07/28/2026	PT0160341	Routine Food Establishment Inspection	Conditional Approved	Pg. 53
Corrective Action Compliance does not represent a full routine health inspection. Instead, it reflects that a facility has taken specific corrective actions in response to violations identified during an inspection. These actions may be taken during the inspection or afterward, and the Corrective Action Compliance allows for the facility's grade or status to be updated based on those corrections. Corrective actions may be demonstrated through documentation such as photos, videos, receipts, work orders, site visits, or both verifiable means showing that the violation has been addressed and compliance has been achieved. APPROVED An "Approved" grade indicates that a food establishment that has demonstrated compliance with the standards in the Food Code the Food Service and Retail Ordinance, other industry standards, and other laws and has received a Grade of Approved and is able to operate. CONDITIONAL APPROVED A "Conditional Approved" grade is issued when a facility is found to have violations of the Food Code, the Food Service and Ret Ordinance, industry standards, or applicable laws. While the facility may continue operating, it must complete specific corrective actions to address the violation A yellow sticker is placed alongside the green "Approved" sticker. UNSATISFACTORY				

An "Unsatisfactory" grade indicates that a facility has not met the required standards but is allowed to continue operating temporarily while corrective actions are completed. A red "Unsatisfactory" sticker will be displayed at the facility for the duration of this grade. This is a temporary status and requires timely follow-up to verify compliance.

CLOSED

A "Closed" grade is assigned when violations pose a significant risk to public health, requiring the facility to immediately cease operations. The facility must remain closed until corrective actions have been completed and verified. A facility with this grade will display an orange "Closed" sticker for the duration of the closure.

ALBUQ SUBWAY INC/SUBWAY SAND - 7120 WYOMING BLVD NE - Approved

ALBUQ SUBWAY INC/SUBWAY SAND - 7120 WYOMING BLVD NE

Food Establishment Class C

Date: 07/28/2026 - #: PT0044695 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at the service sink at the time of inspection. Observed hose connected to service sink faucet is too long and comes into direct contact with the bottom of the sink basin.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Food must be protected from contamination of splashing water, chemical, or other foods; dust; and other contaminants. Instructed PIC to have food protected in covered containers/wrapping and not to store food in those areas unless the source of contamination can be mediated another way.

Observed food stored improperly where it was exposed to contamination from splash, dust, or other contamination. Location: storage cabinet under beverage dispenser station in customer self service area. Food Item: bag of sugar. Condition: observed an opened bag of sugar is stored in cabinet without being covered or in a covered container.

ALBUQUERQUE SCHOOL OF EXCELLENCE - 13201 LOMAS BLVD NE - Approved

ALBUQUERQUE SCHOOL OF EXCELLENCE - 13201 LOMAS BLVD NE

Food Establishment Class C

Date: 07/30/2026 - #: RT-FOODEST-041618-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Can opener Location: Prep table

Condition of the Location: Soiled with food debris

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain under the dish machine and steam table.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on kitchen floors and to clean and sanitize on a regular basis

Observed buildup and debris on the kitchen floors behind and under equipment.

Violation: Physical Facilities, Construction and Repair

• Walls and Ceilings, Attachments

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed several ceiling tiles above kitchen in disrepair by being water damaged and are visibly flaking.

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at multiple floor drains in the kitchen such as under the kitchen beverage station and dish washing machine.

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Observed multiple improper employee beverages stored on storage shelving.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on reach in cooler floors and to clean and sanitize on a regular basis. Observed soil buildup and debris on the reach in cooler floors.

APPLEBEES NEIGHBORHOOD GRILL & BAR - 2000 YALE BLVD SE

Food Establishment Class B

Date: 07/27/2026 - #: PT0159630 - Inspection Result: Approved

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.
Observed water buildup on the bar floors under the ice bin, bottle station and three-compartment sink.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located on the bottom base of the reach in bar cooler. The condition of the surface was soiled with sticky residue.

Complaint

This inspection was the result of a citizen complaint that was unsubstantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Pepsi fountain drink dispenser. Location: Facing dining area.
Condition of the Location chute with a brown like residue.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings. peaches

Observed ready-to-eat time and temperature-controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Walk in cooler.

Food Items: Sliced cucumber, veggies, unknown dressing, chunked pizza.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges of both dining exit doors.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Kitchen food prep area.

Activity: Two employees making pizzas with hair not restrained.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage

and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on front sales counter back side bottom, backroom near receiving and tank. and to clean and sanitize.

Observed buildup and debris on the front sales counter back side bottom, backroom near receiving and tank.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located behind the fountain drink dispensers. The surface was made out of wood. back cabinets had debris and soil buildup.

Chili's Bar & Grill - 8100 WYOMING BLVD NE – Approved

Chili's Bar & Grill - 8100 WYOMING BLVD NE

Food Establishment Class C

Date: 07/27/2026 - #: PT0044660 - Inspection Result: Approved

Violation: Miscellaneous

• Miscellaneous Sources of Contamination

- Regardless of its specificity, a Code cannot anticipate all the diverse means by which food can become contaminated after receipt. Food must be protected from all sources of contamination.

Method of contamination: Observed employee cell phone stored on the ledge of the steam table next to a plate used for customer orders. Location: appetizer food prep area

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course. Observed food handler cards on file were expired.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: upon entering kitchen line area, observed employee working with utensils without out gloves. After inspector washed hands at hand washing sink observed employee had donned a pair of single use gloves. Educated employee on hand washing and glove usage.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize floor drains.

Observed buildup and debris in the floor drains in kitchen and ware washing areas.

Chili's Bar & Grill - 8100 WYOMING BLVD NE

Food Establishment Class B

Date: 07/27/2026 - #: PT0044661 - Inspection Result: Approved

Violation: Training Records

Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course. Observed food handler cards on file were expired.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage

and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize floor drains. Observed buildup and debris in the floor drains in the bar area.

CHURCHS CHICKEN 10386 - 9250 GOLF COURSE RD NW - Conditional Approved

CHURCHS CHICKEN 10386 - 9250 GOLF COURSE RD NW

Food Establishment Class C

Date: 07/29/2026 - #: RT-FOODEST-118173-2025 - Inspection Result: Conditional Approved

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165 F and to maintain temperature at 135 F and above.

Observed time/temperature control for safety food not hot held at 135°F or above. Food Item: Chicken strips.

Food Temperature: 115 °F.

Violation: Miscellaneous

• Miscellaneous Sources of Contamination

- Regardless of its specificity, a Code cannot anticipate all the diverse means by which food can become contaminated after receipt. Food must be protected from all sources of contamination. Instructed pic to dump the ice clean and sanitize on a regular basis.

Method of contamination: Observed the interior of the ceiling of the ice machine with a brown, black soil residue dripping onto the ready to eat ice. Observed an unopened drink stored in the ice machine at the time of inspection.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Hand wash station is not maintained in good repair or is not repaired by law. Observed Hot water valve leaking when turned on.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed doors to the outside that are not tight fitting, light can be seen at the edges. Also, door is not levels and does not shut right.

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.

Observed food temperature measuring devices were not provided or readily accessible for the measuring of thin foods for the cabinet reach in freezer and refrigerators.

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire new sanitizing solution testing kits

Observed expired testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Back hand wash station no paper towels.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located walk in cooler The surface was made out of Meatal.

The condition of the surface was. raw chicken is being prepared in that area of the walk-in cooler, and the walls has substantial soil buildup. Observed interior of two of the refrigerator cabinets with substantial debris and soil buildup.

CIRCLE K - 361 COORS BLVD NW - Approved

CIRCLE K - 361 COORS BLVD NW

Retail Food Establishment Class 3

Date: 07/30/2026 - #: PT0134579 - Inspection Result: Approved

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

-Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed back hallway area in disrepair by trim coming off wall in back hallway area and a hole in wall in back office where a door is off the track exposing the interior of the wall.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located in retail area and in walk in cooler The surface was made out of plastic and metal The condition of the surface had debris buildup on walk in coolers vent covers on shelving on the exterior of reach in coolers/freezers doors inside cabinets and on the exterior of soda and coffee machines

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at the three-compartment sink.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: walk in coolers, reach in coolers and freezers and retail shelves Location: retail and back walk-in cooler areas Condition of the Location: debris buildup on shelving in retail area, debris buildup on the shelving inside walk in cooler where drinks are displayed, inside reach in coolers and freezers debris buildup drain tray at the soda machine.

Complaint

This inspection was the result of a citizen complaint that was unsubstantiated.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Sales floor.

The surface was made out of Cabinets.

The condition of the surface's bottoms with substantial debris and soil buildup.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Drain. is not maintained in good repair or is not repaired by law. Observed backroom drain found in disrepair by missing the required drain screen debris catcher.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on.

Observed buildup and debris on the floors of the storage room under shelving, sinks. Cooler and freezer floors. Cooler ceiling and walls with soil buildup at the time of inspection.

Storage room drains with substantial soil buildup.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils - Grease/Soil Deposits, Cooking Equipment

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Sandwich tray holders Location: Sandwich display case

Condition of the Location: Sandwich trays with substantial debris and soil buildup.

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. Instructed PIC to refill sanitizer with fresh solution of 200 ppm quat.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Front sanitizer bucket.

Concentration: Below 100 PPM Temperature: 72 degrees

CLIFFS - 4800 OSUNA RD NE

Food Establishment Class B

Date: 07/30/2026 - #: RT-FOODEST-063870-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Back of kitchen Condition of the Location: Brown buildup on inside of ice machine.

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood

contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Observed nonfood contact surface with the buildup of soil residues. The surface was located in the ice cream chest freezer. The condition of the surface was ice and frost buildup.

CLIFFS - 4800 OSUNA RD NE

Food Establishment Class C

Date: 07/30/2026 - #: RT-FOODEST-063868-2025 - Inspection Result: Approved

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Observed nonfood contact surface with the buildup of soil residues. Type of Equipment: Walk in cooler condenser unit. Manner: Observed ice buildup on the condenser unit next to fan guard at the time of inspection.

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to close/seal hole. PIC must send updates to CHPD Inspector when repairs are completed for verification. Observed wall area above upright cooler is not smooth and easily cleanable. Manner: Observed a 12"x 4" elongated hole in the wall where hoses for previous beverage dispenser unit was located.

CLIFFS - 4800 OSUNA RD NE

Food Establishment Class B

Date: 07/30/2026 - #: RT-FOODEST-063869-2025 - Inspection Result: Approved

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the rolling door's door sweep so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use. Observed roller door to the outside that is not tight fitting, light can be seen at the bottom edge.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Observed nonfood contact surface with the buildup of soil residues. Type of equipment: Walk in freezer fan guard on condenser unit. Condition: Observed ice buildup on the fan guard at the time of inspection.

CLIFFS - 4800 OSUNA RD NE

Food Establishment Class C

Date: 07/30/2026 - #: RT-FOODEST-062999-2025 - Inspection Result: Approved

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Observed nonfood contact surface with the buildup of soil residues. The surface was located Ice cream chest freezer. The condition of the surface was ice and frost buildup. Observed nonfood contact surface with the buildup of soil residues. The surface was located on the floor next to soda machine. The condition of the surface was spider web and dust debris buildup

COA/North Valley Senior Center - 3825 4TH ST NW - Approved

COA/North Valley Senior Center - 3825 4TH ST NW

Charitable Food Provider

Date: 07/27/2026 - #: PT0150792 - Inspection Result: Approved

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records. Observed pests in the facility with no control methods in place. Location: Men's restroom. Pest Type: 1 American cockroach. was living

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine

. Location: back prep kitchen

. Condition of the Location: Interior of the ice machine ceiling with a pink like soil and buildup.

Violation: Pest Control

• **Controlling Pests, If Present: Treatment**

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place

. Location: Kitchen oven.

Pest Type: American Roach.

Pest Condition: one dead roach.

Violation: Ventilation and Hood Systems

• **Heating, Ventilation, Air Conditioning System Vents**

- Heating, ventilating, and air conditioning systems shall be designed, installed, and maintained so that make-up air intake and exhaust vents do not cause contamination of food, contact surfaces, equipment, or utensils.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and dust to occur. Condition: Substantial soil buildup.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the storage area floors under shelving, behind freezers and refrigerators.

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located in Kitchen.

. The surface was made out of Stainless steel. steam table bottom prep tables and sides. The condition of the surface was soiled with debris and grease buildup.

CRUMBL COOKIES - 8100 WYOMING BLVD NE, F-3 - Approved

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. Equipment Type: Dry ingredient bins exterior surfaces.

Violation: Physical Facilities

• **Outer Openings, Protected**

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to replace the back door bottom door sweep so that the door is solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use.

Observed back door to the outside is not tight fitting, light can be seen at the bottom edges.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize floor and walls underneath front counter area.

Observed buildup and debris on the floor and wall areas underneath the front counter area where the dry ingredient bins are stored.

Violation: Toilet Facilities

• **Toilet Room Receptacle, Covered**

- Instructed to provide a covered receptacle for sanitary napkins.
Observed in a toilet room used by females, no covered receptacle.

Violation: Poisonous and Toxic/Chemical Substances

• **Common Name-Working Containers**

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Sanitizer dispenser at three-compartment sink. Alleged Material: Quat sanitizer. Observed label on dispenser: sink & surface. But sanitizer chemical connected to dispenser for sanitizer is Multi-Quat.

Curry Leaf - 6910 MONTGOMERY BLVD NE, C - Unsatisfactory Re-Inspection required

Curry Leaf - 6910 MONTGOMERY BLVD NE, C

Food Establishment Class C

Date: 07/31/2026 - #: CAC-Food-072897-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Complaint

This inspection is a follow-up related to a citizen complaint that was substantiated.

Facility issued citation for operating with a suspended permit for \$250.00.

Facility is being re-opened under a grade of Unsatisfactory.

Observed minimal rodent droppings inside kitchen area (at stand mixer) and dry storage (at holes in walls with damaged coving). Additionally, one live cockroach in the kitchen.

