

City of Albuquerque
Environmental Health Department
Consumer Health Protection Division
P.O. Box 1293, Albuquerque, NM 87103

Summary Table
Consumer Health Protection Inspections Performed
Week: September 13, 2026 to September 19, 2026
Report Amended on 9/21/2026 for clerical errors

This report includes inspection history for the dates listed. Inspections may have occurred after those dates.

The summary reflects each establishment's current operating status as of the report release date.

BOBS BURGERS ONE INC - 4506 CENTRAL AVE SW

Inspection Date	Inspection ID Number	Inspection Type	Inspection Status	Page #
Food Establishment (Permit # - PT0137851) - Operational Status - Open				
09/17/2026	RT-FOODEST-064968-2025	Routine Food Establishment Inspection	Approved	Pg. 5

BROOKDALE PLACE - 300 VALENCIA DR SE

Corrective Action Compliance does not represent a full routine health inspection. Instead, it reflects that a facility has taken specific corrective actions in response to violations identified during an inspection. These actions may be taken during the inspection or afterward, and the Corrective Action Compliance allows for the facility's grade or status to be updated based on those corrections. Corrective actions may be demonstrated through documentation such as photos, videos, receipts, work orders, site visits, or both verifiable means showing that the violation has been addressed and compliance has been achieved.

APPROVED

An "Approved" grade indicates that a food establishment that has demonstrated compliance with the standards in the Food Code the Food Service and Retail Ordinance, other industry standards, and other laws and has received a Grade of Approved and is able to operate.

CONDITIONAL APPROVED

A "Conditional Approved" grade is issued when a facility is found to have violations of the Food Code, the Food Service and Ret Ordinance, industry standards, or applicable laws. While the facility may continue operating, it must complete specific corrective actions to address the violation A yellow sticker is placed alongside the green "Approved" sticker.

UNSATISFACTORY

An "Unsatisfactory" grade indicates that a facility has not met the required standards but is allowed to continue operating temporarily while corrective actions are completed. A red "Unsatisfactory" sticker will be displayed at the facility for the duration of this grade. This is a temporary status and requires timely follow-up to verify compliance.

CLOSED

A "Closed" grade is assigned when violations pose a significant risk to public health, requiring the facility to immediately cease operations. The facility must remain closed until corrective actions have been completed and verified. A facility with this grade will display an orange "Closed" sticker for the duration of the closure.

BOBS BURGERS ONE INC - 4506 CENTRAL AVE SW - Approved

BOBS BURGERS ONE INC - 4506 CENTRAL AVE SW

Food Establishment Class C

Date: 09/17/2026 - #: RT-FOODEST-064968-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: reach in coolers and freezers Location: kitchen and food prep areas
Condition of the Location: debris buildup inside the reach in coolers and freezers.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap under both soda machines pipes and hoses coming from soda machines being vented inside floor drain.

BROOKDALE PLACE - 300 VALENCIA DR SE - Approved

BROOKDALE PLACE - 300 VALENCIA DR SE

Food Establishment Class C

Date: 09/16/2026 - #: RT-FOODEST-020639-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Kitchen
Condition of the Location: Soiled with debris buildup on the deflector

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed the following plumbing systems are not maintained in good repair or are not repaired by law. Observed handwashing sink the dish pit is slowly draining and also found spray washer in disrepair by having a leak that needs to be corrected.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Make line prep table
Food Items: Sliced cheese (51°F), green chile (48°F), chicken chunks(46°F), Chicken salad (48°F)

Violation: Personal Cleanliness

• Eating, Drinking, or Using Tobacco Products

- A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area and should be in a cup with a lid and straw.

Observed a food employee with an improper drink. Location: On clean dish storage rack in dish pit Type of Drink: Twist top water bottle

Date: 09/18/2026 - #: COM-FOODES-089454-2026 - Inspection Result: Approved

Violation: Result of a Complaint

- **Complaint**

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine

Location: Back of house

Condition of the Location: Extreme buildup of orange organic matter

Violation: Operation and Maintenance

- **Using a Handwashing Sink-Operation and Maintenance**

- Handwashing facilities can become sources of contamination if the sinks used for other purpose such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purpose other than handwashing.

Observed handwashing sink used for purpose other than handwashing. Location: Near cook line Manner: Discarding drinks

BUFFALO WILD WINGS 610 - 8505 MONTGOMERY BLVD NE

Food Establishment Class B

Date: 09/18/2026 - #: CAC-Food-089481-2026 - Inspection Result: Approved

Violation: Result of a Complaint

- **Complaint**

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Complaint Food Establishment Inspection. Inspection resulted in a Conditional Approved status. No yellow sticker was placed on facility due to PIC correcting two Priority Violations and one Priority Foundation violation on site.

Violations corrected:

1. Food Contact Surfaces Cleaned & Sanitized: Sanitizers, Criteria-Chemicals
2. Food Contact Surfaces Cleaned & Sanitized: Equipment, Food Contact Surfaces, and Utensils Clean
3. Temperature & Sanitizer Measuring Devices: Sanitizing Solutions, Testing Devices

BUFFALO WILD WINGS 610 - 8505 MONTGOMERY BLVD NE

Food Establishment Class B

Date: 09/18/2026 - #: COM-FOODES-089472-2026 - Inspection Result: Conditional Approved

Violation: Result of a Complaint

- **Complaint**

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for sanitizer utilized it must be at the manufacturer specified concentration and temperature range with a contact time of 30 seconds.

Violation corrected on site.

Observed chemical solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Type of Sanitizer: Sink and surface

Location: Bar area Concentration: Below 272 ppm

Violation: Plumbing

- **System Maintained in Good Repair, Repaired According to Law**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed floor drain in bar area is not maintained in good repair or is not repaired by law. Observed floor drain in bar area found in disrepair by missing strainer.

Violation: Testing Devices

- **Sanitizing Solutions, Testing Devices**

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer

in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Violation corrected on site
Observed no/expired testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purpose such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purpose other than handwashing.
Observed handwashing sink used for purpose other than handwashing. Location: Bar area Manner: Discarding drinks

Violation: Warewashing Temperature and Concentration

• Sanitizers, Criteria-Chemicals

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR. PIC corrected violation by diluting chemical to proper parts per million.
Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Sink and surface
Location: Spray bottle in bar area Concentration: Above 272 PPM

CHC MGMT 2 LLC DBA Jimmy John's - 10260 Coors Bypass NW BYP NW, B1 - Approved

CHC MGMT 2 LLC DBA Jimmy John's - 10260 Coors Bypass NW BYP NW, B1

Food Establishment Class C

Date: 09/16/2026 - #: RT-FOODEST-008717-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues

. Equipment Type: Ice machine.

Location: Backroom.

Condition of the Location: Interior top with a tan and black soil buildup near the chute and entry from top.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Food prep area.

Activity: employee handling food with hair ineffectively restrained.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the Floors in the cooler and storage areas, prep table.

Violation: Records

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

CHICAGO PIZZA KITCHEN - 4300 EUBANK BLVD NE - Approved

CHICAGO PIZZA KITCHEN - 4300 EUBANK BLVD NE

Food Establishment Class C

Date: 09/16/2026 - #: CAC-Food-088228-2026 - Inspection Result: Approved

Manual and Mechanical Warewashing Equipment, Chemical Sanitization Temperature, pH, Concentration and Hardness- Ware washing machine was retested at 50ppm

Due to correction made. Facility will be back into the green approved status

CHICAGO PIZZA KITCHEN - 4300 EUBANK BLVD NE

Food Establishment Class C

Date: 09/16/2026 - #: RT-FOODEST-087967-2026 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Wiping cloth bucket and ware washing machine Concentration: 25ppm

CHICAGO PIZZA KITCHEN - 4300 EUBANK BLVD NE

Food Establishment Class C

Date: 09/15/2026 - #: RT-FOODEST-051456-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Wiping cloth bucket and ware washing machine Concentration: 25ppm

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener Location: prep area of kitchen Condition of the Location: Dried food debris on blade of can opener

Violation: Poisonous and Toxic/Chemical Substances

• **Common Name-Working Containers**

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottles Alleged Material: degreaser

Violation: Maintenance and Operation

• **Good Repair and Proper Adjustment-Equipment**

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: hood vents Type of Equipment: Hood vents Condition of the equipment: Missing hood vents

• **Cutting Surfaces**

- Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may buildup or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.

Observed cutting surface with deep scratches and scoring which limit the ability to be effectively cleaned and sanitized. Location: prep table by three compartment sink Type: white cutting boards

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• **Food Storage Containers Identified with Common Name of Food**

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Large bins of flours and sugar Location: dough room

Violation: Toilet Facilities

• **Toilet Room Receptacle, Covered**

- Instructed to provide a covered receptacle for sanitary napkins.
Observed in a toilet room used by females, no covered receptacle.

Violation: Physical Facilities

• **Outer Openings, Protected**

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are

solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges. back door in dough room

Violation: Sewage and Waste Water

• Conveying Sewage

- Sewage shall be conveyed to the point of disposal through an approved sanitary sewage system or other system, including use of sewage transport vehicles, waste retention tanks, pumps, pipes, hoses, and connections that are constructed, maintained, and operated according to law.

Observed floor drain on main cook line overflowing sewage into kitchen when handwashing sink is used

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under ☐ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: portion cups Location: kitchen area Condition of the Location: Portion cup stored in food container with sides touching food product inside

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on the hood system The condition of the surface was dust and grease debris

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: stored

Chipotle Mexican Grill 1714 - 6810 MENAUL BLVD NE - Approved

Chipotle Mexican Grill 1714 - 6810 MENAUL BLVD NE

Food Establishment Class C

Date: 09/15/2026 - #: COM-FOODES-087554-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Personal Cleanliness

• Clean Condition-Outer Clothing

- Dirty clothing may harbor diseases that are transmissible through food. Food employees who inadvertently touch their dirty clothing may contaminate their hands. This could result in contamination of the food being prepared. Food may also be contaminated through direct contact with dirty clothing. In addition, employees wearing dirty clothes send a negative message to consumers about the level of sanitation in the establishment. Food employees shall wear clean outer clothing to prevent contamination of food, equipment, utensils, linens, and single-service and single-use articles. Instructed PIC to retrain employees on

personal cleanliness requirements.

Observed employee wearing soiled clothing. Employee had a significant amount of possibly pet hair on shirt while preparing food entrees on main kitchen line.

