City of Albuquerque Environmental
Health Department
Consumer Health Protection Division
P.O. Box 1293, Albuquerque, NM 87103

Summary Table
Consumer Health Protection Inspections Performed
Week: October 11, 2026 to October 17, 2026 Report
Amended on 10/19/2026 for clerical errors

This report includes inspection history for the dates listed. Inspections may have occurred after those dates. The summary reflects each establishment's current operating status as of the report release date.

Inspection Date	Inspection ID Number	Inspection Type	Inspection Status	Page #
ALBUQUERQUE UPTOWN ASSISTED LIVING - 7611 INDIAN SCHOOL RD NE				
Food Establishment (Permit # - PT0152389) - Operational Status - Open				
10/15/2026	RT-FOODEST-010728-2025	Routine Food Establishment Inspection	Approved	Pg. 4

10/14/2026	COM-FOODES-097481-2026	Complaint Food Establishment Inspection	Conditional Approved	Pg. 29

Corrective Action Compliance does not represent a full routine health inspection. Instead, it reflects that a facility has taken specific corrective actions in response to violations identified during an inspection. These actions may be taken during the inspection or afterward, and the Corrective Action Compliance allows for the facility's grade or status to be updated based on those corrections. Corrective actions may be demonstrated through documentation such as photos, videos, receipts, work orders, site visits, or both verifiable means showing that the violation has been addressed and compliance has been achieved.

APPROVED

An "Approved" grade indicates that a food establishment that has demonstrated compliance with the standards in the Food Code the Food Service and Retail Ordinance, other industry standards, and other laws and has received a Grade of Approved and is able to operate.

CONDITIONAL APPROVED

A "Conditional Approved" grade is issued when a facility is found to have violations of the Food Code, the Food Service and Ret Ordinance, industry standards, or applicable laws. While the facility may continue operating, it must complete specific corrective actions to address the violation A yellow sticker is placed alongside the green "Approved" sticker.

UNSATISFACTORY

An "Unsatisfactory" grade indicates that a facility has not met the required standards but is allowed to continue operating temporarily while corrective actions are completed. A red "Unsatisfactory" sticker will be displayed at the facility for the duration of this grade. This is a temporary status and requires timely follow-up to verify compliance.

CLOSED

A "Closed" grade is assigned when violations pose a significant risk to public health, requiring the facility to immediately cease operations. The facility must remain closed until corrective actions have been completed and verified. A facility with this grade will display an orange "Closed" sticker for the duration of the closure.

ALBUQUERQUE UPTOWN ASSISTED LIVING - 7611 INDIAN SCHOOL RD NE
Food Establishment Class C
Date: 10/15/2026 - #: RT-FOODEST-010728-2025 - Inspection Result: Approved

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed three compartment sink faucet is not maintained in good repair or is not repaired by law. Observed dispensing hose found in disrepair by constant leak unable to completely shut off.

Violation: Cooling

• Cooling Methods

- Instructed PIC to use an alternate method of cooling to minimize the opportunity for pathogen growth; recommended to utilize one or more methods such as 1) Place the food in a shallow pan 2) Separate the food into smaller or thinner portions 3) Use rapid cooling equipment 4) Stir the food in a container placed in an ice/water bath 5) Use containers that facilitate heat transfer 6) Only partially cover product, if protected from overhead contamination.
Observed TCS food items cooling in a method that does not facilitate the necessary rate of heat transfer to cool the food in an appropriate time frame. Location: Inside cold holding unit Food Items: Oatmeal Manner: Stored covered

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Plastic food container Location: Spice storage area

Violation: Maintenance

• Maintaining Premises, Unnecessary Items and Litter

- The presence of unnecessary articles, including equipment which is no longer used, makes regular and effective cleaning more difficult and less likely. It can also provide harborage for insects and rodents. Areas designated as equipment storage areas and closets must be maintained in a neat, clean, and sanitary manner. They must be routinely cleaned to avoid attractive or harborage conditions for rodents and insects. Instructed the PIC to keep the premises clean of unused articles and litter.
Observed items on the premises of the food establishment that is no longer used or is non-functional. Location: Inside drawers Items list: Tools, rolling pins, and other items Condition of the items: Cluttered and unorganized

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: reach in cooler south wall of kitchen. Food Items and Temperature: Strawberries 48 °F, blueberries 47 °F, Onion 56 °F

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.
Observed insufficient cold holding equipment to properly hold food cold. Location: reach in cooler next to hand washing sink at entrance of kitchen Condition: Unit temperature measured at 48°F

Violation: Operations

• Sticker Posted

- Instructed the PIC that every Food Establishment must display the Grade received at the time of the most recent inspection in a place that is visible to the public.
Observed that no grade sticker was posted on the facility.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located inside cabinet drawers. The surface was made out of synthetic wood The condition of the surface was food debris buildup.

AMERICAN LEGION POST 100 - 424 CANDELARIA RD NW
Food Establishment Class B
Date: 10/14/2026 - #: COM-FOODES-097431-2026 - Inspection Result: Conditional Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Chlorine was made at 50 PPM chlorine at 99°F.
All cooking equipment must be cleaned and sanitized on a regular basis.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine.
Location: Bar area
Condition of the Location: Interior of the Ice machine chute and guard with a black like soil residue. Observed Hot dog and Pop Corm machine and electric grill with dry old soil residue at the time of inspection. Chlorine sanitizer was not made up at the time of inspection.

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by routinely inspecting incoming shipments of food and supplies, routinely inspecting the premises for evidence of pests, and eliminating harborage conditions. Instructed PIC to provide EHD with their standard operating procedures and pest control plan
Observed the facility has inadequate procedures to effectively control pests. Currently uses glue stick and box mice traps. glue traps have several dead roaches. box traps need to be reset and set up right.
Facility has mice droppings on the side of the east side of the bar side of the refrigerator. Roach trap has several dead roaches and needs to be replaced.
back dining areas several dead insects' bugs crickets

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing inappropriate date markings.
Observed ready-to-eat time and temperature controlled for safety food held within the establishment inappropriately marked. Location: Refrigerator.
Food Items: Green chili, unknown oil brown food item. Manner: No date markers or as to what the food items is.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed Hand wash sink hot and cold-water valves is not maintained in good repair or is not repaired by law. Observed water lines leaking and found in disrepair by Moisture damaging hand was cabinet.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the bottom edges of all three entry and receiving doors.