Facility has tremendous cleaning opportunities remaining with substantial debris throughout the facility. Additionally, numerous holes and damaged walls/ceilings were found throughout the interior and holes around the outside of the facility going into the walls. Doors into the facility had visible gaps along the base and center. Instructed PIC to continue to clean facility, removing harborage, food sources and water sources for rodents and instructed PIC to seal holes, gaps, cracks and crevices throughout.

Reminded PIC that they shall remove rodent droppings in accordance with current Centers for Disease Control and Prevention recommendations published on the Enforcement Authority's website.

Observed facility's refrigeration units were holding temperature at 41°. Recommended to PIC to make adjustments to refrigeration units to bring temperature lower, so that when they are in operation the temperatures are maintained. Reminded PIC when cooking equipment is fully on, and they are opening and closing doors or prep top is open the temperatures will rise and their product may go outside of temperature.

PIC created cleaning schedule for kitchen. Instructed PIC to follow their plan to maintain a clean, and sanitary environment. Reminded PIC grade sticker must be kept visible to the public and not blocked, or removed.

Curry Leaf - 6910 MONTGOMERY BLVD NE, C

Food Establishment Class C

Date: 07/29/2026 - #: CAC-Food-072021-2026 - Inspection Result: Closure Re-Inspection Required

Complaint

This inspection is a follow-up related to a citizen complaint that was substantiated.

Instructed PIC to send documentation to CHPD demonstrating corrective actions, this is to include new pest control services rendered. Facility will be invoiced for \$150.00 reinspection fee which must be paid prior to re-inspection.

Facility is to remain closed due to the imminent health hazard of rodent infestation.

Observed 100s rodent droppings inside kitchen, ware washing, dining room food storage area and dry storage area. These were in areas including on top of food container lids in sanitized drying area of ware washing room, container plastic wrapped fenugreek leaves, containers of yellow lentils, container of black pepper and white pepper, a variety of green pulse (pea/lentil). Droppings were found on multiple food storage shelving, shelving above cooking area, behind equipment such as refrigerators, stuck on the walls, and were on the flooring.

Additionally observed live roach in dry storage area with spices, and various lentils/pulses.

Facility had tremendous cleaning opportunities remaining with substantial debris throughout the facility. Additionally, numerous holes and damaged walls/ceilings were found throughout the interior and holes around the outside of the facility going into the walls. Doors into the facility had visible gaps along the base and center. Instructed PIC to continue to clean facility, removing harborage, food sources and water sources for rodents and instructed PIC to seal holes, gaps, cracks and crevices throughout.

Observed facility removing and handling rodent droppings, urine and other materials without safety precautions including PPE.

Reminded PIC that they shall remove rodent droppings in accordance with current Centers for Disease Control and Prevention recommendations published on the Enforcement Authority's website. Provided physical copy of CDC guidelines on cleaning after rodents, droppings, urine and nesting material during inspection.

Curry Leaf - 6910 MONTGOMERY BLVD NE, C

Food Establishment Class C

Date: 07/27/2026 - #: RT-FOODEST-068718-2026 - Inspection Result: Closure Re-Inspection Required

Complaint

This inspection is a follow-up related to a citizen complaint that was substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Knife, vegetable dicer, robot coupe Location: Stored away on prep table, on magnetic knife storage rack Condition of the Location: Stored away with debris buildup.

Violation: Poisonous and Toxic/Chemical Substances

• Separation-Storage

- The storage of poisonous or toxic materials directly above or adjacent to food could result in contamination of the food from spillage. Poisonous or toxic materials must be stored so they cannot contaminate food, equipment, utensils, linens, and single-service and single-use articles by separating the poisonous or toxic materials by spacing or partitioning; and storing them in an area that is not above food, equipment, utensils, linens, and single-service or single-use articles. Instructed PIC to move chemicals to an approved location.

Observed poisonous or toxic materials stored in a manner that has the potential to contaminate utensils. Poisonous/Toxic Substance and Location: Eye glass cleaner stored inside soup bowl in clean dish area storage rack, glass cleaner stored inside soup bowl.

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165 F and to maintain temperature at 135 F and above.

Observed time/temperature control for safety food not hot held at 135°F or above.

Food Item and Food Temperature: Cooked carrot mix 113 °F, cooked meat 127 °F, soup 127 °F, green paste 115, soup 120 °F.

Violation: Corrective Actions

• Infestation Corrective Actions: Clean Up After Rodents

- Food Establishments shall remove rodent droppings in accordance with current Centers for Disease Control and Prevention recommendations published on the Enforcement Authority's website. Instructed PIC that the following steps must be taken when cleaning rodent droppings: <https://www.cdc.gov/healthypets/pets/wildlife/clean-up.html> Clean up rodent urine and droppings Step 1: Put on rubber or plastic gloves. Step 2: Spray urine and droppings with bleach solution or an EPA-registered disinfectant until very wet. Let it soak for 5 minutes or according to instructions on the disinfectant label. Step 3: Use paper towels to wipe up the urine or droppings and cleaning product. Step 4: Throw the paper towels in a covered garbage can that is regularly emptied. Step 5: Mop or sponge the area with a disinfectant. Clean all hard surfaces including floors, countertops, cabinets, and drawers. Follow instructions below to clean and disinfect other types of surfaces. Step 6: Wash gloved hands with soap and water or a disinfectant before removing gloves. Step 7: Wash hands with soap and warm water after removing gloves or use a waterless alcohol-based hand rub when soap is not available and hands are not visibly soiled. Observed employees improperly cleaning up rodent droppings. Location: Inside kitchen back prep area. Manner: Wiped off food storage container.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility.

Observed ready-to-eat time and temperature-controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Standing reach in refrigerators Food Items: Prepared vegetables, soups and sauces Expiration Dates: None available

Violation: Maintenance and Operation

• Cutting Surfaces

- Cutting surfaces such as cutting boards and blocks that become scratched and scored may be difficult to clean and sanitize. As a result, pathogenic microorganisms transmissible through food may buildup or accumulate. These microorganisms may be transferred to foods that are prepared on such surfaces. Instructed PIC to resurface the cutting board, or discard if not capable of being resurfaced.

Observed cutting surface with deep scratches and scoring which limit the ability to be effectively cleaned and sanitized. Location: On prep cold holding units Type: Cutting boards

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Knowledge Tested: Multiple priority violations

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Filters

- Instructed PIC to make repairs or replace hood ventilation system to allow for filters or other grease extracting equipment to be readily removable for cleaning and replacement, or cleaned in place.

Observed filters or grease extracting equipment damaged with substantial gaps inside hood ventilation system Location: Inside main kitchen hood ventilation system. Manner: Substantial gaps and debris buildup.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: plastic food containers Location: Large storage tub

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Cold holding unit Food Items and Food temperature: Soup 49 °F stored at room temperature, raw shrimp 47 °F, veggie mix sauce 45 °F, feta cheese 46 °F, chile sauce 47 °F, red curry 47 °F, red curry meat 48 °F, sauce 45 °F, sauce 47 °F, cooked meat 49 °F, cooked meat 47 °F, cooked garbanzo beans 50 °F, green chile 56 °F, chopped cabbage 52 °F, chopped cilantro 51 °F, shredded cheese 47 °F,

Violation: Designated Areas

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Preparing entrees and preparing raw chicken Inappropriate Jewelry Observed: Watch

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: Main kitchen line Activity: Multiple employees preparing food with no hair restraints.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on all areas and to clean and sanitize all areas.

Observed buildup and debris underneath kitchen equipment such as underneath shelving and prep table in back of facility. Rodent droppings underneath shelving in back area

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located in back of facility where prep table and non-functional walk-in refrigerator is located The surface was made out of wood shelving The condition of the surface was substantial number of rodent droppings.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked meats, prepared vegetables, sauces, soups etc. Activity of the Food: Stored, cooled, received Records were not completed today prior to opening.

DAVES HIGH DESERT GRILL - 5200 EUBANK BLVD NE, B-5 - Conditional Approved

DAVES HIGH DESERT GRILL - 5200 EUBANK BLVD NE, B-5

Food Establishment Class C

Date: 07/29/2026 - #: RT-FOODEST-072104-2026 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine, Chef knives, and food wedger Location: Kitchen area Condition of the Location: Yellow buildup on inside of ice machine bin, Dried food and soil debris buildup on Chef knives and food wedger.

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed soiled wiping cloths stored on prep tables and cutting boards

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Main cook line Ice bath and prep table Food Items: Pooled Eggs 53°F, Whole Eggs 63°F, Diced Tomatoes 53°F, Sauce 52°F, Shredded Cheese 54°F, White sauce 53°F, Sliced Cheese 61°F, Orange sauce 54°F, Cheese 56°F, Sliced Strawberries 58°F, Sliced Onions 47°F, Cut Green Bell Peppers 61°F.

Multiple items left out of counter of prep table with no ice or refrigeration.

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

Observed handwashing sink(s) without a handwashing sign. Location: Men's and women's restrooms

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: wrist watch and bracelets

Violation: Storage

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: washing area Equipment Type: Food service pans Manner: Not air dried and stacked wet

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: stored

• **Calibration Logs**

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
- Observed the food establishment does not have calibration logs for temperature measuring devices.

DAVES HIGH DESERT GRILL - 5200 EUBANK BLVD NE, B-5

Food Establishment Class C

Date: 07/29/2026 - #: PT0158935 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine, Chef knives, and food wedger Location: Kitchen area Condition of the Location: Yellow buildup on inside of ice machine Dried food and soil debris buildup on Chef knives and food wedger.

Violation: Use Limitations

• **Wiping Cloths, Use Limitation**

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed soiled wiping cloths stored on prep tables and cutting boards

Violation: Pooled Eggs

• **Pooled Eggs Prohibition**

- Raw eggs may only be combined in the amount and in response to a customer's order, or for the preparation of a batter to be cooked immediately. Instructed the PIC that the identified pooled eggs must not be used in further food preparation and that raw eggs shall only be combined for batters or in response to a customer's order.

Observed pooled eggs in the food establishment that were not being combined for a customer's order or for a batter. Location: Main cook line on counter Number of eggs combined: 4 quarts

Violation: Date Marking and Disposition

• **Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition**

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature-controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Under counter cooler on main cook line Food Items: Multiple items in reach in coolers on main cook line with no date marking. Including cooked meats, Cut vegetables, Cut fruits and sauces

Violation: Training Records

• **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Food Separation

• **Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination**

- It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination.

Observed non-ready-to-eat raw animal food stored with ready-to-eat food without protection from contamination. Location: Main cook line. Food Item: Raw eggs Condition: Raw eggs stored directly over Cheeses, Sliced Onions, and Corn on main cook line

Violation: Cold Holding

• **Time/Temperature Control for Safety Food, Cold Holding**

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Main cook line Ice bath and prep table Food Items: Pooled Eggs 53°F, Whole Eggs 63°F, Diced Tomatoes 53°F, Sauce 52°F, Shredded Cheese 54°F, White sauce 53°F, Sliced Cheese 61°F, Orange sauce 54°F, Cheese 56°F, Sliced Strawberries 58°F, Sliced Onions 47°F, Cut Green Bell Peppers 61°F.

Multiple items left out of counter of prep table with no ice or refrigeration.

Violation: Operation and Maintenance

• Handwashing Signage

- In order to remind food employees to wash their hands a clearly visible sign or poster that notifies food employees to wash their hands shall be provided at all handwashing sinks used by food employees. Instructed PIC to install handwashing signage at all handwashing sinks.

Observed handwashing sink(s) without a handwashing sign. Location: Men's and women's restrooms

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purpose such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purpose other than handwashing.

Observed handwashing sink used for purpose other than handwashing. Location: handwashing sink in front of main cook line Manner: Being used as a dump sink. Drain was full of blueberries

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: wrist watch and bracelets

Violation: Storage

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: washing area Equipment Type: Food service pans Manner: Not air dried and stacked wet

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: stored

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

DAVES HIGH DESERT GRILL - 5200 EUBANK BLVD NE, B-5

Food Establishment Class B

Date: 07/29/2026 - #: PT0158936 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain and three-compartment sink and floor drain at ware washing machine

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products. Employee drink stored in cooler above facility food items

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on the drink gun holder/drain The condition of the surface was debris buildup

DOLLAR TREE - 3211 COORS BLVD SW, #SCUC - Approved

DOLLAR TREE - 3211 COORS BLVD SW, #SCUC

Retail Food Establishment Class 3

Date: 07/29/2026 - #: PT0155447 - Inspection Result: Approved

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize.

Observed buildup and debris on the floors throughout the facility.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: reach in coolers and freezers Location: Retail area Condition of the Location: debris buildup on the interior of the reach in coolers and freezers.

DOLLAR TREE - 11110 LOMAS BLVD NE - Approved

DOLLAR TREE - 11110 LOMAS BLVD NE

Retail Food Establishment Class 3

Date: 07/29/2026 - #: PT0153528 - Inspection Result: Approved

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Package Integrity

- Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging.

Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants.

Packaged Food: Can of Libby's Pineapple tidbits and can of Mackerel Location: Food shelf Condition: Dented can

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Unless food is stored on lot handling equipment or in water-proof containers, it must be stored at least six (6) inches above the floor. Storing food on the floor created opportunity for contamination and reduces the ease of cleanability in an area creating harborage for pests. Instructed PIC that food must be stored at least six (6) inches above the floor.

Observed food stored improperly less than six (6) inches off the floor. Location: Walk in freezer Food Item: Swirl Stix popsicle

EAT MY THAI CUISINE - 5303 GIBSON BLVD SE - Unsatisfactory Re-Inspection required

EAT MY THAI CUISINE - 5303 GIBSON BLVD SE

Food Establishment Class C

Date: 07/29/2026 - #: CAC-Food-071868-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Complaint

This inspection is a follow-up related to a citizen complaint that was substantiated.

Facility will be allowed to re-open under a Grade of Unsatisfactory and will be subject to an unannounced follow-up inspection within five (5) business days of reopening and operating.

