City of Albuquerque
Environmental Health Department
Consumer Health Protection Division
P.O. Box 1293, Albuquerque, NM 87103

Summary Table
Consumer Health Protection Inspections Performed
Week: September 27, 2026 to October 03, 2026
Report Amended on 10/5/2026 for clerical errors

This report includes inspection history for the dates listed. Inspections may have occurred after those dates. The summary reflects each establishment's current operating status as of the report release date.

COA - FAMILY & COMMUNITY SVCS - 419 PENNSYLVANIA ST SE

Inspection Date	Inspection ID Number	Inspection Type	Inspection Status	Page #
Food Establishment (Permit # - PT0102188) - Operational Status - Open				
09/28/2026	RT-FOODEST-005979-2026	Routine Food Establishment Inspection	Approved	Pg. 3

Horizon Bagels & Cafe LLC - 4016 Louisiana Blvd NE, Suite D

Inspection Date	Inspection ID Number	Inspection Type	Inspection Status	Page #
Food Processor (Permit # - PROC-2025-00271) - Operational Status - Open				
09/29/2026	RT-PRC-018865-2026	Routine Food Processor Inspection	Approved	Pg. 3
Food Establishment (Permit # - PT0160175) - Operational Status - Open				
09/29/2026	COM-FOODES-092608-2026	Complaint Food Establishment Inspection	Approved	Pg. 3

HOTEL ANDALUZ - 125 2ND ST NW

Inspection Date	Inspection ID Number	Inspection Type	Inspection Status	Page #
Food Establishment (Permit # - PT0159978) - Operational Status - Open				
09/29/2026	RT-FOODEST-081786-2025	Routine Food Establishment Inspection	Approved	Pg. 3
Food Establishment (Permit # - PT0159979) - Operational Status - Open				
09/29/2026	RT-FOODEST-081788-2025	Routine Food Establishment Inspection	Approved	Pg. 4

JAPANESE KITCHEN - 6521 AMERICAS PKWY NE

Food Establishment (Permit # - PT0161324) - Operational Status - Open				
09/29/2026	PT0161324	Routine Food Establishment Inspection	Unsatisfactory Re-Inspection required	Pg. 15

Corrective Action Compliance does not represent a full routine health inspection. Instead, it reflects that a facility has taken specific corrective actions in response to violations identified during an inspection. These actions may be taken during the inspection or afterward, and the Corrective Action Compliance allows for the facility's grade or status to be updated based on those corrections. Corrective actions may be demonstrated through documentation such as photos, videos, receipts, work orders, site visits, or both verifiable means showing that the violation has been addressed and compliance has been achieved.

APPROVED

An "Approved" grade indicates that a food establishment that has demonstrated compliance with the standards in the Food Code the Food Service and Retail Ordinance, other industry standards, and other laws and has received a Grade of Approved and is able to operate.

CONDITIONAL APPROVED

A "Conditional Approved" grade is issued when a facility is found to have violations of the Food Code, the Food Service and Ret Ordinance, industry standards, or applicable laws. While the facility may continue operating, it must complete specific corrective actions to address the violation A yellow sticker is placed alongside the green "Approved" sticker.

UNSATISFACTORY

An "Unsatisfactory" grade indicates that a facility has not met the required standards but is allowed to continue operating temporarily while corrective actions are completed. A red "Unsatisfactory" sticker will be displayed at the facility for the duration of this grade. This is a temporary status and requires timely follow-up to verify compliance.

CLOSED

A "Closed" grade is assigned when violations pose a significant risk to public health, requiring the facility to immediately cease operations. The facility must remain closed until corrective actions have been completed and verified. A facility with this grade will display an orange "Closed" sticker for the duration of the closure.

COA - FAMILY & COMMUNITY SVCS - 419 PENNSYLVANIA ST SE - Approved

COA - FAMILY & COMMUNITY SVCS - 419 PENNSYLVANIA ST SE
Food Establishment Class B
Date: 09/28/2026 - #: RT-FOODEST-005979-2026 - Inspection Result: Approved

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment
in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Assisted the PIC in completing a pre-inspection application.
Observed that the facility is operating without a permit.