• Exterior Walls and Roofs, Protective Barrier

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.
Observed holes or other gaps in the structure of the facility.
Location: Bar area south wall behind the refrigerator. office walls towards the bar and liquor storage. Size: overall gap or hole diameter are 12-inch 10 inch in diameter some are smaller holes.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device. PIC must purchase chlorine test strips.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.
Observed handwashing sink(s) without a handwashing sign. Location: Bar area and public restrooms.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface
Observed nonfood contact surface with the buildup of soil residues. The surface was located Bar area The surface was made out of Stainless steel.
The condition of the reach in beer taps surfaces with substantial soil and liquid buildup.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- Wall and ceiling attachments, such as light fixtures, mechanical room ventilation system components, vent covers, wall mounted fans, ornamental objects, and other attachments, must be EASILY CLEANABLE, with the exception of what is mentioned in (B) of this section. (B) If wall and ceiling surfaces, decorative accessories, and other ambiance-enhancing items are maintained clean in a CONSUMER area, this criterion need not be met. Instructed person in charge to clean and sanitize wall and ceiling attachments.
Observed missing coved base, damaged tile located in the bara area and surrounding Bar areas.

BEGINNING STEPS DAYCARE INC - 6521 PARADISE BLVD NW, A - Approved

BEGINNING STEPS DAYCARE INC - 6521 PARADISE BLVD NW, A
Food Establishment Class C
Date: 10/15/2026 - #: RT-FOODEST-001372-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Can opener. Location: Kitchen prep table.
Condition of the Location: Blade and base with dry food residue.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.
Observed insufficient cold holding equipment to properly hold food cold. Location: Reach in refrigerator. Condition: Ambient temperature was holding at 50°F., Creamcheeses-47°F, Milk 47°F.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Milk, cheeses, cream cheeses, chicken, beef, Butter. without logs. TCS items stored in the refrigerators

DUTCH BROS COFFEE - 9600 UNIVERSE BLVD NW - Approved

DUTCH BROS COFFEE - 9600 UNIVERSE BLVD NW
Food Establishment Class B
Date: 10/16/2026 - #: PT0158097 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact

surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Soft serv Ice cream dispenser. Location: Service areas.
Condition of the Location: dispense spouts. with a yellow soil buildup.

Violation: Storage

• Storage or Display of Food in Contact with Water or Ice

- Pathogens can contaminate and/or grow in food that is not stored properly. Drips of condensate and drafts of unfiltered air can be sources of microbial contamination for stored food. Shoes carry contamination onto the floors of food preparation and storage areas. Even trace amounts of refuse or wastes in rooms used as toilets or for dressing, storing garbage or implements, or housing machinery can become sources of food contamination. Moist conditions in storage areas promote microbial growth. Food must be protected from contamination and must not be stored in locker rooms, toilet rooms, dressing rooms, garbage rooms, mechanical rooms, under sewer lines, under leaking water lines, under open stairwells, or under other sources of contamination.
Observed food stored improperly under a miscellaneous source of contamination
. Location: Walk in cooler.
Food Item: 8 cases of rebel energy mix stored on the cooler floors.

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings. stored on food shelving next to and above food items.

Violation: Operation and Maintenance

• Cleaning of Handwashing Fixtures

- Handwashing facilities are critical to food protection and must be maintained in operating order at all times so they will be used. Handwashing sinks shall be cleaned as often as necessary to keep them clean. Instructed PIC to clean handwashing sink(s).
Observed handwashing fixtures with the buildup of soil residues. The plumbing fixture was located Serving stations. The condition of the surface was coffee stains and a white buildup interior of the hand wash stations.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors/ base coving near the drive thru under a table and rolling cart.

FLYING STAR 3 - 8001 MENAUL BLVD NE - Approved

FLYING STAR 3 - 8001 MENAUL BLVD NE
Food Establishment Class D
Date: 10/14/2026 - #: COM-FOODES-097292-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.
Observed time/temperature control for safety food not hot held at 135°F or above. Food Item and Food Temperature: Red chile sauce 122 °F, Red chile sauce 120 °F and green chile sauce 99 °F

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination.
Observed non-ready-to-eat raw animal food stored with ready-to-eat raw animal food without protection from contamination. Location: Salad preparation area on main kitchen line Food Item: Raw chicken Condition: Bagged raw chicken being stored above chopped kale inside cold holding unit.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be

protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.
Observed holes or other gaps in the structure of the facility. Location: Dining room synthetic wood walls

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did provide a designated area for employees to eat, drink, or use tobacco products however drinks were stored in prep station and main kitchen line.

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels
(B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Observed no approved method of hand drying at handwashing sink(s). Location: Hand washing sink in back prep area.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris underneath ice machine, prep tables, main kitchen walls and floors on main kitchen line.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located inside walk in refrigerator The surface was made out of metal The condition of the surface was condensing unit fan covers with substantial debris buildup.