• **Prohibition-Jewelry**

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Preparing food entrees Inappropriate Jewelry Observed: Bracelet

Violation: Hands Clean & Properly Washed

• **When to Wash**

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee does not wash hands when required. Condition: Employees switching gloves and not washing hands prior to donning new gloves, employees touching personal items and not washing hands afterwards.

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked and raw meats, cooked vegetables, prepared vegetables, salsas and sauces Activity of the Food: Reheated, stored and received

Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment.

Observed the food establishment does not have calibration logs for temperature measuring devices.

CLYDE HOTEL - 330 TIJERAS ST NW - Approved

CLYDE HOTEL - 330 TIJERAS ST NW

Food Establishment Class C

Date: 09/18/2026 - #: COM-FOODES-089307-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• **Complaint**

- This inspection is a follow-up to previously substantiated complaints.

Violation: Cold Holding

• **Time/Temperature Control for Safety Food, Cold Holding**

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Undercounter cooler cookline

Food Items: Chopped green chile Temperature: 50°F

CLYDE HOTEL - 330 TIJERAS ST NW

Food Establishment Class C

Date: 09/16/2026 - #: CAC-Food-088216-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Result of a Complaint

• **Complaint**

- This inspection is a follow-up to previously substantiated complaints.

Facility is being reopened under an Unsatisfactory status. Facility will remain under an Unsatisfactory status for a minimum of five business days. CHPD inspector will reinspect facility within five business days while in operation to ensure safe food operations. PIC has had pest control conducted in the facility and provided the invoices for pest control treatment conducted. PIC has also replaced broken or damaged equipment with new equipment. CHPD inspector observed all plumbing concerns have been corrected and or repaired.

Violations corrected:

1. Imminent Health Hazard
2. Food Contact Surfaces Cleaned & Sanitized: Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch
3. Designated Areas: Designation-Dressing Areas and Lockers
4. In Use Utensils/Equipment, Properly Used & Stored: Good Repair and Proper Adjustment-Equipment
5. Insects, Rodents & Animals: Controlling Pests, If Present: Treatment

• **Complaint**

- This inspection is a follow-up to previously substantiated complaints.

Facility is re-opened under an Unsatisfactory status. PIC has provided photo documentation of corrections and repairs. Facility will remain under an Unsatisfactory status for a minimum of five business days. CHPD inspector will reinspect facility within five business days to ensure safe food operations.

CROWNE PLAZA ALBUQUERQUE - 1901 UNIVERSITY BLVD NE - Approved

CROWNE PLAZA ALBUQUERQUE - 1901 UNIVERSITY BLVD NE

Food Establishment Class B

Date: 09/15/2026 - #: RT-FOODEST-017256-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75°F with a contact time of 7 seconds.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Bar area
Concentration: 10 ppm

Violation: Plumbing

• **System Maintained in Good Repair**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed three compartment sink is not maintained in good repair or is not repaired by law. Observed three compartment sink found in disrepair by leaking faucet.

• **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain in bar area.

DIPPIN DOT ICE CREAM - 6600 MENAUL BLVD NE, #8001 - Approved

DIPPIN DOT ICE CREAM - 6600 MENAUL BLVD NE, #8001

Date: 09/17/2026 - #: CAC-Food-088969-2026 - Inspection Result: Approved

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

PIC has cleaned and sanitized ice machine

- Backflow Prevention, Air Gap

PIC has repaired and provided 2inch gap from floor drain.

- Temperature Measuring Devices, Ambient Air and Water-Accuracy PIC has placed cold holding thermometers inside all cold holding units.

DIPPIN DOT ICE CREAM - 6600 MENAUL BLVD NE, #8001

Food Establishment Class B

Date: 09/16/2026 - #: RT-FOODEST-088422-2026 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Behind cashier area Condition of the Location: Substantial debris buildup on ice dispensing area and surrounding covering area.

Violation: Plumbing

• **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the

introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at plumbing from grease trap to floor drain.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff. Owner provided an expired food handlers card

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures.

Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Inside cold holding freezers Thermometer Location: None available

DIPPIN DOT ICE CREAM - 6600 MENAUL BLVD NE, #8001

Food Establishment Class B

Date: 09/16/2026 - #: PT0155757 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75°F with a contact time of 7 seconds.

Observed no chlorine solution utilized to adequately achieve sanitization. PIC was packaging popcorn and cleaning machine with no chlorine sanitizer available at the time of inspection. PIC was not aware of how to prepare chlorine sanitizer. Inspector demonstrated how to prepare and verify parts per million.

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Behind cashier area Condition of the Location: Substantial debris buildup on ice dispensing area and surrounding covering area.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at plumbing from grease trap to floor drain.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff. Owner provided an expired food handlers card

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or

Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.
Observed no handwashing cleanser available at handwashing sink(s). Location: Hand washing sink next to three compartment sink

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s). Location: Hand washing sink next to three compartment sink

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.
Observed handwashing sink(s) was observed blocked or inaccessible. Location: Hand washing sink behind casher area Manner: Liquid measuring cup stored in sink basin

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures.
Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Inside cold holding freezers Thermometer Location: None available

Downtown Java Joe's - 906 PARK AVE SW - Unsatisfactory Re-Inspection required

Downtown Java Joe's - 906 PARK AVE SW

Food Establishment Class C

Date: 09/14/2026 - #: COM-FOODES-087403-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Cooling

• Cooling

- Observed cooling TCS food items fail to reach seventy (70) °F within two (2) hour period
Instructed PIC to rapidly reheat the (TCS) food item to 165°F; then, quickly cool the product down to 70°F within two (2) hour period using method(s) such as 1) Place the food in a shallow pan 2) Separate the food into smaller or thinner portions 3) Use rapid cooling equipment 4) Stir the food in a container placed in an ice/water bath 5) Use containers that facilitate heat transfer 6) Only partially cover product, if protected from overhead contamination.
Observed cooling TCS food items fail to reach seventy (70) °F within two (2) hour period. Location: Kitchen Area Food Items: Green Chile Sauce Temperature: 126f Time transpired: 3 plus hours pic stated he started cooling around 7:30am or 8:00 am when food measured 126f it was 11:30am
pic disposed of green chile at time of the inspection

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Drip Prevention and Adequacy

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.
Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface. Location: kitchen area where flat top grill is located Equipment: flat top grill

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- Food must be protected from contamination by storing the food in packages, covered containers, or wrappings. Instructed PIC to ensure that all food is covered during storage and to train employees on proper food storage procedures.
Observed food not protected from contamination during storage by not being covered in a container, by being in a package, or wrapping. hot holding food uncovered in steam table (pappas, red chile, green chile)

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: walk-in cooler Food Items: mesquite smoked turkey breast, heavy whip cream 51f, butter milk 50f, watermelon 52f, red Chile 51f, tofu 50f, black olives 51f, chopped green peppers 50f, diced tomatoes 53f, sliced mushrooms 52f, cole slaw 53f, chicken marinade 49f, stewed tomatoes 48f, red onions chopped 54f, smoked salmon 63f, chunks of cooked chicken 64f, turkey deli slices, deli sliced ham pic disposed of all food that was temped at 41 degrees or above in front of the inspector

• **Cold Holding Capacities-Equipment**

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: walk-in cooler Condition: walk-in cooler temping at 52 °F

Violation: Personal Cleanliness

• **Effectiveness-Hair Restraints**

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: cooking area Activity: cooking food

Violation: Hot & Cold-Water Availability & Pressure

• **Water Pressure**

- Inadequate water pressure could lead to situations that place the public health at risk such as improper handwashing or equipment operation. Water under pressure must be provided to all fixtures, equipment, and nonfood equipment that are required to use water.

Observed facility with inadequate water pressure Location: Hand washing sink Manner: when the dishwasher comes on the pressure goes very low on hand washing sink.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the floors, walls and ceiling throughout the kitchen area, dishwashing area and back dry good storage areas

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located kitchen area and front counter areas The surface was made out of Metal and plastic The condition of the surface had debris buildup on the light covers, exterior of ice machines and on both walk-in coolers vent covers

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: cold holding, hot holding, cooling and equipment logs

• **Calibration Logs**

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

EGOODNESS - 5701 GIBSON BLVD SE - Approved

EGOODNESS - 5701 GIBSON BLVD SE

Catering Class C

Date: 09/14/2026 - #: RT-FOODEST-001426-2025 - Inspection Result: Approved

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• **Honestly Presented**

- Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging.

Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants. Packaged Food: Strawberries

Location: Walk-in cooler

Condition: Package was damaged and unable to prevent moisture buildup. Person in charge voluntarily discarded the pack of strawberries.

EGOODNESS LLC - 5650 UNIVERSITY BLVD SE - Approved

EGOODNESS LLC - 5650 UNIVERSITY BLVD SE

Food Processor Class C

Date: 09/14/2026 - #: RT-PRC-087252-2026 - Inspection Result: Approved

FOODWORKS@NETFLIX - 5650 UNIVERSITY BLVD SE - Approved

FOODWORKS@NETFLIX - 5650 UNIVERSITY BLVD SE

Food Establishment Class C

Date: 09/14/2026 - #: PT0161139 - Inspection Result: Approved

Violation: Consumer Advisories

• Compliance with Food Law, Labeling

- Food labels serve as a primary means by which consumers can make informed decisions about their food selections and answer questions including ingredients, allergens, weight, and manufacturer. Food must be labeled as specified by 21 CFR 101 - Food labeling, and 9 CFR 317 Labeling, marking devices, and containers. This must include: (1) The common name of the food, or absent a common name, an adequately descriptive identity statement; (2) If made from two or more ingredients, a list of ingredients and sub ingredients in descending order of predominance by weight, including a declaration of artificial colors, artificial flavors and chemical preservatives, if contained in the food; (3) An accurate declaration of the net quantity of contents; (4) The name and place of business of the manufacturer, packer, or distributor; and (5) The name of the food source for each major food allergen contained in the food unless the food source is already part of the common or usual name of the respective ingredient. (6) Nutrition labeling as specified in 21 CFR 101 - Food Labeling and 9 CFR 317 Subpart B Nutrition Labeling, if required by law. (7) For any salmonid fish containing canthaxanthin or astaxanthin as a color additive, the labeling of the bulk fish container, including a list of ingredients, displayed on the retail container or by other written means, such as a counter card, that discloses the use of canthaxanthin or astaxanthin Instructed PIC to correct mislabeled food product prior to continuing to offer for sale.

Observed foods packaged inside the facility without necessary labeling. Location: Display case Food Items: Prepackaged sandwiches and salads

Manner: Products are missing nutrition information, allergen information, net weight, supplier name and address.