Facility must continue to work on the following:

- 1.) Ensure facility's ability to properly maintain cold holding temperatures of food inside standing reach in coolers and prep tables. Observed several coolers sitting at temperatures exceeding 41°F. Instructed owner to have refrigeration repaired and to send service invoice to EHD
- 2.) Cleaning and sanitizing all food and other debris from food and non-food contact surfaces so that they are clean to sight and touch. Kitchen floors and walls included.
- 3.) Continue routine pest control treatment to eradicate the facility of cockroaches. Including the removal of dead cockroaches.
- 4.) Develop and implement a detailed cleaning/sanitizing list for food contact and non-food contact surfaces for daily, weekly and monthly cleaning must be provided to CHPD.
- 5.) Maintaining Premises of facility including the removal of any necessary items that are damaged or unused throughout the facility.
- 6.) Seal off any holes, gaps or cracks in the physical facility including door weather stripping and expedite window.
- 7.) Abide and execute by the direction as outlined on the compliance plan by the dates agreed upon and signed for.
- 8.) Participate in a mandatory food safety course offered by the City of Albuquerque at no cost and must have all staff participate.

ELEMENT BY WESTIN ALBUQUERQUE UPTOWN - 2430 LOUISIANA BLVD NE - Approved

ELEMENT BY WESTIN ALBUQUERQUE UPTOWN - 2430 LOUISIANA BLVD NE

Food Establishment Class C

Date: 07/31/2026 - #: PT0161178 - Inspection Result: Approved

FEDERICOS MEXICAN FOOD - 4400 CENTRAL AVE SE - Approved

FEDERICOS MEXICAN FOOD - 4400 CENTRAL AVE SE

Food Establishment Class C

Date: 07/31/2026 - #: CAC-Food-072943-2026 - Inspection Result: Approved

Facility has been upgraded to Approved following submission of photographic evidence of corrected violations by the Environmental Health Department. The following has been addressed:

- Time/Temperature Control for Safety Food, Cold Holding (Refrigeration has been serviced and brought into compliance)
- Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition (TCS food items missing date labels have been corrected)
- Certified Food Protection Manager (CFPM course has been taken and a certificate was provided to CHPD)
- Food Temperature Measuring Devices (Temperature measuring devices have been acquired and put to use)

FEDERICOS MEXICAN FOOD - 4400 CENTRAL AVE SE

Food Establishment Class C

Date: 07/30/2026 - #: CAC-Food-072549-2026 - Inspection Result: Conditional Approved

Facility has been upgraded to conditional approved status following the correction of the following violations during inspection by the Environmental Health Department.

The facility corrected:

- Thawing Method (Person in charge placed improperly thawing frozen fish that was still at 41°F into the walk-in refrigerator)

FEDERICOS MEXICAN FOOD - 4400 CENTRAL AVE SE

Food Establishment Class C

Date: 07/30/2026 - #: RT-FOODEST-080735-2025 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Thawing

• Thawing Method

- Freezing prevents microbial growth in foods, but usually does not destroy all microorganisms. Improper thawing provides an opportunity for surviving bacteria to grow to harmful numbers and/or produce toxins. Food must be thawed in an approved method such as: A. under refrigeration maintaining food below forty-one (41) °F or below, B. submerged under running water at seventy (70) °F, or below with sufficient velocity to agitate and float off loose particles in the overflow, if ready-to-eat does not go above forty-one (41) °F, or if raw does not exceed forty-one (41) °F for four (4) hours including the cooking or re-cooling process C. in a microwave oven only when the food will be immediately transferred to conventional cooking facilities as part of a continuous cooking process, or when the entire, uninterrupted cooking process takes place in the microwave oven D. as part of the cooking process E. prepared for immediate service in response to an individual consumer's order Instructed PIC to retrain food employees on thawing food and PIC corrected violation by placing the frozen fish back in the walk in cooler.

Observed frozen time/temperature control for safety food improperly thawing. Food: Fish

Location: Kitchen

Method: Thawing directly in ambient air

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature-controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Make tables and reach in coolers

Food Items: Salsa's, multiple trays of prepared meats, diced vegetables and other unknown food items. Expiration Dates: Not available

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Refrigerated make table and upright cooler

Food Items: Shrimp (48°F), sausage (51°F), chicken (49°F), guacamole (49°F)

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded.

Instructed PIC to provide and make readily accessible food temperature measuring devices.
Observed food temperature measuring devices were not provided or readily accessible.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All hot and cold temperature-controlled foods

Activity of the Food: Stored, thawed, cooled

FIVE GUYS BURGERS AND FRIES - 6650 HOLLY AVE - Approved

FIVE GUYS BURGERS AND FRIES - 6650 HOLLY AVE

Food Establishment Class C

Date: 07/31/2026 - #: PT0146008 - Inspection Result: Approved

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Fuego Enterprises LLC DBA Laguna Burger- 105 HARVARD DR SE - Approved

Fuego Enterprises LLC DBA Laguna Burger - 105 HARVARD DR SE

Food Establishment Class C

Date: 07/31/2026 - #: RT-FOODEST-072929-2026 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: three-compartment sink dispenser

Concentration: 0 PPM

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at multiple bar area floor drains.

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on exterior of kitchen waste bin and on the inside of several reach in coolers. The condition of the surface was soiled with food debris and residue.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All hot and cold held temperature-controlled foods.

Activity of the Food: Stored, thawed, cooled

Fuel Ignited by Sparks LLC DBA Chicago Pizza Kitchen - 9250 Golf Course RD NW, B - Approved

Fuel Ignited by Sparks LLC DBA Chicago Pizza Kitchen - 9250 Golf Course RD NW, B

Food Establishment Class C

Date: 07/28/2026 - #: RT-FOODEST-004656-2026 - Inspection Result: Approved

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature-controlled for safety food prepared and held within the establishment with no date marking indicators. Location: prep top cooler.

Food Items: Alfredo and garlic sauces

Expiration Dates: 4 containers. with no expiration dated

Violation: Training Records

• Food Handler Cards

- Food handler cards shall be kept by the Food Employee on their Person while working as a Food Employee or volunteer for a Food operation, or a copy shall be kept on file by the current employer and be made available for inspection by the Enforcement Authority. If trained through another approved method; records of the training shall be maintained for the duration of the Food Employee s employment. Instructed PIC to provide updated training records to EHD for review.

The PIC was unable to provide records of training or certification of food employees.

Violation: Ventilation and Hood Systems

• Heating, Ventilation, Air Conditioning System Vents

- Heating, ventilating, and air conditioning systems shall be designed, installed, and maintained so that make-up air intake and exhaust vents do not cause contamination of food, contact surfaces, equipment, or utensils.

Observed heating and air conditioning system vents not properly designed and located to be easily cleanable. Location: back prep and washing areas.

Manner: Dust and soil buildup on the air vents and lighting.

Violation: Warewashing Temperature and Concentration

• Sanitizers, Criteria-Chemicals

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR. PIC corrected violation by Diluting with water and brought to 500 ppm at 99 degrees.

Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Chlorine Location: front sanitizer bucket.

Concentration: sanitizer tested above 200 ppm.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctions, Coved, and Enclosed or Sealed

- Wall and ceiling covering materials shall be attached so that they are EASILY CLEANABLE. Instructed person in charge to replace or clean and sanitize the area so that it is maintained or is easily cleanable.

Observed Floor base covings.is not easily cleanable. The surface was made out of ceramic tile. Tile is damaged and need replacing.

GURU INVESTMENTS INC DBA Taj Mahal Restaurant - 1430 CARLISLE BLVD NE - Approved

GURU INVESTMENTS INC DBA Taj Mahal Restaurant - 1430 CARLISLE BLVD NE

Food Establishment Class C

Date: 07/29/2026 - #: CAC-Food-071952-2026 - Inspection Result: Approved

Facility is being upgraded to an Approved status from a Conditional Approved due to PIC correcting two (2) Priority Violations bringing score back into an Approved status. CHPD inspector removed Yellow sticker from facility.

Violations Corrected:

1. Cold Holding: Time/Temperature Control for Safety Food, Cold Holding
2. Date Marking and Disposition: Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition
3. Equipment, Food Contact Surfaces, and Utensils Clean: Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch
4. Training Records: Certified Food Protection Manager

Facility is being upgraded from a Conditional Approved status to an Approved status. PIC has corrected two (2) Priority violations and one (1) Priority Foundation Violation bringing score back into an Approved status.

Violations corrected:

1. Equipment, Food Contact Surfaces, and Utensils Clean: Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch
2. Operation and Maintenance: Using a Handwashing Sink-Operation and Maintenance
3. Plumbing: System Maintained in Good Repair, Repaired According to Law

HILTON GARDEN INN & HOMEWOOD STS ABQ DWNTWN - 222 CENTRAL AVE SE**Food Establishment Class C****Date: 07/28/2026 - #: RT-FOODEST-009624-2025 - Inspection Result: Conditional Approved****Violation: Equipment, Food Contact Surfaces, and Utensils Clean****• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine

Location: Back of house

Condition of the Location: Red organic matter buildup near deflector plate

Violation: Plumbing**• System Maintained in Good Repair, Repaired According to Law**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed floor drain located under ware wash machine is not maintained in good repair or is not repaired by law. Observed floor drain located under ware wash machine found in disrepair by missing strainer.

Violation: Training Records**• Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented**• Food Storage Containers Identified with Common Name of Food**

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of

Food: Diced tomatoes and diced onions stainless portioning pan

Location: Upright cooler

Violation: Operation and Maintenance**• Using a Handwashing Sink-Operation and Maintenance**

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained.

Observed handwashing sink(s) was observed blocked or inaccessible. Location: Hand was station near ware wash area Manner: Blocked by speed rack

HILTON GARDEN INN & HOMEWOOD STS ABQ DWNTWN - 222 CENTRAL AVE SE**Food Establishment Class B****Date: 07/28/2026 - #: RT-FOODEST-027667-2025 - Inspection Result: Approved****Violation: Equipment, Food Contact Surfaces, and Utensils Clean****• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75F with a contact time of 7 seconds. PIC did not correction violation on site.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Ware wash unit in bar area

Concentration: 25 PPM

Violation: Plumbing**• Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an

air gap established to prevent backflow.
Observed an inadequate air gap at floor drain in bar area.

Violation: Testing Devices

- **Sanitizing Solutions, Testing Devices**

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.

Observed no chlorine testing kit or other device to measure the concentration of chemical sanitizing solution.

HILTON GARDEN INN & HOMEWOOD STS ABQ DWNTWN - 222 CENTRAL AVE SE

Retail Food Establishment Class 3

Date: 07/28/2026 - #: PT0157056 - Inspection Result: Approved

HONEY BOTTOM COFFEE AND TEA CO LLC #2 - 1208 Rio Grande BLVD NW - Approved

HONEY BOTTOM COFFEE AND TEA CO LLC #2 - 1208 Rio Grande BLVD NW

Mobile Food Unit Class C

Date: 08/01/2026 - #: PT0159374 - Inspection Result: Approved

Violation: Training Records

- **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

HOTEL ALBUQUERQUE AT OLD TOWN - 800 RIO GRANDE BLVD NW - Approved

HOTEL ALBUQUERQUE AT OLD TOWN - 800 RIO GRANDE BLVD NW

Food Establishment Class B

Date: 08/01/2026 - #: PT0149941 - Inspection Result: Approved

Violation: Maintenance and Operation

- **Good Repair and Proper Adjustment-Equipment**

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: Bar Area Type of Equipment: Ice Bin Condition of the equipment: Ice bin had no lid

HOTEL ALBUQUERQUE AT OLD TOWN - 800 RIO GRANDE BLVD NW

Food Establishment Class B

Date: 08/01/2026 - #: PT0088531 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

- **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: under counter cooler Location: Bar Area Condition of the Location: debris buildup inside coolers

Violation: Maintenance and Operation

- **Good Repair and Proper Adjustment-Equipment**

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment not maintained in good repair. Location: Bar Area Type of Equipment: ice bin and metal locks for undercounter coolers Condition of the equipment: Ice bin missing lid and metal locks have rust buildup.

KAPS - 5801 CENTRAL AVE NE - Closure Re-Inspection Required

KAPS - 5801 CENTRAL AVE NE

Food Establishment Class C

Date: 07/30/2026 - #: RT-FOODEST-004444-2025 - Inspection Result: Closure Re-Inspection Required

Complaint

This inspection is the result of a citizen complaint that was substantiated.

Violation: Linens Unclean

• Clean Linens

- Linens that are not free from food residues and other soiling matter may carry pathogenic microorganisms that may cause illness. Instructed PIC to remove all soiled linens and to discontinue use until linens are free from food residue and other soiling matter. Advised PIC to contact cleaning service provider to have linens cleaned.

Observed clean linens not free from food residues and other soiling matter. Linen sitting in standing water in line reach-in

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75F with a contact time of 7 seconds. PIC corrected violation by PIC making chlorine sanitizer solution to proper parts per million (PPM)

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Front of house service counter

Concentration: No sanitizer available/not prepped

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine

Location: Back of house

Condition of the Location: Black organic matter buildup near ice chute

Violation: Poisonous and Toxic/Chemical Substances

• Common Name-Working Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Plastic spray bottle

Alleged Material: Unknown

Violation: Pest Control

• Controlling Pests, If Present: Treatment

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by using methods such as trapping devices or other means of pest control. Instructed PIC to remove any dead pests or pest fecal material and to have a professional pest control company set traps and perform treatment as needed. Facility is to provide EHD with appropriate pest control records.

Observed pests in the facility with no control methods in place. Location: Next to cooking equipment, flat top, substantial crack in wall Pest Type: cockroach Pest Condition: alive

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps.

Location: Multiple dead roaches under equipment and in basement. Observed dead mouse still in trap under soda machine Pest Type: roaches and mice

Pest Condition: dead

Number of Pests Present: dozens of roaches, one dead mouse

Violation: Pooled Eggs

• Pooled Eggs Prohibition

- Raw eggs may only be combined in the amount and in response to a customer's order, or for the preparation of a batter to be cooked immediately. Instructed the PIC that the identified pooled eggs must not be used in further food preparation and that raw eggs shall only be combined for batters or in response to a customer's order.

Observed pooled eggs in the food establishment that were not being combined for a customer's order or for a batter. Location: Line reach-in Number of eggs combined: 2 dozen

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on ensuring the proper disposition of food items. PIC voluntarily discarded food items bearing no date markings.

