ice/water bath 5) Use containers that facilitate heat transfer 6) Only partially cover product, if protected from overhead contamination.
Observed TCS food items cooling in a method that does not facilitate the necessary rate of heat transfer to cool the food in an appropriate time frame. Location: Upright cooler Food Items: Green chile sauce Manner: Full 1/3 pan of green chile sauce was covered and placed in upright cooler. Temperature was at 127°F. Also, chile was not put on cooling log or had any other documentation of when the cooling process was started

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination.
Observed non-ready-to-eat raw animal food stored with ready-to-eat food without protection from contamination. Location: Walk in cooler Food Item: Raw Eggs Condition: Raw Eggs stored above Green and Red Chile

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee not wash hands when required. Condition: Employees changing tasks and changing gloves and not washing hands prior to donning new gloves

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.
Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Storage

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: Food service pans were not air dried and stacked wet with water in between pans

CIRCLE K 8551 - 2934 EUBANK BLVD NE - Approved

CIRCLE K 8551 - 2934 EUBANK BLVD NE
Retail Food Establishment Class 3
Date: 10/21/2026 - #: PT0107529 - Inspection Result: Approved

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels
(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s). Location: Handwashing sink in back by three compartment sink

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.
Observed handwashing sink(s) without a handwashing sign. Location: Back room next to 3 compartment sink

CIRCLE K STORE #2706305 - 1401 COORS BLVD NW - Approved

CIRCLE K STORE #2706305 - 1401 COORS BLVD NW
Retail Food Establishment Class 3
Date: 10/22/2026 - #: COM-RET-100016-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use. instructed pic doors must be repaired by 10/22/26 photos must be sent to EHD.
Observed doors to the outside that are not tight fitting, light can be seen at the edges of the front double doors.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris on the cooler under liquor shelving.

CIRCLE K STORE #2706305 - 1401 COORS BLVD NW
Retail Food Establishment Class 3
Date: 10/21/2026 - #: COM-RET-099717-2026 - Inspection Result: Closure Re-Inspection Required

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Imminent Health Hazard

• Imminent Health Hazard

- Due to Mice infestation in the grocery retail areas and backroom area by sink and corners of the walls.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use. instructed pic doors must be repaired by 10/22/26 photos must be sent to EHD
Observed doors to the outside that are not tight fitting, light can be seen at the edges of the front double doors.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by routinely inspecting incoming shipments of food and supplies, routinely inspecting the premises for evidence of pests, and eliminating harborage conditions. Instructed PIC to provide EHD with their standard operating procedures and pest control plan.
Observed the facility has inadequate procedures to effectively control pests. Current Policy: last pest control was 10/3/26 pest control technician stated that there were Door gaps/ damaged that allows pest access and to please repair to prevent entry. Pic did not follow through which created a Mice infestation on sales floor which ate through several candy items and mice droppings under the shelving and in the candy boxes. observed mice droppings in the backroom on both sides of the three compartments sinks. hallway has a 12x12 square hole in the wall observed chewed up insulation. Repairs were completed however mice dropping were never removed under the grocery shelving and backroom area by the corner of the coke syrups and three compartment sinks area.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage

and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris on the cooler shelving liquor shelving, debris and soil build won the grocery shelving sales floor. backroom area with substantial debris and soil builds up throughout the back room.

CIRCLE K STORE #2706305 - 1401 COORS BLVD NW

A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris on the cooler shelving liquor shelving, debris and soil build won the grocery shelving sales floor. backroom area with substantial debris and soil buildup throughout the back room.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Service area.
Concentration:0 ppm Temperature: 70 degrees.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.
Observed handwashing sink(s) was observed blocked or inaccessible. Location: Cooking and preparation are. Manner: old discarded hot food stored in front of the hand wash station.

CORONADO VILLA RETIREMENT COMMUNITY - 6900 SAN VICENTE AVE NE - Approved

CORONADO VILLA RETIREMENT COMMUNITY - 6900 SAN VICENTE AVE NE
Food Establishment Class C
Date: 10/21/2026 - #: PT0150529 - Inspection Result: Approved

Violation: Thawing

• Thawing Method

- Observed frozen reduced oxygen packaged fish that does not contain additional barriers to prevent the growth of pathogens improperly thawing or thawed. Food: Salmon and swordfish Location: Prep Area Condition: Frozen Method: Fish was going to be thawed in ROP instead of package being sliced open or

removed completely.
In order to safeguard against toxin formation reduced oxygen packaged (ROP) fish bearing a label indicating that it is to be kept frozen until time of use must be removed from the reduced oxygen environment prior to thawing. Instructed PIC that ROP fish that had been improperly could not be offered for consumption. PIC voluntarily discarded the food items.

Violation: Consumer Self-Service Operations

• Condiments, Protection

- Unpackaged condiments are exposed to contamination by consumers who could be suffering from a disease transmissible through food. Once the condiments are contaminated, subsequent consumers using the condiments may be exposed to pathogens. Condiments in individual packages are protected from consumer contamination. Condiments shall be protected from contamination by being kept in dispensers that are designed to provide protection, protected food displays provided with the proper utensils, original containers designed for dispensing, or individual packages or portions. Instructed PIC to ensure condiments are offered in a manner that prevents contamination by the elements, consumers, or staff.
Observed condiments being offered that were not protected from contamination. Location: Salad Bar Method Of Distributing Condiments: Condiments were left open and unprotected with contamination preventing barrier or lid.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed Dish machine drain is not maintained in good repair or is not repaired by law. Observed Drain found in disrepair by backing up onto floor

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at Both dish machine drains

Violation: Training Records

• Food Handler Cards

- Food handler cards shall be kept by the Food Employee on their Person while working as a Food Employee or volunteer for a Food operation, or a copy shall be kept on file by the current employer and be made available for inspection by the Enforcement Authority. If trained through another approved method; records of the training shall be maintained for the duration of the Food Employees employment. Instructed PIC to provide updated training records to EHD for review.
The PIC was unable to provide records of training or certification of food employees.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Kitchen Activity: All back of house employees did not have beard guards.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under □□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Portion scoop Location: In walk-in Condition of the Location: Scoop was in the Lexan with the handle touching the food.