FRENCHISH - 3509 CENTRAL AVE NE - Approved

FRENCHISH - 3509 CENTRAL AVE NE

Food Establishment Class C

G & G Concessions Inc - 1601 AVENIDA CESAR CHAVEZ SE - Conditional Approved

G & G Concessions Inc - 1601 AVENIDA CESAR CHAVEZ SE

Food Establishment Class C

Date: 09/17/2026 - #: RT-FOODEST-089001-2026- Inspection Result: Conditional Approved

Violation: Ventilation and Hood Systems

• Cleaning Ventilation Systems, Nuisance and Discharge Prohibition

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: In service area

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food commercially prepared and opened, held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility.

Observed ready-to-eat time and temperature controlled for safety food commercially prepared opened in the facility with no date marking indicators. Location: Walk-in Cooler Food Items: Strawberry topping, 3 containers Expiration Dates: None Present

Violation: Maintenance and Operation

• Cutting Surfaces

- Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may buildup or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.

Observed cutting surface with deep scratches and scoring which limit the ability to be effectively cleaned and sanitized. Location: Drying Rack Type: Plastic type material

Violation: Storage

• In-Use Utensils, Between-Use Storage

- Multiuse utensils which have been cleaned and sanitized can become contaminated with pathogens which can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. Instructed PIC to clean and sanitize utensils prior to continuing use, must be maintained cleaned in a regular schedule as prescribed by the code and to store items so that the risk of contamination prior to use is minimized.

Observed utensils during a pause in use stored incorrectly. Utensil was not stored on a clean and sanitized portion of the equipment. Utensil Type: Funnel used for chip ice for snow cones type food items, ice scoop wet stored on cardboard box with single use articles Condition of the Location: cone/funnel was stored directly inside the ice

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an

environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed utensils were not air dried and were wet stacked. Location: Storage Rack Utensil Type: Pans such as 1/2 pans Manner: wet stacked

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with inadequate control methods in place. Location: Behind equipment and storage, at walk-in cooler Pest Type: Rodent Droppings

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed all food employee without any hair restraints. Location: In kitchen and service area Activity: Handling open TCS foods

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed throughout the facility in the back service area, walls in between and out to walk way in disrepair by having numerous gaps, holes, cracks, and crevices. In addition, around plumbing and electrical fixtures

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed faucet at 3 compartment sink is not maintained in good repair or is not repaired by law. Observed faucet found in disrepair by leaking.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at 3 compartment sink.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the floors, walls and ceiling.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of calibration of thermometer. TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment is not utilizing temperature logs for TCS foods items, or calibration logs for thermometers.

G & G Concessions Inc - 1601 AVENIDA CESAR CHAVEZ SE

Food Establishment Class C

Date: 09/17/2026 - #: RT-FOODEST-107358-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Sanitizer wiping cloth buckets Concentration: below 200ppm Temperature: 74°F

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with inadequate control methods in place. Location: Behind equipment and storage, at walk-in cooler Pest Type: Rodent Droppings

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food commercially prepared and opened, held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility.

Observed ready-to-eat time and temperature controlled for safety food commercially prepared opened in the facility with no date marking indicators. Location: Walk-in Cooler Food Items: Strawberry topping, 3 containers Expiration Dates: None Present

Violation: Maintenance and Operation

• Cutting Surfaces

- Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may buildup or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.

Observed cutting surface with deep scratches and scoring which limit the ability to be effectively cleaned and sanitized. Location: Drying Rack Type: Plastic type material

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed faucet at 3 compartment sink is not maintained in good repair or is not repaired by law. Observed faucet found in disrepair by leaking.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at 3 compartment sink.

Violation: Ventilation and Hood Systems

• Cleaning Ventilation Systems, Nuisance and Discharge Prohibition

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: In service area

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not self-closing.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items intended to be using ice for cold holding measuring above 41°F. Location: By fryer area Food Items: funnel cake batter Temperature: 63°F

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed all food employee without any hair restraints. Location: In kitchen and service area Activity: Handling open TCS foods

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority

for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.
Observed that the facility was operating with an expired permit.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors, walls and ceiling.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- Multiuse utensils which have been cleaned and sanitized can become contaminated with pathogens which can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. Instructed PIC to clean and sanitize utensils prior to continuing use, must be maintained cleaned in a regular schedule as prescribed by the code and to store items so that the risk of contamination prior to use is minimized.
Observed utensils during a pause in use stored incorrectly. Utensil was not stored on a clean and sanitized portion of the equipment. Utensil Type: Funnel used for chip ice for snow cones type food items, ice scoop wet stored on cardboard box with single use articles Condition of the Location: cone/funnel was stored directly inside the ice

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed utensils were not air dried and were wet stacked. Location: Storage Rack Utensil Type: Pans such as 1/2 pans Manner: wet stacked

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair. Observed throughout the facility in the back service area, walls in between and out to walk way in disrepair by having numerous gaps, holes, cracks, and crevices. In addition, around plumbing and electrical fixtures

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of calibration of thermometer, TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment is not utilizing temperature logs for TCS foods items, or calibration logs for thermometers.

HELENS BAKERY - 1014 SAN PEDRO DR NE - Approved

HELENS BAKERY - 1014 SAN PEDRO DR NE

Food Establishment Class C

Date: 09/14/2026 - #: RT-FOODEST-080926-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is a follow-up from a complaint received by the Department.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- When cleaning is accomplished by spraying or flushing, coving and sealing of the floor/wall junctures is required to provide a surface that is conducive to water flushing. Grading of the floor to drain allows liquid wastes to be quickly carried away, thereby preventing pooling which could attract pests such as insects and rodents or contribute to problems with certain pathogens such as *Listeria monocytogenes*.
Observed floor and wall juncture covering missing cove and damage sheetrock throughout several locations in facility.

IL VICINO INTERNATIONAL LLC - 10701 COORS RD NW - Approved

IL VICINO INTERNATIONAL LLC - 10701 COORS RD NW

Food Establishment Class C

Date: 09/14/2026 - #: COM-FOODES-087319-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of cooking equipment and pans shall be cleaned at a frequency to prevent the buildup of soil residues and encrusted grease deposits. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Deli Meat Slicer.
Location: Kitchen prep area.

Condition of the Location: Dry soil residue on the back of the deli slicer.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Filters

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.
Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating food.
Location: Hoods and filter vents.
with substantial grease and soil buildup.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.
Observed doors to the outside that are left open.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Front prep top coolers.
Food Items: Ham 47. °F, Sliced Turkey 56°F, Shrimp 44°F, Temperature, Sauteed mushrooms 50°F Chicken cooked chunks 65°F.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- Food, clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Food, clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, and protected from contamination. Instructed PIC to store items so that the risk of contamination prior to use is minimized.
Observed Flour scoop stored improperly,
Scoops stored with handles stored with handles in the flour.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctions, Coved, and Enclosed or Sealed

- Wall and ceiling covering materials shall be attached so that they are EASILY CLEANABLE. Instructed person in charge to replace or clean and sanitize area of concern so that it is maintained or is easily cleanable.
Observed Base coving and floors is not easily cleanable. The surface was made out of vinyl coating damaged and missing. Wall above sink with a 2x2 inch hole.

ISOTOPES PARK - OVATIONS - 1601 AVENIDA CESAR CHAVEZ SE – Approved

ISOTOPES PARK - OVATIONS – Pecos River Café - 1601 AVENIDA CESAR CHAVEZ SE

Food Establishment Class C

Date: 09/17/2026 - #: RT-FOODEST-097635-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine
Location: Back of house
Condition of the Location: Buildup of black organic matter near ice chute

Violation: Pest Control

• Insect Control Devices, Design and Installation

- Exposed food and food-contact surfaces must be protected from contamination by insects or insect parts. Installation of the device over food preparation areas or in close proximity to exposed food and/or food-contact surfaces could allow dead insects and/or insect parts to be impelled by the electric charge, fall, or be blown from the device onto food or food-contact surfaces. Instructed PIC to ensure that insect control devices do not cause more contamination than they prevent by placing them away from food and the equipment and utensils used for food and ensuring that they are constructed in a way that contains insects and their parts.
Observed an insect control device installed in a way that does not prevent insects or insect fragments from contaminating food or clean equipment, utensils, linens, or single-service and single-use articles.
Location: North wall of facility
Type of Device: Electrocutation and sticky device
Contamination: Open bag of popcorn located under pest control device

Violation: Testing Devices

• **Sanitizing Solutions, Testing Devices**

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no/expired testing kit or other device to measure the concentration of chemical sanitizing solution.

ISOTOPES PARK - OVATIONS – Batters Up - 1601 AVENIDA CESAR CHAVEZ SE

Food Establishment Class C

Date: 09/17/2026 - #: RT-FOODEST-097600-2025 - Inspection Result: Approved

Violation: Hot Holding & Reheating

• **Time/Temperature Control for Safety Food, Hot Holding**

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.

Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Chicken tender (131°F), green chile (123°F), queso (120°F)

Violation: Cold Holding

• **Time/Temperature Control for Safety Food, Cold Holding**

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Rear make station (ice bath)

Food Items: Sliced cheese (53°F), sliced tomatoes (56°F), salsa (47°F), guacamole (47°F)

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the kitchen and walk-in cooler doors under storage shelving.

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All hot held TCS foods Activity of the Food: Stored, thawed, cooled□

ISOTOPES PARK – OVATIONS – Santa Fe Trail/Pecos River - 1601 AVENIDA CESAR CHAVEZ SE

Food Establishment Class C

Date: 09/17/2026 - #: RT-FOODEST-097648-2025 - Inspection Result: Approved

ISOTOPES PARK - OVATIONS – Sugar Shack - 1601 AVENIDA CESAR CHAVEZ SE

Food Establishment Class C

Date: 09/17/2026 - #: CAC-Food-088968-2026 - Inspection Result: Approved

Facility was able to correct one violation during the inspection by having service provider come and make repairs to dispensing equipment:

Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

Facility did not have yellow Conditional Approved Sticker placed and will be in grade of Approved.

ISOTOPES PARK - OVATIONS – Sugar Shack - 1601 AVENIDA CESAR CHAVEZ SE

Food Establishment Class C

Date: 09/17/2026 - #: RT-FOODEST-097647-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Sanitizer wiping cloth buckets Concentration: below 200ppm Temperature: 74°F

Violation: Pest Control

• **Controlling Pests, If Present: Treatment**

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with inadequate control methods in place. Location: Behind equipment and storage Pest Type: Rodent Droppings

Violation: Use Limitations

• **Wiping Cloths, Use Limitation**

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces

with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed wiping cloths stored on prep table outside of concentration bucket.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed faucet at 3 compartment sink is not maintained in good repair or is not repaired by law. Observed faucet found in disrepair by leaking.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at 3 compartment sink.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not self-closing.