Observed ready-to-eat time and temperature-controlled for safety food held within the establishment exceeding the seven (7) day limit. Location: Line reach in Food Items: green chile Expiration Dates: 7/9/26

• **Raw Meat Date Marking**

- Refrigeration helps prevents food from becoming a hazard by significantly slowing the growth of most microbes, but not stopped. Over a period of time, organisms may increase their risk to public health in ready-to-eat foods. Time/temperature control for safety refrigerated foods must be consumed, sold or discarded by the expiration date therefore must not be altered or concealed. Instructed PIC to retrain food employees on ensuring the proper dating and disposition of food items. Observed dating information on foods concealed or altered. Food: Chicken Location: Line reach in Condition: Raw chicken left unlabeled

Violation: Knowledgeable

• **Knowledgeable Person In Charge**

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances. Knowledge Tested: PIC failed to know that the concentration of bleach was too high.

Violation: Plumbing

• **System Maintained in Good Repair, Repaired According to Law**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed floor drain located near cook line is not maintained in good repair or is not repaired by law. Observed floor drain located near cook line found in disrepair with standing water.

Violation: Ventilation and Hood Systems

• **Cleaning Ventilation Systems, Nuisance and Discharge Prohibition**

- Instructed PIC to clean and sanitize the indoor ventilation system and to replace filters as necessary to prevent it from becoming a source of contamination of food and food contact surfaces in the surrounding area.

Observed interior intake and exhaust air ducts with debris buildup. Location: Line vent had bird feathers stuck to vent fins

• **Ventilation Hood Systems, Drip Prevention and Adequacy**

- Instructed to repair as necessary, clean and sanitize the outdoor ventilation system to prevent it from becoming a source of public health hazard, nuisance, or unlawfully discharge, and an attractant for pests.

Observed exterior exhaust duct outlet not being maintained in a clean and sanitary manner. Location: Line hood system.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• **Package Integrity**

- Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging.

Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants. Packaged Food: mushrooms in peeled open Styrofoam pack Location: Walk-in cooler Condition: ripped open container

Violation: Food Separation

• **Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination**

- It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination.

Observed non-ready-to-eat raw animal food stored with ready-to-eat food without protection from contamination. Location: Line reach-in Food Item: Raw chicken and mushrooms Condition: Raw chicken was stored next to mushrooms on bottom of reach-in

Violation: Toilet Facilities

• **Toilet Rooms, Enclosed**

- Instructed to enclose and provide the toilet rooms with a tight-fitting and self-closing door; and, that they must be maintained closed except during cleaning and maintenance.

Observed toilet room is not equipped with a tight-fitting self-closing door; or the door is propped open.

Violation: Physical Facilities

• **Exterior Walls and Roofs, Protective Barrier**

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by filling or closing holes and other gaps along floors, walls and ceilings. Instructed PIC to repair the holes/gaps identified to prevent entrance of pests.

Observed holes or other gaps in the structure of the facility. Location: Hole in dish pit wall Size: 1 foot hole

Violation: Testing Devices

• **Food Temperature Measuring Devices**

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.
Observed food temperature measuring devices were not provided or readily accessible for the measuring of thin foods.

Violation: Warewashing Temperature and Concentration

• Sanitizers, Criteria-Chemicals

- Chemical sanitizers may be toxic if not used in accordance with requirements listed in the Code of Federal Regulations (CFR). Large concentrations of sanitizer in excess of the CFR requirements can be harmful because residues of the materials remain. Instructed PIC that sanitizer concentration levels must be within manufacturers guidelines and the CFR. PIC did not correction violation.
Observed chemical sanitizer concentration exceeding the maximum level permitted. Type of Sanitizer: Chlorine sanitizer
Location: Wiping cloth container near cook line Concentration: Above 200 (PPM)

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.
Observed inadequate amount of lighting. Location: Dry Storage area Manner: No lighting in entire dry storage. Preventing adequate cleaning and pest observation.

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.
Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Employee observed wearing jewelry Inappropriate Jewelry
Observed: Watch

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.
Observed a food employee without proper hair restraints. Location: Line Activity: Employee not wearing hat or beard guard

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.
Observed a soiled mop not in use, stored directly on the floor.

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on Entire kitchen and to clean and sanitize Walls, floors, behind equipment
Observed buildup and debris on the walls, floors, behind equipment.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.
Observed nonfood contact surface with the buildup of soil residues. The surface was located throughout kitchen and facility
The surface was made out of stainless steel, metal, and plastic
The condition of the surface was dirty with extreme grease and food debris buildup.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.
Observed the following areas of the facility in disrepair. Observed walls with holes in disrepair by dish pit, and walls throughout

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All food on the line had no temp logs. Activity of the Food: hot holding

• Calibration Logs

- General Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

KEVA JUICE 1 - 2451 SAN MATEO BLVD NE, A4 - Approved

KEVA JUICE 1 - 2451 SAN MATEO BLVD NE, A4

Food Establishment Class C

Date: 07/28/2026 - #: PT0137689 - Inspection Result: Approved

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed faucet for hand wash station is not maintained in good repair or is not repaired by law. Observed faucet for hand wash station found in disrepair by leaking.

Violation: Functionality and Accuracy

• Temperature Measuring Devices, Ambient Air and Water-Accuracy

- The placement of the temperature measuring device is important. If the device is placed in the coldest location in the storage unit, it may not be representative of the temperature of the unit. Food could be stored in areas of the unit that exceed temperature requirements for cold holding. Instructed PIC to obtain temperature measuring device and place it in the warmest part of the cold holding unit to ensure that all areas of the storage unit are maintaining proper cold holding temperatures.

Observed in a mechanically refrigerated food storage unit the temperature measuring device was not placed in the warmest part of the unit. Equipment Location: Back of house upright cooler

Thermometer Location: No thermometer available

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: Donning new gloves and switching tasks.

Kimmy Snacks Craft Services LLC - 4720 Alexander Blvd. NE - Approved

Kimmy Snacks Craft Services LLC - 4720 Alexander Blvd. NE

Food Establishment Class C

Date: 07/29/2026 - #: RT-FOODEST-018365-2026 - Inspection Result: Approved

KINDER CARE LEARNING CTR. INC. – 4515 Lower Terrace Cir NE - Approved

KINDER CARE LEARNING CTR. INC. - 4515 LOWER TERRACE CIR NE

Food Establishment Class C

Date: 07/27/2026 - #: RT-FOODEST-064580-2025 - Inspection Result: Approved

Violation: Receptacle Condition

• Covering Receptacles

- Waste bins with food residue must have tight fitting lids or doors and be emptied once they are filled. Instructed PIC empty the waste bin(s) and to ensure that waste bins are kept sanitary by installing tight fitting lids and emptying the bins once they are filled.

Observed waste bins outside the food establishment without tight fitting lids or doors. Location: Large trash receptacle outside.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided invoice for permit.

Observed that the facility was operating with an expired permit.

• Sticker Posted

- Instructed the PIC that every Food Establishment must display the Grade received at the time of the most recent inspection in a place that is visible to the public.

Observed that no grade sticker was posted on the facility.

Violation: Outside Storage Prohibitions

• **Outside Storage Prohibitions**

- Waste that is not in a rodent or insect resistant bin must not be stored outside; unless it is cardboard or other recyclables that do not contain food residue and is awaiting regularly scheduled pick-up. Instructed PIC to designate an area indoors for waste that does not fit in the outdoor enclosures or to place proper waste storage bins outside.

Observed that waste was being improperly stored outside. Location of the waste: Outside large receptacle storage container Type of items: Trash bags and plastic crates Storage method: Stored around waste receptacle Overall condition of the items: scattered

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on walls inside kitchen, under three-compartment sinks, and shelving inside kitchen and to clean and sanitize all areas.

Observed buildup and debris on walls inside kitchen, under three-compartment sinks, and shelving inside kitchen.

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported.

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Dairy products, deli, meats, prepared salad mixes Activity of the Food: Stored and received

KINDER CARE LEARNING CTR. INC. – 5701 Mcleod Rd NE - Approved

KINDER CARE LEARNING CTR. INC. - 5701 MCLEOD RD NE

Food Establishment Class C

Date: 07/29/2026 - #: CAC-Food-071879-2026 - Inspection Result: Approved

Corrective action taken during the routine inspection resulted in the facility being upgraded from a Conditional Approved Status to Approved Status. The person in charge promptly addressed and corrected most of the violations noted in the original inspection report while on site. As a result of the corrections, the inspection score improved from a 67 to an 85. The following priority violations were corrected on site:

-Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness. Observed employee fill up spray bottle with sanitizer during inspection.

-When to wash. Observed employee wash hands during inspection.

- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch. Observed employee remove can opener blade and place in three-compartment sink to be washed and sanitized during inspection.

KINDER CARE LEARNING CTR. INC. - 5701 MCLEOD RD NE

Food Establishment Class C

Date: 07/29/2026 - #: RT-FODEST-009622-2025 - Inspection Result: Unsatisfactory Re-Inspection required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. Advised food employee that sanitizer spray bottle is required for use during all times of operation. Observed employee refill spray bottle with sanitizer. Violation corrected on site.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Spray bottle. Concentration: 0ppm due to spray bottle being empty. Upon inquiring with employee, they stated that they fill up a new bottle every day.

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours. Instructed employee to clean and sanitize can opener blade after every use.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: can opener. Location: attached to counter top. Condition of the Location: observed buildup and debris on the can opener blade at the time of inspection.

Violation: Training Records

• **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

• **Food Handler Cards**

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed

PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints. Observed a food employee without proper facial hair restraints. Location: food service area. Activity: preparing food items.

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit. Observed that the facility was operating with an expired permit.

Violation: Hands Clean & Properly Washed

• When to Wash

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.

Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.

Observed food employee not wash hands when required. Condition: Observed employee change gloves multiple times without washing hands. Educated employee on hand washing requirements and when to wash hands.

KINDER CARE LEARNING CTR. INC. - 9111 HIGH ASSETS WAY LN NW - Approved

KINDER CARE LEARNING CTR. INC. - 9111 HIGH ASSETS WAY LN NW

Food Establishment Class C

Date: 07/30/2026 - #: RT-FOODEST-030580-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Popcorn Machine.

Location: top of a storage shelf.

Condition of the Location: stored soiled with debris and grease buildup on the interior of the Popcorn Machine.

Violation: Pest Control

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps. Location: Kitchen

Pest Type: cockroach.

Pest Condition: Dead.

Number of Pests Present: 12 to 15 roaches.

Violation: Plumbing

• Approved System and Cleanable Fixtures, Designed/Installed By Law

- Water within a system will leach minute quantities of materials out of the components of the system. To make sure none of the leached matter is toxic or in a form that may produce detrimental effects, even though long-term use, all materials and components used in water systems must be of an approved type. New or replacement items must be tested and approved based on current standards. Improperly designed, installed, or repaired water systems can have inherent deficiencies such as improper access openings, dead spaces, and areas difficult or impossible to clean and disinfect. Dead spaces allow water quality to degrade since they are out of the constant circulation of the system. Fixtures such as warewashing sinks that are not easily cleanable may lead to the contamination of food products.

Observed plumbing fixture is not constructed of approved materials. The plumbing fixture was made out of a metal kitchen faucet leaking at the bottom of the prep sink which creating standing water and debris and smelly buildup.

Violation: Testing Devices

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device

Observed expired testing kit or other device to measure the concentration of chemical sanitizing solution. date was September 1st, 2021.

Violation: Lighting

• Light Bulbs, Protective Shielding

- Instructed PIC to make repairs necessary so that light bulbs are shielded, coated, or made otherwise shatter-resistant to prevent the contamination of exposed food, clean equipment, utensils, linens, or unwrapped single-service-single-use articles.

Observed light bulbs with no protective shielding, coating or by other means shatter-resistant. Location: Kitchen., equipment, utensils, linens, unwrapped single service article.

Manner: 4 fluorescent bulbs missing the cover where food is being prepared.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on Kitchen floors sinks and equipment. and to clean and sanitize.

Observed buildup and debris on the floors under equipment's and sinks.

Violation: Physical Facilities, Construction and Repair

• Floor and Wall Junctures, Coved, and Enclosed or Sealed

- Floors, walls, and ceilings that are constructed of smooth and durable surface materials are more easily cleaned. Floor surfaces that are graded to drain and consist of effectively treated materials will prevent contamination of foods from dust and organisms from pooled moisture. The special requirements for carpeting materials and nonabsorbent materials in areas subject to moisture are intended to ensure that the cleanability of these surfaces is retained.

Instructed person in charge to repair flooring with non-absorbent, smooth and easily cleanable material.

Observed FRP corner synthetic piece constructed of Synthetic corner strips missing all of the corner and top area next to the refrigerator which is creating the FRP to come apart from the wall.

La Loteria - 9800 CENTRAL AVE SE - Approved

La Loteria - 9800 CENTRAL AVE SE

Food Establishment Class C

Date: 07/28/2026 - #: PT0160466 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Back of kitchen by back door Condition of the Location: Yellow buildup on inside of ice machine around ice chute

Violation: Toilet Facilities

• Toilet Room Receptacle, Covered

- Instructed to provide a covered receptacle for sanitary napkins.

Observed in a toilet room used by females, no covered receptacle.

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Men's restroom

Violation: Lighting

• Light Bulbs, Protective Shielding

- Instructed PIC to make repairs necessary so that light bulbs are shielded, coated, or made otherwise shatter-resistant to prevent the contamination of exposed food, clean equipment, utensils, linens, or unwrapped single-service-single-use articles.

Observed light bulbs with no protective shielding, coating or by other means shatter-resistant. Location: Main kitchen line Manner: not shatter proof bulb,

Violation: Consumer Advisories

• **Allergen Warning, Unpackaged Food**

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Storage

• **Equipment and Utensils, Air-Drying Required**

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: Not air dried and stacked wet

Violation: Physical Facilities, Construction and Repair

• **Floors, Walls and Ceilings-Cleanability**

- Floors, floor coverings, walls, wall coverings, and ceilings shall be designed, constructed, maintained and/or installed from materials so that they are SMOOTH and EASILY CLEANABLE. Instructed person in charge to repair missing and broken floor tiles and replace with material that is smooth and easily cleanable.