Food Establishment Class C
Date: 10/16/2026 - #: CAC-Food-098577-2026 - Inspection Result: Approved

Equipment, Food-Contact Surfaces and Utensils - Clean to Sight
and Touch- PIC corrected by cleaning and sanitizing dicer and can opener
Due to corrections made facility is back into the green approved status

HERENCIA - 11225 MONTGOMERY BLVD NE, D
Food Establishment Class C
Date: 10/16/2026 - #: RT-FOODEST-022490-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.
Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Ware washing machine Concentration: 0ppm

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener and Food dicer Location: back prep area of kitchen Condition of the Location: Dried food debris buildup on blade of can opener and dried food debris on blade of food dicer

Violation: Time as Public Health Control

• Time as a Public Health Control, Written Procedures, Labeling

- Instructed PIC that food must be labeled indicating when the food was removed from temperature control or indication of the maximum holding time. Reminded that the time must be appropriately indicated as this is the sole method being utilized for the protection and safety of the food. Facility voluntarily discarded food items with no time markings.
Observed no marking or identification signifying when the food was removed from temperature control or indication of the maximum holding time. Location: Main cook line Type of Food: Cabbage, sliced poblano, and sliced squash.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed Ware washing machine is not maintained in good repair or is not repaired by law. Observed ware washing machine found in disrepair by Leaking water from fresh water pipe going into machine

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.
Observed handwashing sink(s) without a handwashing sign. Location: Bathrooms

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: Wrist jewelry

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under □□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: plastic quart container Location: Walk in cooler Condition of the Location: quart containers used as scoop for sauce and left in food container with sauce

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: pans were not air dried and stacked wet with moisture between pans

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: stored Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

HERENCIA - 11225 MONTGOMERY BLVD NE, D
Food Establishment Class B
Date: 10/16/2026 - #: RT-FOODEST-022489-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 100ppm must also be at a minimum temperature of 55°F.
Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Ware washing machine Concentration: 0ppm Temperature: 127

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.
Observed handwashing sink(s) without a handwashing sign. Location: Bathrooms

Little Lions Academy - 1431 Crescent DR NW - Approved

Little Lions Academy - 1431 Crescent DR NW
Food Establishment Class C
Date: 10/16/2026 - #: RT-FOODEST-044502-2025 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

-All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Records

• Temperature Logs

-TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. facility did not have Cold Holding, Hot Holding or Equipment logs at the time of the visit
inspector gave pic gave copies of Cold Holding, Hot Holding logs at time of the visit

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

MURPHYS EXPRESS 8963 - 9700 MONTGOMERY BLVD NE - Approved

MURPHYS EXPRESS 8963 - 9700 MONTGOMERY BLVD NE
Retail Food Establishment Class 3
Date: 10/16/2026 - #: PT0157157 - Inspection Result: Approved

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located inside the chest ice cream cooler The surface was made out of metal The condition of the surface was heavy ice and frost buildup

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: wiping cloth bucket at coffee station Concentration: 0ppm

NAGOMI JAPANESE RESTAURANT - 2400 JUAN TABO BLVD NE, G - Approved

NAGOMI JAPANESE RESTAURANT - 2400 JUAN TABO BLVD NE, G
Food Establishment Class C
Date: 10/14/2026 - #: RT-FOODEST-097707-2026 - Inspection Result: Approved

Violation: Maintenance and Operation

• Warewashing Equipment, Cleaning Frequency

- During operation, warewashing equipment is subject to the accumulation of food wastes and other soils or sources of contamination. In order to ensure the proper cleaning and sanitization of equipment and utensils, it is necessary to clean the surface of warewashing machines, three (3) compartment sinks, drainboards, and laundry facilities for wiping cloths before use, every twenty-four (24) hours if used, and periodically throughout the day to prevent buildup of soils or other sources of contamination. Instructed PIC to clean the warewashing equipment and retain employees on the cleaning schedule.
Observed soiled or dirty ware washing machine. Location: back of kitchen Condition: caked on buildup on inside of ware washing machine

Violation: Thawing

• Thawing Method

- Freezing prevents microbial growth in foods, but usually does not destroy all microorganisms. Improper thawing provides an opportunity for surviving bacteria to grow to harmful numbers and/or produce toxins. Food must be thawed in an approved method such as: A. under refrigeration maintaining food below forty-one (41) °F or below, B. submerged under running water at seventy (70) °F, or below with sufficient velocity to agitate and

float off loose particles in the overflow, if ready-to-eat does not go above forty-one (41) °F, or if raw does not exceed forty-one (41) °F for four (4) hours including the cooking or re-cooling process C. in a microwave oven only when the food will be immediately transferred to conventional cooking facilities as part of a continuous cooking process, or when the entire, uninterrupted cooking process takes place in the microwave oven D. as part of the cooking process E. prepared for immediate service in response to an individual consumer's order Instructed PIC to retrain food employees on thawing food and PIC corrected violation.
Observed frozen time/temperature control for safety food improperly thawing. Food: Sauces Location: prep table Condition: Frozen Method: Left on prep table to thaw at room temperature

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.
Observed wiping cloths improperly used. Observed soiled wiping cloths stored on prep tables and cutting boards

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drain for ware washing machine

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floor walls and ceiling in kitchen area with substantial debris buildup around three compartment sink

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.
Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located in the inside of the coolers and freezers The condition of the surface was frost buildup on inside of freezers and food debris buildup on inside of coolers

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to repair wall area.
Observed wall underneath three compartment sink is not smooth and easily cleanable. Observed a section of the wall was removed to allow access to plumbing system

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: Stored Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

NAGOMI JAPANESE RESTAURANT - 2400 JUAN TABO BLVD NE, G
Food Establishment Class C
Date: 10/14/2026 - #: RT-FOODEST-049659-2025 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Meat slicer and vegetable peeler Location: kitchen area Condition of the Location: Dried food debris buildup

Violation: Maintenance and Operation

• Warewashing Equipment, Cleaning Frequency

- During operation, warewashing equipment is subject to the accumulation of food wastes and other soils or sources of contamination. In order to ensure the proper cleaning and sanitization of equipment and utensils, it is necessary to clean the surface of warewashing machines, three (3) compartment sinks, drainboards, and laundry facilities for wiping cloths before use, every twenty-four (24) hours if used, and periodically throughout the day to prevent buildup of soils or other sources of contamination. Instructed PIC to clean the warewashing equipment and retain employees on the cleaning schedule.
Observed soiled or dirty ware washing machine. Location: back of kitchen Condition: caked on buildup on inside of ware washing machine

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.
Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottles and bucket Alleged Material: Glass cleaner, sanitizer, bathroom cleaner and Pine Sol