ENCHANTED LIVING OF NEW MEXICO - 2020 WHITE CLOUD ST NE - Approved

ENCHANTED LIVING OF NEW MEXICO - 2020 WHITE CLOUD ST NE

Food Establishment Class C
Date: 10/23/2026 - #: PT0159599 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can Opener Location: Kitchen area Condition of the Location Dried food debris on blade of can opener

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution Test strips expired as of 5/2024

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

FAMILY DOLLAR STORES OF NM 3087 - 1722 BRIDGE BLVD SW - Approved

FAMILY DOLLAR STORES OF NM 3087 - 1722 BRIDGE BLVD SW
Retail Food Establishment Class 3
Date: 10/23/2026 - #: RT-RET-111213-2025 - Inspection Result: Approved

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

-Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed leak in ceiling with a trash can on shelfing catching rain inside trash can in the retail area please repair and send a picture of the repair by 11/07/26

Violation: Hot & Cold-Water Availability & Pressure

• Water System-Distribution, Delivery, and Retention

- Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods.

Observed facility with insufficient hot water. Location: Employee Bathroom Manner: Water only reaching 71 °F needs to reach above 85 °F

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed mop sink faucet is not maintained in good repair or is not repaired by law. Observed mop sink faucet found in disrepair by leaking water from connection on faucet.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed build up and debris on the floors in retail and backstock areas.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Reach in coolers, freezers and shelfs where dry goods are sold

Location: Retail area Condition of the Location: Debris build up on all referenced areas

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.
Observed handwashing sink(s) without a handwashing sign.

Gibson Medical Center Cafeteria - 5400 GIBSON BLVD SE - Approved

Gibson Medical Center Cafeteria - 5400 GIBSON BLVD SE
Food Establishment Class C
Date: 10/21/2026 - #: COM-FOODES-099548-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener Location: Kitchen
Condition of the Location: Soiled with food debris and residue

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.
Observed pests allowed to accumulate in facility. Location:
Pest Type: Cockroach and other insects Pest Condition: Dead
Number of Pests Present: +50
Also observed rodent droppings in an unused piece of equipment. Provided facility with CDC instructions on how to properly clean and sanitize after rodents.

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.
Observed equipment not maintained in good repair. Location: Clean dish storage rack
Type of Equipment: Pans, ice scoop, pitcher and Cambro container
Condition of the equipment: Equipment is broken, damaged, burned or pitted.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drain under dish machine and under rear standing reach in cooler on the back side of make line

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed rear receiving doors to the outside that are not tight fitting, light can be seen along the middle.

Violation: Maintenance

• Maintaining Premises, Unnecessary Items and Litter

- The presence of unnecessary articles, including equipment which is no longer used, makes regular and effective cleaning more difficult and less likely. It can

also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.
Observed excessive number of items on the premises in the food establishment that are no longer used or are non-functional.
Location: Throughout the entirety of the kitchen, storage areas, lobby, serve line and foyer. Items list: To much to list but includes payment registers, single use items, banquet equipment, displays, tables, chairs, racks, plates, cups, trays, utensils, unknown boxes containing miscellaneous items and decor.
Excessive amount of restaurant equipment varying in condition such as hot holding cases, refrigeration equipment, grills, bar taps, coffee brewers, fryers, baskets, sinks tables, caster wheels, oven warmers, ice boxes and steam wells. Of which there is many multiples of each squirreled away. Condition of
the items: Non-functional, purposeless, filthy, no longer used, old and outdated. All making it difficult to maneuver and properly clean. Most is even labeled as "unused equipment" or "broken". This is also not promoting proper food safety practices and safe pest prevention as a lot of the equipment has filth and residue contaminating the area. The facility was given a timeline to remove this cache of littered equipment or further enforcement may be taken.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed litter build up and debris accumulation on the floors throughout the kitchen, storage area, lobby, dish pit and especially under equipment. This is hard to clean and inaccessible due to the excessive amount of clutter in the facility. Damaged equipment in foyer is dripping grease and food residue that is collecting on the floor tiles. Substantial number of dead insects are also building up and need to be properly removed as well as cleaned and sanitized.

Violation: Storage

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.
Observed clean single-service and single-use articles stored improperly. Single-service and single-use articles was not stored in a clean, dry location. Single-service and single-use articles Type: Multiple boxes containing food containers, portion cups, foam lunch trays and plastic lids
Location: Dry storage room
Condition of the Location: Stored directly on unclean floor

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located on make line fryer, grill and stove. The surface was made out of stainless steel. The condition of the surface was soiled with substantial grease and food residue. Also observed ice buildup in reach in cooler containing bread.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair. Observed damaged floor tiles, grout, base coving, flaking ceiling, open drywall and other holes to be in need of repair. Also observed a significant hole in the right lower corner of the single use items storage room.

GOLDEN CORRAL - 2701 COORS BLVD NW - Approved

GOLDEN CORRAL - 2701 COORS BLVD NW
Food Establishment Class C
Date: 10/22/2026 - #: CAC-Food-100086-2026 - Inspection Result: Approved

-meat slicer and Ice machine cleaned and sanitized. Violations corrected and brought score to approved.

GOLDEN CORRAL - 2701 COORS BLVD NW
Food Establishment Class C
Date: 10/20/2026 - #: RT-FOODEST-074061-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: meat slicer, Ice machine.
Location: Back prep areas.
Condition of the Location: Slicer- dry soil residue on the blade and grabber. interior of the ice machine chute and ceiling with substantial soil build up.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing inappropriate date markings.
Observed raw chicken, ready-to-eat time and temperature controlled for safety food held within the establishment inappropriately marked. Location: Coolers and refrigerators
Food Items: cut up raw chicken two containers. ready to eat sour cream, cooked chicken chunks

Violation: Storage

• Food Storage, Prohibited Areas

- Pathogens can contaminate and/or grow in food that is not stored properly. Drips of condensate and drafts of unfiltered air can be sources of microbial contamination for stored food. Shoes carry contamination onto the floors of food preparation and storage areas. Even trace amounts of refuse or wastes in rooms used as toilets or for dressing, storing garbage or implements, or housing machinery can become sources of food contamination. Moist conditions in storage areas promote microbial growth. Food must be protected from contamination and must not be stored in locker rooms, toilet rooms, dressing rooms, garbage rooms, mechanical rooms, under sewer lines, under leaking water lines, under open stairwells, or under other sources of contamination.
Observed food stored improperly under a miscellaneous source of contamination. Location: Backroom steam table.
Food Item: meat loaf sauce and enchilada sauce not covered.