Horizon Bagels & Cafe LLC - 4016 Louisiana Blvd NE, Suite D - Approved

Horizon Bagels & Cafe LLC - 4016 Louisiana Blvd NE, Suite D
Food Processor Class C
Date: 09/29/2026 - #: RT-PRC-018865-2026 - Inspection Result: Approved

HORIZON BAGELS AND CAFE - 4016 LOUISIANA BLVD NE, D
Food Establishment Class C
Date: 09/29/2026 - #: COM-FOODES-092608-2026 - Inspection Result: Approved

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.
Observed wiping cloths improperly used. Observed wiping cloths used for cleaning and sanitizing.

Violation: Toilet Facilities

• Toilet Room Receptacle, Covered

- Instructed to provide a covered receptacle for sanitary napkins.
Observed in a toilet room used by females, no covered receptacle.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Main kitchen line Activity: Employee preparing food entrees with no hair restraint.

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed a soiled mop not in use, stored directly inside mop bucket.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked meats, soups, dairy products Activity of the Food: Stored, received
Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment.
Observed the food establishment does not have calibration logs for temperature measuring devices.

HOTEL ANDALUZ - 125 2ND ST NW - Approved

HOTEL ANDALUZ - 125 2ND ST NW
Food Establishment Class B
Date: 09/29/2026 - #: RT-FOODEST-081788-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used.

Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75°F with a contact time of 7 seconds.
Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Ware wash machine bar area
Concentration: Zero

HOTEL ANDALUZ - 125 2ND ST NW
Food Establishment Class B
Date: 09/29/2026 - #: RT-FOODEST-081786-2025 - Inspection Result: Approved

JAPANESE KITCHEN - 6521 AMERICAS PKWY NE - Approved

JAPANESE KITCHEN - 6521 AMERICAS PKWY NE
Food Establishment Class D
Date: 09/28/2026 - #: RT-FOODEST-092209-2026 - Inspection Result: Approved

Violation: Maintenance and Operation

• Cutting Surfaces

- Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may buildup or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.
Observed cutting surface with deep scratches and scoring which limit the ability to be effectively cleaned and sanitized. Location: Inside kitchen on main kitchen line Type: cutting board

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.
Observed inadequate amount of lighting. Location: On main kitchen cook line hood suppression system Manner: Inadequate lighting no lights installed on hood vent.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee does not wash hands when required. Condition: Observed employee wash hands with gloves on then proceeded to continue to work with the same gloves on.
Food employees shall only clean their hands in a handwashing sink or approved automatic handwashing facility. Effective handwashing is essential for minimizing the likelihood of the hands becoming a vehicle of cross contamination. It is important that handwashing be done only at a properly equipped handwashing facility in order to help ensure that food employees effectively clean their hands and to prevent the contamination of food preparation sinks. Food employee re-washed hands in a designated hand sink. Instructed PIC to retrain employees on proper hand-washing procedures.
Food employee was observed washing hands in not in a hand-washing sink. Location: Employee was preparing raw shrimp then rinsed hands off in three compartment sinks with no hand soap or paper towels. Employee switched out chlorine bottle on automatic dish machine and then went back to three compartment sink and rinsed hands off then went back to preparing raw shrimp.

Violation: Single-Service

• Single-Service and Single-Use Articles-Use Limitations

- Single-service and single-use articles may not be reused. Articles that are not constructed of multiuse materials may not be reused as they are unable to withstand the rigors of multiple uses, including the
ability to be subjected to repeated washing, rinsing, and sanitizing. Instructed PIC that all single-service and single-use articles being reused must be replaced with multiuse containers and/articles.
Observed single-use containers being re-used. Location: Cold holding units Use: Frozen Seaweed and Calamari Salad containers being reused with existing label still on container.