Observed Floor on main cook line is not smooth and easily cleanable. The surface was located on the floor on the main cook line The surface was cracked and broken tiles

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: stored

• **Calibration Logs**

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

LA PETITE ACADEMY INC. - 4910 KACHINA ST NW - Approved

LA PETITE ACADEMY INC. - 4910 KACHINA ST NW

Food Establishment Class C

Date: 07/29/2026 - #: RT-FOODEST-013415-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions and shall be used within designated parameters. Instructed PIC that for sanitizer utilized it must be at the manufacturer specified concentration and temperature range with a contact time of 30 seconds. PIC corrected violation by making sanitizer solution of 200 pp at 78 °F.

Observed chemical solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Type of Sanitizer: Quat sanitizer.

Location sink, wiping cloth container.

Concentration: No sanitizer was made up at the time of inspection.

Violation: Surface Condition

• **Nonfood-Contact Surfaces, Smooth, Corrosion-Resistant, Non-Absorbent**

- Nonfood-contact surfaces of equipment routinely exposed to splash or food debris are required to be constructed of nonabsorbent materials to facilitate cleaning. Equipment that is easily cleaned minimizes the presence of pathogenic organisms, moisture, and debris and deters the attraction of rodents and insects. Instructed PIC to replace the surface with a material that is nonabsorbent.

Observed nonfood contact surface that was absorbent. The surface was located Kitchen. The surface was made out of wood cabinets and storage shelving. condition of the surfaces was old. cabinets are absorbent and losing its cleanable surface, storage shelves cracked and also losing the cleanable surface

Violation: Operation and Maintenance

• **Using a Handwashing Sink-Operation and Maintenance**

- Facilities must be maintained in a condition that promotes handwashing and restricted for that use. Convenient accessibility of a handwashing facility encourages timely handwashing which provides a break in the chain of contamination from the hands of food employees to food or food-contact surfaces. Handwashing sinks shall be maintained so that they are accessible at all time for employee use. Instructed PIC to make handwashing sink accessible and to retrain employees on ensuring handwashing sinks are properly maintained

Observed handwashing sink(s) was observed blocked or inaccessible. Location: Kitchen Hand was sink. Manner: Employees lunches stored inside the sink while food was being put away in the refrigerator.

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage

and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on Floors behind and side of the refrigerators and under the three-compartment sink.

Observed buildup and debris on the Floors behind and side of the refrigerators and under the three-compartment sink and ceiling tiles.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Kitchen The surface was made out of wood The condition of the cabinets and drawers with debris and soil buildup.

LAS PALOMAS NURSING & REHAB CTR - 8100 PALOMAS AVE NE - Approved

LAS PALOMAS NURSING & REHAB CTR - 8100 PALOMAS AVE NE

Food Establishment Class C

Date: 07/27/2026 - #: PT0057064 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 25-49ppm must also be at a minimum temperature of 120F with a contact time of 10 seconds. Instructed PIC to contact repair personnel to have dish machine repaired so that it is able to dispense chlorine sanitizer.

PIC must provide CHPD with completed work order when repairs are made. Dish machine cannot be used until it is repaired. Three-compartment sink must be used for all warewashing.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: warewashing machine. Concentration: 0 ppm.

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours. Observed can opener blade was cleaned and sanitized during inspection. Violation corrected on site.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: can opener blade. Location: attached to kitchen prep table. Condition of the Location: observed dried food debris and buildup on the can opener blade.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions. Instructed PIC to contact repair personnel to have drain pipes repaired at warewashing machine and dump sink so that they do not leak.

Warewashing machine and dump sink cannot be used until repairs are made.

PIC stated that major plumbing work is scheduled to repair drain. Instructed PIC to provide CHPD inspector with completed work order and updates when repairs are completed on floor drain.

Observed drain pipes at warewashing machine and dump sink are not maintained in good repair or is not repaired by law. Observed drain pipes found in disrepair by leaking water on to floor.

Observed standing water in floor drain near warewashing machine. PIC stated that they have a crack in the piping of floor drain and a work order is in place to have repairs done to floor drain.

Violation: Storage

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.

Observed cleaned single-service and single-use articles stored improperly. Single-service and single-use articles was not stored six (6) inches above the floor. Single-service and single-use articles Type: boxes of single service cups, containers and lids. Storage Method: stored directly on the floor. Location: dry storage area.

Limra DBA Royal Hyderabad - 5760 McMahon NW BLVD, Ste B-E - Unsatisfactory Re-Inspection required

Limra DBA Royal Hyderabad - 5760 McMahon NW BLVD, Ste B-E

Food Establishment Class C

Date: 07/29/2026 - #: CAC-Food-072026-2026 - Inspection Result: Unsatisfactory Re-Inspection required

Complaint

This inspection is a follow-up related to a citizen complaint that was substantiated.

facility will be upgraded from a Closure to unsatisfactory. these are the violations that were corrected:

- ventilation hoods systems cleaned and sanitized.
 - Time/Temperature Control for Safety Food, Cold Holding freezer and make table repaired sent repair invoice to EHD.
 - Equipment, Food-Contact Surfaces and Utensils
 - Clean to Sight and Touch. Food contact surfaced and utensil cleaned and sanitized.
 - Cooling. gave pic documentation on cooling TCS food items.
 - Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition pic updated on proper date marking w/ date made and when it expires within 7 days.
 - Discarding or Reconditioning Unsafe, Adulterated, or Contaminated Food,
- all items that came into contamination from dripping water was discarded and food expired also discarded.
- Hand Drying Provision
- All bathroom paper towel dispensers refilled.
- PIC will operate for 5 business days and will be reinspected to check on progress of the facility.

LITTLE CAESARS 510 - 6125 MONTGOMERY BLVD NE - Approved

LITTLE CAESARS 510 - 6125 MONTGOMERY BLVD NE

Food Establishment Class C

Date: 07/28/2026 - #: RT-FOODEST-060328-2025 - Inspection Result: Approved

Complaint

This inspection is the result of a citizen complaint that was unsubstantiated.

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.
- Observed floor drain is not maintained in good repair or is not repaired by law. Observed floor drain found in disrepair by missing floor drain cover.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
- Observed that the food establishment does not have a certified food protection manager on staff.

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.
- Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Food must be protected from contamination of splashing water, chemical, or other foods; dust; and other contaminants. Instructed PIC to have food protected in containers/wrapping and not to store food in those areas unless the source of contamination can be mediated another way.
- Observed food stored improperly where it was exposed to contamination from splash, dust, or other contamination. Location: Reach in freezer Food Item: Pepperoni Condition: Stored uncovered

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.
- Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats,

shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens, and single-service and single-use articles are not in jeopardy of contamination from these areas.
Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Preparing pizzas Inappropriate Jewelry Observed: Watch and bracelets

Violation: Physical Facilities, Cleaning

• Drying Mops

- Mops can contaminate food and food preparation areas if not properly cleaned and stored after use. Mops should be cleaned and dried in a sanitary manner away from food flow areas. Instructed person in charge to relocate mop to an area away from food and food preparation area and to ensure that mop is stored to promote air drying.

Observed a soiled mop not in use, stored directly in mop sink.

LOBBY BAR - 4720 ALEXANDER BLVD NE - Approved

LOBBY BAR - 4720 ALEXANDER BLVD NE

Food Establishment Class B

Date: 07/28/2026 - #: PT0155914 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75F with a contact time of 7 seconds.

Instructed PIC to contact repair service personnel to have warewashing machine repaired. PIC must also provide a copy of the completed work order to CHPD for verification when repairs are completed.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Warewashing machine. Concentration: 0ppm

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize floor areas.

Observed buildup and debris on the floor area underneath equipment and coolers at the time of inspection.

Long Cao LLC DBA Dragon Sushi - 6904 MENAUL BLVD NE, STE D - Approved

Long Cao LLC DBA Dragon Sushi - 6904 MENAUL BLVD NE, STE D

Food Establishment Class D

Date: 07/27/2026 - #: RT-FOODEST-065927-2026 - Inspection Result: Approved

Complaint

This inspection is a follow-up related to a citizen complaint that was previously substantiated.

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed wiping cloths used for cleaning and sanitizing.

Violation: Date Marking and Disposition

• Ready-To-Eat Time/Temperature Control for Safety Food, Date Marking and Disposition

- Ready-to-eat, time/temperature control for safety food prepared in a food establishment and held longer than a 24-hour period shall be marked to indicate the date or day by which the food is to be consumed on the premises, sold, or discarded when held at a temperature of 41°F or less for a maximum of 7 days. Instructed PIC to retrain food employees on the proper date marking of food items held longer than 24-hour period inside the facility.

Observed ready-to-eat time and temperature-controlled for safety food prepared and held within the establishment with no date marking indicators. Location: Walk in refrigerator Food Items: Sliced vegetables Expiration Dates: None available

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• Food Storage Containers Identified with Common Name of Food

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.

Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Flour Location: Inside kitchen

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: Sushi bar area Food Items and Temperature: tofu 51 °F, crab mix 49 °F, prepared jalapenos 48 °F, avocado 64 °F, coleslaw 56 °F, Raw salmon 47 °F, Wasabi 63 °F, pickled ginger 64 °F,

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Hand washing sink inside main kitchen.

Violation: Operations

• Permit Posted

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. Provided a copy of the valid permit for posting.

Observed that no food permit was posted at the facility.

MCDONALDS 32613 - 150 98TH ST NW - Approved

MCDONALDS 32613 - 150 98TH ST NW

Food Establishment Class C

Date: 07/27/2026 - #: RT-FOODEST-072173-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces, Nonfood-Contact Surfaces, and Utensils - Grease/Soil Deposits, Cooking Equipment

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: reach in coolers and reach in freezers Location: kitchen and drive thru areas Condition of the Location: debris buildup inside and outside of reach in coolers and freezers as well as coffee machines, soda dispenser, and slushy machines.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize.

Observed buildup and debris on the entry doors of the facility hand fingerprint marks.

MENCHIES FROZEN YOGURT - 6500 HOLLY AVE NW, A-1 - Approved

MENCHIES FROZEN YOGURT - 6500 HOLLY AVE NW, A-1

Food Establishment Class C

Date: 07/31/2026 - #: PT0158893 - Inspection Result: Approved

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage.

These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions. Instructed PIC to contact repair personnel to have service sink faucet repaired. Observed faucet at service sink is not maintained in good repair or is not repaired by law. Observed service sink faucet found in disrepair by having a leak at the time of inspection.

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Food must be protected from contamination of splashing water, chemical, or other foods; dust; and other contaminants. Instructed PIC to have food protected in containers/wrapping and not to store food in those areas unless the source of contamination can be mediated another way.

Observed food stored improperly where it was exposed to contamination from splash, dust, or other contamination. Location: on the drainboard of three-compartment sink Food Item: whole blueberries and strawberries. Condition: observed containers of whole blueberries and strawberries stored on drainboard at three-compartment sink directly next to wash basin that is full of soapy detergent water and a container of dish detergent and a green chemical container.

Violation: Personal Cleanliness

• Effectiveness-Hair Restraints

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: front counter and back area. Activity: working in food service areas.

Violation: Precleaning and Rinsing

• Rinsing Procedures

- It is important to rinse off detergents, abrasive, and food debris after the wash step to avoid diluting or inactivating the sanitizer. Washed utensils and equipment shall be rinsed so that abrasives are removed and cleaning chemicals are removed or diluted by using a distinct water rinse step if warewashing with a three (3) compartment sink, alternative manual warewashing equivalent, or performing cleaning in place on large or installed equipment. Instructed PIC to retrain employees on the necessity of the water rinse step and that equipment and utensils observed being cleaned and sanitized improperly must be re-cleaned and sanitized.

Observed a three (3) compartment sink being used for warewashing without use of a water rinse step.

PAY AND SAVE INC. DBA Lowe's Super Save Grocery - 701 11TH ST NW - Approved

PAY AND SAVE INC. DBA Lowe's Super Save Grocery - 701 11TH ST NW

Retail Food Establishment Class 4

Date: 07/31/2026 - #: PT0043742 - Inspection Result: Approved

Complaint

This inspection is the result of a citizen complaint that was unsubstantiated.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: cold holding logs for meat, poultry and seafood

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: reach in coolers and single use bag equipment Location: Meat department Condition of the Location: debris buildup on referenced equipment

PAY AND SAVE INC. DBA Lowe's Super Save Grocery - 701 11TH ST NW
Retail Food Establishment Class 4
Date: 07/31/2026 - #: PT0043741 - Inspection Result: Approved

Complaint

This inspection is the result of a citizen complaint that was unsubstantiated.

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly.

Observed the following areas of the facility in disrepair. Observed back stock areas in disrepair by having holes in walls where the wall and floor meet as well as holes in ceiling where pipes come through the ceiling and missing ceiling tiles

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize.

Observed buildup and debris on the floors in grocery and produce areas and spider webs on ceilings in stock areas of the facility.
instructed pic to clean grocery, backstock and produce areas floors on a more frequent basis

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: reach in coolers and reach in freezers, produce area shelving and displays Location: produce and grocery areas Condition of the Location: debris buildup in these areas can lead to contamination or pests please clean on a more frequent basis

Peter Defries Corp DBA Dion's - 8100 WYOMING BLVD NE - Approved

Peter Defries Corp DBA Dion's - 8100 WYOMING BLVD NE
Food Establishment Class C
Date: 07/27/2026 - #: RT-FOODEST-038363-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for chlorine sanitizer at a concentration range of 50-99ppm must also be at a minimum temperature of 75F with a contact time of 7 seconds. PIC corrected violation by replacing empty chlorine sanitizer container and priming warewashing machine during inspection.

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: warewashing machine. Concentration: 0ppm. Observed chlorine chemical container that was connected to dispensing hose for warewashing machine was empty at the time of inspection.

Violation: Chemicals

• Warewashing Equipment, Cleaning Agents

- Failure to use detergents or cleaners in accordance with the manufacturer's label instructions could create safety concerns for the employee and consumer.