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.
Observed food temperature measuring devices damaged and not working.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located Food cooking and prep areas. The surface was made out of Stainless steel and gaskets.
The condition of the surfaces had substantial build up and debris.

GRAY HOUSE - 1105 GEORGIA ST NE - Approved

GRAY HOUSE - 1105 GEORGIA ST NE
Food Establishment Class C
Date: 10/23/2026 - #: PT0156866 - Inspection Result: Approved

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.
Observed food stored improperly less than six (6) inches off the floor. Location: Dry storage closet Food Item: Chips

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

ICHIBAN JAPANESE REST. - 10701 CORRALES RD, 18 - Conditional Approved

ICHIBAN JAPANESE REST. - 10701 CORRALES RD, 18
Food Establishment Class D
Date: 10/23/2026 - #: PT0045775 - Inspection Result: Conditional Approved

Violation: Poisonous and Toxic/Chemical Substances

• Separation-Storage

- Use of poisonous or toxic material containers to store, transport, or dispense food is prohibited because of the potential for contamination of the food. A container previously used to store poisonous or toxic materials may not be used to store, transport, or dispense food, equipment, utensils, linens,
single-service or single-use articles. Instructed PIC to remove items immediately, discard contaminated food and wash and sanitize any equipment or utensils.
Observed a container previously used to store poisonous or toxic materials used for storage of food. Location: Storage food table.
Material Type: Evap Foam Rinse
Food Items: stored next to a bag of rice.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing inappropriate date markings.
Observed ready-to-eat time and temperature controlled for safety food held within the establishment inappropriately marked. Location: Sushi making ice box, prep top cooler.
Food Items: wasabi dressing, and other unknown liquid dressings with no used by dates.

Violation: Training Records

• Food Handler Cards

- General Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the bottom edge of the receiving door.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- In order to minimize the possibility that a non-designated handwashing sink is used for handwashing such as ones used food preparation or utensil washing, or a service sink or curbed cleaning facility used for the disposal of mop water or similar wastes, may not be provided with the handwashing aids and devices required for a handwashing sink. Instructed PIC to remove hand aids or devices from non-designated handwashing sink.
Observed sinks other than handwashing sink(s) supplied with handwashing aids or devices. Location: Food cooking and prepping area.
Manner: Ice was observed dumped in the hand wash station.

Violation: Warewashing Temperature and Concentration

• Sanitizers, Criteria-Chemicals

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR. PIC corrected violation by remaking sanitizer to 50 PPM at 90°F.
Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Chlorine sanitizer.
Location: Sushi making area.
Concentration: above 200 PPM

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints
. Location: Sushi making areas
: Food handlers not wearing hair restraint or beard Guard.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris on the under the storage shelving, sinks and walls of the sink and drain piping. also drink station under tables with soil and debris buildup.

Violation: Storage

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.
Observed clean single-service and single-use articles stored improperly. Single-service and single-use articles was not stored in a clean, dry location. Single-service and single-use articles
Type: case of cups stored on the prep area floors that are dirty could be possible contamination.

IN PIZZA WE TRUST LLC - 5701 GIBSON BLVD SE
Mobile Food Unit Class C
Date: 10/22/2026 - #: RT-MBFOOD-098680-2025 - Inspection Result: Approved

Violation: Operations

• Valid Permit

- General Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.
Observed that the facility was operating with an expired permit.

LA PETITE ACADEMY INC. - 5701 REDLANDS RD NW - Conditional Approved

LA PETITE ACADEMY INC. - 5701 REDLANDS RD NW
Food Establishment Class C
Date: 10/22/2026 - #: RT-FOODEST-012134-2026 - Inspection Result: Conditional Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff. Observed two employees do not have their food handler's certification.

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination.
Observed non-ready-to-eat raw animal food stored with ready-to-eat raw animal food without protection from contamination. Location: refrigerator.
Food Item: Raw beef.
Condition: raw beef stored next shredded lettuce and butter.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- In order to minimize the possibility that a non-designated handwashing sink is used for handwashing such as ones used food preparation or utensil washing, or a service sink or curbed cleaning facility used for the disposal of mop water or similar wastes, may not be provided with the handwashing aids and devices required for a handwashing sink. Instructed PIC to remove hand aids or devices from non-designated handwashing sink.
Observed sinks other than handwashing sink(s). Location: Kitchen Handwash sink.
Manner: Hand sink was used for dumping juice or rinsing produce items.

Violation: Personal Cleanliness

• Eating, Drinking, or Using Tobacco Products

- A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area and should be in a cup with a lid and straw.
Observed a food employee with an improper drink. Location: prep table, refrigerator.
Type of Drink: Straw drink with a Lid was stored on a prep table where food prep was being done. observe employee’s half eaten food stored in the refrigerator on top of the childcare food items.

Violation: Records

• Calibration Logs

- General Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

MACS LA SIERRA COFFEE SHOP - 6217 CENTRAL AVE NW - Approved

MACS LA SIERRA COFFEE SHOP - 6217 CENTRAL AVE NW
Food Establishment Class C

Date: 10/22/2026 - #: RT-FOODEST-068558-2025 - Inspection Result: Approved

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: five-gallon containers of onions and pinto beans Location: back prep areas

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.

Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. Location: kitchen area Food Item: containers of Chips, Chile rellenos, Steak Fingers, Taquitos, shredded cheese and Chopped Green Chile

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.
inspector found purses stored on shelfing where pots and pans are stored

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.