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

Observed food temperature measuring devices were not provided or readily accessible.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the floors, walls and ceiling.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed throughout the facility in the back service area, walls in between and out to walk way in disrepair by having numerous gaps, holes, cracks, and crevices.

LITTLE CAESARS - 10020 central AVE SE – Conditional Approved

LITTLE CAESARS - 10020 central AVE SE

Food Establishment Class C

Date: 09/14/2026 - #: CAC-Food-087401-2026 - Inspection Result: Conditional Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Facility was able to take corrective actions during in the inspection, correcting two violations. These corrections bring their grade to a Conditional Approved. Re Unsatisfactory grade sticker was not placed.

Facility corrected:

-Sanitizers, Criteria-Chemicals by diluting sanitizer

-Using a Handwashing Sink-Operation and Maintenance

LITTLE CAESARS - 10020 central AVE SE

Food Establishment Class C

Date: 09/14/2026 - #: COM-FOODES-087373-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Result of a Complaint

- **Complaint**

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment/utensil food-contact surface with the buildup of soil residues. Utensil/Equipment Type: can opener blade Location Condition of the Location: Heavy debris buildup on the can opener blade, and the can opener housing

Violation: Time as Public Health Control

- **Time as a Public Health Control, Written Procedures, Labeling**

- Instructed PIC that food must be labeled indicating when the food was removed from temperature control or indication of the maximum holding time. Reminded that the time must be appropriately indicated as this is the sole method being utilized for the protection and safety of the food.

Observed no marking or identification signifying when the food was removed from temperature control or indication of the maximum holding time. Location: Speed racks Type of Food: Pizza to be cooked with items such as cheese, marinara and pepperonis

Violation: Plumbing

- **System Maintained in Good Repair, Repaired According to Law**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed piping from sinks is not maintained in good repair or is not repaired by law. Observed piping from underneath the prep sink, and 3 compartment sink found in disrepair by leaking grey water onto the floor.

- **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at prep sink and 3 compartment sink.

Violation: Physical Facilities

- **Outer Openings, Protected**

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors/window so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door/window when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors/drive through window to the outside that are not tight fitting, light can be seen at the edges.

Violation: Storage

- **Food Storage-Preventing Contamination from the Premises**

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.

Observed food stored improperly less than six (6) inches off the floor. Location: in the mixing area Food Item: Bags of open flour stored on the ground

Violation: Designated Areas

- **Designation-Dressing Areas and Lockers**

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility was not utilizing, with personal effects such as headphone case, keys, sunglasses etc., lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Operation and Maintenance

- **Using a Handwashing Sink-Operation and Maintenance**

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

Observed handwashing sink(s) was observed blocked or inaccessible. Location: Handwashing sink on east side of kitchen Manner: Speed rack filled with to be

cooked pizzas was in front of the sink making it inaccessible.

Violation: Warewashing Temperature and Concentration

• Sanitizers, Criteria-Chemicals

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR.

Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Quat Location: Sanitizer bucket Concentration: Over 400ppm

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Multiple employees in kitchen Activity: Handling open TCS foods

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed heavy, significant buildup and debris on the floor drains.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under ☐☐ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food. Utensil Type: cup Location: inside container of cheese Condition of the Location: utensil had no handle was stored directly in the food

LITTLE CAESARS 511 - 2801 EUBANK BLVD NE - Unsatisfactory Re-Inspection required

LITTLE CAESARS 511 - 2801 EUBANK BLVD NE

Food Establishment Class C

Date: 09/18/2026 - #: COM-FOODES-088533-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food commercially prepared and opened, held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility.

Observed ready-to-eat time and temperature controlled for safety food commercially prepared opened in the facility with no date marking indicators. Location: Underneath cold holding unit Food Items: Cubed ham, chopped green chile, cooked sausage, sliced pepperoni, chopped vegetables Expiration Dates: None available

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed plumbing at three compartment sink is not maintained in good repair or is not repaired by law. Observed found in disrepair by substantial leaks at faucet and spray nozzle at three compartment sinks.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Plastic Lexan with flour Location: under prep table

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Hand washing sink in pizza cooking area.

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

Observed handwashing sink(s) without a handwashing sign. Location: Hand washing sinks in prep line and pizza cooking area

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

Observed handwashing sink(s) was observed blocked or inaccessible. Location: Hand washing sink next to three compartment sink Manner: baking sheet stored on top of hand-washing sink basin.

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures.

Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Walk-in refrigerators, cold holding units Thermometer Location: None available

The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

Observed food temperature measuring devices were not provided or readily accessible.

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Preparing pizzas Inappropriate Jewelry Observed: Bracelets and watches

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food;

clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints. Observed a food employee without proper hair restraints. Location: Food preparation areas Activity: Preparing pizzas, cooking pizzas, and preparing dough

Violation: Operations

• Permit Posted

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Instructed PIC to log into ABQ-Plan to obtain permit and print out permit to post inside facility.
Observed that no food permit was posted at the facility.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked meats, prepared vegetables and dairy products Activity of the Food: Stored and received

Long Cao LLC DBA Dragon Sushi - 6904 MENAUL BLVD NE, STE D - Approved

Long Cao LLC DBA Dragon Sushi - 6904 MENAUL BLVD NE, STE D

Food Establishment Class D

Date: 09/14/2026 - #: COM-FOODES-087200-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.
Observed wiping cloths improperly used. Observed wiping cloths used for cleaning and sanitizing.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date marking.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Walk-in refrigerator Food Items: Cooked fish and wasabi Expiration Dates: None available on these food items

Violation: Maintenance and Operation

• Cutting Surfaces

- Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may buildup or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.
Observed cutting surface with deep scratches and scoring which limit the ability to be effectively cleaned and sanitized. Location: In back of facility above cold holding make prep table Type: Cutting board

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: White rolling food storage bins Location: In back of facility

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.
Observed food stored improperly less than six (6) inches off the floor. Location: In cooking area Food Item: Raw meat stored in plastic bag inside plastic container directly on the floor

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints. Observed a food employee without proper hair restraints. Location: Sushi preparation area Activity: Preparing Sushi

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to remove and replace with material that is smooth and easily cleanable. Observed floor is not smooth and easily cleanable. The surface was located inside kitchen under dish machine The surface was made out of concrete.

MCALISTERS DELI - 2200 LOUISIANA BLVD NE, A - Approved

MCALISTERS DELI - 2200 LOUISIANA BLVD NE, A

Food Establishment Class C

Date: 09/17/2026 - #: COM-FOODES-088855-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions. Observed floor drain in mop sink is not maintained in good repair or is not repaired by law. Observed mop sink floor drain found in disrepair by missing floor drain cover.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained. Observed handwashing sink(s) was observed blocked or inaccessible. Location: Main kitchen line Manner: Large bus cart stored directly in front of hand washing sink preventing access to hand washing sink.

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying. Observed a soiled mop not in use, stored directly inside mop sink basin.

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris. Observed buildup and debris on the walls behind cold holding prep table areas.

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to remove and replace with material that is smooth and easily cleanable. Observed flooring throughout facility is not smooth and easily cleanable. The surface was flooring located In food preparation areas and dish washing areas Floors that are of smooth, durable construction and that are nonabsorbent are more easily cleaned. Requirements and restrictions regarding floor coverings, utility lines, and floor/wall junctures are intended to ensure that regular and effective cleaning is possible and that insect and rodent harborage is minimized. Instructed PIC to install floors that are non-absorbent. Observed floor is constructed of flooring with holes making it rough and/or absorbent.

MOMS CAFE - 505 MARQUETTE AVE NW - Approved

MOMS CAFE - 505 MARQUETTE AVE NW

Date: 09/17/2026 - #: CAC-Food-088811-2026 - Inspection Result: Approved

MYKONOS CAFE - 5900 EUBANK ST NE, E18 - Approved

MYKONOS CAFE - 5900 EUBANK ST NE, E18

Food Establishment Class C

Date: 09/18/2026 - #: COM-FOODES-089499-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Walk-in cooler

Food Items: Block of blue cheese Expiration Dates: No dates

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed faucet at ware wash station is not maintained in good repair or is not repaired by law. Observed faucet at ware wash station found in disrepair by leaking.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain near ware wash station.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located throughout kitchen

The surface was made out of stainless steel, plastic and metal

The condition of the surface was buildup of grease and food debris

MYKONOS CAFE - 5900 EUBANK ST NE, E18

Food Establishment Class B

Date: 09/18/2026 - #: COM-FOODES-089498-2026 - Inspection Result: Approved

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain.

NO BULL PRIME MEATS LLC - 5368 PAN AMERICAN FWY NE - Approved

NO BULL PRIME MEATS LLC - 5368 PAN AMERICAN FWY NE
Food Processor Class D
Date: 09/14/2026 - #: PT0160234 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

PAPA JOHNS' PIZZA - 417 TRAMWAY BLVD NE, 4 - Conditional Approved

PAPA JOHNS' PIZZA - 417 TRAMWAY BLVD NE, 4
Food Establishment Class C
Date: 09/16/2026 - #: RT-FOODEST-088401-2026 - Inspection Result: Conditional Approved

Violation: Maintenance and Operation

• Cutting Surfaces

- Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may buildup or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.
Observed cutting surface with deep scratches and scoring which limit the ability to be effectively cleaned and sanitized. Location: Table by three compartment sink Type: white cutting boards

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed plumbing on three compartment sink is not maintained in good repair or is not repaired by law. Observed piping found in disrepair by leaking grey water directly on to the floor. This is also preventing Employees from having three compartment sink set up with the wash rinse sanitize sinks.

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed Floor drain on three compartment sink is not maintained in good repair or is not repaired by law. Observed floor drain found in disrepair by missing protective mesh or dome cover.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the edges. Back receiving door

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Observed employee drinks on prep table and half eaten

subway sandwich placed in walk-in directly onto of pan of cheese

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.
Observed handwashing sink(s) without a handwashing sign. Location: Handwashing sink by three compartment sink and employee restrooms

Violation: Lighting

• Light Bulbs, Protective Shielding

- Instructed PIC to make repairs necessary so that light bulbs are shielded, coated, or made otherwise shatter-resistant to prevent the contamination of exposed food, clean equipment, utensils, linens, or unwrapped single-service-single-use articles.
Observed light bulbs with no protective shielding, coating or by other means shatter-resistant. Location: front of kitchen by front counter Manner: Emergency light directly over pizza pans missing cover

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed a soiled mop not in use, stored directly on the floor.