Violation: Thawing

• Thawing Method

- Freezing prevents microbial growth in foods, but usually does not destroy all microorganisms. Improper thawing provides an opportunity for surviving bacteria to grow to harmful numbers and/or produce toxins. Food must be thawed in an approved method such as: A. under refrigeration maintaining food below forty-one (41) °F or below, B. submerged under running water at seventy (70) °F, or below with sufficient velocity to agitate and
float off loose particles in the overflow, if ready-to-eat does not go above forty-one (41) °F, or if raw does not exceed forty-one (41) °F for four (4) hours including the cooking or re-cooling process C. in a microwave oven only when the food will be immediately transferred to conventional cooking facilities as part of a continuous cooking process, or when the entire, uninterrupted cooking process takes place in the microwave oven D. as part of the cooking process E. prepared for immediate service in response to an individual consumer's order Instructed PIC to retrain food employees on thawing food and PIC corrected violation.
Observed frozen time/temperature control for safety food improperly thawing. Food: Sauces Location: prep table Condition: Frozen Method: Left on prep table to thaw at room temperature

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.
Observed wiping cloths improperly used. Observed soiled wiping cloths stored on prep tables and cutting boards

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Upright cooler Food Items: Tofu, Red pepper diced, and unknown sauce Expiration Dates: none observed

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drain for ware washing machine

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floor walls and ceiling in kitchen area with substantial debris buildup around three compartment sink

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.
Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located in the inside of the coolers and freezers The condition of the surface was frost buildup on inside of freezers and food debris buildup on inside of coolers

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to repair wall area.
Observed wall underneath three compartment sink is not smooth and easily cleanable. Observed a section of the wall was removed to allow access to plumbing system

NINOS BRILLANTES ACADEMY LLC - 1500 COORS BLVD NW, A - Approved

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.
Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Knowledge Tested: pic did not know the six reportable foodborne illnesses, what cold holding temperatures should be at and below, did not know what levels chorine sanitation should be at and did not know how to calibrate a thermometer.
inspector educated on all questions that were not answered correctly

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at the three Compartment Sink.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. facility did not have Cold Holding Hot Holding or Equipment logs

inspector at end of inspection emailed logs to pic

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

NMR DBA Dunkin Donuts - 4th ST, LLC - 5502 4TH ST NW - Approved

NMR - 4th ST, LLC - 5502 4TH ST NW
Food Establishment Class C
Date: 10/15/2026 - #: RT-FOODEST-062870-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is a follow-up to a previous closure that was the result of a citizen complaint.

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices. must be installed in front area interior of the refrigerator unit.
Observed food temperature measuring devices were not provided or readily accessible for the front reach in refrigerator.

Violation: Lighting

• Light Bulbs, Protective Shielding

- Instructed PIC to make repairs necessary so that light bulbs are shielded, coated, or made otherwise shatter-resistant to prevent the contamination of exposed food, clean equipment, utensils, linens, or unwrapped single-service-single-use articles.
Observed light bulbs with no protective shielding, coating or by other means shatter-resistant. Location: walk in freezer.
Manner: light cover not secure

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair.
Observed wall. in disrepair by 4 1/4 in holes as soon as you walk into the preparation areas

OJOS LOCOS SPORTS CANTINA - 2105 LOUISIANA BLVD NE - Approved

OJOS LOCOS SPORTS CANTINA - 2105 LOUISIANA BLVD NE
Food Establishment Class C
Date: 10/13/2026 - #: CAC-Food-096908-2026 - Inspection Result: Approved

- Temperature Logs
PIC provide temperature logs via email since inspection.

PANDA EXPRESS - 2820 CENTRAL AVE SE - Approved

PANDA EXPRESS - 2820 CENTRAL AVE SE
Food Establishment Class C
Date: 10/14/2026 - #: COM-FOODES-097687-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Steam line and lobby wiping cloth buckets
Concentration: 0-100 PPM

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed 3 compartment sink faucet is not maintained in good repair or is not repaired by law. Observed faucet found in disrepair by having a consistent drip leak that needs to be repaired.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located on the fan blade covers of the walk-in cooler. The surface was made out of plastic. The condition of the surface was soiled with dust and debris accumulation. Also observed the lower left side of the make table to have moisture and food debris.

Panda Express #1040 - 9500 MONTGOMERY BLVD NE - Conditional Approved

Panda Express #1040 - 9500 MONTGOMERY BLVD NE
Food Establishment Class C
Date: 10/16/2026 - #: COM-FOODES-098627-2026 - Inspection Result: Conditional Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice Machine Location: Back storage area Condition of the Location: Significant organic debris on the inside and on the deflector shield.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC to clean and remove dead insects from facility.
Observed pests allowed to accumulate under the beverage dispensing machine in the drive through. Pest Type: cockroach
Pest Condition: dead
Number of Pests Present: 15+

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate

preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.
Observed that there was no manager present, designated person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Knowledge Tested: Cold Holding Temperatures, Hot Holding Temperatures, Sanitizer, Reportable foodborne illnesses

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at plumbing systems in the back area such as at the prep sink

Violation: Training Records

• Food Handler Cards

- General Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Maintenance

• Maintaining Refuse Areas and Enclosures

- A storage area and enclosure for waste shall be maintained clean. Instructed PIC to clean the area.
Observed the waste storage area to be unclean. Condition of the storage area: waste spilled on top of lids, and in corral area with fecal matter.