Observed no handwashing cleanser available at handwashing sink(s). Location: kitchen area

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Kitchen area

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located in the prep area and kitchen areas The surface was made out of plastic and metal The condition of the surface had debris build up inside the walk-in coolers vent cover, debris build up on the mixing equipment, debris build up on pipes in the cooking area and debris build up on the handles of the reach in coolers and freezers

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed single service back room and back door area in disrepair by hole in ceiling and broken electrical switch cover and missing weatherstripping at back screen door

MADCREMA - 1108 BROADWAY BLVD NE – Conditional Approved

MADCREMA - 1108 BROADWAY BLVD NE
Food Establishment Class C
Date: 10/20/2026 - #: CAC-Food-099419-2026 - Inspection Result: Conditional Approved

Facility has been upgraded to approved status following the correction of the following violations during inspection by the Environmental Health Department. The facility has corrected:

- When to Wash (staff was retained on proper hand washing procedure and on when to wash)
- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch (food contact surfaces where cleaned and sanitized)
- Manual and Mechanical Warewashing Equipment, Chemical Sanitization Temperature, pH, Concentration and Hardness (Chlorine sanitizer was remade to 50ppm)

MADCREMA - 1108 BROADWAY BLVD NE
Food Establishment Class C
Date: 10/20/2026 - #: COM-FOODES-099290-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Barista wiping cloth bucket

Concentration: 0 PPM

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice maker / pots Location: Kitchen / clean dish storage

Condition of the Location: Soiled with food debris and soil accumulation

Violation: Poisonous and Toxic/Chemical Substances

• Restriction-Presence and Use

- The presence in the establishment of poisonous or toxic materials that are not required for the maintenance and operation of the establishment represents an unnecessary risk to both employees and consumers. Only those poisonous or toxic materials that are required for the operation and maintenance of a food establishment, such as for the cleaning and sanitizing of equipment and utensils and the control of insects and rodents, shall be allowed in a food establishment. Instructed PIC to remove the unapproved chemicals from the facility.

Observed poisonous or toxic materials other than those required for the operation and maintenance of a food establishment located in the establishment. Material: Pesticide that is unapproved to be used inside of the food service establishment.

Location: Dish pit Intended Use: Pest control

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps. Location: Kitchen, dish pit and restroom

Pest Type: Cockroach Pest Condition: Dead

Number of Pests Present: +10

Violation: Maintenance

• Maintaining Premises, Unnecessary Items and Litter

- The presence of unnecessary articles, including equipment which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.

Observed items on the premises of the food establishment that is no longer used or is non-functional. Location: Throughout kitchen, dish pit and exterior

Items list: Many plastic single use packages and bottles, kitchen equipment, linens, shirts Condition of the items: Un-used, non-functional, dirty

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Food production areas

Activity: Active handling of opened food items

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee not wash hands when required.
Condition: After switching tasks in between food production and before donning new gloves.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris on the kitchen floors throughout the kitchen and especially under food equipment and storage racks.

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.
Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Single-Service

• Single-Service and Single-Use Articles-Use Limitations

- Single-service and single-use articles may not be reused. Articles that are not constructed of multiuse materials may not be reused as they are unable to withstand the rigors of multiple uses, including the ability to be subjected to repeated washing, rinsing, and sanitizing. Instructed PIC that all single-service and single-use articles being reused must be replaced with multiuse containers and/articles.
Observed single-use containers being re-used. Location: Throughout kitchen and reach in refrigerators
Use: Observed pasty clam shell containers, beverage bottle packaging, and milk packaging bottles being re-used

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All hot and cold temperature held TCS foods. Activity of the Food: Stored, thawed, cooled□

• Calibration Logs

- General Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

MARIELENAS BAKERY LLC - 640 COORS BLVD NW, 3 - Closure Re-Inspection Required

MARIELENAS BAKERY LLC - 640 COORS BLVD NW, 3
Retail Food Establishment Class 5
Date: 10/21/2026 - #: RT-RET-060567-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair. Observed throughout the whole facility in disrepair by holes in walls ceiling and floors and missing ceiling tiles also missing flooring tiles.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located front retail area and back cooking and prepping area and storage

areas The condition of the surface had debris build up on countertops, on top of ovens, cooking and prepping equipment

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions. Instructed PIC to replace faucet on three compartment sink.

Observed faucet at three compartment sink is not maintained in good repair or is not repaired by law. Observed three compartment sink faucet found in disrepair by faucet being removed at the time of inspection. Observed spray nozzle is available for use.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap in back prep area where three compartment sink and handwashing sinks pipes are inside floor drain

Violation: Records

• Temperature Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed the food establishment does not have calibration logs for temperature measuring devices.

Observed that the food establishment does not have temperature logs available for TCS foods items. no equipment logs

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place. Location: throughout the whole facility Pest Type: cockroach, rodent, fly Pest Condition: living and dead as well as mice droppings everywhere

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed build up and debris on the Floors, walls and ceiling throughout the whole facility.

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: no bucket or bottle made to test Concentration: 0ppm Temperature: no temp

observed no sanitation made at time of the inspection facility was in the process of loading racks of just cooked pastries.

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Mixers, Ovens, utensils, sheet pans, retail holding shelfs, pans, cups, bowls Location: front retail and cooking/prep areas Condition of the Location: heavy accumulation of debris build up on all referenced above.

MCDONALDS - 2305 CENTRAL AVE NW
Food Establishment Class C
Date: 10/23/2026 - #: RT-FOODEST-031301-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: reach in coolers and freezers Location: Kitchen Area Condition of the Location: debris build up on the inside of the reach in coolers and freezers instructed pic to clean on a more frequent basis

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: kitchen area

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed build up and debris on the front door with fingerprints on door as well as debris build up on the floor throughout the facility.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located kitchen and drive thru areas The surface was made out of metal and plastic The condition of the surface was debris build up on all dispensing equipment (coffee machine, Soda Machines, Ice Cream Machines, Slurpee Machines, Ice Machines and on the exterior of all Reach in coolers and freezers)

NMR - Eubank, LLC DBA Dunkin Donuts - 1600 -1608 EUBANK BLVD NE - Approved

NMR - Eubank, LLC DBA Dunkin Donuts - 1600 -1608 EUBANK BLVD NE
Food Establishment Class C
Date: 10/19/2026 - #: RT-FOODEST-103754-2025 - Inspection Result: Approved

Violation: Pest Control

• Insect Control Devices, Design and Installation

- Exposed food and food-contact surfaces must be protected from contamination by insects or insect parts. Installation of the device over food preparation areas or in close proximity to exposed food and/or food-contact surfaces could allow dead insects and/or insect parts to be impelled by the electric charge, fall, or be blown from the device onto food or food-contact surfaces. Instructed PIC to ensure that insect control devices do not cause more contamination than they prevent by placing them away from food and the equipment and utensils used for food and ensuring that they are constructed in a way that contains insects and their parts.