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floor under three compartment sink around grease trap

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under ☐☐ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Food service scoops Location: prep top cooler on main cook line Condition of the Location: scoops stored in food containers with handles of scoops making contact with food product inside containers

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: stored Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

PAPA JOHNS' PIZZA - 417 TRAMWAY BLVD NE, 4

Food Establishment Class C

Date: 09/16/2026 - #: RT-FOODEST-049156-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: spray bottle and three compartment sink Concentration: 100ppm and 0 ppm

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.
Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottles Alleged Material: sanitizer and unknown chemical

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Prep top cooler on main cook line Food Items: Chicken wings, Chicken tenders, Sauces and Cheese sticks Expiration Dates: none

Violation: Maintenance and Operation

• Cutting Surfaces

- Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may buildup or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.

Observed cutting surface with deep scratches and scoring which limit the ability to be effectively cleaned and sanitized. Location: Table by three compartment sink Type: white cutting boards

Violation: Time as Public Health Control

• Time as a Public Health Control, Written Procedures, Labeling

- Instructed PIC that foods when they have reached the time limit may no longer be offered for consumption and to retrain staff on proper procedures for using time as a public health control method. PIC voluntarily discarded products exceeding the time limit.

Observed food using time as a public health control exceeding the maximum time period allowed for TCS food held outside of temperature control. Location: main cook line Type of Food: Pizza Sauce and Pepperoncini Temperature: 67°F, 62°F

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed plumbing on three compartment sink is not maintained in good repair or is not repaired by law. Observed piping found in disrepair by leaking grey water directly on to the floor. This is also preventing Employees from having three compartment sink set up with the wash rinse sanitize sinks.

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Floor drain on three compartment sink is not maintained in good repair or is not repaired by law. Observed floor drain found in disrepair by missing protective mesh or dome cover.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges. Back receiving door

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Observed employee drinks on prep table and half eaten subway sandwich placed in walk-in directly onto of pan of cheese

Violation: Operation and Maintenance

• **Handwashing Cleanser, Availability**

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.
Observed no handwashing cleanser available at handwashing sink(s). Location: Handwashing sink by three compartment sink

• **Handwashing Signage**

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.
Observed handwashing sink(s) without a handwashing sign. Location: Handwashing sink by three compartment sink and employee restrooms

Violation: Lighting

• **Light Bulbs, Protective Shielding**

- Instructed PIC to make repairs necessary so that light bulbs are shielded, coated, or made otherwise shatter-resistant to prevent the contamination of exposed food, clean equipment, utensils, linens, or unwrapped single-service-single-use articles.
Observed light bulbs with no protective shielding, coating or by other means shatter-resistant. Location: front of kitchen by front counter Manner: Emergency light directly over pizza pans missing cover

Violation: Physical Facilities, Cleaning

• **Drying Mops**

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed a soiled mop not in use, stored directly on the floor.

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floor under three compartment sink around grease trap

Violation: Storage

• **In-Use Utensils, Between-Use Storage**

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Food service scoops Location: prep top cooler on main cook line Condition of the Location: scoops stored in food containers with handles of scoops making contact with food product inside containers

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: stored
Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

Patel DT LLC - Del Taco - 10015 CENTRAL AVE NE - Approved

Patel DT LLC - Del Taco - 10015 CENTRAL AVE NE

Food Establishment Class C

Date: 09/14/2026 - #: RT-FOODEST-047836-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Back of kitchen by office Condition of the Location: Yellow and brown buildup on inside of ice machine.

Violation: Plumbing

• **System Maintained in Good Repair**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Floor drains at three compartment sink and prep sink by three compartment sink are not maintained in good repair or is not repaired by law. Observed Floor drains found in disrepair by missing protective dome or mesh cover

• **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain on main cook line by walk-in cooler

Violation: Physical Facilities

• **Outer Openings, Protected**

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges. Front double doors

Violation: Designated Areas

• **Designated Areas-Employee Accommodations for eating/drinking/smoking**

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Observed employee drink on prep table and in walk-in cooler on rack directly above the facility food items

Violation: Storage

• **In-Use Utensils, Between-Use Storage**

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under

□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Scoop Location: back of kitchen by prep sink Condition of the Location: Scoop stored in food container with handle of scoop directly touching food product inside the container

• **Equipment and Utensils, Air-Drying Required**

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: Not air dried and stacked wet with water in between pans

Perico's De Albuquerque - 1601 AVENIDA CESAR CHAVEZ SE - Conditional Approved

Perico's De Albuquerque - 1601 AVENIDA CESAR CHAVEZ SE

Food Establishment Class C

Date: 09/17/2026 - #: RT-FOODEST-088986-2026 - Inspection Result: Conditional Approved

Violation: Pest Control

• **Insect Control Devices, Design and Installation**

- Exposed food and food-contact surfaces must be protected from contamination by insects or insect parts. Installation of the device over food preparation areas or in close proximity to exposed food and/or food-contact surfaces could allow dead insects and/or insect parts to be impelled by the electric charge, fall, or be blown from the device onto food or food-contact surfaces. Instructed PIC to ensure that insect control devices do not cause more contamination than they prevent by placing them away from food and the equipment and utensils used for food and ensuring that they are constructed in a way that contains insects and their parts.

Observed an insect control device installed in a way that does not prevent insects or insect fragments from contaminating food or clean equipment, utensils, linens, or single-service and single-use articles. Location: Installed inside shelving unit above plastic wrap, sheet pans, next to agua frescas containers Type of Device: electrocution

• **Controlling Pests, If Present: Treatment**

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents,

and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with inadequate control methods in place. Location: Behind equipment and storage Pest Type: Rodent Droppings

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed faucet at 3 compartment sink is not maintained in good repair or is not repaired by law. Observed faucet found in disrepair by leaking.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at 3 compartment sink.

Violation: Ventilation and Hood Systems

• Cleaning Ventilation Systems, Nuisance and Discharge Prohibition

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: In kitchen/service area

Violation: Installation

• Handwashing Sinks, Installation, Steam, Self-closing, Automatic

- A self-closing, slow-closing, or metering faucet shall provide a flow of water for at least 15 seconds without a need to reactive the faucet. Instructed PIC to repair or replace faucet so that it has a stream of water for at least 15 seconds to help ensure proper washing of hands, and re-contamination.

Observed a self-closing, slow-closing or metered faucet at the handwashing sink fail to provide a flow of water for 15 seconds without reactivation of the faucet. Location: Food Service Manner: Water would almost instantly would turn off, could barely keep water on for longer than 2 seconds.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not self-closing.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

Observed handwashing sink(s) was observed blocked or inaccessible. Location: Main food service area Manner: Blocked with chair

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Handling open TCS food Inappropriate Jewelry Observed: Rings, Bracelets

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed all food employee without any hair restraints. Location: In kitchen and service area Activity: Handling open TCS foods

• Eating, Drinking, or Using Tobacco Products

- A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area and should be in a cup with a lid and straw.

Observed a food employee with improper drinks, stored on food preparation tables.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands. Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: When changing tasks, and gloves, handling open TCS food

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the floors, walls and ceiling.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- Multiuse utensils which have been cleaned and sanitized can become contaminated with pathogens which can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. Instructed PIC to clean and sanitize utensils prior to continuing use, must be maintained cleaned in a regular schedule as prescribed by the code and to store items so that the risk of contamination prior to use is minimized.

Observed utensils during a pause in use stored incorrectly. Utensil was not stored on a clean and sanitized portion of the equipment. Utensil Type: ice scoop wet stored on cardboard box with single use articles

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed utensils were not air dried and were wet stacked. Location: Storage Rack Utensil Type: pans such as 1/2 pans Manner: wet stacked/nested

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on sides of equipment, inside refrigerators, cooking equipment, and piping The condition of the surface was soiled with debris buildup

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed throughout the facility in the back service area, walls in between and out to walk way in disrepair by having numerous gaps, holes, cracks, and crevices.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of calibration of thermometer, TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items, calibration logs for thermometers.

Perico's De Albuquerque - 1601 AVENIDA CESAR CHAVEZ SE

Food Establishment Class C

Date: 09/17/2026 - #: RT-FOODEST-051827-2025 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Sanitizer wiping cloth buckets Concentration: below 200ppm Temperature: 74°F

Violation: Poisonous and Toxic/Chemical Substances

• Separation-Storage

- The storage of poisonous or toxic materials directly above or adjacent to food could result in contamination of the food from spillage. Poisonous or toxic materials must be stored so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by separating the poisonous or toxic materials by spacing or partitioning; and storing them in an area that is not above food, equipment, utensils, linens, and single-service or single-use articles. Instructed PIC to move chemicals to an approved location.

Observed poisonous or toxic materials stored in a manner that has the potential to contaminate single-service and single-use articles. Poisonous/Toxic Substance:

Spray cleaner Location: Inside drawer with misc. items including single use straws.

Violation: Pest Control

• Insect Control Devices, Design and Installation

- Exposed food and food-contact surfaces must be protected from contamination by insects or insect parts. Installation of the device over food preparation areas or in close proximity to exposed food and/or food-contact surfaces could allow dead insects and/or insect parts to be impelled by the electric charge, fall, or be blown from the device onto food or food-contact surfaces. Instructed PIC to ensure that insect control devices do not cause more contamination than they prevent by placing them away from food and the equipment and utensils used for food and ensuring that they are constructed in a way that contains insects and their parts.

Observed an insect control device installed in a way that does not prevent insects or insect fragments from contaminating food or clean equipment, utensils, linens, or single-service and single-use articles. Location: Installed inside shelving unit above plastic wrap, sheet pans, next to aqua frescas containers Type of Device: electrocution

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with inadequate control methods in place. Location: Behind equipment and storage Pest Type: Rodent Droppings

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed faucet at 3 compartment sink is not maintained in good repair or is not repaired by law. Observed faucet found in disrepair by leaking.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at 3 compartment sink.

Violation: Ventilation and Hood Systems

• Cleaning Ventilation Systems, Nuisance and Discharge Prohibition

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: In kitchen/service area

Violation: Installation

• Handwashing Sinks, Installation, Steam, Self-closing, Automatic

- A self-closing, slow-closing, or metering faucet shall provide a flow of water for at least 15 seconds without a need to reactive the faucet. Instructed PIC to repair or replace faucet so that it has a stream of water for at least 15 seconds to help ensure proper washing of hands, and re-contamination.