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Food must be protected from contamination of splashing water, chemical, or other foods; dust; and other contaminates. Instructed PIC to have food protected in containers/wrapping and not to store food in those areas unless the source of contamination can be mediated another way.
Observed food stored improperly where it was exposed to contamination from splash, dust, or other contamination. Location: Prep area Food Item: Bulk rice bin Condition: bulk bin had lid open with soiled perforated pan directly over it

Violation: Operations

• Sticker Posted

- Instructed the PIC that every Food Establishment must display the Grade received at the time of the most recent inspection in a place that is visible to the public.
Observed that no grade sticker was posted on the facility. CHPD replaced grade stickers during inspection.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the walls such as underneath 3 compartment sink, and floors in areas such as the drive through and beverage station in the lobby.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- Multiuse utensils which have been cleaned and sanitized can become contaminated with pathogens which can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. Instructed PIC to clean and sanitize utensils prior to continuing use, must be maintained cleaned in a regular schedule as prescribed by the code and to store items so that the risk of contamination prior to use is minimized.
Observed utensils with use for non-time/temperature controlled for safety food during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food. Utensil Type: Portion scoop Location: Prep top cooler Condition of the Location: Handle was in direct contact with the food

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed utensils were not air dried and were wet stacked. Location: Warewashing area Utensil Type: Various sized pans various hotel pan sizes and half lexans Manner: Wet stacked with visible moisture accumulated between the stacked pans

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located in the drive through and cooking areas, inside cabinets, coolers/cooler gaskets, wok station. The condition of the surface was covered in significant debris accumulation, such as underneath the beverage station in drive through with significant spillage of what appears to be soda syrup accumulating dead insects, with significant odor. Facility was utilizing that area for storage for straws, etc.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair. Observed walls throughout the facility drive through, mop sink, warewashing, service line etc. in disrepair by having numerous gaps, holes, cracks and crevices.

Panda Express #1040 - 9500 MONTGOMERY BLVD NE
Food Establishment Class C
Date: 10/16/2026 - #: COM-FOODES-098578-2026 - Inspection Result: Closure Re-Inspection Required

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Wiping cloth bucket Concentration: 0ppm Temperature: 68°F

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice Machine Location: Back storage area Condition of the Location: Significant organic debris on the inside and on the deflector shield.

Violation: Poisonous and Toxic/Chemical Substances

• Restriction-Presence and Use

- The presence in the establishment of poisonous or toxic materials that are not required for the maintenance and operation of the establishment represents an unnecessary risk to both employees and consumers. Only those poisonous or toxic materials that are required for the operation and maintenance of a food establishment, such as for the cleaning and sanitizing of equipment and utensils and the control of insects and rodents, shall be allowed in a food establishment. Instructed PIC to remove the unapproved chemicals from the facility.
Observed poisonous or toxic materials other than those required for the operation and maintenance of a food establishment located in the establishment. Material: Home Based Pesticides

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC to clean and remove dead insects from facility.
Observed pests allowed to accumulate under the beverage dispensing machine in the drive through. Pest Type: cockroach
Pest Condition: dead
Number of Pests Present: 15+

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the

areas that deficiency was shown.
Observed that there was no manager present, designated person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Knowledge Tested: Cold Holding Temperatures, Hot Holding Temperatures, Sanitizer, Reportable foodborne illnesses

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at plumbing systems in the back area such as at the prep sink

Violation: Training Records

• Food Handler Cards

- General Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Maintenance

• Maintaining Refuse Areas and Enclosures

- A storage area and enclosure for waste shall be maintained clean. Instructed PIC to clean the area.
Observed the waste storage area to be unclean. Condition of the storage area: waste spilled on top of lids, and in corral area with fecal matter.

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Food must be protected from contamination of splashing water, chemical, or other foods; dust; and other contaminates. Instructed PIC to have food protected in containers/wrapping and not to store food in those areas unless the source of contamination can be mediated another way.
Observed food stored improperly where it was exposed to contamination from splash, dust, or other contamination. Location: Prep area Food Item: Bulk rice bin Condition: bulk bin had lid open with soiled perforated pan directly over it

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Warewashing Temperature and Concentration

• Sanitizers, Criteria-Chemicals

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR. PIC corrected violation by diluting the sink basin with water.
Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Quat Location: 3 compartment sink basin Concentration: Over 400ppm

Violation: Operations

• Sticker Posted

- Instructed the PIC that every Food Establishment must display the Grade received at the time of the most recent inspection in a place that is visible to the public.
Observed that no grade sticker was posted on the facility. CHPD replaced grade stickers during inspection.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the walls such as underneath 3 compartment sink, and floors in areas such as the drive through and beverage station in the

lobby.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- Multiuse utensils which have been cleaned and sanitized can become contaminated with pathogens which can be transferred to food from utensils that have been stored on surfaces which have not been cleaned and sanitized. Instructed PIC to clean and sanitize utensils prior to continuing use, must be maintained cleaned in a regular schedule as prescribed by the code and to store items so that the risk of contamination prior to use is minimized.
Observed utensils with use for non-time/temperature controlled for safety food during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food. Utensil Type: Portion scoop Location: Prep top cooler Condition of the Location: Handle was in direct contact with the food

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed utensils were not air dried and were wet stacked. Location: Warewashing area Utensil Type: Various sized pans various hotel pan sizes and half lexans Manner: Wet stacked with visible moisture accumulated between the stacked pans

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located in the drive through and cooking areas, inside cabinets, coolers/cooler gaskets, wok station. The condition of the surface was covered in significant debris accumulation, such as underneath the beverage station in drive through with significant spillage of what appears to be soda syrup accumulating dead insects, with significant odor. Facility was utilizing that area for storage for straws, etc.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair. Observed walls throughout the facility drive through, mop sink, warewashing, service line etc. in disrepair by having numerous gaps, holes, cracks and crevices.

PETER PIPER PIZZA - 9260 GOLF COURSE RD NW - Conditional Approved

PETER PIPER PIZZA - 9260 GOLF COURSE RD NW
Food Establishment Class C
Date: 10/16/2026 - #: COM-FOODES-098428-2026 - Inspection Result: Conditional Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75°F with a contact time of 30 seconds.
Instructed pic fryer must be cleaned on a regular basis.
Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.
Location: Front prep table and cheeses cutting area.
Concentration: Both buckets.at 0 PPM.
Temperature: 65°F- 72°F
Observed interior fryer with substantial soil and debris buildup.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by routinely inspecting incoming shipments of food and supplies, routinely inspecting the premises for evidence of pests, and eliminating harborage conditions. Instructed PIC to provide EHD with their standard operating procedures and pest control plan.
Observed the facility has inadequate procedures to effectively control pests. facility had 5 dead roaches storage areas and behind the ice machine.