Observed an insect control device installed in a way that does not prevent insects or insect fragments from contaminating food or clean equipment, utensils, linens, or single-service and single-use articles. Location: In kitchen by drive through window Type of Device: electrocution Contamination: installed over table with single use articles and next to rack of donuts

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: kitchen prep area on top of the oven Type of Equipment: Oven mitts Condition of the equipment: Covered in substantial frosting build up

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Food service pans holding sugars, flours, and donut toppings Location: Back prep area of kitchen by ovens

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.
Observed food stored improperly less than six (6) inches off the floor. Location: Walk in cooler and walk in freezer Food Item: Milk and other drinks in cooler and donuts on freezer

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing.
Observed handwashing sink used for purposes other than handwashing. Location: Hand washing sink by ice machine Manner: Used as dump sink. Basin of sink was full of ice at time of inspection

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: Wrist jewelry

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: kitchen area Activity: Actively working with open food items

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee not wash hands when required. Condition: Employees changing trash can bags and not washing hands after and before donning new gloves

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under □□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Scoops and Portion spoons Location: Behind front counter in matcha container and in prep area of kitchen in flour and sugar bins Condition of the Location: Scoops and spoon stored in food containers with handles of utensils directly touching the food product inside

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service sheet pans Manner: Not air dried and stacked wet leaving water and moisture stuck in between pans

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.
Observed cleaned single-service and single-use articles stored improperly. Single-service and single-use articles was not stored six (6) inches above the floor.

Single-service and single-use articles Type: Single use cup lids Storage Method: Directly on the floor Location: By mobile pickup area

PANERA BREAD #1949 - 4300 THE 25 WAY NE - Approved

PANERA BREAD #1949 - 4300 THE 25 WAY NE
Food Establishment Class C
Date: 10/20/2026 - #: COM-FOODES-099397-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the bottom edges.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer. Observed PIC dispose of fruit cups during inspection.
Observed food items in cold holding unit measuring above 41°F. Location: prep top cooler on kitchen line and under counter cooler in drive thru area. Food Items: Spring mix lettuce, chopped romaine lettuce and fruit cups. Temperature: 47°F, 48°F, 51°F

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris on the floor behind the ice machine and underneath equipment at the time of inspection.

Peter Defries Corp DBA Dion's - 1600 TOWNE CENTER LN SE - Approved

Peter Defries Corp DBA Dion's - 1600 TOWNE CENTER LN SE
Food Establishment Class C
Date: 10/19/2026 - #: COM-FOODES-098967-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Wiping cloth bucket by beverage station and by hand washing station
Concentration: 0-100 PPM

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener, reusable food storage containers, portioning cups and equipment storage tubs
Location: Clean dish storage and kitchen Condition of the Location: Soiled with food debris

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.
Observed equipment not maintained in good repair. Location: Clean dish storage rack
Type of Equipment: Reusable storage container
Condition of the equipment: Torn and damaged along top lip

PETER PIPER PIZZA - 9260 GOLF COURSE RD NW - Approved

PETER PIPER PIZZA - 9260 GOLF COURSE RD NW
Food Establishment Class C
Date: 10/19/2026 - #: CAC-Food-099094-2026 - Inspection Result: Approved

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight- Sanitizer concentrations brought to compliance
- Using a Handwashing Sink-Operation and Maintenance- hand wash station clear and ready to use
- Time/Temperature Control for Safety Food, Hot Holding- hot holding pastas holding above 135°F
After correction were brought to compliance facility is approved. yellow sticker can be removed.

PRECIOUS MOMENTS CHILDCARE CTR - 6711 CHURCHILL RD SW
Food Establishment Class B
Date: 10/22/2026 - #: RT-FOODEST-022859-2026 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

SATELLITE - 8405 MONTGOMERY BLVD NE - Approved

SATELLITE - 8405 MONTGOMERY BLVD NE
Food Establishment Class D
Date: 10/22/2026 - #: COM-FOODES-100302-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.
Observed pests allowed to accumulate in traps.
Location: Under ice machine and counter next to drive thru window Pest Type: Rodent and rodent droppings
Pest Condition: Dead Number of Pests Present: 1

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed Piping under counter next to handwashing sink is not maintained in good repair or is not repaired by law. Observed piping found in disrepair by leaking into cabinet at time of inspection

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.
Observed holes or other gaps in the structure of the facility. Location: wall under drive thru window Size: Gap going along most of wall and has been filled in with spray foam sealer. Observed gap continues after foam or sealer. Instructed facility to fill in the rest of the gap with steel wool and more foam or sealant as this looks to be the main entry point for the rodents

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution. Quat test strips in facility were expired as of Feb 2026

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Kitchen and make line Activity: Actively working with open food and drink items

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris in the floor drain under expresso machine

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair. Observed Wall by back door in disrepair by large hole in wall where plumbing is coming in to building

Squeezed, LLC - 8201 GOLF COURSE RD NW - Approved

Squeezed, LLC - 8201 GOLF COURSE RD NW
Food Establishment Class C
Date: 10/21/2026 - #: RT-FOODEST-084024-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: three compartment sinks.
Concentration: 100 ppm.
Temperature: 95°F

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.
Observed equipment not maintained in good repair. Location: backroom Refrigerator: Door gaskets on the triple door refrigerator damaged and in need of replacement.

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.
Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers of pecans and walnuts which are tree nuts.

STARBUCKS 61203 - 1314 GIBSON BLVD SE - Approved

STARBUCKS 61203 - 1314 GIBSON BLVD SE
Food Establishment Class C
Date: 10/23/2026 - #: RT-FOODEST-014619-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.
Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Barista station
Concentration: 0 PPM

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Barista make line
Activity: Active food prep

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and food debris on the floors though kitchen, make line and storage areas.

Violation: Surface Not Clean

• Nonfood-Contact Surfaces, Easily Cleanable

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located on barista make line such as pumps, reach in coolers and exteriors or pitchers. The condition of the surface was soiled with debris build up and residues.