JAPANESE KITCHEN - 6521 AMERICAS PKWY NE
Food Establishment Class D
Date: 09/28/2026 - #: RT-FOODEST-064132-2025 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.
Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Automatic dish machine Concentration: 0 parts per million Temperature: 134 degrees f

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.
Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottle Alleged Material: Disinfectant

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Reach in refrigerator and walk in refrigerator Food Items: Chopped green onion, sliced onion, mixed vegetables, imitation crab meat Expiration Dates: None available.
Also, stored in single use storage containers labeled as seaweed.

Violation: Maintenance and Operation

• Cutting Surfaces

- Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may buildup or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.
Observed cutting surface with deep scratches and scoring which limit the ability to be effectively cleaned and sanitized. Location: Inside kitchen on main kitchen line Type: cutting board

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.
Observed food temperature measuring devices were not provided or readily accessible.

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.
Observed inadequate amount of lighting. Location: On main kitchen cook line hood suppression system Manner: Inadequate lighting no lights installed on hood vent.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee does not wash hands when required. Condition: Observed employee wash hands with gloves on then proceeded to continue to work with the same gloves on.

Food employees shall only clean their hands in a handwashing sink or approved automatic handwashing facility. Effective handwashing is essential for minimizing the likelihood of the hands becoming a vehicle of cross contamination. It is important that handwashing be done only at a properly equipped handwashing facility in order to help ensure that food employees effectively clean their hands and to prevent the contamination of food preparation sinks. Food employee re-washed hands in a designated hand sink. Instructed PIC to retrain employees on proper hand-washing procedures.
Food employee was observed washing hands in not in a hand-washing sink. Location: Employee was preparing raw shrimp then rinsed hands off in three compartment sinks with no hand soap or paper towels. Employee switched out chlorine bottle on automatic dish machine and then went back to three compartment sink and rinsed hands off then went back to preparing raw shrimp.

Violation: Single-Service

• Single-Service and Single-Use Articles-Use Limitations

- Single-service and single-use articles may not be reused. Articles that are not constructed of multiuse materials may not be reused as they are unable to withstand the rigors of multiple uses, including the ability to be subjected to repeated washing, rinsing, and sanitizing. Instructed PIC that all single-service and single-use articles being reused must be replaced with multiuse containers and/articles.
Observed single-use containers being re-used. Location: Cold holding units Use: Frozen Seaweed and Calamari Salad containers being reused with existing label still on container.

JAPANESE KITCHEN - 6521 AMERICAS PKWY NE
Food Establishment Class B
Date: 09/28/2026 - #: RT-FOODEST-064117-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Grater for ginger Location: Stored inside cabinet inside sushi bar area. Condition of the Location: Stored away with substantial ginger debris build up.

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures.
Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Cold holding display unit for sushi Thermometer Location: None available

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located inside cabinets behind sushi preparation area The surface was made out of synthetic wood The condition of the surface was debris build up and miscellaneous items stored.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Raw meats and prepared vegetables in Sushi bar area Activity of the Food: Stored
Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment.
Observed the food establishment does not have calibration logs for temperature measuring devices.

KIDS PLANET CDC - 1200 4TH ST SW - Approved

KIDS PLANET CDC - 1200 4TH ST SW
Food Establishment Class C
Date: 09/28/2026 - #: RT-FOODEST-019349-2026 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located in the kitchen area The surface was made out of metal and plastic The condition of the surface was debris build up inside the oven and on the shelfs where dishes are stored.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. facility did not have Cold Holding or Hot Holding logs or Equipment logs

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

KR Goods LLC DBA Monaco Market- 4400 WYOMING BLVD NE - Approved

KR Goods LLC DBA Monaco Market - 4400 WYOMING BLVD NE
Retail Food Establishment Class 3
Date: 09/29/2026 - #: COM-RET-092467-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is partially substantiated. Dead mice found in the facility, and they were taking active measures to control.

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures.

Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Inside cold holding units Thermometer Location: None available inside cold holding units

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness.

Observed food items in cold holding unit measuring above 41°F. Location: Walk in refrigerator Food Items: Yogurt beverage, sliced cheese Temperature: 48 to 49°F.