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165°F and to maintain temperature at 135°F and above.
Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: pasta mac and cheeses< pasta Mac and alfredo Spinach and

mushroom Food Temperature: Both internal temperatures of 127°F.

Violation: Miscellaneous

• Miscellaneous Sources of Contamination

- Regardless of its specificity, a Code cannot anticipate all the diverse means by which food can become contaminated after receipt. Food must be protected from all sources of contamination.
Method of contamination Condensation and ice dripping off the freezer unit onto open boxed chicken and unknown frozen food items.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed hand wash station is not maintained in good repair or is not repaired by law.
Observed Pizza dough making hand wash station found in disrepair by Faucet leaking badly when turned on.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.
Observed handwashing sink(s) was observed blocked or inaccessible. Location: shredded cheese prep area, dish washing area Manner: roll cart and dustpan and broom stored in front of the hand wash station.
Sink also being used for dumping food debris.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Pizza making area, cheese prep area.
Activity: Pizza was being made by Employee with ne hair restraint. cheeses were being shredded by employee who had a beard and was not covered.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors under fountain drink dispensers, shelving thorough out the facility, sinks, prep tables. Ceiling tiles and vents in the cashier area and pizza oven with substantial soil buildup and debris.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under □□ 4-602.11
In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was not stored on a clean and sanitized portion of the equipment. Utensil Type: Ice scoop. Location: Ice machine. Condition of the
Location: was stored inside Ice machine with handle touching the ice.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located Dining food service area and reach in refrigerators and coolers. The surface was made out of Stainless steel and epoxy.
The walk-in coolers under shelving with excessive soil buildup. Reach in refrigerators with substantial soil buildup. sides of prep top coolers with caked on build and walls around the prep table areas. fountain drink dispenser push wand and bottom with dry soil residue.

Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch- PIC corrected violation by cleaning and sanitizing Food dicer

QUICK TRACK 88 - 12000 MENAUL BLVD NE
Retail Food Establishment Class 3
Date: 10/13/2026 - #: RT-RET-090716-2026 - Inspection Result: Conditional Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: all TCS food items for hunts bros pizza Activity of the Food: Stored
Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.
Observed pests allowed to accumulate in facility Location: by atm machine
Pest Type: cockroach Pest Condition: Dead
Number of Pests Present: 3-4

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: food dicer Location: Hunts brothers pizza station Condition of the Location: dried food debris on dicer

RAVENNA ASSISTED LIVING - 3051 TWIN OAKS DR NW - Approved

RAVENNA ASSISTED LIVING - 3051 TWIN OAKS DR NW
Food Establishment Class C
Date: 10/14/2026 - #: RT-FOODEST-004809-2026 - Inspection Result: Approved

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.
Observed pests allowed to accumulate in traps. Location: Dry storage room and utility closet Pest Type: Cockroach
Pest Condition: Dead Number of Pests Present: 2

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not solid. Facility is keeping the rear receiving door open and is using a magnetic mesh that does not properly protect the door from pest or rodents as it is not tight fitting to the doorframe.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the kitchen make line floor behind the steamer. Also observed debris buildup on the walk-in cooler floors under storage racks.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located on the underside of the grill and cooktop. The surface was made out of stainless steel. The condition of the surface was soiled with grease and food residue. Also observed the knife magnet to be in need of cleaning.

ROSE GARDEN CHINESE RESTAURANT LLC - 6541 PARADISE RD NW, E
Food Establishment Class C
Date: 10/15/2026 - #: COM-FOODES-098022-2026 - Inspection Result: Conditional Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours
Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Can opener cabbage smasher. Location: back prepping area.
Location: Blades with dry old soil buildup.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Refrigerators and walk in coolers.
Food Items: Rice cakes 3 units, seaweed no expiration dates.

Violation: Food Separation

• Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination

- It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination.
Observed non-ready-to-eat raw animal food stored with ready-to-eat raw animal food without protection from contamination. Location: walk in cooler.
Food Item: Raw ground Beef.

Condition: Stored above ready to vegetables.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the edges of the screen doors. also, front door was wide open at the time of inspection

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Cooking area.
Activity: Employee cooking food without proper hair restraint.

• Eating, Drinking, or Using Tobacco Products

- Eating by employees in food preparation areas is prohibited because of the potential that the hands, food, and food-contact surfaces may become contaminated. Instructed PIC to retrain employees on designated eating areas.
Observed employee eating in an undesignated area. Proper hygienic practices must be followed by food employees in performing assigned duties to ensure the safety of the food, prevent the introduction of foreign objects into the food, and minimize the possibility of transmitting disease through food.
Location: Food Prep table.
Activity: Employee eating in the prep area on a prep table.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.
Observed Knifes stored improperly, in-between prep top cooler and tables contaminated surfaces.

RUSTIC BUBBLE TEA CAFE LLC - 800 JUAN TABO BLVD NE - Approved

RUSTIC BUBBLE TEA CAFE LLC - 800 JUAN TABO BLVD NE
Food Establishment Class C
Date: 10/15/2026 - #: PT0141857 - Inspection Result: Approved

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.
Observed wiping cloths improperly used. Observed soiled wiping cloths stored on prep table

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at Floor drain for handwashing sink behind counter and at floor drain next to ice machine in kitchen

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the

mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: food service containers with matcha, sugar and assorted powders Location: behind front counter

Violation: Toilet Facilities

• Toilet Room Receptacle, Covered

- Instructed to provide a covered receptacle for sanitary napkins.
Observed in a toilet room used by females, no covered receptacle.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under □□ 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.
Observed utensils during a pause in use stored incorrectly. Utensil was stored in food with their handle not above the top of the food and the container. Utensil Type: Scoops Location: behind front counter bins for protein powders and ice bin Condition of the Location: Scoops stored in food containers with handles directly touching the food product inside

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS items Activity of the Food: Stored
Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

Sam's Club - 10600 COORS BYPASS BLVD NW - Approved

Sam's Club - 10600 COORS BYPASS BLVD NW
Food Establishment Class C
Date: 10/14/2026 - #: COM-FOODES-097474-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- There was evidence to substantiate the complaint of employees touching contaminated surfaces. changing gloves but did not wash their hands before donning gloves.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Cutting boards. Location: Cafe prep top cooler.
Condition of the Location: cutting surfaces with a black like soil residue.