For example, employees could suffer chemical burns, and chemical residues could find their way into food if detergents or cleaners are used carelessly. When performing warewashing the wash solution of soap, detergent, acid cleaner, alkaline cleaner, degreaser, abrasive cleaner, or other cleaning agent must be used in accordance to the cleaning agent manufacturer's label instructions. Instructed PIC to use detergent when washing dishes. Equipment and utensils previously cleaned and sanitized must be re-cleaned and sanitized with detergents used in accordance with the manufacturer's label instructions. Observed PIC replace empty chemical container with a full one and prime warewashing machine during inspection. Violation corrected on site.

Observed improper cleaning solution use during warewashing. Detergent being used: none. Observed detergent chemical container that was connected to dispensing hose for warewashing machine was empty at the time of inspection.

QUALITY INN AND SUITES - 5601 ALAMEDA BLVD NE - Closure Re-Inspection Required

QUALITY INN AND SUITES - 5601 ALAMEDA BLVD NE

Food Establishment Class B

Date: 07/31/2026 - #: PT0158292 - Inspection Result: Closure Re-Inspection Required

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC did not correct violation.

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Kitchen prep area

Concentration: Quat sanitizer was not prepped at the start of the work day

Violation: Thawing

• Thawing Method

- Freezing prevents microbial growth in foods, but usually does not destroy all microorganisms. Improper thawing provides an opportunity for surviving bacteria to grow to harmful numbers and/or produce toxins. Food must be thawed in an approved method such as: A. under refrigeration maintaining food below forty-one (41) °F or below, B. submerged under running water at seventy (70) °F, or below with sufficient velocity to agitate and float off loose particles in the overflow, if ready-to-eat does not go above forty-one (41) °F, or if raw does not exceed forty-one (41) °F for four (4) hours including the cooking or re-cooling process C. in a microwave oven only when the food will be immediately transferred to conventional cooking facilities as part of a continuous cooking process, or when the entire, uninterrupted cooking process takes place in the microwave oven D. as part of the cooking process E. prepared for immediate service in response to an individual consumer's order Instructed PIC to retrain food employees on thawing food and PIC corrected.

Violation corrected on site by PIC discarding improperly thawed chopped green chile. Observed frozen time/temperature control for safety food improperly thawing.

Food: Prepackaged bag of chopped green chile

Location: In hand wash station Condition: Thawed

Method: Thawing in ambient air. PIC stated it was left out from the night before for thawing

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain located under three-compartment sink.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Violation corrected on site by PIC discard out of temperature food items.

Observed food items in cold holding unit measuring above 41°F. Location: Upright cooler in customer self-serve area

Food Items: Dannon Light & Fit Original Raspberry Yogurt Temperature: 56°F

• Cold Holding Capacities-Equipment

- The ability of equipment to maintain time/temperature control for safety foods at Code-required temperatures is critical to food safety. Improper holding and cooking temperatures continue to be major contributing factors to foodborne illness. Therefore, it is very important to have adequate cold holding equipment with enough capacity to meet the demands of the operation. Instructed PIC to make repairs necessary to have adequate cold holding equipment or must acquire sufficient equipment to do so.

Observed insufficient cold holding equipment to properly hold food cold. Location: Upright cooler in customer self-serve area Condition: Cold holding unit not maintaining temperature.

Violation: Testing Devices

• Food Temperature Measuring Devices

- The presence and accessibility of food temperature measuring devices is critical to the effective monitoring of food temperatures. Proper use of such devices provides the operator or person in charge with important information with which to determine if temperatures should be adjusted or if foods should be discarded. Instructed PIC to provide and make readily accessible food temperature measuring devices.
Observed food temperature measuring devices were not provided or readily accessible.

• Sanitizing Solutions, Testing Devices

- Testing devices to measure the concentration of sanitizing solutions are required for 2 reasons: 1. The use of chemical sanitizers requires minimum concentrations of the sanitizer to ensure sanitization; and 2. Too much sanitizer could be toxic. Verified facility is utilizing the correct concentration level of sanitizer in the facility. Instructed PIC to acquire sanitizing solution testing kits or device.
Observed no/expired testing kit or other device to measure the concentration of chemical sanitizing solution.

Violation: Operation and Maintenance**• Handwashing Cleanser, Availability**

- Hand cleanser must always be present to aid in reducing microorganisms and particulate matter found on hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with a supply of hand cleanser. Instructed PIC to ensure that hand cleanser is available at all times of operation.
Violation corrected on site by PIC replacing hand cleanser.
Observed no handwashing cleanser available at handwashing sink(s). Location: Hand wash station located near three-compartment sink

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.
Violation corrected on site by PIC replacing paper towels.
Observed no approved method of hand drying at handwashing sink(s). Location: Hand wash station located near three-compartment sink

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purpose such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purpose other than handwashing.
Violation corrected on site by PIC removing and discarding bag of thawed green chile
Observed handwashing sink used for purpose other than handwashing. Location: Hand wash station located near three-compartment sink. Manner: Thawing open bag of chopped green chile.

Violation: Hands Clean & Properly Washed**• When to Wash**

- Food employees must clean their hands and exposed arms before food preparation, including working with exposed food, clean equipment, and unwrapped items. This includes after touching bare human body parts, using the toilet room, caring for service and aquatic animals, coughing, sneezing, using tobacco products, eating, drinking, handling soiled equipment or utensils, removing soil and contamination during food preparation, switching between raw and ready-to-eat food, and donning gloves. Employees must wash their hands after any activity which may result in contamination of the hands.
Instructed food employee to wash and sanitize hands, and PIC to retrain employees on when handwashing is required.
Observed food employee not wash hands when required. Condition: Donning new gloved and switching tasks

Violation: Records**• Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: Cooked scrambled eggs
Activity of the Food: Hot holding

• Calibration Logs

- Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment
Observed the food establishment does not have calibration logs for temperature measuring devices.

SANDIA LEARNING CENTER - 2433 CHELWOOD PARK BLVD NE - Conditional Approved**SANDIA LEARNING CENTER - 2433 CHELWOOD PARK BLVD NE****Food Establishment Class C****Date: 07/31/2026 - #: RT-FOODEST-019317-2025 - Inspection Result: Conditional Approved****Violation: Equipment, Food Contact Surfaces, and Utensils Clean****• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.
Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Can opener Location: Kitchen area by stove Condition of the Location: Dried food debris on blade of can opener

Violation: Training Records

• **Certified Food Protection Manager**

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Food Identification, Safe, Unadulterated and Honestly Presented

• **Package Integrity**

- Food packages shall be in good condition and protect the integrity of the contents so that the food is not exposed to adulteration or potential contaminants. Instructed PIC to ensure all food with compromised packaging is not offered for sale and is segregated for return. OR PIC voluntarily discard food items in compromised packaging.
Observed food packaging not in good condition and failing to protect the integrity of the contents of the food from adulteration or potential contaminants. Packaged Food: Cans of Del monte Green Beans and Corn Location: Dry storage rack Condition: Heavily dented cans

• **Food Storage Containers Identified with Common Name of Food**

- Certain foods may be difficult to identify after they are removed from their original packaging. Consumers may be allergic to certain foods or ingredients or the mistaken use of food from labeled containers could result in chemical poisoning and may result in severe medical consequences. Working containers holding food or food ingredients that are removed from their original packages for use in the food establishment shall be identified with the common name of the food. Instructed PIC to label all containers.
Observed food that is not readily and unmistakably recognized removed from original packaging without proper labeling or identification. Working Container of Food: Sugar and flour Location: Bins on counter in kitchen

Violation: Food Separation

• **Packaged and Unpackaged Food-Separation, Packaging, and Segregation, Cross Contamination**

- It is important to separate foods in a ready-to-eat form from raw animal foods during storage, preparation, holding and display to prevent them from becoming contaminated by pathogens that may be present in or on the raw animal foods. Except when frozen or combined as ingredients; non-ready-to-eat raw animal foods must be separated from ready-to-eat raw animal foods such as molluscan shellfish or fish for sushi, or other raw ready to eat food, cooked ready-to-eat food, and fruits and vegetables prior to washing. Instructed PIC that the food not separated from the non-ready-to-eat raw animal food must not be used in the food operation or must be cooked to a temperature sufficient to act as a kill step for pathogens. Instructed PIC to store foods in a manner that protects ready-to-eat food from contamination.
Observed non-ready-to-eat raw animal food stored with ready-to-eat raw animal food without protection from contamination. Location: Upright cooler Food Item: Country Pride Raw Chicken Breast Tenders Condition: Raw Chicken breast tenders stored directly above Lettuce, berries and Celery

Violation: Records

• **Temperature Logs**

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported
Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All TCS food items Activity of the Food: stored

SANDIA LEARNING CENTER - 2433 CHELWOOD PARK BLVD NE

SATELLITE - 2300 CENTRAL AVE SE, A

Food Establishment Class D

Date: 07/31/2026 - #: PT0069848 - Inspection Result: Approved

Violation: Plumbing

• **Backflow Prevention, Air Gap**

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system. Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.
Observed an inadequate air gap at floor drain next to espresso machine.

Violation: Operations

• **Valid Permit**

- General Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.
Observed that the facility was operating with an expired permit.

Violation: Storage

• **Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing**

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become

contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized. Observed single-service coffee filters stored outside of the original packaging and not stored in a manner to prevent contamination.

Seemos Slices - 2300 CENTRAL AVE SE - Approved

Seemos Slices - 2300 CENTRAL AVE SE

Food Establishment Class C

Date: 07/28/2026 - #: RT-FOODEST-047678-2025 - Inspection Result: Approved

Violation: Poisonous and Toxic/Chemical Substances

• Identifying Information, Prominence-Original Containers

- When toxic or poisonous substances are purchased in bulk, it is common practice to divide the contents into working containers for use around the establishment. When working containers are not labeled, a risk of misuses or food contamination is created. Working containers used for storing poisonous or toxic materials such as cleaners and sanitizers taken from bulk supplies shall be clearly and individually identified with the common name of the material. Instructed PIC that the unlabeled containers and their contents must not be used in the operation of the food establishment unless it can be shown that there is an internal system where the contents are known and the containers can be labeled properly.

Observed working containers used for storing poisonous or toxic materials taken from bulk supplies not properly labeled or identified. Container Type: Spray bottle

Alleged Material: Chemical sanitizer

Violation: Training Records

• Food Handler Cards

- Food handler cards shall be kept by the Food Employee on their Person while working as a Food Employee or volunteer for a Food operation, or a copy shall be kept on file by the current employer and be made available for inspection by the Enforcement Authority. If trained through another approved method; records of the training shall be maintained for the duration of the Food Employee's employment. Instructed PIC to provide updated training records to EHD for review.

The PIC was unable to provide records of training or certification of food employees.

Violation: Storage

• Equipment, Utensils, Linens and Single-Service and Single-Use Articles Storing

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.

Observed cleaned single-service and single-use articles stored improperly. Single-service and single-use articles was not stored six (6) inches above the floor.

Single-service and single-use articles

Type: Unwrapped pizza boxes

Storage Method: Stored directly on the floor Location: Behind sales counter

Violation: Physical Facilities, Construction and Repair

• Repairing-Premises, Structures, Attachments, and Fixtures-Methods

- Poor repair and maintenance compromise the functionality of the physical facilities. This requirement is intended to ensure that the physical facilities are properly maintained in order to serve their intended purpose. Instructed PIC to contact repair personnel to have area of concern repaired so that it is able to serve their intended purpose properly

Observed the following areas of the facility in disrepair. Observed multiple screw holes and crevices in the walls in warewashing area, kitchen and mop closet, these where are from previous screws used to mount old fixtures particularly in mop closet.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items. Food Items: All hot and cold held temperature-controlled foods

Activity of the Food: Stored, thawed, cooled, received

SNAPDRAGON TEA - 115 HARVARD DR SE, 7 – Approved

SNAPDRAGON TEA - 115 HARVARD DR SE, 7

Food Establishment Class C

Date: 07/28/2026 - #: PT0158987 - Inspection Result: Approved

Violation: Plumbing

• Backflow Prevention, Air Gap

- During periods of extraordinary demand, drinking water systems may develop negative pressure in portions of the system. If a connection exists between the system and a source of contaminated water during times of negative pressure, contaminated water may be drawn into and foul the entire system.

Standing water in sinks, dipper wells, steam kettles, and other equipment may become contaminated with cleaning chemicals or food residue. To prevent the introduction of this liquid into the water supply through back siphonage, various means may be used. The water outlet of a drinking water system must not be installed so that it contacts water in sinks, equipment, or other fixtures that use water. Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an

air gap established to prevent backflow.

Observed an inadequate air gap at floor drain under three-compartment sink and rear ice machine that needs to be corrected.

SNAPDRAGON TEA - 115 HARVARD DR SE, 7

Food Processor Class C

Date: 07/28/2026 - #: PT0160820 - Inspection Result: Approved

Violation: Plumbing

Providing an air gap between the water supply outlet and the flood level rim of a plumbing fixture or equipment prevents contamination that may be caused by backflow. Instructed PIC to contact repair personnel to have an air gap established to prevent backflow.

Observed an inadequate air gap at floor drain under three-compartment sink and rear ice machine that needs to be corrected.

SONIC DRIVE IN - 280 98TH ST NW - Approved

SONIC DRIVE IN - 280 98TH ST NW

Food Establishment Class C

Date: 07/27/2026 - #: RT-FOODEST-023972-2025 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: pans and trays Location: holding and prepping areas Condition of the Location: Debris buildup on food holding areas

observed a heavy debris buildup of old food on trays and scoops in prep and food holding areas

Violation: Training Records

• Food Handler Cards

- Food Employees shall demonstrate their knowledge of safe Food handling practices through passing a test from a Food Handler Training Program, Approved by the Enforcement Authority, and possess a Valid Food Handler Card within thirty (30) days of employment in a Food Establishment unless the Food Employee is a Certified Food Protection Manager; the Food Employee does not prepare or handle TCS Food, provided that at a minimum, the Permit Holder assures the Food Employee complies with Part 16 of these rules; or The Food Employee is working as a Food Employee or volunteer of a Temporary Food Establishment or Charitable Food Provider, provided that at minimum, the Person In Charge is a Certified Food Protection Manager or has a Valid Food Handler Card. Instructed PIC to ensure that all food employees are properly trained in safe food handling practices.