The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: Walk in refrigerator Condition: Unable to properly cold hold TCS food items at 41 degrees f or below. Walk in refrigerator is the only refrigeration unit in facility all other cold holding units are freezers.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Dairy products Activity of the Food: Stored and received

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps.
Location: Back storage area
Pest Type: Rodent and cockroaches
Pest Condition: Dead
Number of Pests Present: 2 mice on glue board and 5 cockroaches on glue board

MEDIA ARTS COLLABORATIVE CHARTER SC - 4401 CENTRAL AVE NE - Approved

MEDIA ARTS COLLABORATIVE CHARTER SC - 4401 CENTRAL AVE NE
Food Establishment Class B
Date: 09/30/2026 - #: RT-FOODEST-037252-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75°F with a contact time of 7 seconds.
Violation was corrected on site by CHPD inspector, educated and provided guidance to PIC on safely utilizing sanitizer.
Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Wiping cloth container next to food service line
Concentration: Zero PPM

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing.
Observed handwashing sink used for purposes other than handwashing. Location: Handwash station next to service line Manner: Observed utensils with food debris being stored at the hand wash station

MORADA ALBUQUERQUE - 1620 INDIAN SCHOOL RD NE – Approved

MORADA ALBUQUERQUE - 1620 INDIAN SCHOOL RD NE
Food Establishment Class C
Date: 09/29/2026 - #: COM-FOODES-092749-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

MORADA ALBUQUERQUE - 1620 INDIAN SCHOOL RD NE
Food Establishment Class C
Date: 09/29/2026 - #: RT-FOODEST-065838-2025 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Violation corrected on site by PIC replacing strainer.
Observed floor drain near hand wash station on south wall is not maintained in good repair or is not repaired by law. Observed floor drain near hand wash station on south wall found in disrepair by missing strainer.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Violation corrected on site by PIC cutting drain pipe to create an adequate air gap. Observed an inadequate air gap at floor drain located near hand wash station south wall.

MURPHY EXPRESS #8909 - 221 UNSER BLVD SW - Conditional Approved

MURPHY EXPRESS #8909 - 221 UNSER BLVD SW
Retail Food Establishment Class 3
Date: 09/29/2026 - #: RT-RET-056937-2025 - Inspection Result: Conditional Approved

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located in retail and walk in coolers The surface was made out of metal and

plastic The condition of the surface had debris build up on the walk-in coolers vent covers on top of microwave shelfs where retail re package food is stored for sale and on vent cover for the cold holding case in retail area

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris on the floors throughout the retail and walk in coolers and inside bathrooms as well as debris build up inside walk in coolers roofs and walls black debris build up could be seen and debris build up in bathrooms walls, floors and stalls

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Coffee Machine and Soda Machines Location: Retail Areas Condition of the Location: equipment had debris build up

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.
Observed no handwashing cleanser available at handwashing sink(s). Location: back prep/backstock area

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s).

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purposes such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purposes other than handwashing.
Observed handwashing sink used for purposes other than handwashing. Location: back prep /stock area Manner: mop head being stored inside mop sink

Violation: Toilet Facilities

• Toilet Room Receptacle, Covered

-Instructed to make toilet tissue available at each toilet for the hygienic use of the facilities.
Observed no toilet tissue available at every toilet.

OUTPOST 1706 BREWHOUSE - 301 ROMERO ST NW, S205 - Approved

OUTPOST 1706 BREWHOUSE - 301 ROMERO ST NW, S205
Food Establishment Class B
Date: 09/30/2026 - #: PT0157270 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at under bar near three compartment sink.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

pic did not have temp or sanitizing test strips to be able to adequately test dishwashing machine

RISING STAR CHINESE EATERY - 7001 SAN ANTONIO DR NE, S - Approved

RISING STAR CHINESE EATERY - 7001 SAN ANTONIO DR NE, S
Food Establishment Class C
Date: 09/28/2026 - #: COM-FOODES-092310-2026 - Inspection Result: Approved

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Drip Prevention and Adequacy

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto
food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.
Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface. Location Hood Ventilation System vents. Equipment: dripping on walls behind wok and fryer area.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris in the following areas at the time of inspection:
1.) observed grease build up and debris on the floor underneath fryer and on the wall around the fryer and wok station. 2.) on the floor and bottom shelf of prep tables in the kitchen area.
3.) on the exterior surfaces of the prep top and upright coolers and freezers. 4.) on the wall in the warewashing area.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers
or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: ice scoop. Location: stored with handle and scoop lying flat on ice.