Observed a self-closing, slow-closing or metered faucet at the handwashing sink fail to provide a flow of water for 15 seconds without reactivation of the faucet. Location: Food Service Manner: Water would almost instantly would turn off, could barely keep water on for longer than 2 seconds.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not self-closing.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

Observed handwashing sink(s) was observed blocked or inaccessible. Location: Main food service area Manner: Blocked with chair

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item

or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Handling open TCS food Inappropriate Jewelry Observed: Rings, Bracelets

• **Effectiveness-Hair Restraints**

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints. Observed all food employee without any hair restraints. Location: In kitchen and service area Activity: Handling open TCS foods

• **Eating, Drinking, or Using Tobacco Products**

- A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area and should be in a cup with a lid and straw.

Observed a food employee with improper drinks, stored on food preparation tables.

Violation: Hands Clean & Properly Washed

• **When to Wash**

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: When changing tasks, and gloves, handling open TCS food

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the floors, walls and ceiling.

Violation: Storage

• **In-Use Utensils, Between-Use Storage**

- Multiuse utensils which have been cleaned and sanitized can become contaminated with pathogens which can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. Instructed PIC to clean and sanitize utensils prior to continuing use, must be maintained cleaned in a regular schedule as prescribed by the code and to store items so that the risk of contamination prior to use is minimized.

Observed utensils during a pause in use stored incorrectly. Utensil was not stored on a clean and sanitized portion of the equipment. Utensil Type: ice scoop wet stored on cardboard box with single use articles

• **Equipment and Utensils, Air-Drying Required**

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed utensils were not air dried and were wet stacked. Location: Storage Rack Utensil Type: pans such as 1/2 pans Manner: wet stacked/nested

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on sides of equipment, inside refrigerators, cooking equipment, and piping The condition of the surface was soiled with debris buildup

Violation: Physical Facilities, Construction and Repair

• **Repairing-Premises, Structures, Attachments, and Fixtures-Methods**

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed throughout the facility in the back service area, walls in between and out to walk way in disrepair by having numerous gaps, holes, cracks, and crevices.

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of calibration of thermometer, TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items, calibration logs for thermometers.

Peter Defries Corporation DBA Dion's - 1601 AVENIDA CESAR CHAVEZ SE - Conditional Approved

Peter Defries Corporation - 1601 AVENIDA CESAR CHAVEZ SE

Food Establishment Class C

Date: 09/17/2026 - #: RT-FOODEST-051962-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine chute Location: Rear kitchen

Condition of the Location: Soiled with debris and organic buildup

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food commercially prepared and opened, held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food commercially prepared opened in the facility with no date marking indicators. Location: Walk-in cooler

Food Items: Chopped produce, chopped onions, sliced cheese, turkey, chopped tomato, pre-packaged prepared salad. Expiration Dates: Not available

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Bulk powdered ingredients

Location: Rear prep area

Violation: Consumer Advisories

• Compliance with Food Law, Labeling

- Food labels serve as a primary means by which consumers can make informed decisions about their food selections and answer questions including ingredients, allergens, weight, and manufacturer. Food must be labeled as specified by 21 CFR 101 - Food labeling, and 9 CFR 317 Labeling, marking devices, and containers. This must include: (1) The common name of the food, or absent a common name, an adequately descriptive identity statement; (2) If made from two or more ingredients, a list of ingredients and sub ingredients in descending order of predominance by weight, including a declaration of artificial colors, artificial flavors and chemical preservatives, if contained in the food; (3) An accurate declaration of the net quantity of contents; (4) The name and place of business of the manufacturer, packer, or distributor; and (5) The name of the food source for each major food allergen contained in the food unless the food source is already part of the common or usual name of the respective ingredient. (6) Nutrition labeling as specified in 21 CFR 101 - Food Labeling and 9 CFR 317 Subpart B Nutrition Labeling, if required by law. (7) For any salmonid fish containing canthaxanthin or astaxanthin as a color additive, the labeling of the bulk fish container, including a list of ingredients, displayed on the retail container or by other written means, such as a counter card, that discloses the use of canthaxanthin or astaxanthin Instructed PIC to correct mislabeled food product prior to continuing to offer for sale.

Observed foods packaged inside the facility without necessary labeling. Location: Display cooler Food Items: Pre-packaged salad and fruit cups

Manner: No labeling including ingredients and allergens available

PIZZA HUT - 4400 WYOMING BLVD NW - Approved

PIZZA HUT - 4400 WYOMING BLVD NW

Food Establishment Class C

Date: 09/14/2026 - #: RT-FOODEST-083560-2025 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Maintenance and Operation

• Warewashing Equipment, Cleaning Frequency

- During operation, warewashing equipment is subject to the accumulation of food wastes and other soils or sources of contamination. In order to ensure the proper cleaning and sanitization of equipment and utensils, it is necessary to clean the surface of warewashing machines, three (3) compartment sinks, drainboards, and laundry facilities for wiping cloths before use, every twenty-four (24) hours if used, and periodically throughout the day to prevent buildup of soils or other sources of contamination. Instructed PIC to clean the warewashing equipment and retain employees on the cleaning schedule.

Observed soiled or dirty warewashing machine. Location: Back of kitchen Condition: Stainer basket full and clogged

Violation: Pest Control

• **Removing Dead or Trapped Birds, Insects, Rodents and other Pest**

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps. Location: By back door and mop sink

Pest Type: cockroach and rodent droppings Pest Condition: dead and dying

Number of Pests Present: 9 cockroaches

Violation: Plumbing

• **System Maintained in Good Repair, Repaired According to Law**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Ware washing machine is not maintained in good repair or is not repaired by law. Observed Ware washing machine found in disrepair by leaking grey water directly onto floor beneath due to pipe leaking and dish machine strainer basket clogged

Violation: Training Records

• **Food Handler Cards**

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Ventilation and Hood Systems

• **Heating, Ventilation, Air Conditioning System Vents**

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Kitchen area

Violation: Physical Facilities

• **Outer Openings, Protected**

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Personal Cleanliness

• **Prohibition-Jewelry**

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry

Observed: Wrist jewelry

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the floors under equipment and on walls behind ware washing machine and prep table by walk-in cooler

Violation: Storage

• **In-Use Utensils, Between-Use Storage**

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under ☐ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Portion cup and food scoop Location: Main cook line prep top cooler and Crushed red pepper container by Front counter Condition of the Location: Scoop and portion cup stored in food containers with handle directly touching the food product inside

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Observed nonfood contact surface with the buildup of soil residues. The surface was located on the pizza oven. The condition of the surface was Heavy Grease and carbon buildup on inside of pizza oven.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported. Observed that the food establishment does not have temperature logs available for TCS food items. Food Items: All TCS food items Activity of the Food: stored

REDDY ICE - 7445 PAN AMERICAN FWY NE - Approved

REDDY ICE - 7445 PAN AMERICAN FWY NE

Food Processor Class A

Date: 09/18/2026 - #: PT0044214 - Inspection Result: Approved

Violation: Installation

• Handwashing Sinks, Installation, Steam, Self-closing, Automatic

- A self-closing, slow-closing, or metering faucet shall provide a flow of water for at least 15 seconds without a need to reactive the faucet. Instructed PIC to repair or replace faucet so that it has a stream of water for at least 15 seconds to help ensure proper washing of hands, and re-contamination. Observed a self-closing, slow-closing or metered faucet at the handwashing sink fail to provide a flow of water for 15 seconds without reactivation of the faucet. Location: east wall in bagging area. Manner: 1 second. Observed PIC had to keep knob pushed in to activate water.

Roadrunner Food Bank - 3831 SINGER BLVD NE - Approved

Roadrunner Food Bank - 3831 SINGER BLVD NE

Warehouse

Date: 09/17/2026 - #: COM-RET-088794-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly. Observed the following areas of the facility in disrepair. Observed electrical wall outlet in disrepair by not having a cover installed to prevent entry of pests.

Roadrunner Food Bank - 5840 OFFICE BLVD NE

Charitable Food Provider

Date: 09/17/2026 - #: COM-FOODES-088790-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

SANDIA VIEW FOUNTAIN HILL - 4551 VISTA FUENTE RD NW - Approved

SANDIA VIEW FOUNTAIN HILL - 4551 VISTA FUENTE RD NW

Food Establishment Class C

Date: 09/17/2026 - #: CAC-Food-088786-2026 - Inspection Result: Approved

Utensils and food contact surfaces- corrected on site

Calibration log- corrected on site

After corrections facility is brought up to approved

SANDIA VIEW FOUNTAIN HILL - 4551 VISTA FUENTE RD NW

Food Establishment Class C

Date: 09/17/2026 - #: RT-FOODEST-031546-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS

foods every 4 hours.

Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Can opener Location: Prep table.

Condition of the Location: Sticky and a black soil residue.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at dishwasher drain line below the drain cover.

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Heating, ventilating, and air conditioning systems shall be designed, installed, and maintained so that make-up air intake and exhaust vents do not cause contamination of food, contact surfaces, equipment, or utensils.

Observed heating and air conditioning system vents not properly designed and located to be easily cleanable. Location: Kitchen air conditioning heater vents.

Manner: Substantial soil buildup.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Kitchen cooking areas.

Activity: employees cooking food with no beard guard.

Violation: Operations

• Valid Permit

- General Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit as of 09/30/2025.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the floors and drains behind sinks, storage shelving.

Violation: Records

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

SKIES HEALTHCARE AND REHAB CTR - 9150 MCMAHON NW - Approved

SKIES HEALTHCARE AND REHAB CTR - 9150 MCMAHON NW

Food Establishment Class C

Date: 09/16/2026 - #: RT-FOODEST-008609-2026 - Inspection Result: Approved

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Filters

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating food.

Location: Kitchen hood vents.

Food item: Soil and grease buildup on the filter vents, hoods, spray valves.

Violation: Installation

• Handwashing Sinks-Numbers and Capacities

- Hands are a common vehicle for the transmission of pathogens to foods in an establishment. Hands can become soiled with a variety of contaminants during routine operations. The transfer of contaminants can be limited by providing food employees with handwashing sinks that are properly equipped and conveniently located. Hand washing sinks must be installed as required by law, and handwashing sinks shall be located to allow convenient use by employees in food preparation, food dispensing, and warewashing areas, and in or immediately adjacent to, toilet rooms. Instructed PIC to install handwashing sink(s).