Observed that food employees were not in possession of a food handler card or had been trained in another approved food safety course.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F. Location: prep top cold holding table Food Items: diced onions and pickles Temperature: containers of diced onions temping 46f, 46f, 49, and pickles 46f all disposed by pic at time of the inspection

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

observed multiple drinks in food contact surface areas instructed pic to have employees have drinks in a designated area

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris and to clean and sanitize.

Observed buildup and debris on the floors, and drive thru windows and entry doors had fingerprint marks and debris on the floors.

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located kitchen, prep and drive thru areas The surface was made out of Metal and plastic The condition of the surface had debris build upon the exterior of all equipment throughout the kitchen, prep and drive thru areas

STARBUCKS COFFEE 5588 - 11321 MONTGOMERY BLVD NE - Approved

STARBUCKS COFFEE 5588 - 11321 MONTGOMERY BLVD NE

Food Establishment Class C

Date: 07/27/2026 - #: PT0145982 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC corrected violation by remaking sanitizer solution

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Sanitizer pans under espresso machines Concentration: 50ppm and 100ppm

Violation: Personal Cleanliness

• **Prohibition-Jewelry**

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: Hair tie around wrist

• **Effectiveness-Hair Restraints**

- Hair can be both a direct and indirect vehicle of contamination. Food employees may contaminate their hands when they touch their hair. A hair restraint keeps dislodged hair from ending up in the food and may deter employees from touching their hair. Food employees must wear hair restraints such as hats, hair coverings or nets, beard restraints, and clothing that covers body hair, that are designed and worn to effectively keep their hair from contacting exposed food; clean equipment, utensils, and linens; and unwrapped single-service and single-use articles. Instructed PIC to retrain food employees on proper hair restraints.

Observed a food employee without proper hair restraints. Location: behind front counter Activity: Actively working with open food items

Violation: Physical Facilities, Cleaning

• **Cleaning, Frequency and Restrictions**

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris on Floors and to clean and sanitize floors

Observed buildup and debris on the floors under and around equipment

STARBUCKS CORP - 2801 EUBANK BLVD NE - Approved

STARBUCKS CORP - 2801 EUBANK BLVD NE

Food Establishment Class C

Date: 07/28/2026 - #: PT0066000 - Inspection Result: Approved

Violation: Operation and Maintenance

• **Hand Drying Provision**

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Hand washing sink in back of facility

Violation: Operations

• **Permit Posted**

- Instructed PIC that the permit to operate must be posted in a conspicuous place on the premises of the Food Establishment and made available for examination by the Enforcement Authority. PIC had valid permit stored in a file.

Observed that no food permit was posted at the facility.

Sundowner Hospitality, LLC DBA Hilton Garden Inn & Homewood Suites - 222 CENTRAL AVE SW - Approved

Sundowner Hospitality, LLC DBA Hilton Garden Inn & Homewood Suites

222 CENTRAL AVE SW Food Establishment Class B

Date: 07/28/2026 - #: RT-FOODEST-071367-2026 - Inspection Result: Approved

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
- Observed that the food establishment does not have a certified food protection manager on staff.

SUSHI AND SAKE LLC - 4214 CENTRAL AVE SE - Approved

SUSHI AND SAKE LLC - 4214 CENTRAL AVE SE

Food Establishment Class D

Date: 07/30/2026 - #: CAC-Food-072277-2026 - Inspection Result: Approved

Facility has been upgraded to Approved status following submission of photographic evidence of corrected violations to the Environmental Health Department.

- Manual and Mechanical Warewashing Equipment, Chemical Sanitization Temperature, pH, Concentration and Hardness (Warewashing machine corrected)
- Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch (Food contact surfaces cleaned and sanitized)
- System Maintained in Good Repair (three-compartment sink faucet repaired)
- Cleaning, Frequency and Restrictions (Kitchen floors/walls/drains cleaned throughout facility)

Tanoan Kava - 2500 12th St NW Bldg. E Suite 4 ST NW, 4 - Approved

Tanoan Kava - 2500 12th St NW Bldg. E Suite 4 ST NW, 4

Food Establishment Class A

Date: 07/30/2026 - #: RT-FOODEST-037871-2026 - Inspection Result: Approved

Violation: Pest Control

• Controlling Pests, Inspection/Harborage

- Insects and other pests are capable of transmitting disease to humans by contaminating food and food-contact surfaces. Effective measures must be taken to eliminate their presence in food establishments. The premises shall be maintained free of insects, rodents, and other pests. The presence of insects, rodents, and other pests shall be controlled to eliminate their presence on the premises by routinely inspecting incoming shipments of food and supplies, routinely inspecting the premises for evidence of pests, and eliminating harborage conditions. Instructed PIC to provide EHD with their standard operating procedures and pest control plan.

Observed the facility has inadequate procedures to effectively control pests. Current Policy: Facility has no pest control method in place.

• Removing Dead or Trapped Birds, Insects, Rodents and other Pest

- Dead or trapped birds, insects, rodents, and other pests shall be removed from control devices and the premises at a frequency that prevents their accumulation, decomposition, or the attraction of pests. Instructed PIC that traps must be checked regularly and pests removed when possible or traps replaced when removal is not feasible for the trap type. Instructed PIC that the overfull traps observed must be replaced or emptied and reset.

Observed pests allowed to accumulate in traps.

Location: Near bar cash register and east wall behind upright cooler Pest Type: Cockroach

Pest Condition: Dead

Number of Pests Present: Three (3)

Violation: Knowledgeable

• Knowledgeable Person In Charge

- A designated person in charge that is knowledgeable about foodborne disease prevention, the Food Code, and local ordinance requirements is prepared to recognize conditions that may contribute to foodborne illness or that otherwise fail to comply with food safety regulations and is authorized to take appropriate preventive and corrective actions. The person in charge may demonstrate knowledge by having no priority violations, being a certified food protection manager, responding correctly to an inspector's questions as they relate to specific food operations. Instructed PIC that additional food safety training is required in the areas that deficiency was shown.

Observed that the person in charge was unable to demonstrate knowledge of foodborne disease prevention and other requirements of the Food Code and local ordinances.

Knowledge Tested: PIC did not know what type of sanitizer is being utilized in facility. PIC also did not know where the sanitizer test strips are stored in between uses.

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.
- Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purpose such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purpose other than handwashing.

Observed handwashing sink used for purpose other than handwashing. Location: Hand wash station located near cash register and bar area Manner: Storing soiled wiping cloth

Tokyo Hana Hibachi and Sushi Bar - 10001 COORS BLVD NW - Unsatisfactory Re-Inspection required

Tokyo Hana Hibachi and Sushi Bar - 10001 COORS BLVD NW

Food Establishment Class C

Date: 07/30/2026 - #: RT-FOODEST-063066-2025 - Inspection Result: Unsatisfactory Re-Inspection required

Complaint

This inspection is the result of a citizen complaint that was substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for sanitizer utilized it must be at the manufacturer specified concentration and temperature range with a contact time of 30 seconds. Instructed PIC remake a new batch of sanitizer at 50 PPM at 89 °F,

Observed chlorine solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization. Location: Drinks service station. Concentration: 0 PPM

Temperature: 72 degrees.

Observed interior of the ice machine with a brown and black soil buildup on the interior of the ceiling around the ice chute.

Violation: Hot Holding & Reheating

• Time/Temperature Control for Safety Food, Hot Holding

- Instructed PIC to reheat the time/temperature control for safety foods in the microwave in the following manner: reheated so that all parts of the food reach a temperature of at least 165°F and the food is rotated or stirred, covered, and allowed to stand covered for 2 minutes after reheating. Instructed PIC to retrain food employees on the proper method of reheating food.

Observed time/temperature control for safety food reheated in microwave incorrectly for hot holding. Food Item: Miso soup- 133.1, unknow dark soup- 80.7 degrees, unknown dark sauce.

Violation: Training Records

• Food Handler Cards

- Food handler cards shall be kept by the Food Employee on their Person while working as a Food Employee or volunteer for a Food operation, or a copy shall be kept on file by the current employer and be made available for inspection by the Enforcement Authority. If trained through another approved method; records of the training shall be maintained for the duration of the Food Employee s employment. Instructed PIC to provide updated training records to EHD for review
The PIC was unable to provide records of training or certification of food employees.

Violation: Ventilation and Hood Systems

• Ventilation Hood Systems, Drip Prevention and Adequacy

- Ventilation hood systems and devices must be sufficient in number and capacity to and designed to prevent grease or condensation from collecting on walls and ceilings and from draining or dripping onto food, equipment, utensils, linens, and single-service/single-use articles. Instructed PIC to make repairs to ventilation hood system to accumulation and to prevent contamination of food or food contact surfaces.

Observed hood ventilation system inadequately collecting grease and condensation allowing for accumulation and drips to occur. Condition: dripping when preparing foods.

• Heating, Ventilation, Air Conditioning System Vents

- Heating, ventilating, and air conditioning systems shall be designed, installed, and maintained so that make-up air intake and exhaust vents do not cause contamination of food, contact surfaces, equipment, or utensils

Observed heating and air conditioning system vents not properly designed and located to be easily cleanable. Location: Kitchen cooking prep areas.

Manner: Return and air-conditioning vents with substantial buildup and debris.

Violation: Physical Facilities

• Outer Openings, Protected

- The presence of insects and rodents is minimized by protecting outer openings to the food establishment. Outer openings of a food establishment shall be protected against the entry of insects and rodents by having solid, self-closing, tight-fitting doors. Instructed PIC to repair or replace the doors so that they are solid, self-closing, and tight-fitting. Light should not be seen through the door when closed. Self-closing doors are not required when they are exit doors that are solid and tight-fitting, designated as an emergency exit, or have limited use

Observed doors to the outside that are not self-closing and receiving door propped open with a broom.

Violation: Cold Holding

• Time/Temperature Control for Safety Food, Cold Holding

- Maintaining TCS foods under the cold temperature control requirements prescribed in this code will limit the growth of pathogens that may be present in or on the food and may help prevent foodborne illness. Instructed PIC to rapidly chill food to below 41°F as measured by a calibrated thermometer.

Observed food items in cold holding unit measuring above 41°F.

Location: Reach in refrigerator Beef-45.6, Ribeye beef- 44.4, Chopped garlic 61 degrees, Sliced ginger- 62.4, chunks of raw beef- 57.9 degrees. chicken pieces- 60.09

Violation: Operation and Maintenance

• Hand Drying Provision

- Hand drying provisions must be provided for hand drying so that employees will not dry their hands on their clothing or other unclean materials which could re-contaminate hands. Each handwashing sink or group of 2 adjacent handwashing sinks shall be provided with: (A) individual, disposable towels (B) a continuous towel system that supplies the user with a clean towel (C) a heater-air hand drying device or (D) a hand drying device that employs an air-knife system that delivers high velocity, pressurized air at ambient temperatures. Instructed PIC to provide and ensure that hand drying provisions are available for

each handwashing sink.

Observed no approved method of hand drying at handwashing sink(s). Location: Hand wash station where drink station is located.

Violation: Lighting

• Intensity-Lighting

- Instructed PIC to replace or repair lighting to permit the conducting of operations safely, and thorough cleaning.

Observed inadequate amount of lighting.

Location: Cooking area, both prep area and storage areas. Manner: Several lightings burned out.

Violation: Physical Facilities, Cleaning

• Cleaning, Frequency and Restrictions

- Cleaning of the physical facilities is an important measure in ensuring the protection and sanitary preparation of food. A regular cleaning schedule should be established and followed to maintain the facility in a clean and sanitary manner. Primary cleaning should be done at times when foods are in protected storage and when food is not being served or prepared. Instructed person in charge to remove buildup and debris.

Observed buildup and debris on the floor's kitchen, drink stations prep areas, storage areas. side of and under food equipment prep tables sinks, storage racks.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- During pauses in food preparation or dispensing, food preparation and dispensing utensils shall be stored: (A) In the food with their handles above the top of the food and the container; (B) In food that is not time/temperature control for safety food with their handles above the top of the food within containers or equipment that can be closed, such as bins of sugar, flour, or cinnamon; (C) On a clean portion of the food preparation table or cooking equipment only if the in-use utensil and the food-contact surface of the food preparation table or cooking equipment are cleaned and sanitized at a frequency specified under 4-602.11 and 4-702.11; (D) In running water of sufficient velocity to flush particulates to the drain, if used with moist food such as ice cream or mashed potatoes; (E) In a clean, protected location if the utensils, such as ice scoops, are used only with a food that is not time/temperature control for safety food; or (F) In a container of water if the water is maintained at a temperature of at least 57oC (135oF) and the container is cleaned at a frequency specified under Subparagraph 4-602.11(D)(7). Educated and informed PIC on how to properly store utensils.

Observed utensils during a pause in use stored incorrectly. Utensil was not stored on a clean and sanitized portion of the equipment. Utensil Type: Tongs.

Location: Cooking area.

Tongs were used for food items that were being cooked in Wok, and was also used to pull drain grid up to allow grey water flow into the drain.

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located Kitchen and drink station. The surface was made out of stainless steel

The condition of the surface food equipment such as rice steamer holder prep tables, refrigerators soda dispensers on bottom.

Violation: Records

• Temperature Logs

- TCS Foods must be kept at safe temperatures at all times and Food Establishments shall maintain adequate temperature logs of TCS Foods while being stored, thawed, cooled, prepared, displayed, dispensed, or transported

Observed that the food establishment does not have temperature logs available for TCS foods items

. Food Items: Rice, Miso soup, beef, chicken, shrimp, cut veggies. without logs also for cooling TCS food items.

• Calibration Logs

- General Food Establishments shall calibrate measuring equipment in accordance with the manufacturer recommendations and shall maintain adequate and contemporaneous calibration logs for calibration of equipment

Observed the food establishment does not have calibration logs for temperature measuring devices.