SUSHI XUAN - 417 TRAMWAY BLVD NE, 3 - Unsatisfactory Re-Inspection Required

SUSHI XUAN - 417 TRAMWAY BLVD NE, 3
Food Establishment Class D
Date: 10/21/2026 - #: CAC-Food-099877-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Time/Temperature Control for Safety Food, Cold Holding- PIC Corrected violation by discarding all out of temp food items
Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition- PIC corrected violation by date marking al TCS food items Parasite Destruction-- PIC Corrected violation by getting parasite destruction form from supplier
Separation-Storage- PIC corrected violation by removing chemical to proper storage area
Water Capacity-Quantity and Availability- Pic Corrected violation by turning back on hot water.
Package Integrity- Pic corrected violation by discarding dented cans
Equipment, Food-Contact Surfaces and Utensils
- Clean to Sight and Touch- Pic corrected violation by cleaning and sanitizing food contact surfaces Due to correction made Facility will be in an unsatisfactory status
Facility will be reinspected within 5 business days
Provided facility with Temperature logs (Hot holding Cold holding, thermometer calibration and cooling logs) Also provided facility with Employee health (English and Mandarin) And Allergens flyers
Due to score Facility will have to take a mandatory food safety class with our department. OR Facility must get food handlers cards for all employees with EHD

SUSHI XUAN - 417 TRAMWAY BLVD NE, 3
Food Establishment Class D
Date: 10/21/2026 - #: COM-FOODES-099764-2026 - Inspection Result: Closure Re-Inspection Required

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Mandolin Slicer Location: Kitchen prep area Condition of the Location: Dried food debris buildup in blade of slicer

Violation: Poisonous and Toxic/Chemical Substances

• Separation-Storage

- Poisonous or toxic materials shall be stored and displayed for retail so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by separating the poisonous or toxic materials by spacing or partitioning and locating the poisonous or toxic materials in an area that is not above food, equipment, utensils, linens, and single-service and single-use articles. Instructed PIC to move toxic chemicals to an approved location and that contaminated single-service and single-use articles must be discarded.
Observed poisonous or toxic materials stored in a manner that has the potential to contaminate food. Poisonous/Toxic Substance: Degreaser Location: Stored next to rack of tempura battered meat,

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.
Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottle Alleged Material: Degreaser

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators.
Location: Upright cooler and prep top cooler Food Items: Multiple items including Tempura chicken, tempura batter, Vegetables, Expiration Dates: No dates

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drain under ware washing machine

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed interior intake and exhaust air ducts with debris buildup. Location: Kitchen area

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Package Integrity

- Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging.
Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants. Packaged Food: Cans of Pineapple Location: Dry storage area Condition: Severely dented can

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Large food service bins of flour and sugar Location: kitchen prep area

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming

contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination.

Observed non-ready-to-eat raw animal food stored with ready-to-eat food without protection from contamination. Location: Upright cooler next to main cook line Food Item: Raw Squid and Raw meat scraps Condition: Stored Above RTE food items

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Prep top cooler and on shelf Food Items: Sliced Zucchini 61°F, Tempura Chicken 55°F, Minced Garlic 59°F, Julianna Carrots 55°F, Sliced onions 53°F, Sprouts 50°F, Cooked Chicken 48°F, Sliced Jalapenos 49°F, Cooked Shrimp 53°F, Diced Pineapple 47°F, Squid 45°F

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.

Observed food stored improperly less than six (6) inches off the floor. Location: Walk in freezer and walk in cooler and kitchen Food Item: Raw Chicken Soft shell crab, Raw Beef

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Operation and Maintenance

• Cleaning of Handwashing Fixtures

- Handwashing facilities are critical to food protection and must be maintained in operating order at all times so they will be used. Handwashing sinks shall be cleaned as often as necessary to keep them clean. Instructed PIC to clean handwashing sink(s).

Observed handwashing fixtures with the buildup of soil residues. The plumbing fixture was located on the hand washing sink in main kitchen The condition of the surface was debris build up

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

Observed handwashing sink(s) without a handwashing sign. Location: All handwashing sink including bathrooms

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: Wrist jewelry

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Kitchen main line and prep area Activity: Actively working with open food items

Violation: Hot & Cold-Water Availability & Pressure

• Water Capacity-Quantity and Availability

- Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods.

Observed facility with insufficient hot water. Location: Handwashing sink in kitchen next to main cook line Manner: Hot water was turned off

Violation: Parasite Destruction

• Parasite Destruction

- If the fish are frozen by a supplier, a written agreement or statement from the supplier stipulating that the fish supplied are frozen to a temperature and for a time as previously specified must be provided. Instructed PIC to contact supplier and acquire necessary statement or agreement.

Observed fish intended to be consumed as a ready-to-eat form, raw, raw-marinated without parasite destruction documentation or verification. Type of Fish: Salmon and other fish Location: Sushi station Condition: cold holding

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee not wash hands when required. Condition: Changing tasks, touching body, changing gloves, returning to kitchen

• Where to Wash

- Food employees shall only clean their hands in a handwashing sink or approved automatic handwashing facility. Effective handwashing is essential for minimizing the likelihood of the hands becoming a vehicle of cross contamination. It is important that handwashing be done only at a properly equipped handwashing facility in order to help ensure that food employees effectively clean their hands and to prevent the contamination of food preparation sinks. Food employee re-washed hands in a designated hand sink. Instructed PIC to retrain employees on proper hand washing procedures.
Food employee was observed washing hands in not in a hand washing sink. Location: Observed employee washing hands in three compartment sink and another employee washing hands in prep sink

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris on the floors, walls and ceilings in kitchen area with substantial debris build up under wok station

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under □□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Scoops and containers Location: dry storage bins Condition of the Location: Scoops and containers stored in food containers with handles and all sides of containers touching the food product inside

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: Not air dried and stacked wet with water in between pans

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.
Observed cleaned single-service and single-use articles stored improperly. Single-service and single-use articles was not stored six (6) inches above the floor. Single-service and single-use articles Type: To go boxes lids and cups Storage Method: Stored directly on the floor Location: Suite next door

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located On the equipment The condition of the surface was heavy debris build up and substantial debris build up on sides of fryers and wok station

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: Stored Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

SW CONVENIENCE STORES LLC - DK #709 - 2120 BROADWAY BLVD SE
Retail Food Establishment Class 3
Date: 10/23/2026 - #: RT-RET-026924-2025 - Inspection Result: Approved

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located inside reach in coolers, 3 compartment sink and self-serve beverage machine station. The condition of the surface was soiled with debris accumulation.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed 3 compartment sink floor drain is not maintained in good repair or is not repaired by law. Observed floor drain found in disrepair by not being free flowing.