RISING STAR CHINESE EATERY - 7001 SAN ANTONIO DR NE, S
Food Establishment Class C
Date: 09/28/2026 - #: RT-FOODEST-060761-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75°F with a contact time of 7 seconds.
Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: wiping cloth containers. Concentration:0 ppm.

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours. Also instructed PIC to retrain employees on proper wash, rinse and sanitize steps.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: stainless steel bowl. Location: three compartment sink. Condition of the Location: observed employee rinse out a bowl used to store raw beef and place in in clean ware shelving above three compartment sink without properly cleaning and sanitizing bowl.

Violation: Cooling

• Cooling

- Instructed PIC to rapidly reheat the (TCS) food item to 165°F; then, quickly cool the product down to 70°F within two (2) hour period using method(s) such as 1) Place the food in a shallow pan 2) Separate the food into smaller or thinner portions 3) Use rapid cooling equipment 4) Stir the food in a container placed in an ice/water bath 5) Use containers that facilitate heat transfer 6) Only partially cover product, if protected from overhead contamination.
Observed cooling TCS food items fail to reach seventy (70) °F within two (2) hour period. Location: Kitchen area. Food Items: Breaded fried chicken. Temperature: 99°F and 101°F. Time transpired: 2.75 hours

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Drip Prevention and Adequacy

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.
Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface. Location Hood Ventilation System vents. Equipment: dripping on walls behind wok and fryer area.

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- Pathogens can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. They may also be passed on by consumers or employees directly, or indirectly from used tableware or food containers. Food must only contact surfaces of equipment and utensils that have been properly cleaned and sanitized, single-service articles, or linens that have been properly laundered. Instructed PIC that the food in contact with the unapproved source must not be used in the operation of the food establishment unless it can be made wholesome through cleaning or cooking. Observed PIC instruct employee to discontinue prewashing of dishes and relocate shrimp away from three compartment sink. Violation corrected on site.
Observed food contacting an unapproved surface. Location: three compartment sink. Food Item: raw thawing shrimp. Observed first basin of three compartment sink being used to thaw raw frozen shrimp under running water as employee was utilizing the other two basins to pre-wash dishes at the time of inspection.

Violation: Toilet Facilities

• Toilet Tissue, Availability

- Instructed to make toilet tissue available at each toilet for the hygienic use of the facilities. Observed PIC refill toilet tissue during inspection. Violation corrected on site.
Observed no toilet tissue available at toilet in Men's restroom.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Prep top cooler bottom area. Food Items: container of pot stickers. Temperature: 75°F.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris in the following areas at the time of inspection.
1.) observed grease build up and debris on the floor underneath fryer and on the wall around the fryer and wok station. 2.) on the floor and bottom shelf of prep tables in the kitchen area.
3.) on the exterior surfaces of the prep top and upright coolers and freezers. 4.) on the wall in the warewashing area.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers
or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: ice scoop. Location: stored with handle and scoop lying flat on ice.

• Prohibitions, Storage Areas

- Food, clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Food, clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, and protected from contamination. Instructed PIC to store items so that the risk of contamination prior to use is minimized.
Observed food stored improperly, items stored under leaking water lines or lines where water has condensed. Location: under drain board of warewashing machine directly on top of warewashing machine chemicals. Item: a container of cut raw onions

SONIC DRIVE IN 8 - 3110 JUAN TABO BLVD NE
Food Establishment Class C
Date: 09/28/2026 - #: COM-FOODES-092149-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed several floor drains throughout facility is not maintained in good repair or is not repaired by law. Observed several floor drains throughout facility found in disrepair by missing strainer and one floor drain with missing strainers.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at two floor drains throughout facility located under ice machine unit and beverage dispensing unit.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Drip Prevention and Adequacy