VILLAGE INN RESTAURANT - 2340 YALE BLVD SE - Approved

VILLAGE INN RESTAURANT - 2340 YALE BLVD SE

Food Establishment Class C

Date: 07/27/2026 - #: PT0155983 - Inspection Result: Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Produce chopped, ice machine, syrup bottles, knives and knife magnet

Location: Kitchen and clean dish storage rack

Condition of the Location: Soiled with food debris and residue

Violation: Pest Control

• Insect Control Devices, Design and Installation

- Exposed food and food-contact surfaces must be protected from contamination by insects or insect parts. Installation of the device over food preparation areas or in close proximity to exposed food and/or food-contact surfaces could allow dead insects and/or insect parts to be impelled by the electric charge, fall, or be blown from the device onto food or food-contact surfaces. Insect control devices are not allowed to be installed above food preparation areas.

Instructed PIC to move the device and to clean and sanitize the food preparation area that was under the device.

Observed insect control device installed over a food preparation area. Location: Prep table next to large mixer Type of Device: Blue light flying insect trap

Violation: Maintenance and Operation

• Good Repair and Proper Adjustment-Equipment

- Proper maintenance of equipment to manufacturer specifications helps ensure that it will continue to operate as designed. Failure to properly maintain equipment could lead to violations that place the health of the consumer at risk. Equipment and its components shall be maintained in a state of repair Instructed PIC to repair or replace equipment or components.

Observed equipment components not maintained. Location: Walk in freezer

Type of equipment: Freezer door / frame

Condition of component: Bottom door seals or possible heater in door frame are not working as intended and a large amount of frost buildup is forming on the floor.

Violation: Plumbing

• System Maintained in Good Repair, Repaired According to Law

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed south side hand washing sink is not maintained in good repair or is not repaired by law. Observed hand washing sink found in disrepair by not being free flowing. Sink is full of backed up water and is also leaking along the bottom.

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements.

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Active food handling of uncovered foods Inappropriate Jewelry

Observed: Wrist jewelry

Violation: Surface Not Clean

• Nonfood Contact Surfaces - Cleaning Frequency

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on cook line equipment such as reach in coolers, fryers, grill tops, stove exterior body and caster wheels. The surface was made out of stainless steel. The condition of the surface was soiled with heavy grease and food residue.

Violation: Physical Facilities, Construction and Repair

• Floors, Walls and Ceilings-Cleanability

- When cleaning is accomplished by spraying or flushing, coving and sealing of the floor/wall junctures is required to provide a surface that is conducive to water flushing. Grading of the floor to drain allows liquid wastes to be quickly carried away, thereby preventing pooling which could attract pests such as insects and rodents or contribute to problems with certain pathogens such as *Listeria monocytogenes*.

Observed floor tiles and grout to be significantly worn and damaged causing water and grease to pool and also does not allow for proper cleaning and flushing.

Retail Food Establishment Class 5

Date: 07/31/2026 - #: RT-RET-006480-2026 - Inspection Result: Approved

Complaint

This inspection is the result of a citizen complaint that was substantiated.

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed utensil food-contact surface with the buildup of soil residues. Utensil Type: Chef Knives Location: Knife rack on wall next to three-compartment sink
Condition of the Location: Dried food debris on chef knife blade

Violation: Hot Holding & Reheating

• **Time/Temperature Control for Safety Food, Hot Holding**

- If food is held at improper temperatures for enough time, pathogens have the opportunity to multiply to dangerous numbers. Instructed PIC to rapidly reheat TCS foods to 165 F and to maintain temperature at 135 F and above.

Observed time/temperature control for safety food not hot held at 135°F or above.

Food Item: Sauced Fried Chicken bites 121°F, Sauced Fried Chicken bites 132°F, Fried Cheese poppers 111°F

Manual and Mechanical Ware washing Equipment, Chemical Sanitization Temperature, pH, Concentration and Hardness-PIC corrected violation by remaking sanitizer solution.

Due to corrections made by pic facility is back into the green approved status

WENDYS - 1012 JUAN TABO BLVD NE

Food Establishment Class C

Date: 07/27/2026 - #: PT0155731 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• **Manual and Mechanical Warewashing Equipment, Chemical Sanitization-Temperature, pH, Concentration and Hardness**

- The effectiveness of chemical sanitizers can be directly affected various factors including by the temperature, and concentration of the sanitizer solution used. Sanitizers shall be used in accordance with the EPA-registered label use instructions, and shall be used within designated parameters. Instructed PIC that for quaternary ammonium compound solution at a concentration range of allowed by the manufacturer must also be at a minimum temperature of 75F with a contact time of 30 seconds. PIC corrected violation by Remaking sanitizer solution

Observed quaternary ammonium compound solution utilized to sanitize food contact surfaces failing to meet parameters to adequately achieve sanitization.

Location: Three-compartment sink Concentration: 50 ppm

• **Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch**

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine Location: Back of kitchen Condition of the Location: brown buildup on inside of ice machine

Violation: Plumbing

• **System Maintained in Good Repair, Repaired According to Law**

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of ware washing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Plumbing for three-compartment sink is not maintained in good repair or is not repaired by law. Observed Three-compartment sink piping found in disrepair by not pipe not connected and draining grey water directly on to the floor beneath

Violation: Storage

• **Equipment and Utensils, Air-Drying Required**

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: not air dried and stacked wet

Violation: Surface Not Clean

• **Nonfood Contact Surfaces - Cleaning Frequency**

- Nonfood contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on nonfood contact surfaces may provide a suitable environment for the growth of microorganisms which employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface.

Observed nonfood contact surface with the buildup of soil residues. The surface was located on the fryers and hood system lights The condition of the surface was heavy grease buildup on outside of fryer and lights under hood system

Using a Handwashing Sink-Operation and Maintenance- PIC corrected violation on site by cleaning and sanitizing handwashing sink and retraining employees on usage

Valid Permit- PIC corrected violation on site by paying permit at time of inspection Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch- PIC corrected violation on site by cleaning and sanitizing all food contact surfaces

Due to correction made facility is back into the green approved status

WRAP N ROLL - 121 EUBANK BLVD NE, B

Food Establishment Class C

Date: 07/28/2026 - #: PT0160341 - Inspection Result: Conditional Approved

Violation: Equipment, Food Contact Surfaces, and Utensils Clean

• Equipment, Food-Contact Surfaces and Utensils - Clean to Sight and Touch

- Food-contact surfaces of equipment shall be cleaned at a frequency to prevent the buildup of soil residues. The presence of food debris or dirt on food contact surfaces may inhibit the ability to sanitize and provide a suitable environment for the growth of microorganisms which food employees may inadvertently transfer to food. If these areas are not kept clean, they may also provide harborage for insects, rodents, and other pests. Instructed PIC to create a cleaning schedule and to clean the surface. Reminded PIC that requirements food-contact surfaces must be cleaned include: with each different type of raw animal food unless following the succession of cook temperatures, when changing from raw foods to ready-to-eat foods, between raw fruits and vegetables and with time/temperature control for safety foods (TCS), before using or storing food temperature measuring devices, at any time it may have been contaminated and if used with TCS foods every 4 hours.

Observed equipment food-contact surface with the buildup of soil residues. Equipment Type: Ice machine, can opener and slicer Location: Back of kitchen Condition of the Location: Brown buildup on inside of ice machine. Dried food and soil debris on Can opener blade and slicer

Violation: Use Limitations

• Wiping Cloths, Use Limitation

- Wiping cloths should be stored in a sanitizer solution to prevent pathogens from transferring to food. Change the sanitizer solution as needed to maintain proper concentration and avoid over-accumulation of organic material. Regular chemical test kits can ensure proper sanitizer concentration. While wiping down surfaces with reusable wet cloths is acceptable, it doesn't meet the requirements for cleaning and sanitizing food contact surfaces. Dry cloths and disposable towels are acceptable for situations where full cleaning isn't needed. To effectively clean and sanitize food contact surfaces, remove organic material with detergents or cleaners, then apply a sanitizing solution of appropriate temperature and chemical concentration. The solution should stay on the surface for a specific contact time and follow the manufacturer's EPA-registered label. Instructed PIC to retrain employees on wiping cloths use requirements and restrictions and to discontinue misuse of wiping cloths.

Observed wiping cloths improperly used. Observed soiled wiping cloths stored on prep tables and cutting boards

Violation: Plumbing

• System Maintained in Good Repair

- Improper repair or maintenance of any portion of the plumbing system may result in potential health hazards such as cross connections, backflow, or leakage. These conditions may result in the contamination of food, equipment, utensils, linens, or single-service or single-use articles. Improper repair or maintenance may result in the creation of obnoxious odors or nuisances, and may also adversely affect the operation of warewashing equipment or other equipment which depends on sufficient volume and pressure to perform its intended functions.

Observed Pipe for ice bin is not maintained in good repair or is not repaired by law. Observed Ice bin found in disrepair by draining fresh ice water into bucket on floor. Instructed pic to install piping to floor drain so that it can drain properly

Violation: Training Records

• Certified Food Protection Manager

- All Food Establishments shall have at least one Certified Food Protection Manager. Instructed PIC that the permit holder must designate an employee to be certified as a food protection manager. The facility must provide a certificate to EHD to have on file.

Observed that the food establishment does not have a certified food protection manager on staff.

Violation: Storage

• Food Storage-Preventing Contamination from the Premises

- Food must be protected from contamination of splashing water, chemical, or other foods; dust; and other contaminants. Instructed PIC to have food protected in containers/wrapping and not to store food in those areas unless the source of contamination can be mediated another way.

Observed food stored improperly where it was exposed to contamination from splash, dust, or other contamination. Location: boba tea station Food Item: boba tea toppings in prep top cooler Condition: Handwashing sink next to prep top cooler does not have a splash guard. Observed splashed water on side of prep top cooler

Violation: Designated Areas

• Designated Areas-Employee Accommodations for eating/drinking/smoking

- Employees could introduce pathogens to food by hand-to-mouth-to-food contact areas. Instructed PIC to create a designated to accommodate employees' personal which food, food equipment and utensils, clean linens, and single-service and single-use articles must not be in jeopardy of contamination from these areas.

Observed facility did not provide a designated area for employees to eat, drink, or use tobacco products.

• Designation-Dressing Areas and Lockers

- Personal belongings can contaminate food, food equipment, and food-contact surfaces. Proper storage facilities are required for articles such as purses, coats, shoes, and personal medications. Instructed PIC to create an area designated for personal belongings in which food, food equipment and utensils, clean linens,

and single-service and single-use articles are not be in jeopardy of contamination from these areas.

Observed facility did not provide lockers or other suitable facilities for storage of employees clothing or other personal belongings.

Violation: Operation and Maintenance

• Using a Handwashing Sink-Operation and Maintenance

- Handwashing facilities can become sources of contamination if the sinks used for other purpose such as for food preparation and warewashing. Instructed PIC to train food employees that handwashing facilities can be utilized for no other purpose other than handwashing.

Observed handwashing sink used for purpose other than handwashing. Location: handwashing sink by boba tea station Manner: Lots of food debris in basin of sink at time of inspection. Also observed employee rinsing out dishes in sink

Violation: Personal Cleanliness

• Prohibition-Jewelry

- Items of jewelry such as rings, bracelets, and watches may collect soil and the construction of the jewelry may hinder routine cleaning. As a result, the jewelry may act as a reservoir of pathogenic organisms transmissible through food. An additional hazard associated with jewelry is the possibility that pieces of the item or the whole item itself may fall into the food being prepared. Hard foreign objects in food may cause medical problems for consumers, such as chipped and/or broken teeth and internal cuts and lesions. Except for a plain ring such as a wedding band, while preparing food, food employees may not wear jewelry including medical information jewelry on their arms and hands. Instructed PIC to retrain employees on personal cleanliness requirements

Observed employee wearing unapproved jewelry while preparing food. Food Preparation Activity: Actively working with open food items Inappropriate Jewelry Observed: wrist watches and bracelets

Violation: Operations

• Valid Permit

- Instructed the PIC that no person is allowed to operate a Food Establishment in the City without a valid permit to operate issued by the Enforcement Authority for that Food Establishment. Provided a 5-Day notice of nonpayment and the outstanding invoice(s) that must be paid to receive a valid permit.

Observed that the facility was operating with an expired permit.

Violation: Consumer Advisories

• Allergen Warning, Unpackaged Food

- Unintended food allergen food allergen exposures pose a serious risk to consumers with food allergies. Consumers with food allergies depend on allergen information, written notification of the presence of major food allergens as an ingredient in unpackaged foods that are served or sold by the food establishment must be provided. Written notification can be provided in many forms such as: physical or electronic means, including, but not limited to, brochures, deli case or menu notifications, label statements, table tents, placards, or other effective written means. Notifying the consumer to the presence of major food allergens may prevent an inadvertent exposure. Instructed PIC to provide written notification of major allergen information for all unpackaged food offered for sale or served to consumers.

Observed no written notification of the presence of major food allergens for unpackaged food served or sold to consumers.

Violation: Storage

• In-Use Utensils, Between-Use Storage

- Clean equipment and multiuse utensils which have been cleaned and sanitized, laundered linens, and single-service and single-use articles can become contaminated before their intended use in a variety of ways such as through water leakage, pest infestation, or other insanitary condition. Clean equipment, utensils, linens, and single-service and single-use articles must be stored in a clean, dry location, protected from contamination, and at least six (6) inches above the floor. Equipment and utensils must be stored so that they are in a self-draining and inverted position or are covered. Single-service and single-use articles should be kept in the original packaging until use. Instructed PIC to store items so that the risk of contamination prior to use is minimized.

Observed cleaned utensils stored improperly. Utensils were not stored in a clean, dry location. Utensil Type: Paring knives Location: Back kitchen prep area Condition of the Location: knives stored in between wall and prep table

• Equipment and Utensils, Air-Drying Required

- Items must be allowed to drain and to air-dry before being stacked or stored. Stacking wet items such as pans prevents them from drying and may allow an environment where microorganisms can begin to grow. Instructed PIC to allow items to be air-dried, and to retrain staff on preventing wet stacking.

Observed equipment was not air dried and was wet stacked. Location: Ware washing area Equipment Type: Food service pans Manner: Not air dried and stacked wet