Violation: Pest Control

• Insect Control Devices, Design and Installation

- Exposed food and food-contact surfaces must be protected from contamination by insects or insect parts. Installation of the device over food preparation areas or in close proximity to exposed food and/or food-contact surfaces could allow dead insects and/or insect parts to be impelled by the electric charge, fall, or be blown from the device onto food or food-contact surfaces. Insect control devices are not allowed to be installed above food preparation areas.
Instructed PIC to move the device and to clean and sanitize the food preparation area that was under the device.
Observed insect control device installed over a food preparation area. Location: Directly above the self-serve drink station Type of Device: Sticky

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.
Observed pests allowed to accumulate in traps. Location: Rear hall by restrooms
Pest Type: Cockroach Pest Condition: Dead
Number of Pests Present: 3

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Display case and reach in cooler
Food Items: Deli Breakfast sandwiches Expiration Dates: Not listed

THE WATERMARK AT CHERRY HILLS - 6901 SAN VICENTE AVE NE - Approved

THE WATERMARK AT CHERRY HILLS - 6901 SAN VICENTE AVE NE
Food Establishment Class C
Date: 10/21/2026 - #: CAC-Food-099724-2026 - Inspection Result: Approved

Corrective action taken during the routine inspection resulted in the facility being upgraded from a Conditional Approved Status to Approved Status. The person in charge promptly addressed and corrected most of the violations noted in the original inspection report while on site. The following priority violations were corrected on site:
- Corrective action taken during the routine inspection resulted in the facility being upgraded from a Conditional Approved Status to Approved Status. The person in charge promptly addressed and corrected most of the violations noted in the original inspection report while on site. As a result of the corrections, the inspection score improved to Approved. The following priority violations were corrected on site:
Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition. Observed PIC dispose of old food stored inside reach-in.

THE WATERMARK AT CHERRY HILLS - 6901 SAN VICENTE AVE NE
Food Establishment Class C
Date: 10/21/2026 - #: RT-FOODEST-097724-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if

used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Kitchen Area Condition of the Location: Buildup of organic matter in Ice hopper

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food commercially prepared and opened, held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food commercially prepared opened in the facility with no date marking indicators. Location: Reach-in cooler Food Items: Cocktail sauce Expiration Dates: Opened food was 7 months old.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Lexan with cut salad Location: Walk-in cooler

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Employee drink in area not designated for personal items.

• Storage-Other Personal Care Items

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings. Food employee's Purse was stored on rack

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: prepping food. Inappropriate Jewelry Observed: wrist watches.

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Kitchen Activity: Chef not wearing beard guard

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed a soiled mop not in use, stored directly on the floor.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cut fruit salad Activity of the Food: Cooled

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

THE WATERMARK AT CHERRY HILLS - 6901 SAN VICENTE AVE NE
Food Establishment Class C
Date: 10/21/2026 - #: RT-FOODEST-097725-2025 - Inspection Result: Approved

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.
Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottle Alleged Material: Sanitizer

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at Kitchenette drain

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Kitchenette Food Items: Orange juice Temperature: 61 degrees

Topgolf USA Albuquerque - 1600 DESERT SURF CIR NE - Approved

Topgolf USA Albuquerque - 1600 DESERT SURF CIR NE
Food Establishment Class C
Date: 10/19/2026 - #: COM-FOODES-098897-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Observed facility has made modifications to their menu due to one section of the food service area not having gas. Facility is only utilizing equipment that requires electric and not gas for the section under repair. Observed hot water available at all hand washing, prep and three compartment sinks. Observed hot water is also available at the hot water sanitizing dish machine. Instructed PIC to contact CHPD when repairs are made to gas line and is gas is restored for verification.

Unser Bakery LLC - 10850 UNSER BLVD NW - Conditional Approved

Unser Bakery LLC - 10850 UNSER BLVD NW
Food Establishment Class C
Date: 10/21/2026 - #: RT-FOODEST-085572-2026 - Inspection Result: Conditional Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff. several employees will also need the food handler's certification as well

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.
Observed holes or other gaps in the structure of the facility. Location: backroom Hall way, backroom ceiling
Size: 1/2 ich wall hole not sealed properly, two ceiling tiles not in place.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.
Observed insufficient cold holding equipment to properly hold food cold. Location: Display case Condition's food bakery items holding above 41 degrees. time unknown when displayed.

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.
Observed no handwashing cleanser or hand towels available at handwashing sink(s). Location: front hand wash station

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris on the freezer and cooler floors, under three compartment sink and tables, drains with substantial soil residue.

Violation: Storage

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Food, clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Food, clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, and protected from contamination. Instructed PIC to store items so that the risk of contamination prior to use is minimized.
Observed bowl stored improperly. right side up and observed debris on the clean bowl.

Violation: Single-Service

• Shells, Use Limitations

- The safety and quality of food can be adversely affected through single service and single use articles that are not constructed of acceptable materials. Single-service articles must be clean and not allow for the migration of debris or other substances, impart colors, odors, or tastes to food; and must be safe. Instructed PIC that the single-service articles must not be used for food in the operations of the establishment and that proper single-service articles should be obtained.
Observed utensil that were unclean. Condition of the Article bowls was stored right side up with substantial debris.

Unser Restaurant LLC DBA IHOP 3824 - 10850 UNSER BLVD NW - Approved

Unser Restaurant LLC DBA IHOP 3824 - 10850 UNSER BLVD NW
Food Establishment Class C
Date: 10/23/2026 - #: RT-FOODEST-085574-2026 - Inspection Result: Approved

Violation: Training Records

• Food Handler Cards

- General Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having closed, tight-fitting windows. Instructed PIC to repair or replace the windows so that they are closed and tight-fitting; or have intact insect protection through screens.
Observed windows with openings to the outside. Location Bottom of back receiving door.
Door seal missing.
Ceiling tile also missing at the time of inspection.