Observed facility with an inadequate number of handwashing sinks necessary for the convenient use by employees. Location: Hand sink is in need of replacement due to being damaged and not very secure to the wall.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire cold holding below 41 degrees.

Observed insufficient cold holding equipment to properly hold food cold. Location: Ice Bath.

Condition: Green chili internal temp -53 degrees, tomatoes due to not enough ice to maintain temperature below 41 °F.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

Observed handwashing sink(s) was observed blocked or inaccessible. Location: Kitchen hand wash sink. Manner: Service carts stored in front of the main hand wash sink.

Violation: Storage

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking

Observed clean equipment stored in a position that did not allow for self-draining or air drying.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Kitchen, The surface was made out of Stainless steel.

The condition of the surface hot case unit interior with debris and soil buildup.

SOLARE COLLEGIATE CHARTER SCHOOL - 8801 GIBSON BLVD SW - Approved

SOLARE COLLEGIATE CHARTER SCHOOL - 8801 GIBSON BLVD SW

Food Establishment Class C

Date: 09/16/2026 - #: RT-FOODEST-037506-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: ice machine Location: kitchen area Condition of the Location: debris buildup on the internal walls of the ice machine

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed plumbing system is not maintained in good repair or is not repaired by law. Observed Three compartment sink faucet found in disrepair by leaking water.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap below three compartment sink ice machine line venting directly into drain.

SONIC DRIVE IN 5479 - 2119 VISTA OESTE NW - Unsatisfactory Re-Inspection required

SONIC DRIVE IN 5479 - 2119 VISTA OESTE NW

Food Establishment Class C

Date: 09/18/2026 - #: COM-FOODES-089347-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated. due cleanliness of the facility by dirty food equipment interior exterior, floors and walls drains with excessive soil and grease buildup.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils - Grease/Soil Deposits, Cooking Equipment

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization

Location: Sanitizer bucket

Concentration: sanitizer tested at 0 ppm. Temperature: 74 degrees

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of cooking equipment and pans shall be cleaned at a frequency to prevent the buildup of soil residues and encrusted grease deposits. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed equipment food-contact surface with the buildup of soil residues.

Equipment Type: Interior ice cream machine, interior ice machine chute. Location: Front serving station and back are where ice machine was stored. Condition of the Location: Interior of both equipment with substantial soil buildup.

Violation: Maintenance and Operation

• Warewashing Equipment, Cleaning Frequency

- If a warewashing sink is used to wash wiping cloths, wash produce, or thaw food, the sink shall be cleaned and sanitized before and after each time it is used to wash wiping cloths or wash produce or thaw food. Instructed PIC to wash and sanitize wash sink before and after it is used for other purpose than warewashing and to retain employees on proper washing procedures.

Observed ware washing sink with excessive soil buildup and not cleaned or sanitized before and after use.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing inappropriate date markings.

Observed ready-to-eat time and temperature controlled for safety food held within the establishment inappropriately marked. Location: Prep top cooler

Food Items: two squeeze bottles with unknown food dressings not date marked.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Three compartment sinks are not maintained in good repair or is not repaired by law. Observed Faucet found in disrepair by Faucet leaking.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Filters

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area

Observed interior intake and exhaust air ducts with debris buildup. Location: all cooking exhaust hoods and filter vents

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

Observed food temperature measuring devices were not provided or readily accessible. cooler and freezer.

Violation: Lighting

• **Light Bulbs, Protective Shielding**

- Instructed PIC to make repairs necessary so that light bulbs are shielded, coated, or made otherwise shatter-resistant to prevent the contamination of exposed food, clean equipment, utensils, linens, or unwrapped single-service-single-use articles.

Observed light bulbs with no protective shielding, coating or by other means shatter-resistant. Location: Walk-in freezer unwrapped where food is stored.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the floors, walls, ceiling tiles under food equipment, prep tables, three compartment sinks, cooler and freezer floors Excessive buildup in drains.

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located front service dispensing equipment. The surface was made out of stainless steel.

The condition of the surface interior and exterior with excessive soil and debris buildup.

SONIC DRIVE IN 8 - 3110 JUAN TABO BLVD NE - Closure Re-Inspection Required

SONIC DRIVE IN 8 - 3110 JUAN TABO BLVD NE

Food Establishment Class C

Date: 09/18/2026 - #: COM-FOODES-089142-2026 - Inspection Result: Closure Re-Inspection Required

Violation: Result of a Complaint

• **Complaint**

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Three compartment sink

Concentration: Zero PPM

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine and ice well lid

Location: Back of house

Condition of the Location: Extreme build of orange and red organic matter near ice chute and black organic matter buildup on ice well lid

Violation: Pest Control

• **Controlling Pests, If Present: Treatment**

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place.

Location: Ice cream sundae make station; coffee make station and soda dispensing unit Pest Type: Rodent droppings

Pest Condition: Living

• **Removing Dead or Trapped Birds, Insects, Rodents and other Pest**

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed rodent droppings allowed to accumulate in facility, equipment and food prep tables. Location: Coffee make station, ice cream sundae make station and soda dispensing unit

Pest Type: Rodent droppings Pest Condition: Living

Number of Pests Present: 100 plus droppings throughout facility

Violation: Hot Holding & Reheating

- **Time/Temperature Control for Safety Food, Hot Holding**

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.

Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Chopped green chile

Food Temperature: 117°F

Violation: Date Marking and Disposition

- **Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition**

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Prep top cooler, and walk-in cooler

Food Items: Diced tomatoes and sliced cheese Expiration Dates: No dates available

Violation: Maintenance and Operation

- **Good Repair and Proper Adjustment-Equipment**

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: Back of house

Type of Equipment: Walk-in cooler and walk-in freezer Condition of the equipment: Damaged gaskets

Violation: Imminent Health Hazard

- **Imminent Health Hazard**

- CHPD inspector observed an extreme amounts of rodent droppings in several areas of the facility. Rodent droppings observed on window seal near ice cream sundae make station, coffee make station and soda dispensing unit.

Violation: Knowledgeable

- **Knowledgeable Person In Charge**

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances.

Knowledge Tested: PIC failed routine inspection

Violation: Plumbing

- **System Maintained in Good Repair, Repaired According to Law**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed several floor drains throughout facility is not maintained in good repair or is not repaired by law. Observed several floor drains throughout facility found in disrepair by missing strainer and one floor drain with standing water.

- **System Maintained in Good Repair**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed three compartment sink and hand wash station is not maintained in good repair or is not repaired by law. Observed three compartment sink and hand wash station found in disrepair by leaking faucets.

- **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at several floor drains throughout facility.

Violation: Ventilation and Hood Systems

- **Cleaning Ventilation Systems, Nuisance and Discharge Prohibition**

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup.
Location: HVAC vents throughout facility observed dust debris buildup and bird feathers.

• **Ventilation Hood Systems, Filters**

- Instructed PIC to make repairs or replace hood ventilation system to allow for filters or other grease extracting equipment to be readily removable for cleaning and replacement, or cleaned in place.

Observed filters or grease extracting equipment improperly designed or constructed to make it easily cleanable. Location: Hood vent above cooking equipment

Manner: Broken and damaged hood vent filters

• **Ventilation Hood Systems, Drip Prevention and Adequacy**

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface.

Location: Hood vent cook line Equipment: Flat top griddle and fryers

Violation: Physical Facilities

• **Outer Openings, Protected**

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Cold Holding

• **Time/Temperature Control for Safety Food, Cold Holding**

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Near beverage station

Food Items: Maraschino cherries Temperature: 48°F

Violation: Storage

• **Food Storage-Preventing Contamination from the Premises**

- Food must be protected from contamination of splashing water, chemical, or other foods; dust; and other contaminants. Instructed PIC to have food protected in containers/wrapping and not to store food in those areas unless the source of contamination can be mediated another way.

Observed food stored improperly where it was exposed to contamination from splash, dust, or other contamination. Location: Reach in cooler

Food Item: Frozen onion rings Condition: Uncovered

Violation: Designated Areas

• **Storage-Other Personal Care Items**

- Employees shall store their personal care items in proper storage facilities. Instructed PIC to move employee belongings to an approved location.

Observed employee personal care items stored incorrectly. Location: Storage shelf of prep table near ready to eat food items

Violation: Operation and Maintenance

• **Using a Handwashing Sink-Operation and Maintenance**

- Handwashing facilities can become sources of contamination if the sinks used for other purpose such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purpose other than handwashing.

Observed handwashing sink used for purpose other than handwashing. Location: Hand wash station back of house Manner: Discarding drinks

Violation: Warewashing Temperature and Concentration

• **Sanitizers, Criteria-Chemicals**

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR.

PIC did not correct violation

Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Chlorine

Location: Wiping cloth container Concentration: Above 200 PPM

Violation: Hands Clean & Properly Washed

• **When to Wash**

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: Donning new gloves and switching tasks

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the floors, walls and ceilings.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- Multiuse utensils which have been cleaned and sanitized can become contaminated with pathogens which can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. Instructed PIC to clean and sanitize utensils prior to continuing use, must be maintained cleaned in a regular schedule as prescribed by the code and to store items so that the risk of contamination prior to use is minimized.

Observed utensils during a pause in use stored incorrectly. Utensil was not stored on a clean and sanitized portion of the equipment. Utensil Type: Spatula

Location: Near cook line

Condition of the Location: Stored on cardboard with extreme grease buildup

Violation: Surface Not Clean

• Nonfood-Contact Surfaces, Easily Cleanable

- Hard-to-clean areas could result in the attraction and harborage of insects and rodents and allow the growth of foodborne pathogenic microorganisms. Well-designed equipment enhances the ability to keep nonfood-contact surfaces clean. Instructed PIC to replace the material with one that is easily cleanable or to modify the existing material so that it is easily cleanable.

Observed nonfood contact surface that was not easily cleanable.

The surface was located in walk-in coolers, prep tables and near cook line The surface was made out of cardboard

The condition of the surface was dirty with extreme buildup of food debris and grease

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located throughout facility

The surface was made out of stainless steel, plastic, metal and fiberglass reinforced panels (FRP) The condition of the surface was dirty with extreme build of food debris and grease

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctions, Coved, and Enclosed or Sealed

- When cleaning is accomplished by spraying or flushing, coving and sealing of the floor/wall junctions is required to provide a surface that is conducive to water flushing. Grading of the floor to drain allows liquid wastes to be quickly carried away, thereby preventing pooling which could attract pests such as insects and rodents or contribute to problems with certain pathogens such as *Listeria monocytogenes*.

Observed floor and wall juncture covering missing and damaged wall cove.