Violation: Poisonous and Toxic/Chemical Substances

• Separation-Storage

- Use of poisonous or toxic material containers to store, transport, or dispense food is prohibited because of the potential for contamination of the food. A container previously used to store poisonous or toxic materials may not be used to store, transport, or dispense food, equipment, utensils, linens,
single-service or single-u shelf use articles. Instructed PIC to remove items immediately, discard contaminated food and wash and sanitize any equipment or utensils.
Observed a container previously used to store poisonous or toxic materials used for storage of food. Location: prep table. coke syrup shelf.
Material Type: Sanitizer stored in food contact above food, and a spray bottle toxic substance. Food Items: Pizza sauce and coke syrup.

Violation: Surface Condition

• Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is smooth.
Observed nonfood contact surface that was not smooth. The surface was located Cafe refrigerator. The surface was made out of Rubber. The condition of the

surface rubber gaskets damaged and hanging and in need of replacement.

Violation: Operation and Maintenance

• Cleaning of Handwashing Fixtures

- Handwashing facilities are critical to food protection and must be maintained in operating order at all times so they will be used. Handwashing sinks shall be cleaned as often as necessary to keep them clean. Instructed PIC to clean handwashing sink(s).
Observed handwashing fixtures with the buildup of soil residues. The plumbing fixture was located Cafe. The condition of the surface was a hand wash stations were soiled and in need of cleaning.

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.
Observed inadequate amount of lighting. Location: Walk in cooler and walk in freezer. Manner: Lights in both areas not working.

Violation: Personal Cleanliness

• Eating, Drinking, or Using Tobacco Products

- A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area and should be in a cup with a lid and straw.
Observed a food employee with an improper drink. Location: Reach in refrigerator.
Type of Drink: Ice coffee stored on top of ready to eat foods.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors base coving and walls and corners. Ceiling tiles are pretty soiled and in need of cleaning replaced.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to remove and replace with material that is smooth and easily cleanable.
Observed Floors and base coving is not smooth and easily cleanable. The surface was located Cafe. The surface was made out of Epoxy.

SUBWAY 25474 - 1306 GIBSON BLVD SE - Approved

SUBWAY 25474 - 1306 GIBSON BLVD SE
Food Establishment Class C
Date: 10/16/2026 - #: CAC-Food-098442-2026 - Inspection Result: Approved

Facility has been upgraded to Approved status following the correction of the following violations during inspection by the Environmental Health Department. The facility has corrected:
- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch (Food contact surfaces have been cleaned and sanitized)
- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition (Person in in charge voluntarily discarded expired food item)
- Removing Dead or Trapped Birds, Insects, Rodents and other Pest (Dead insects were removed and affected area was sanitized)

SUBWAY 25474 - 1306 GIBSON BLVD SE
Food Establishment Class C
Date: 10/16/2026 - #: COM-FOODES-098414-2026 - Inspection Result: Conditional Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Slicer, pizza cutter, knifes / knife magnet and clean dish storage tubs. Location: Make line and clean dish storage area
Condition of the Location: Soiled with debris accumulation and food residue.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.
Observed pests allowed to accumulate in traps.
Location: Dry storage, walk in freezer and under prep table Pest Type: Cockroach
Pest Condition: Dead Number of Pests Present: 3

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on ensuring the proper disposition of food items. PIC voluntarily discarded food items bearing no date markings.
Observed ready-to-eat time and temperature controlled for safety food held within the establishment exceeding the seven (7) day limit. Location: Reach in cooler on make line
Food Items: Shaved steak Expiration Dates: 10/15/26

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed 3 compartment sink faucet is not maintained in good repair or is not repaired by law. Observed faucet found in disrepair by having a continuous leak in that needs to be repaired.

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.
Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drain directly under the 3-compartment sink.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed front door to the outside that is not tight fitting, light can be seen at the edges.

• Exterior Walls and Roofs, Protective Barrier

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.
Observed holes or other gaps in or along the structure of the facility.
Location: Outdoor directly across the trash enclosure in the cement sidewalk slab alongside of the building. Size: 1/2-to-3-inch gaps

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraint (Beard guard) Location: Kitchen
Activity: Active food prep of unprotected food items

• Eating, Drinking, or Using Tobacco Products

- A food employee may drink from a closed beverage container if the container is handled to prevent the contamination of the employee's hands, the container, and exposed food, clean equipment, utensils, linens, and unwrapped single-service and single-use articles. Instructed PIC that employee drinks should be kept in a designated area and should be in a cup with a lid and straw.
Observed a food employee with an improper drink. Location: Above food prep table and deli slicer Type of Drink: Coffee Tumbler

Violation: Storage

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed equipment was not air dried and was wet stacked. Location: Clean dish storage rack
Equipment Type: Portion trays for meats Manner: Not air dried/wet stacked

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located on counter top where deli slicer is stored and in cabinet drawers' underneath. The surface was made out of stainless steel. The condition of the surface was soiled with debris buildup and food residue.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed floor tiles throughout kitchen, storage areas and sandwich make line to be in disrepair by being damaged, cracked and broken.