Violation: Hot & Cold-Water Availability & Pressure

• Water Capacity-Quantity and Availability

- Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during

peak water usage periods. violation was corrected on site by PIC
Observed facility with insufficient hot water. Location: Cooking area hand wash station
Manner: Hot side of the hand sink in operable. however, all other sinks are operable.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris on the Floors behind the ice machine, dry area storage racks. Walk in cooler floors under storage racks.

WHOLE HOG CAFE - 9880 MONTGOMERY BLVD NE - Approved

WHOLE HOG CAFE - 9880 MONTGOMERY BLVD NE
Food Establishment Class C
Date: 10/20/2026 - #: RT-FOODEST-099449-2026 - Inspection Result: Approved

Violation: Lighting

• Light Bulbs, Protective Shielding

- Instructed PIC to make repairs necessary so that light bulbs are shielded, coated, or made otherwise shatter-resistant to prevent the contamination of exposed food, clean equipment, utensils, linens, or unwrapped single-service-single-use articles.
Observed light bulbs with no protective shielding, coating or by other means shatter-resistant. Location: Reach-in cooler with potato salad and other ready-to-eat food. Manner: No shatter-proof cover.

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.
Observed inadequate amount of lighting. Location: Protein Walk-in. Manner: Single light bulb not casting enough light to clean.

Violation: Hot & Cold-Water Availability & Pressure

• Water Capacity-Quantity and Availability

- Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods.
Observed facility with insufficient hot water. Location: Both hand sinks in prep and on line Manner: No hot water

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required. Observed food employee not wash hands when required. Condition: Employee did not wash hands after prepping food.

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Food labels serve as a primary means by which consumers can make informed decisions about their food selections and answer questions including ingredients, allergens, weight, and manufacturer. Instructed PIC a label, sign or other method notification must be prominent in plain view of the consumer with the manufacturer's or processor's label provided with the food or The common name of the food, or absent a common name, an adequately descriptive identity statement, if made from two or more ingredients, a list of ingredients and sub ingredients in descending order of predominance by weight, including a declaration of artificial colors, artificial flavors and chemical preservatives, if contained in the food, the name of the food source for each major food allergen contained in the food unless the food source is already part of the common or usual name of the respective ingredient, and if required by law the Nutrition labeling as specified in 21 CFR 101 - Food Labeling and 9 CFR 317 Subpart B Nutrition Labeling.
Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair. Observed Dish area in disrepair by Holes in ceiling

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Potato salad, ribs, brisket, pulled pork, baked potato Activity of the Food: Held without logs or thermometer

• Calibration Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Potato salad, ribs, brisket, pulled pork, baked potato Activity of the Food: Held without logs or thermometer

WHOLE HOG CAFE - 9880 MONTGOMERY BLVD NE
Food Establishment Class C
Date: 10/20/2026 - #: RT-FOODEST-033700-2025 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Date Marking and Disposition

• Date Marking Altered or Concealed

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing inappropriate date markings. Shredded cheese in walk-in

Violation: Preventing Contamination From Hands

• Gloves, Use Limitation

- Single-use gloves must only be used for one task such as working with ready-to-eat food or with raw animal food, used for no other purpose, and discarded when damaged or soiled, or when interruptions occur in the operation. Cross contamination may occur when single use gloves are not changes regularly or kept in good, clean condition. Instructed PIC to retrain staff on the proper use of single-use gloves and the frequency and times they should be changed. Single-use gloves are a food utensil and must be treated as such to prevent the contamination of food. Advised PIC to ensure replacement single-use gloves are readily available to encourage employees to change them as often as necessary.
Observed employee fail to change single-use gloves after an interruption in their task. Location: Prep area Activity: Prep cook cut raw chicken and then touched beef with same gloves

Violation: Cooling

• Cooling Methods

- Instructed PIC to use an alternate method of cooling to minimize the opportunity for pathogen growth; recommended to utilize one or more methods such as 1) Place the food in a shallow pan 2) Separate the food into smaller or thinner portions 3) Use rapid cooling equipment 4) Stir the food in a container placed in an ice/water bath 5) Use containers that facilitate heat transfer 6) Only partially cover product, if protected from overhead contamination.
Observed TCS food items cooling in a method that does not facilitate the necessary rate of heat transfer to cool the food in an appropriate time frame. Location: Prep Area Food Items: Cheese Sauce Manner: Left covered in prep area

Violation: Warewashing Temperature and Concentration

• Sanitizers, Criteria-Chemicals

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR. PIC corrected violation.
Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Chlorine Location: Front counter Concentration: 200ppm

Violation: Lighting

• Light Bulbs, Protective Shielding

- Instructed PIC to make repairs necessary so that light bulbs are shielded, coated, or made otherwise shatter-resistant to prevent the contamination of exposed food, clean equipment, utensils, linens, or unwrapped single-service-single-use articles.
Observed light bulbs with no protective shielding, coating or by other means shatter-resistant. Location: Reach-in cooler with potato salad and other ready-to-eat food. Manner: No shatter-proof cover.

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.
Observed inadequate amount of lighting. Location: Protein Walk-in. Manner: Single light bulb not casting enough light to clean.

Violation: Hot & Cold-Water Availability & Pressure

• Water Capacity-Quantity and Availability

- Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods.
Observed facility with insufficient hot water. Location: Both hand sinks in prep and on-line Manner: No hot water

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required. Observed food employee not wash hands when required. Condition: Employee did not wash hands after prepping food.

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Food labels serve as a primary means by which consumers can make informed decisions about their food selections and answer questions including ingredients, allergens, weight, and manufacturer. Instructed PIC a label, sign or other method notification must be prominent in plain view of the consumer with the manufacturer's or processor's label provided with the food or The common name of the food, or absent a common name, an adequately descriptive identity statement, if made from two or more ingredients, a list of ingredients and sub ingredients in descending order of predominance by weight, including a declaration of artificial colors, artificial flavors and chemical preservatives, if contained in the food, the name of the food source for each major food allergen contained in the food unless the food source is already part of the common or usual name of the respective ingredient, and if required by law the Nutrition labeling as specified in 21 CFR 101 - Food Labeling and 9 CFR 317 Subpart B Nutrition Labeling.

Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