STARBUCKS COFFEE #51106 - 5730 MCMAHON BLVD NW - Approved

STARBUCKS COFFEE #51106 - 5730 MCMAHON BLVD NW

Food Establishment Class C

Date: 09/16/2026 - #: PT0153769 - Inspection Result: Approved

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Drains is not maintained in good repair or is not repaired by law. Observed Drains found in disrepair by missing the required drain screens interior drains.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Backroom hand wash station.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the Floors under food equipment Storage Cabinets, storage racks trash cans.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Service areas and backroom. The surface was made out synthetic surface, stainless steel, wood with a cleanable surface.

The condition of the surface had substantial debris and soil buildup.

TENDER HEART - 4308 TULANE NE - Approved

TENDER HEART - 4308 TULANE NE

Food Establishment Class C

Date: 09/15/2026 - #: PT0116526 - Inspection Result: Approved

Violation: Installation

• Handwashing Sinks, Installation, Water 85F

- A handwashing sink shall be equipped to provide water at a temperature of at least 85°F through a mixing valve or combination faucet. Instructed PIC to repair or replace handwashing sink so it has hot water available at all times. PIC must update CHPD inspector when repairs are completed and hot water is restored hand washing sink.

Observed handwashing sink with hot water not available. Location: kitchen area. Condition: Hot water is turned off; no water dispenses when hot water handle is turned on.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

THE DAILY GRIND - 4360 CUTLER AVE NE, A - Approved

THE DAILY GRIND - 4360 CUTLER AVE NE, A

Food Establishment Class C

Date: 09/16/2026 - #: PT0145490 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 25-49ppm must also be at a minimum temperature of 120°F with a contact time of 10 seconds.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Ware wash machine located in ware wash area

Concentration: 10 ppm

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Drip Prevention and Adequacy

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur, observed grease and condensation drip on to and contaminating equipment surface.

Location: Hood vent located above cook line Equipment: Fryers and flat top griddle

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.

Observed inadequate amount of lighting. Location: Food storage room

Manner: Missing light bulbs

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Working cook line Inappropriate Jewelry Observed: Wrist watch

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Cook line
Activity: Working cook line

Violation: Physical Facilities, Cleaning

- **Drying Mops**

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.

Observed a soiled mop not in use, stored directly on the floor.

THE LIBRARY BAR AND GRILL - 312 CENTRAL AVE SW - Approved

THE LIBRARY BAR AND GRILL - 312 CENTRAL AVE SW

Food Establishment Class B

Date: 09/18/2026 - #: PT0114549 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine

Location: back of house

Condition of the Location: Extreme buildup of black organic matter

Violation: Pest Control

- **Removing Dead or Trapped Birds, Insects, Rodents and other Pest**

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed rodent droppings allowed to accumulate in facility. Location: Basement

Pest Type: rodent droppings Pest Condition: Unknown

Number of Pests Present: 10 plus rodent droppings

Violation: Plumbing

- **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain in bar area.

Violation: Testing Devices

- **Sanitizing Solutions, Testing Devices**

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

THE LIBRARY BAR AND GRILL - 312 CENTRAL AVE SW

Food Establishment Class B

Date: 09/18/2026 - #: PT0114550 - Inspection Result: Approved

Violation: Poisonous and Toxic/Chemical Substances

- **Common Name-Working Containers**

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottle

Alleged Material: Quat sanitizer

Violation: Pest Control

- **Removing Dead or Trapped Birds, Insects, Rodents and other Pest**

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed rodent droppings allowed to accumulate in facility. Location: Basement

Pest Type: rodent droppings Pest Condition: Unknown

Number of Pests Present: 10 plus rodent droppings

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain in bar area.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

The Montessori Academy - 1730 MONTANO RD NW - Approved

The Montessori Academy - 1730 MONTANO RD NW

Food Establishment Class B

Date: 09/14/2026 - #: RT-FOODEST-087215-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Kitchen wiping cloth container.

Concentration: tested at 0 ppm.

Temperature: 74 °F.

Violation: Training Records

• Food Handler Cards

- General Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels

(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Kitchen hand wash station.

Violation: Storage

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.

Observed clean single-service and single-use articles stored improperly. Single-service and single-use articles was not stored in a clean, dry location. Single-service and single-use articles

Type: Food trays, Location: Storage shelving.

Condition of the Location: Stored right side up not covered.

THE RANGE CAFE 4 - 1050 RIO GRANDE BLVD NW - Approved

THE RANGE CAFE 4 - 1050 RIO GRANDE BLVD NW

Food Establishment Class C

Date: 09/17/2026 - #: PT0151036 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain in bar area.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Corrective Action: 2. 3-501.16(A)(2) and (B)

Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Undercounter cooler

Food Items: Salsa Temperature: 47°F

Violation: Lighting

• Light Bulbs, Protective Shielding

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.

Observed inadequate amount of lighting. Location: Hood vent above cook line Manner: Light burned out.

TIERRA ADENTRO CHARTER SCHOOL - 1781 BELLAMAH AVE NW - Approved

TIERRA ADENTRO CHARTER SCHOOL - 1781 BELLAMAH AVE NW

Food Establishment Class C

Date: 09/17/2026 - #: RT-FOODEST-041004-2026 - Inspection Result: Approved

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators.

Location: kitchen area Food Items: containers of peaches, tomatoes, lettuce, cheese and mushrooms Expiration Dates: no dates observed

pic put dates on containers at time of the inspection after inspector brought to the pic attention they had just put into pans and entered them into the reach in cooler

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap below three compartment sink ice machine and three compartment sinks pipes being vented directly inside floor drain.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was made out of metal The condition of the surface had debris buildup on the exterior (top) of ovens.

Turning Point Detox, LLC - 3501 STARDUST DR NE - Approved

Turning Point Detox, LLC - 3501 STARDUST DR NE

Food Establishment Class C

Date: 09/16/2026 - #: RT-FOODEST-009165-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Inside kitchen no sanitizer was prepared prior to preparing food entrees.

Violation: Surface Condition

• **Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent**

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is nonabsorbent.

Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.

Observed nonfood contact surface that was absorbent. The surface was located inside food pantry The surface was made out of synthetic wood The condition of the surface was damaged unsealed.

Observed nonfood contact surface that was not smooth. The surface was located inside food pantry. The surface was made out of synthetic wood The condition of the surface was damaged unsealed.

Violation: Food Separation

• **Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination**

- It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination.

Observed non-ready-to-eat raw animal food stored with ready-to-eat raw animal food without protection from contamination. Location: Standing reach in refrigerator Food Item: Raw eggs Condition: Raw eggs stored above fresh produce bell peppers.

Uptown Sports Bar - 6601 UPTOWN BLVD NE – Conditional Approved

Uptown Sports Bar - 6601 UPTOWN BLVD NE

Food Establishment Class C

Date: 09/18/2026 - #: COM-FOODES-088589-2026 - Inspection Result: Conditional Approved

Violation: Result of a Complaint

• **Complaint**

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Plumbing

• **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at plumbing from grease trap to floor drain.

Violation: Ventilation and Hood Systems

• **Ventilation Hood Systems, Filters**

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Inside main kitchen line substantial debris buildup.

• **Heating, Ventilation, Air Conditioning System Vents**

- Heating, ventilating, and air conditioning systems shall be designed, installed, and maintained so that make-up air intake and exhaust vents do not cause contamination of food, contact surfaces, equipment, or utensils.

Observed heating and air conditioning system vents not properly designed and located to be easily cleanable. Location: Inside main kitchen line Manner: Substantial debris buildup

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• **Food Storage Containers Identified with Common Name of Food**

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Flour, salt and possibly sugar Location: Kitchen in plastic Lexan and plastic food containers

Violation: Operations

• **Valid Permit**

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment.

Observed that the facility was operating with an expired permit.

Violation: Hot & Cold-Water Availability & Pressure

• **Water System-Distribution, Delivery, and Retention**

- Hot water required for washing items such as equipment and utensils and employees' hands, must be available in sufficient quantities to meet demand during peak water usage periods.

Observed facility with insufficient hot water. Location: Hand washing sink Manner: Hot water was turned off at plumbing due to sink faucet unable to completely shut off.

Violation: Physical Facilities, Construction and Repair

• **Floors, Walls and Ceilings-Cleanability**

- Floors that are of smooth, durable construction and that are nonabsorbent are more easily cleaned. Requirements and restrictions regarding floor coverings, utility lines, and floor/wall junctures are intended to ensure that regular and effective cleaning is possible and that insect and rodent harborage is minimized. Instructed PIC to install floors that are non-absorbent.

Observed floor is constructed of damaged flooring at three compartment sink making it rough and/or absorbent. Corrective Action: 2. 6-201.11 Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to remove and replace with material that is smooth and easily cleanable.

Observed floor is not smooth and easily cleanable. The surface was located in dish washing area The surface was made out of damaged flooring.

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Raw and cooked meats, prepared vegetables, dairy products Activity of the Food: Stored, received, cooled

Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

Uptown Sports Bar - 6601 UPTOWN BLVD NE

Food Establishment Class B

Date: 09/18/2026 - #: COM-FOODES-088585-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• **Complaint**

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75°F with a contact time of 7 seconds.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Ware washing machine Concentration: Zero parts per million Temperature: 99 °F

The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Red sanitizer bucket Concentration: Below 200 parts per million Temperature: 76 degrees

Violation: Poisonous and Toxic/Chemical Substances

• **Common Name-Working Containers**

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottles Alleged Material: Quaternary ammonium sanitizer.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no testing kit or other device to measure the concentration of quaternary ammonium chemical sanitizing solution.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris underneath automatic dish machine, three compartment sinks and soda bib storage area.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located inside bar cabinets. The surface was made out of synthetic wood. The condition of the surface was debris buildup.

WAL MART SUPER CENTER 2924 - 2550 COORS BLVD NW - Approved

WAL MART SUPER CENTER 2924 - 2550 COORS BLVD NW

Retail Food Establishment Class 4

Date: 09/17/2026 - #: COM-RET-088866-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair.

Observed Back chemical and service article storage area base board damaged and not secure to the wall. several drains dairy, produce areas with substantial soil and debris buildup.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Sales floor grocery shelving and reach in freezer shelving areas. The surface was made out of Meatal.

The condition of the surface was excessive food debris and substantial cardboard with tape placed on top of the interior of the freezer doors on top of the return air vents.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the bottom of the receiving door north side receiving door.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be

established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris at the backroom floors under storage shelving, freezer floor shelving, also by trash compactor area, and gondolas.