SW CONVENIENCE STORES LLC - DK #711 - 9215 INDIAN SCHOOL RD NE - Approved

SW CONVENIENCE STORES LLC - DK #711 - 9215 INDIAN SCHOOL RD NE
Retail Food Establishment Class 3
Date: 10/14/2026 - #: PT0045183 - Inspection Result: Approved

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to move temperature measuring device to the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures.
Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Display unit for sandwiches and burritos Thermometer Location: None available

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Frozen burritos, sandwiches Activity of the Food: Stored

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed a soiled mop not in use, stored directly in mop bucket.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.
Observed handwashing sink(s) was observed blocked or inaccessible. Location: Hand washing station next to three compartment sink Manner: Drinks stored inside sink basin

TACO BELL 4149 - 1001 JUAN TABO BLVD NE - Approved

TACO BELL 4149 - 1001 JUAN TABO BLVD NE
Food Establishment Class C
Date: 10/15/2026 - #: COM-FOODES-098001-2026 - Inspection Result: Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed Three compartment sink is not maintained in good repair or is not repaired by law. Observed Three compartment sink found in disrepair by leaking grey water onto the floor below

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
Observed floor drains are not maintained in good repair or is not repaired by law. Observed Floor drains found in disrepair by missing protective dome or mesh cover at 3 compartment sink and at floor drain next to ice cream machine and managers office

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Observed employee's food stored in hot box directly

over facility food items

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings. Observed Employee phone stored on prep table of main cook line

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: wrist jewelry and ring

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors behind fryers and soda machine

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located in walk in freezer The surface was made out of metal The condition of the surface was ice and frost buildup on walk in freezer door, door frame, and floor

TACOS EL MUCHACHO ALEGRE - 3107 EUBANK BLVD NE, 16 - Approved

TACOS EL MUCHACHO ALEGRE - 3107 EUBANK BLVD NE, 16
Food Establishment Class C
Date: 10/14/2026 - #: PT0160667 - Inspection Result: Approved

Violation: Cooling

• Cooling Methods

- Instructed PIC to use an alternate method of cooling to minimize the opportunity for pathogen growth; recommended to utilize one or more methods such as 1) Place the food in a shallow pan 2) Separate the food into smaller or thinner portions 3) Use rapid cooling equipment 4) Stir the food in a container placed in an ice/water bath 5) Use containers that facilitate heat transfer 6) Only partially cover product, if protected from overhead contamination.
Instructed PIC to rapidly reheat the (TCS) food item to 165°F; then, quickly cool the product down to 70°F within two (2) hour period using method(s) such as 1) Place the food in a shallow pan 2) Separate the food into smaller or thinner portions 3) Use rapid cooling equipment 4) Stir the food in a container placed in an ice/water bath 5) Use containers that facilitate heat transfer 6) Only partially cover product, if protected from overhead contamination.
Observed TCS food items cooling in a method that does not facilitate the necessary rate of heat transfer to cool the food in an appropriate time frame. Location: Food Items: Cooked meats Manner: Stored at room temperature covered with aluminum foil.
TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked meats Activity of the Food: Cooled

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.
Observed doors to the outside that are not tight fitting, light can be seen at the edges.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.
Observed food items in cold holding unit measuring above 41°F. Location: Cold holding drawers on cook line Food Items and Temperature: Chopped green chile 48 °F, cooked chopped meat 47 °F, cooked meat 46 °F.

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees'

personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Employee eating burrito inside kitchen.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee does not wash hands when required. Condition: Employee did not wash hands after eating in kitchen and before donning new gloves.

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed a soiled mop not in use, stored directly inside mop bucket.

TERIYAKI CHICKEN BOWL #5 - 4700 MENAUL BLVD NE - Conditional Approved

TERIYAKI CHICKEN BOWL #5 - 4700 MENAUL BLVD NE
Food Establishment Class C
Date: 10/14/2026 - #: COM-FOODES-097481-2026 - Inspection Result: Conditional Approved

Violation: Result of a Complaint

• Complaint

- This inspection is the result of a complaint received by the Department and the complaint is unsubstantiated.

Violation: Preparation

• Food Preparation

- Food preparation activities may expose food to an environment that may lead to the food's contamination. Just as food must be protected during storage, it must also be protected during preparation. Instructed PIC that the contaminated food must not be used in the operations of the food establishment and to ensure food is protected from contamination at all stages of preparation.

Observed unpackaged food unprotected from environmental contamination during preparation. Location: back prep area Food Item: buckets of raw chicken thighs and a bucket of soy sauce Condition: buckets of raw chicken and soy sauce stored on floor next to garbage can and mop bucket at time of the inspection had employees clean bottom of buckets and place buckets on prep tables to prevent contamination from occurring

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed plumbing system item is not maintained in good repair or is not repaired by law. Observed three compartment sink and hand washing station near drive thru area both faucets are leaking water.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee did not wash hands when required. Condition: employee was dumping raw chicken into containers and then moving onto next task without washing hands at handwashing station and using soap.
inspector stopped employee and made him wash hands before prepping any other food after raw chicken was being processed by employee

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Facility did not have Hot Holding, Cold Holding, Equipment or Calibration logs for thermometers
Inspector emailed pic all logs to start documentation as of today

WIENERSCHNITZEL - 110 JUAN TABO BLVD NE - Approved

WIENERSCHNITZEL - 110 JUAN TABO BLVD NE
Food Establishment Class C
Date: 10/14/2026 - #: RT-FOODEST-051576-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice Machine and Can opener Location: back of kitchen by three compartment sink Condition of the Location: Ice machine with Organic buildup on the top inside of ice bin

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.
Observed pests in the facility with no control methods in place. Location: Dining room Pest Type: fly Pest Condition: living

Violation: Toilet Facilities

• Toilet Room Receptacle, Covered

- Instructed to provide a covered receptacle for sanitary napkins.
Observed in a toilet room used by females, no covered receptacle.

Violation: Operation and Maintenance

• Handwashing Cleanser, Availability

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.
Observed no handwashing cleanser available at handwashing sink(s). Location: Main handwashing sink in kitchen

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: Wrist jewelry

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed buildup and debris on the floors in the hand to reach areas such as under the equipment and shelving

Violation: Storage

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.
Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: Not air dried and stacked wet with moisture between pans