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.
Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface.
Location: Hood vent cook line Equipment: Flat top griddle and fryers

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Cook line
Activity: Working fry station

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- When cleaning is accomplished by spraying or flushing, coving and sealing of the floor/wall junctures is required to provide a surface that is conducive to water flushing. Grading of the floor to drain allows liquid wastes to be quickly carried away, thereby preventing pooling which could attract pests such as insects and rodents or contribute to problems with certain pathogens such as Listeria monocytogenes.
Observed floor and wall juncture covering missing and damaged wall cove.

SPRING ROLLIN COTTONWOOD LLC - 10131 COORS BLVD NW - Approved

SPRING ROLLIN COTTONWOOD LLC - 10131 COORS BLVD NW
Food Establishment Class C
Date: 09/29/2026 - #: RT-FOODEST-014041-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization . Location: Dining area, food prep area.
Concentration: 100pp, dining area, food prep area 68 * F, 100 * F 78 * f

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.
Observed equipment not maintained in good repair
. Location: kitchen prep areas.
Type of Equipment: Two reach in refrigerators Condition of the equipment: Door gaskets damaged and in need of replacement.

Violation: Ventilation and Hood Systems

• Mechanical-Ventilation

- Instructed PIC to replace missing fan guard by 10-13-21. send photo to EHD

Observed interior cooler fan guard missing. Location: walk in cooler.

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is nonabsorbent.
Observed nonfood contact surface that was absorbent. The surface was located back prep area. The surface was made out of Wood cutting board. The condition of the surface was absorbent and not easily cleanable.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Prep top cooler top and bottom.
Food Items: Sliced Jalapenos-45*F, beef brisket- 44 *F, Tofu- 44*F, Bean sprouts 45.08*F, Shredded Lettuce 44.5* F, Sliced Cucumber- 47*F.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- Wall and ceiling covering materials shall be attached so that they are EASILY CLEANABLE. Instructed person in charge to replace or clean and sanitize area of concern so that it is maintained or is easily cleanable.
Observed 3 compartment sink tiles missing and is not easily cleanable. The surface was made out of dry wall. Observed corner wall and top base coving near hand wash station damaged and not easily cleanable.

STARRY MOON - 10131 COORS BLVD NW, H2
Food Establishment Class C
Date: 09/28/2026 - #: PT0157821 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice Machine.
Location: Interior of the ice machine ceiling with excessive soil build up and rust.

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.
Observed pests in the facility with no control methods in place. Location: Kitchen prep area.
Pest Type: Mice
Pest Condition: Mice droppings behind the prep tables. sinks, grease trap.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing inappropriate date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Refrigerator
Food Items: Cut melons, Strawberries, blueberries, oranges, Pineapple, with no expiration dates.

Violation: Training Records

• Food Handler Cards

- Food handler cards shall be kept by the Food Employee on their Person while working as a Food Employee or volunteer for a Food operation, or a copy shall be kept on file by the current employer and be made available for inspection by the Enforcement Authority. If trained through another approved method; records of the training shall be maintained for the duration of the Food Employees employment. Instructed PIC to provide updated training records to EHD for review.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.
Observed holes or other gaps in the structure of the facility. Location: Mop station and water heater area.
Size: 8in. x 12in., 13 in. x 5 in, on the other side of the hallway.

Violation: Cold Holding

• Cold Holding Capacities-Equipment

- 5. 4-301.11The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.
Observed insufficient cold holding equipment to properly hold food cold. Location: Front prep top cooler. Condition: Ambient temperature was holding at a temperature of 89.9 degrees f.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.
Observed no handwashing cleanser available at handwashing sink(s). Location: Back prep area hand wash station with no hand cleanser, paper towels.

Violation: Warewashing Temperature and Concentration

• Sanitizers, Criteria-Chemicals

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR. PIC corrected violation by diluting sanitizer to 50 ppm chlorine.
Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Chlorine sanitizer
Location: Wiping cloth container.
Concentration: over 200 ppm.

Violation: Lighting

• Light Bulbs, Protective Shielding

- Instructed PIC to make repairs necessary so that light bulbs are shielded, coated, or made otherwise shatter-resistant to prevent the contamination of exposed food, clean equipment, utensils, linens, or unwrapped single-service-single-use articles.
Observed light bulbs with no protective shielding, coating or by other means shatter-resistant.
Location: Back food prep area with exposed food, equipment, utensils, linens, unwrapped single service articles Manner: no shatter proof covers or caps over the lighting.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris on the floors, walls, drains, under equipment and tables.

Violation: Storage

• Prohibitions, Storage Areas

- Multiuse utensils which have been cleaned and sanitized can become contaminated with pathogens which can be transferred to food from utensils that have

been stored on surfaces which have not been cleaned and sanitized. Instructed PIC to clean and sanitize utensils prior to continuing use, must be maintained cleaned in a regular schedule as prescribed by the code and to store items so that the risk of contamination prior to use is minimized.
Observed utensils during a pause in use stored incorrectly. Utensil was not stored on a clean and sanitized portion of the equipment. Utensil Type: ice scoop.
Location: top of ice machine,
Condition of the Location: Ice scoop stored on top of the dirty ice machine.

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- Wall and ceiling covering materials shall be attached so that they are EASILY CLEANABLE. Instructed person in charge to replace or clean and sanitize area of concern so that it is maintained or is easily cleanable.
Observed Floors, base coving is not easily cleanable. The surface was made out of epoxy. base coving is absorbent.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Milks, creams, cut fruits.
No temperature logs were observed.

STRIPES BURRITO LLC - 10621 UNSER BLVD NW, B5 - Unsatisfactory Re-Inspection required

STRIPES BURRITO LLC - 10621 UNSER BLVD NW, B5
Food Establishment Class C
Date: 09/29/2026 - #: PT0161324 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.
Location: Front sanitizer bucket.
Concentration: 100 ppm.
Temperature:69* F.

Violation: Pooled Eggs

• Pooled Eggs Prohibition

- Raw eggs may only be combined in the amount and in response to a customer's order, or for the preparation of a batter to be cooked immediately. Instructed the PIC that the identified pooled eggs must not be used in further food preparation and that raw eggs shall only be combined for batters or in response to a customer's order.
Observed pooled eggs in the food establishment that were not being combined for a customer's order or for a batter.
Location: 8 Pitchers at the upright refrigerator by the grill, 4 pitchers in the walk-in cooler, 8 5-gallon buckets of pooled eggs walk in cooler.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Prep top cooler.
Food Items: Crema 2 squeeze bottle units with no Expiration Dates.

Violation: Miscellaneous

• Miscellaneous Sources of Contamination

- Regardless of its specificity, a Code cannot anticipate all the diverse means by which food can become contaminated after receipt. Food must be protected from all sources of contamination.
Method of contamination: Observed two ready to eat pans of Chicharrónes under a prep table uncovered at the time of inspection.

Violation: Operation and Maintenance

• Cleaning of Handwashing Fixtures

- Handwashing facilities are critical to food protection and must be maintained in operating order at all times so they will be used. Handwashing sinks shall be cleaned as often as necessary to keep them clean. Instructed PIC to clean handwashing sink(s)
Observed handwashing fixtures with the buildup of soil residues. The plumbing fixture was located Food prep areas. The condition of the surface was soiled with substantial soil and hard water build up.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed build up and debris on the drains, floors under equipment along with cooler floors under shelving, walls through the kitchen with buildup.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Corrective Action: 5. 4-601.11(C), 4-602.13

Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Kitchen areas. The surface was made out of Stainless-steel metals. The condition of the surfaces with excessive soil builds up on the prep tables, storage racks, refrigerators, fryers, grill, bottom cooler drawers, door gaskets, hoods, tables bottom and legs. Stove range surfaces and burners.
